About the Contributors

Murray E. Jennex is an associate professor at San Diego State University, editor in chief of the International Journal of Knowledge Management, editor in chief of Idea Group Publishing’s Knowledge Management book series, co-editor in chief of the International Journal of Information Systems for Crisis Response and Management, and president of the Foundation for Knowledge Management (LLC). Dr. Jennex specializes in knowledge management, system analysis and design, IS security, e-commerce, and organizational effectiveness. Dr. Jennex serves as the Knowledge Management Systems Track co-chair at the Hawaii International Conference on System Sciences. He is the author of over 100 journal articles, book chapters, and conference proceedings on knowledge management, end user computing, international information systems, organizational memory systems, ecommerce, security, and software outsourcing. He holds a BA in chemistry and physics from William Jewell College, an MBA and an MS in software engineering from National University, an MS in telecommunications management and a PhD in information systems from the Claremont Graduate University. Dr. Jennex is also a registered professional mechanical engineer in the state of California and a Certified Information Systems Security Professional (CISSP).

********

Urooj Quezon Amjad spends her days thinking about ways to identify innovation and capitalize on organisational learning with her team at Building Partnerships for Development in Water and Sanitation. Based in London, and working on most continents, Urooj uses her background in political science, urban planning, and water management to rethink assumptions about institutional relationships that could assist low-income communities in accessing safe water and sanitation. When she is not brokering projects to apply tools for enhancing water partnerships in the South Pacific, she can be found writing technical briefs on water affordability or facilitating meetings on water conflict, or gender. Urooj is originally from the US and moved to the UK 8 years ago for doctoral research at the School of Oriental and African Studies, at the University of London.

Alexandre Ardichvili is associate professor at the department of Work and Human Resource Education at the University of Minnesota. He holds PhD in Human Resource Development and MBA from the University of Minnesota, and PhD in management from the University of Moscow. Alexandre has published more than 40 peer-reviewed articles and book chapters in the areas of human resource devel-

Derek Ajesam Asoh, PhD is an assistant professor in the School of Information Systems and Applied Technologies, College of Applied Sciences and Arts, Southern Illinois University Carbondale. He holds a PhD in Information Science (inter-disciplinary) from the University at Albany (SUNY) New York. His research interests include data mining, educational technologies, entrepreneurship, health informatics, knowledge management, systems management technologies, and statistical modeling. His publications have appeared in *Health Care Management Review* and *Methods of Information in Medicine*. His research has also been presented at several conferences including Hawaii International Conference on Systems Sciences, Information Resources Management Association, Organizational Systems Research Association, and Systemic, Cybernetics and Informatics. Dr. Asoh currently teaches application development environments, computing in business administration, and database processing. His industry experiences include working as consultant and project coordinator for a number of international organizations, including the United Nations Office for Project Services, United Nations Development Program, and United Nations Economic Commission for Africa.

Gilles Balmisse is associate director at KnowledgeConsult, a consulting firm specialized in knowledge management and competitive intelligence implementation. Gilles started his career with an international banking group working on the implementation of knowledge management and competitive intelligence systems. Gilles is the author of three books and several publications on knowledge management tools and enterprise search. He also teaches courses in knowledge management at various business schools in France and Switzerland. Gilles Balmisse graduated from Ecole Supérieur d’Electricité as an IT engineer.

Anne Beaudry, PhD, is an associate-professor of MIS at the John Molson School of Business, Concordia University. She obtained her PhD from HEC-Montreal. Her work has been published in *MIS Quarterly*, Communications of the AIS, and the *International Journal of Information and Operations Management Education* as well as in national and international conference proceedings. Her research interests focus on IT-induced behaviors and on individual and organizational impacts of IT implementation and use.

Salvatore Belardo, PhD, is associate professor of Management Science and Information Systems at the University at Albany. He holds a bachelor’s degree in mechanical engineering and MBA, Masters, and PhD in Management Information Systems. professor Belardo has been a visiting professor at the Copenhagen School of Business, the University of Passau (Germany), University of Del Salvador (Argentina), DUXX Graduate School of Business Leadership (Mexico), and Zurich Graduate School of Business Administration (Switzerland). He has published in Management Science, Decision Sciences, IEEE Transactions on Systems Man and Cybernetics, and the Journal of Management Information Systems; and has been recognized as one of the most prolific authors of decision support systems-related research. Interfaces Journal has recognized him as one of the top ten most cited authors. Dr. Belardo edited *Simulation in Business and Management*, and is co-author of *Trust: The Key to Change in the Information Age*, and *Innovation Through Learning: What Leaders Need to Know in the 21st Century*. 
Isabelle Bourdon is lecturer in Information Systems at the Ecole polytechnique Universitaire of University Montpellier 2, in France, where she teaches graduate courses in management of Information system, knowledge management and customer relationship management. She is graduating with a PhD in business (management information systems). Her current research interests include knowledge management, human resource management and organizational support of Information technology. She is engaged in analyzing the use of Knowledge management system with an emphasis on the support of knowledge management and develops work on communities of practices.

Charlie C. Chen is an assistant professor in the Department of Computer Information Systems at Appalachian State University. He received his PhD in management information systems from Claremont Graduate University in 2003. He has authored more than 40 referred articles and proceedings, presented at many professional conferences and venues. Dr. Chen has published in journals such as Communications of the AIS, Journal of Knowledge Management Research Practice, and Journal of Information Systems Education. He has reviewed papers for MISQ journal, and HICSS, AMCIS and DSI conferences. Dr. Chen is also a certified Project Management Professional (PMP). Dr. Chen likes to view the field of management information systems from infrastructural, managerial and operational perspectives. He is working on improving information system solutions in each of these three areas. His current main research areas are online learning, mobile commerce, and supply chain technology.

Zhi-Kai Chen received his Bachelor of Science degree in Electrical and Control Engineering from National Chiao Tung University in 1997, MBA from Soochow University in 2002, and Master of Science degree in Management Information Systems from the University of Arizona, Tucson in 2004. He was a research assistant in the Artificial Intelligence Laboratory at the University of Arizona. His research interests include knowledge management, text mining and data mining. Currently, he is a product manager in the IT industry.

Jakov (Yasha) Crnkovic, PhD is an associate professor and Chair of the ITM Department, University at Albany (SUNY), New York. He completed his education at the University at Belgrade, Yugoslavia. His post-doc activities were in CERN (Geneva, Switzerland) and Middlesex University (London, GB). Prior to joining SUNY, he was professor at the University of Miami, Florida, University at Belgrade (Yugoslavia), College of Saint Rose (Albany, New York). He was leading project manager and team member in many projects for The Traffic Research Institute and the Faculty of Economics Research Institute (Belgrade, Yugoslavia.) His research interests: DSS, OR/OM, Knowledge Management, BPM, and IT education. He has published over 30 journal papers, authored and co-authored 18 textbooks (in Serbian and English languages), published 15 chapters in various IS/IT books, and presented over 40 refereed conference papers. He is visiting professor, he participated in research projects and consulting activities in many countries.

David T. Croasdell is an associate professor of Information Systems at the University of Nevada, Reno. His research interests are in Distributed Knowledge Systems, Knowledge Networks, Knowledge Management and Computer Privacy and Security. Dave has published in the Information Systems Management Journal, the Communications of the Association of Information Systems, IS Frontiers, the Australian Journal of Information Systems and Annals of Cases on Information Technology. He is co-chair of the research track on Knowledge Management Systems for the Hawaii International Conference
on System Sciences. Before embarking on his academic career, Dr. Croasdell worked as a technical staff member at Los Alamos National Laboratory where he managed a computer based training laboratory and supervised computer assisted software engineering efforts across multiple local area networks. Dr. Croasdell can be reached by e-mail at davec@unr.edu

Anne-Marie Croteau, PhD, is associate professor of MIS at the John Molson School of Business at Concordia University. Professor Croteau’s research mainly focuses on the strategic management of information technology and the impact of information technology on business performance. Her research has been published in various journals such as Journal of Strategic Information Systems, Journal of Information Technology, Industrial Management & Data Systems, and Canadian Journal of Administrative Sciences as well as in various national and international conference proceedings.

Björn Decker is a solution engineer for semantics-enabled knowledge management services at emolis, part of avarto, a Bertelsman company, and a member of the Open Source Project Software Organization Platform. Björn was a project manager and scientist at the Fraunhofer Institute for Experimental Software Engineering (IESE) in Kaiserslautern. His interests include experience management in collaborative activities. Björn organizes and is PC member of different workshops and conferences in software engineering, semantic Wikis and experience management.

Lester A. Digman is the Harold J. Laipply college professor at the University of Nebraska, where he also serves as director of graduate studies in management. Dr. Digman specializes in strategic management, strategic decision making, international management, and management of technology. Dr. Digman has written sixteen books, made contributions to 15 others, and published 38 articles in journals such as the Harvard Business Review, Organizational Dynamics, and Operations Research. Dr. Digman has also written 100 conference proceedings papers, presented 138 professional papers, and authored 29 reports and monographs. He has consulted with numerous private and governmental organizations in North America, Asia, Western and Eastern Europe. Dr. Digman is a member of the Strategic Management Society, the Strategic Leadership Forum, the Academy of Management, the Decision Sciences Institute (charter member and fellow), the Institute for Operations Research and Management Sciences (founding member), the MBA Roundtable (charter member), the Pan Pacific Business Association (fellow), and others. He has served as program chair and president of the Midwest Decision Sciences Institute, coordinator of the International Institute’s Doctoral Student Consortium, chair of the Fellows’ Committee, and as vice president. He is listed in Who’s Who in America and seven other editions of Who’s Who.

Hans-Dieter Evers is professor of Development Planning and Senior Fellow, Center for Policy Research, University of Bonn. Until 2000 he was professor and Chairman, Sociology of Development Research Centre, University of Bielefeld, Germany. He received his D.Phil. degree from the University of Freiburg and subsequently taught sociology at Monash University (Australia) and at Yale University (USA), where he was also Director of Graduate Southeast Asia Studies. From 1971 to 74 he was professor of Sociology and Head of the Department of Sociology, University of Singapore. During 2002 to 2006 he held visiting appointments as professor of management in the Lee Kong Chian School of Business, Singapore Management University. He also served (among others) as consultant to ILO, UNESCO, the World Bank and KfW-German Development Bank. Currently he is engaged in research on social and cultural dimensions of knowledge based economies and the management of cultural diversity.
Raimund L. Feldmann received his MS degree (Diplom) in Computer Science with a minor in Economics from the University of Kaiserslautern, Germany in 1996. His research interests are focused on experience and knowledge repositories and SPI. From 1997 to 2003, Raimund was as an employee of the project “Development of Large Systems with Generic Methods”, funded by the German Science Foundation. Currently, Raimund is the technical lead for Knowledge & Experience Management at the Fraunhofer Center, Maryland (CESE). He is involved in the DoD Acquisition Best Practice Clearinghouse project, a web-based EF for providing Software Engineering and System Engineering best practices for government employees and contractors. Before he joined CESE, Raimund participated in several technology transfer projects in Germany. Among other projects, he was involved in developing the software-kompetenz.de portal (VSEK), funded by the Department of Education and Research of the German Federal Government, to offer up-to-date SE knowledge to Germany’s Small and Medium-Sized Enterprises. Contact him at rfeldmann@fc-md.umd.edu.

Albert L. Harris is a professor in the Department of Computer Information Systems at Appalachian State University and Editor-in-Chief of the Journal of Information Systems Education. He received his PhD in MIS from Georgia State University. He is a member of the board of directors of the International Association of Information Management (IAIM) and the Education Special Interest Group (EDSIG) of AITP. He has consulted for numerous private and public organizations. His research is focused on IS education, IS ethics, and international issues in IS. He has authored more than 85 referred articles and proceedings. He has published in Communications of the AIS, Information & Management, Journal of Information Systems Education, Journal of Computer Information Systems, International Journal of Technology and Human Interaction, Knowledge Management Research & Practice, Review of Business Information Systems, International Journal of Management, International Journal of Computer Applications in Technology, Journal of Management Consulting, Journal of Computer and Mathematics Education, and numerous national and international conferences.

Andrea Hornett, senior lecturer, Penn State Great Valley, teaches the capstone strategy courses in the standard MBA and the BioTech Healthcare option. She also teaches managing innovation and change, new venture development, and organizational behavior. She has a bachelor’s degree in economics and political science from Mount Holyoke College, a masters’ degree from the University of Pennsylvania in systems thinking, and a doctorate in organizational learning from the George Washington University. Her research focuses primarily on ethics and geographically distributed forms of organization and learning. She is published in a variety of peer-reviewed books and journals including the International
About the Contributors

Rahinah Ibrahim is associate professor and Deputy Dean of Research, Postgraduate Studies and International Affairs at the Faculty of Design and Architecture, University Putra Malaysia (UPM). She was a Ministry of Science, Technology and Innovation scholar who received her PhD degree in Construction Engineering and Management at Stanford University. A Masters of Architecture graduate from SCI-ARC, U.S.A., Rahinah has extensive project management and architectural practice experience in hospitality development and large-scaled residential projects before joining UPM. Rahinah is one of the patent-holders for Putra Block, a Gold Medal winner at the International Exhibition of Invention 2001 in Geneva; and an inventor for RASPER, an innovative spatial planning expert system. At Stanford University, she worked alongside renowned American scholars where she established the Discontinuity in Organizations theory for complex work processes. Her research focuses on developing theories and emerging computer-integrated applications for enhancing knowledge flows in complex integrated design and construction processes.

Paul Jackson has been an IT industry practitioner for over twenty years. He has managed development of large software systems in diverse application areas in Australia and Germany. He has consulted to industry and public service organizations in knowledge management, strategic IS planning, IS-business alignment and systems development. He joined Edith Cowan University in June 2002 as a lecturer in the School of MIS. He has a PhD in information systems development and his particular research interest is investigating knowledge and information management from philosophical, social and cognitive perspectives to improve outcomes.

Andreas Jedlitschka received his MS degree (Diplom) in Computer Science with a minor in economics from the University of Kaiserslautern in 1994. After working as an IT-consultant he joined Fraunhofer ISE in 2000. Currently, he is a senior scientist and project manager with the Fraunhofer ISE. After having acted as a business area manager in the area of software development he is now responsible for the coordination of Fraunhofer ISE European activities. His research interest is empirically based decision support. Mr. Jedlitschka authored several international journal articles, book chapters, and refereed conference papers, mainly on empirical software engineering. In addition, he is member of the several program committees of software engineering related conferences and acts as a reviewer for software engineering related journals. Andreas has co-founded and is the chair of the Workshop Series on Empirical Software Engineering. Additionally, he is a member of the German Computer Society (Gesellschaft für Informatik, GI) and ACM. He had leading roles in European projects under FP5, FP6, and currently FP7. Contact him at andreas.jedlitschka@iese.fraunhofer.de.

About the Contributors

Karlheinz Kautz, Dr philos is professor in Systems Development & Software Engineering at Department of Informatics at the Copenhagen Business School, Denmark where he has also served as Director of Studies for the course programme on Computer Science and Business Administration. Previously he has been employed as a senior researcher at the Norwegian Computing Center and as a lecturer at universities in Germany, Norway, England and Denmark. In 2005 he stayed at the University of new South Wales and Monash University as visiting professor. He is the chair of the IFIP TC8 WG 8.6 on Diffusion, Transfer, and Implementation of Information Technology. His research interests are in systems development and system development methodologies for advanced application areas, the diffusion and adoption of information technology innovations, the organizational impact of IT, knowledge management and software quality and process improvement. He has published in these areas in journals like Information and Software Technology, Information, Technology & People, the Scandinavian Journal of Information Systems, Software Process: Improvement and Practice, IEEE Software, Journal of Knowledge Management and is a member of ACM and IEEE.

Peter Keen works globally, as a professor, adviser to senior management in business and government organizations, author, executive educator, and public speaker. Named as one of the top 100 business “gurus” in the world - thought leaders with impact - in a 2003 survey, Peter is regularly ranked in the top ten consultants in the world in the information technology field. He was awarded an honorary doctoral degree by Marist College, USA, and Abo Akademi University, Finland, for his career-long “pioneering contributions and key theory work in the interface between information technology, management theory and the managerial use of information systems.” Peter visited the Wee Kim Wee School of Communication and Information at Nanyang Technological University in 2006 as a Visiting Shaw Foundation professor.

Annemette Kjærgaard, PhD, is assistant professor in IS & Organisation at the Department of Informatics at the Copenhagen Business School, Denmark, where she lectures in knowledge management, IT innovation processes and organisational development. Previously she has been employed in software development in industry in the UK and as a consultant in Denmark. Her research interests are adoption and use of IS with a special focus on organisational identity and managerial and organisational cognition. She has published at conferences like ICIS, RENT and EGOS and is currently working on publications for Omega and International Studies of Management in Organizations.

Kevin Laframboise, PhD, is an assistant professor of MIS at the John Molson School of Business at Concordia University, from which he obtained his PhD professor Laframboise’s research centers quality management and on enterprise information systems and the impact of these on business performance. His research has been published in Journal of Supply Chain Management, International Journal of Enterprise Information Systems and Leadership Quarterly. As well, his papers appear in international conference proceedings such as ECIS, EUROMA and DEXA.

Frank Land is Emeritus professor in the Information Systems and Innovation Group, Department of Management, London School of Economics (LSE). He started his career in IT in 1953 as a trainee programmer and systems analyst with the pioneering UK catering company J. Lyons and their LEO computer. In 1967 he was invited to join the LSE to establish teaching and research in systems analysis on a grant from the UK National Computing Centre. He has been Visiting professor at the Wharton School,
University of Sidney, University of Cairo, and the Indian Institute of Management amongst other. In 1996 he became professor of Information Management at the London Business School before returning to the LSE on his retirement. He has published numerous papers. In 2003 he received the LEO Award from the Association for Information Systems for his lifelong contribution to the field of IS.

**Sang M. Lee** is currently the university eminent scholar, regents distinguished professor, chair of the management department, and executive director of four research centers at the University of Nebraska-Lincoln. He is a renowned scholar in the fields of multiple-objective decision making, global business, and information systems management. His professional work has focused on global business strategies, information and communication technologies, knowledge management, and developmental economics. He is the author or co-author of 55 books, more than 250 journal articles, and over 1,000 original papers. He is a fellow of the Academy of Management, DSI, and Pan-Pacific Business Association. He has received many honors for his professional work, including four honorary degrees.

**Wei Li** holds PhD from the Graduate School of Library & Information Science at the University of Illinois at Urbana-Champaign and a Master Degree in Information Science from Beijing University. She is also a Certified Public Accountant (CPA) in China. Her research interests include knowledge management, cross-cultural knowledge sharing and international entrepreneurship. She has carried out extensive research on cross-cultural knowledge sharing among Chinese and American employees through online systems. Ms. Li has presented at multiple conferences and published peer-reviewed articles in both knowledge management and entrepreneurship.

**Benjamin Loh** is a PhD candidate in the Faculty of Social and Political Science at the University of Cambridge, and research fellow at the Cambridge-MIT Institute. He has held research positions at the National University of Singapore, Singapore Management University, and Institute of Southeast Asian Studies. His research interests are in knowledge governance and management, industrial cluster policies, change management in Asian firms, work and employment issues, and studies pertaining to economic and organizational sociology. His publications include articles in the Journal of Asian Business, the International Small Business, and ASEAN Economic Bulletin.

**Mantas Manovas**, MSc, is a native of Lithuania. After completing his MSc degree from Concordia University, he went on to establish and manage an online marketing firm that successfully serves the U.S. and Canadian market.

**Martin Maurer** is a PhD candidate at the Department of Human Resource Education at the University of Illinois. Prior to earning a Master’s degree in human resource education at the same institution, Maurer studied business administration at the Vienna University of Economics and Business Administration in Austria. His dissertation research focuses on group dynamics in a cross-functional health care team. Maurer has presented at several conferences and has co-authored an article which appeared in the Journal of Knowledge Management. Maurer is the Associate Director of the Markets Information Lab at the University of Illinois in the College of Business.

**Denis Meingan** worked for more than 20 years in the management consulting industry with firms such as Deloitte Consulting, Solving International, JMA Consultants and Syntegra. Denis managed
various assignments including R&D performance improvement and reorganization; purchasing and procurement, controlling and auditing; and design of information systems in international groups or medium size companies. He worked in a number of countries in Europe as well as in the United States and Japan. His work appears in Expansion Management Review, Informatique Professionnelle, La Lettre des Achats, La Cible, Qualitique, and other professional and academic French journals. Denis is now associate director at KnowledgeConsult, a consulting firm specialized in knowledge management and competitive intelligence implementation, and frequently teaches in management programs. Denis holds degrees and specializations in mathematics, management and marketing.

Thomas Menkhoff is currently Practice associate professor of Organizational Behaviour (OB) at the Lee Kong Chian School of Business, Singapore Management University (SMU). He received his doctoral degree (Dr rer soc) from the University of Bielefeld, Germany, and subsequently taught Sociology, OB and Business Management at Cologne University (Germany) and the National University of Singapore (Singapore). He also served (among others) as consultant to the German Agency of Technical Cooperation (GTZ), the Government of Malaysia, the Commonwealth Secretariat, Arthur D Little and various private sector firms. His current research activities focus on the socio-cultural dimensions of knowledge transfer in multi-cultural contexts.

Mirghani Mohamed is an assistant professor at the school of management, New York Institute of Technology (NYIT)-Bahrain campus, teaching information systems technology and Knowledge Management. Before joining NYIT, Drs. Mohamed was the Associate Director for Technology Operations and Engineering at The George Washington University in Washington, D.C., USA, he also serves as the Director of Knowledge Management (KM) Technology Center at the same university. Drs. Mohamed holds MSc and PhD in Agronomy/Statistics, MSc in Computer Science and D.Sc. in Systems Engineering and Engineering Management with emphasis on Knowledge Management. Furthermore, Drs. Mohamed is an Oracle and ITIL Certified Professional. He worked as a technical lead for deployments of complex ERP and many other critical enterprise systems.

Jennifer Moro received her degree in Business Administration from Cattaneo University (Italy) in 2000. From 2000 to 2002 she was entitled of a research grant from the Information System department of Cattaneo University and she has been a member of the CETIC research center. Since 2003 she is a PhD student in Management Information System and Supply Chain in the same research center and has been teaching Computer Science for the Cattaneo University in Castellanza and the Catholic University in Milan. Her research work focuses on organizational and technological issues of knowledge management, the management of business information systems and Internet-based technologies and CIO competences.

Mark Nissen is OASD-NII Research Chair professor of Command & Control, Information Sciences and Management at the Naval Postgraduate School. His research focuses on dynamic knowing and organizing, and on the phenomenology of knowledge flows, culminating in his second book, entitled Harnessing Knowledge Dynamics: Principled Organizational Knowing & Learning (IRM Press 2006). Mark’s publications span information systems, project management, organization studies, and knowledge management. In 2000 he received the Menneken Faculty Award for Excellence in Scientific Research. In 2001 he received a prestigious Young Investigator Grant Award from the Office of Naval Research.
for work on knowledge-flow theory. In 2002 – 2003 he was Visiting professor at Stanford, integrating knowledge-flow theory into agent-based tools for computational modeling. In 2004 he established the Center for Edge Power for multi-university, multidisciplinary research on what the Military terms command & control. Before his information systems doctoral work at the University of Southern California, he acquired over a dozen years’ management experience in the aerospace and electronics industries

Sevasti-Melissa Nolas is a research fellow with the CAMHS Evidence-Based Practice Unit at UCL and the Anna Freud Centre. Her PhD from the London School of Economics was an ethnographic study on the use of social psychological knowledge in practice in the context of the delivery and evaluation of a youth inclusion programme. Melissa’s research interest lie in the study of policy and programme enactment in social policy and health services contexts, in particular looking at ways to support people working in these contexts. Her research is qualitative and interpretative and she works with various theories of practice.

Kevin J. O’Sullivan is an assistant professor of Management at New York Institute of Technology. He has over 16 years of experience IT experience in multinational firms and consulting both in the private and public sector in American, Middle Eastern, European and Far Eastern cultures. Dr. O’Sullivan has delivered professional seminars to global Fortune 100 organizations on subjects such as global collaboration, knowledge management, information security and multinational information systems. His research and development interests include knowledge management, intellectual capital security and information visualization. He serves on the editorial board of the Journal of Information and Knowledge Management and as associate editor of VINE: The Journal of Information and Knowledge Management Systems

Sineenad Paisittanand is an adjunct instructor of strategic management at Bangkok University. She also is the vice president of the strategy and planning division at Thanachart Bank, Bangkok, Thailand. Her responsibilities focus on formulating strategic direction, implementing, monitoring, and controlling strategy of Thanachart Bank and its subsidiaries. She received her PhD in business administration focusing on strategic management under the joint PhD program between Bangkok University and the University of Nebraska at Lincoln. Her current research interests are in the areas of strategy process including strategy implementation, organizational capability, organizational knowledge, knowledge management, and strategy within the resource-based view.

Katia Passerini is associate professor and the Hurlburt Chair of management information systems at the School of Management of the New Jersey Institute of Technology (NJIT) where she teaches courses in MIS, knowledge management and IT strategy. She has published in refereed journals (such as Computers & Education, Communications of the ACM, Campus-Wide Information Systems, Communications of AIS, Society and Business Review, Journal of Educational Multimedia and Hypermedia, International Journal of Knowledge Management) particularly in the area of computer-mediated learning, knowledge management and mobile communications. Her professional IT experience includes multi-industry projects at Booz Allen Hamilton and the World Bank. Dr. Passerini earned both a MBA and a PhD degree in Information & Decision Systems from the George Washington University in Washington DC.
**Mario Piattini** is MSc and PhD in Computer Science by the Polytechnic University of Madrid. Certified Information System Auditor by ISACA (Information System Audit and Control Association). Full professor at the Escuela Superior de Informática of the Castilla-La Mancha University. Author of several books and papers on databases, software engineering and information systems. He leads the ALARCOS research group of the Department of Computer Science at the University of Castilla-La Mancha, in Ciudad Real, Spain. His research interests are: advanced database design, database quality, software metrics, object oriented metrics, software maintenance.

**Javier Portillo** is currently studying the last course of the Computer Science Degree and he is also a technician working at the Alarcos Research Group, (University of Castilla-La Mancha) Spain. His research interests include Agent Technology and Knowledge Management.

**Jennifer Lewis Priestley** is a member of the Statistics faculty in the Department of Mathematics and Statistics at Kennesaw State University in Atlanta, GA. She serves as the coordinator of the Minor in Applied Statistics and Data Analysis. Her teaching, research and consulting interests include the application of statistical techniques and the effective transfer of knowledge among individuals and organizations. She has written academic articles on statistical model development and evaluation as well as articles on knowledge exchange which have been included in a variety of encyclopedias, textbooks and trade journals. Prior to her career in academia, Dr. Priestley worked for AT&T, MasterCard and Andersen Consulting.

**Eric Ras** is a senior scientist at the Fraunhofer Institute for Experimental Software Engineering (IESE) in Kaiserslautern, Germany. He received the BS (Vordiplom) and the MS (Diplom) in computer science from the University of Kaiserslautern, Germany. His research interests are reuse-based learning material production, work-process oriented vocational training methods, document engineering, software patterns, experience management, and the conceptual as well as technical integration of knowledge management and learning management. He is scientific coordinator of the international distance learning program Software Engineering for Engineers at the University of Kaiserslautern, Germany. He organizes the workshop on Learning-oriented Knowledge Management and KM-oriented E-Learning (LOKMOL) and is PC member of different workshops and conferences in the domain of software engineering, e-learning, and knowledge management. Contact him at eric.ras@iese.fraunhofer.de.

**Aurelio Ravarini** is Director of CETIC, Research Center on Information Systems, at Università Carlo Cattaneo, Castellanza, Italy, where he is also Assistant professor of Information Systems at the School of Engineering. His research expertise is in strategic information systems, interorganizational information systems, knowledge management systems, and information systems development, the latter of which is focused on small and medium-sized companies. Dr. Ravarini holds a position as instructor at Università Cattolica, Milan, Italy. He also holds a Laurea in Management Engineering from Politecnico di Milano and received his Master in Training Trainers from ISMO, Milan. He is a member of the Association for Information Systems (AIS) and of its Italian chapter (itAIS), where he serves as Webmaster. Dr. Ravarini has published more than 30 papers for international journals, book chapters, or conferences proceedings. He serves as Associate Editor of the European Journal of Information Systems (EJIS) and of the Journal of Information, Information Technology, and Organizations (JITTO).
He is also a member of the editorial board of the Journal of e-Commerce in Organizations as well as a member of the program committees of several international conferences.

**Joerg Rech** is a senior scientist and project manager at the Fraunhofer Institute for Experimental Software Engineering (IESE), an applied research and transfer institute, in Kaiserslautern, Germany. His research mainly concerns software antipatterns, software patterns, defect discovery, software mining, software retrieval, automated software reuse, software analysis, and knowledge management, esp., in the area model-driven software engineering. Joerg Rech authored over 50 international journal articles, book chapters, and refereed conference papers, mainly on software engineering and knowledge management. Additionally, he is a member of the German Computer Society (Gesellschaft für Informatik, GI) and served as a PC member for different workshops and conferences as well as an editor for several books in the domain of software engineering and knowledge management. Contact him at joerg.rech@iese.fraunhofer.de.

**Elsa Rhoads**, a graduate in Knowledge Management from the Engineering Management and Systems Engineering Department of The George Washington University, is the Knowledge and Performance Architect for the Pension Benefit Guaranty Corporation (PBGC), a civilian federal agency in Washington, DC. Previously Rhoads was a Branch Chief in the Information Resources Management Department. A founding member of the Knowledge Management Working Group of the Federal CIO Council in 2000, Rhoads currently serves as a member of the Board. Before joining PBGC, her experience included over 15 years of management and information technology consulting in Chicago. Rhoads holds an M.P.A. degree, and served as an adjunct professor in the Public Administration Department at Roosevelt University, Chicago.

**Vincent Ribière:** After teaching for the past 10 years at American University (Washington, DC) and later on at the New York Institute of Technology (NYIT) in New York and in the Kingdom of Bahrain, Vincent is now an Assistant professor at the Graduate School of Bangkok University. He is the Managing Director of the South Asian branch of the Institute for Knowledge and Innovation (IKI) of Thailand hosted by Bangkok University (http://iki.bu.ac.th) and he is the Director for Asian activities at the Institute for Knowledge and Innovation at the George Washington University, in Washington, DC, USA (http://www.gwu.edu/~iki). Vincent received his Doctorate of Science in Knowledge Management from the George Washington University, and a PhD in Management Sciences from the Paul Cézanne University, in Aix en Provence, France. Vincent teaches, conducts research and consults in the area of knowledge management and information systems. Over the past years, he presented various research papers at different international conferences on knowledge management, organizational culture, information systems and quality as well as publishing in various refereed journals and books. vince@vincentribiere.com

**Subhashish Samaddar** is a member of the Managerial Sciences Department of the J. Mack Robinson College of Business at Georgia State University, Atlanta, Georgia. He is the Director of PhD program in Decision Sciences. His research and teaching interests are in managing operations, technology and knowledge for enhancing organizational effectiveness. Specifically, he is an expert in management of complex productions and supply systems, and information technology infrastructure and knowledge support systems. His research and teaching has been funded by grants from State Farm Insurance Com-

**Rong-An Shang** is an associate professor in the Department of Business Administration at Soochow University, Taiwan. He received his MS from National Chioao Tung University, Hsinchu, Taiwan, and a PhD. from National Taiwan University in 1997. His current research interests include electronic commerce, IS adoption and implementation, and computer mediated communication. His work has been published in Information & Management, Journal of Business Ethics, Internet Research, International Journal of Distance Education Technologies, as well as some Chinese journals and international conference proceedings.

**Stefan Smolnik** is an assistant professor at the Institute of Research on Information Systems (IRIS) at the European Business School (EBS), Oestrich-Winkel, Germany. Smolnik received a Master’s Degree in Computer Science as well as a PhD in Information Systems from University of Paderborn, Germany. He has been working in the research fields of information and knowledge management (KM), semantic technologies, and collaborative computing for several years. In his current research, Smolnik focuses on KM and information systems performance and success measurements, and conducts several case studies and benchmarking initiatives.

**Juan Pablo Soto** is a computer science engineer by the University of Baja California (México). He is a PhD student and the topic of his thesis is based on the goal of improving Knowledge Management Systems by using Multi-Agent technology. His research interests are knowledge management and multi-agent systems.

**Michael Stankosky**, PhD, is professor of systems engineering , lead professor of Knowledge Management, and co-founder and co-director of the Institute of Knowledge and Innovation at the George Washington University. In those capacities, he oversees the research and education of all academic activities relating to Knowledge Management and Innovation. He collaborates with 12 adjunct faculty, 25 doctoral researchers, as well as with numerous scholars and practitioners from around the world. His latest book, *Creating the Discipline of Knowledge Management*, summarizes some of these efforts.

**Eric W. Stein**, PhD, associate professor Management Science and Information Systems at Penn State Great Valley, teaches courses on management, particularly creating innovative high performance organizations, management information systems, decision support and expert systems, high tech new ventures, and knowledge management. He holds a bachelors degree in physics from Amherst College and a doctorate in managerial science from The Wharton School of The University of Pennsylvania. He also serves as the Director of the New Ventures and Entrepreneurial Studies within the MBA program. His widely published research includes contributions in the areas of organizational memory and organizational learning, knowledge management, communities of practice, decision support systems, developing creative high performance organizations, high-tech entrepreneurship, strategy and transformation.
Reed Stuedemann was the knowledge sharing manager for Caterpillar Inc. from 2001 until 2006, and was responsible for their Knowledge Network, an internally developed collaboration tool based on Communities of Practice. Reed has been employed with Caterpillar Inc. for over 30 years in a variety of assignments, including sales, product support, purchasing, quality and manufacturing at Caterpillar. He is currently based at Caterpillar's world headquarters in Peoria, Illinois, USA. Reed received his Bachelor of Science and Master's degrees in Industrial Education from Iowa State University. He is married with two children.

Margaret Tan is an associate professor at the Wee Kim Wee School of Communication and Information and Deputy Director of the Singapore Internet Research Centre at Nanyang Technological University in Singapore. Margaret’s current research focuses on understanding electronic trust and security of online transactions, data protection and privacy statements of online websites, electronic governance and policies, e-Government and the digital societies. With various publications in international journals, she co-edited the book, “The Virtual Workplace” and authored the book, “e-Payment: The Digital Exchange”. Margaret has also spoken at various international conferences and seminars as well as serving numerous editorial boards of international journals and publications.

Hazel Taylor is an assistant professor at the Information School, University of Washington, Seattle. She holds a PhD from Queensland University of Technology, Brisbane, Australia. Prior to joining the Information School, Dr. Taylor taught at the University of Waikato in New Zealand, and at the Hong Kong University of Science and Technology, and conducted research in Hong Kong on risk management and tacit knowledge in IT projects. Her teaching and research focuses on IT project management and risk management, and information systems analysis and development, with an emphasis on tacit knowledge and decision making in these areas. A secondary teaching focus is in the area of research methods. Prior to her academic career, Hazel worked in industry with manufacturing, construction and government organizations, both as a systems manager and an IT project manager.

Claudio Vitari is writing a PhD in management, specializing in Information Systems at the Università Carlo Cattaneo (Italy) and under the double doctoral degree scheme with the Université Montpellier 2 (Montpellier University of Science, France). His fields of study include web content management, knowledge management and online banking services.

Aurora Vizcaíno is an associate professor at the Escuela Superior de Informática of the University of Castilla-La Mancha, Spain. She is MSc and has a European PhD in Computer Science by the University of Castilla-La Mancha. Her PhD work was based on the use of a Simulated Student in collaborative environments. Her research interests include Collaborative Learning, Agents, Simulated Student and Knowledge Management. She has numerous publications in important International Conferences and is part of the program committee of many of them.

Chay Yue Wah is currently head of the psychology program at university SIM. He obtained his doctoral degree from the University of Oxford and is a registered Chartered Psychologist. Prior to his academic career, he worked at various jobs, in the merchant navy, electronics industry and as a research psychologist with CASSIM, a simulator based training facility. He has held faculty positions at the National University of Singapore Business School, the Singapore Management University, and
the Nanyang Technological University. His research interests are in knowledge systems, citizenship behaviour, work commitment, and personnel psychology.

**Ray Webster** is currently associate professor (Adjunct) in the School of Information Technology, Murdoch University. He has been active in both academic life and information systems development for more than thirty years and has worked on systems development projects in England, Australia, Malaysia and Turkey. He has a PhD in educational technology and an MSc in intelligent systems. His research interests include the cognitive aspects of interface design and knowledge strategies for lifelong learning.

**Tim Wentling** is professor of Library and Information Science at the University of Illinois at Urbana/Champaign, and Senior Research Scientist at the National Center for Supercomputing Applications, where heads the Knowledge and Learning Systems Group. professor Wentling is author of numerous books and peer-reviewed articles on human resource development, e-learning, and knowledge management. His current research focuses on knowledge management and e-learning.

**Michael J. Zhang** is an associate professor of management in the John F. Welch College of Business at Sacred Heart University. He received his Doctor of Business Administration degree from Cleveland State University. His current research focuses on the strategic roles of information systems in supporting a number of key organizational capabilities: strategic flexibility, knowledge management, organizational learning, dynamic capabilities of top executives, and organizational innovation. Dr. Zhang’s work has been published in such academic journals as *Journal of Management*, *International Journal of Knowledge Management*, *Journal of Managerial Issues*, *Journal of Engineering and Technology Management*, *Journal of Business Strategies*, and *Journal of Business & Management*.
