About the Contributors

**John Wang** is a professor in the Department of Information & Operations Management at Montclair State University, USA. Having received a scholarship award, he came to the USA and completed his PhD in operations research from Temple University. Due to his extraordinary contributions beyond a tenured full professor, Dr. Wang has been honored with a special range adjustment in 2006. He has published over 100 refereed papers and seven books. He has also developed several computer software programs based on his research findings. He is the Editor-in-Chief of *International Journal of Applied Management Science*, *International Journal of Operations Research and Information Systems*, and *International Journal of Information Systems and Supply Chain Management*. He is also the Editor of *Data Warehousing and Mining: Concepts, Methodologies, Tools, and Applications* (six-volume) and the Editor of the *Encyclopedia of Data Warehousing and Mining*, 1st (two-volume) and 2nd (four-volume). His long-term research goal is on the synergy of operations research, data mining and cybernetics.

**Suraj M. Alexander** is a Professor in the Department of Industrial Engineering at the University of Louisville. He has a B.S. degree in M.E. from I.I.T, Madras, and M.S. and Ph.D. degrees in Industrial Engineering and Operations Research, from the Virginia Polytechnic Institute and State University. Before entering academia, he worked as an Equipment Design Engineer for Corning, Inc. His current research interests are in the areas of quality assurance, process monitoring, diagnosis and control, decision support systems, and logistics. Dr. Alexander is a Fellow of the Institute of Industrial Engineers and the American Society for Quality. He is a Registered Professional Engineer in Kentucky, and a Certified Quality Engineer.

**Bünyamin Atici** is an Assistant Professor of Computer Education and Instructional Technologies at the Faculty of Education, Firat University, Elazig, Turkey. He obtained his Ph.D degree in Educational Technology and master’s degree in Curriculum and Instruction both from Firat University. His research interests include virtual learning environments, computer supported cooperative learning, distance learning, and strategic use of information technology to improve firm performance. He presented his research at several international conferences, including Global Learn Asia Pacific Global Conference on Learning and Technology (AACE), International Conference on Education and New Learning Technologies (IATED), and International Educational Technology Conference (IETC). His articles appeared in the Social Sciences Computer Review, Transylvanian Review of the Administrative Sciences, Problems of the 21st Education, and African Journal of Business Management. He is the Director of Distance Education Centre at Firat University.
About the Contributors

Shirly Bar-Lev, PhD, Lecturer at the School of Engineering in Ruppin Academic Center. She holds a doctorate in Sociology from Bar-Ilan University and is on the faculty of Haifa University. She is a member of the Center for Public Management & Policy, in the School of Political Sciences in Haifa University. Her research interests include: Organizational Politics, Implementation of health information technologies, knowledge management, and Internet research.

Uğur Bati is an Assistant Professor of Advertising Design and Communication at the Faculty of Communication, Yeditepe University, Istanbul, Turkey. He was graduated from Bogaziçi University and obtained his master degree in Advertising and Publicity and PhD degree in Communication Studies both from Marmara University. His research interests are related about semiotics, consumer culture, new media and advertising language. His articles appeared in the Problems of the 21st Education, Journal of Communication Studies, Culture and Communication and International Human Sciences. He is the member of Advertising Creators Centre at Turkey.

Moshe Ben-Akiva is the Edmund K. Turner Professor of Civil and Environmental Engineering at the Massachusetts Institute of Technology (MIT), and Director of the MIT Intelligent Transportation Systems (ITS) Program. He holds a Ph.D. degree in transportation systems from MIT and honorary degrees from the University of the Aegean, the Université Lumi ère Lyon and the Royal Institute of Technology (KTH). His research areas include demand and network modeling, market research and econometrics. His awards include the Lifetime Achievement Award of the International Association for Travel Behavior Research, and the Jules Dupuit prize from the World Conference on Transport Research Society (WCTRS). Professor Ben-Akiva has co-authored two books, including the textbook Discrete Choice Analysis, and over 200 papers. He recently co-edited Recent Developments in Transport Modelling: Lessons for the Freight Sector. Professor Ben-Akiva is also the Editor-in-Chief of Transport Policy, and serves on the Transportation Science Advisory Board of Editors.

Debmalya Biswas is a Researcher at SAP Research, Germany. He obtained his Ph.D. from INRIA (University of Rennes 1), France in 2009, and his M.Sc. from Memorial University of Newfoundland, Canada in 2005. He has considerable experience in software development, having worked for major software solutions providers such as Oracle Corporation and Infosys Technologies Limited. His research interests include transactional and security related aspects of distributed systems, mainly Web Services and P2P systems.

Denis Bolduc is full-professor at Laval University. He has been Chair of the economics Department during the 2002-2008 period. His major fields of expertise include: discrete choice analysis, applied econometrics and demand modeling. He has performed applied and theoretical research mostly in the transportation filed. He is now in charge of a Research Chair on Air Transportation. One objective of the new Chair is to measure the potential gains on the local economy associated with the development of activities at the Jean Lesage International Airport of Québec. The work of Bolduc’s team will estimate accurately the evolution of demand for the Jean Lesage International Airport with the help of a new simulation-based technique that can use perceptions and attitudes to explain in the choices of consumers. The research program of the Chair will contribute to encourage the creation of sustainable socio-economic synergies with the other transportation sectors such as rail, water and road.
About the Contributors

Marius Brand is a graduate student at the University of Stuttgart, Germany, where he studies Technological Business Administration. He was awarded a Master’s degree from Portland State University (Department of Engineering and Technology Management). His emphases and fields of interest are information systems, electronic business and energy systems. He also helped with writing a book about advanced macroeconomics.

Shailesh Chandra graduated with a Bachelor of Technology (2006) in Civil Engineering from the Indian Institute of Technology Delhi (IIT Delhi). He worked for a year in India as a management trainee with Bharat Petroleum Corporation Limited, as an Executive Engineer for hydropower projects at a private firm and thereafter as a Research Project Assistant in Structural division of the Department of Civil Engineering at IIT Delhi. Further, he obtained his Master’s degree (2009) in Civil Engineering with a specialization in Transportation Engineering at Texas A&M University at College Station, TX. Currently, he is a PhD student in the Transportation Engineering division of the Zachary Department of Civil Engineering at Texas A&M University - College Station. His research interests include transit system modeling and design, stochastic applications in transportation planning, optimization and simulation.

Ting-Wei Chang got her master’s degree from the Department of Transportation Technology and Logistics Management at Chung Hua University, Hsinchu, Taiwan in 2009. Her study specializes in driving simulation, collision avoidance systems for bus driving, and pedestrian safety.

Chien-Yen Chang is an Associate Professor of the Department of Transportation Technology and Logistics Management at Chung Hua University, Hsinchu, Taiwan. He obtained his Ph.D. degree and master’s degree in Civil Engineering from National Taiwan University, Taipei, Taiwan. He has been a faculty member at Chung Hua University, Hsinchu, Taiwan since 2003. His current research activities and interests include: driving simulation, collision avoidance systems for bus driving, traffic flow theory, pedestrian safety and traffic signal control. He presented his research at several international conferences, including International Conference on Applications of Advanced Technologies in Transportation (AATT), Intelligent Transportation Systems Asia Pacific Forum and Exhibition, and IEEE Asia-Pacific Services Computing Conference (IEEE APSCC).

Ricardo Colomo-Palacios is an Associate Professor at the Computer Science Department of the Universidad Carlos III de Madrid. His research interests include applied research in Information Systems, Software Project Management, People in Software Projects and Social and Semantic Web. He received his PhD in Computer Science from the Universidad Politécnica of Madrid (2005). He also holds a MBA from the Instituto de Empresa (2002). He has been working as software engineer, project manager and software engineering consultant in several companies including Spanish IT leader INDRA. He is also an Editorial Board Member and Associate Editor for several international journals and conferences and Editor in Chief of International Journal of Human Capital and Information Technology Professionals.

Tugrul Daim is an Associate Professor in Department of Engineering and Technology Management Department at Portland State University. His research areas include technology management, technology forecasting and R&D Management. Prior to his current role, he was at Intel Corporation where he held several management positions between 1995 and 2005. His papers were published in “Technology

**Xutao Du** is a researcher at the Institute of Electronic System Engineering, Beijing, China. He received the Ph.D. degree from the Department of Computer Science and Technology, Tsinghua University, China. His primary research interest is in the area of formal semantics of programming languages, process algebra, software verification and testing.

**Michael Feldman** is the Director of the NICU in Hillel Yaffe Medical Center. He holds a MD from the University of Buenos Aires. He is a specialist in Pediatrics ICU/Pediatric Cardiology and Pediatric Pulmonology. He was a visiting Professor at the Neonatal division of University of Alberta in Edmonton and in Cedars Sinai Medical Center in L.A. Dr. Feldman is a member of the Israeli Medical Association, the Israeli Pediatric Association, the Israeli Neonatal Association and an Affiliate Member Section on Prenatal Pediatrics of the American Academy of Pediatrics.

**Kirk Dean Fiedler** is an Associate Professor of MIS at the Moore School of Business at the University of South Carolina. He received a BA from Wittenberg University, an MBA and an MS in Information Systems and Systems Science from the University of Louisville before completing his Ph.D. in MIS at the University of Pittsburgh. His consulting experience includes several years at Arthur Young & Company where he earned a CPA certification. Currently, his research interests include technology assimilation, knowledge management, international business, assessment and risk management. He has published this research in *Information Systems Research, Communications of the ACM, MIS Quarterly, Journal of Management Information Systems, Decision Sciences, IEEE Transactions in Engineering Management*, and *California Management Review*.

**Angel García-Crespo** is the Head of the SofLab Group at the Computer Science Department in the Universidad Carlos III de Madrid and the Head of the Institute for promotion of Innovation Pedro Juan de Lastanosa. He holds a PhD in Industrial Engineering from the Universidad Politécnica de Madrid (Award from the Instituto J.A. Artigas to the best thesis) and received an Executive MBA from the Instituto de Empresa. Professor García-Crespo has led and actively contributed to large European Projects of the FP V and VI, and also in many business cooperations. He is the author of more than a hundred publications in conferences, journals and books, both Spanish and international.

**Ke Han** is a professor at the Institute of Electronic System Engineering, Beijing, China. His major research interests include software testing, software modeling and verification.

**Patrick Hung** is an Associate Professor at the Faculty of Business and Information Technology in University of Ontario Institute of Technology and an Adjunct Faculty Member at the Department of Electrical and Computer Engineering in University of Waterloo, Canada. He is also a Guest Professor
About the Contributors

Patrick has Ph.D. and Master of Philosophy Science in Computer Science from the Hong Kong University of Science and Technology in Hong Kong, Master of Applied Science in Management Sciences from the University of Waterloo in Canada, and Bachelor of Science in Computer Science at the University of New South Wales, Australia.

Hiroshi Igaki received the B.E. degree (2000) in Department of Electrical and Electronics Engineering from Kobe University, Japan, and the M.E. degree (2002) and D.E. degree (2005) in Information Science from Nara Institute of Science and Technology, Japan. From 2006 to 2007, he worked for Faculty of Mathematical Sciences and Information Engineering, Nanzan University, Japan. From 2007 to 2010, he joined the Graduate School of Engineering at Kobe University. He is currently an assistant professor in Department of Computer Science, Tokyo University of Technology. His research interests include communication support in software development, home network systems and service-oriented architecture. He is a member of the IEEE, ACM, IEICE and IPSJ.

Akiya Inoue joined NTT Public Corporation in 1981. He has been engaged in research on network control and management methods and on new service demand forecasting based on user behavior modeling. From 1994 to 1996, he was engaged in planning and system engineering of operations systems in NTT Long-Distance Communications Sector. From 2004 to 2005, he was an Executive Researcher in Communication Traffic and Service Quality Project, NTT Service Integration Laboratories. He is currently a Professor at the Department of Management Information Science, Faculty of Social Systems Science, Chiba Institute of Technology. He is a member of the COM and SMC Society of IEEE.

Motoi Iwashita received the B.S. and M.S. in Mathematics and Dr. Eng. degrees in electrical engineering from Waseda University, Tokyo, in 1983, 1985, and 1999, respectively. In 1985, he joined NTT, where he engaged in R&D on modeling and evaluation method of optical access networks, development of telecom operation support systems, and multi-service teletraffic network design. In 1992 and 1993, he was a Visiting Researcher at the British Telecom Research Laboratories, England. He is currently an Associate Professor at the Department of Management Information Science, Faculty of Social Systems Science, Chiba Institute of Technology. He is a member of the COM Society of IEEE.

Luiz Antonio Joia is an Associate Professor, MBA Head and Principal of the e:lab – Research Laboratory on e-Government and e-Business at the Brazilian School of Public and Business Administration of Getulio Vargas Foundation. He is also an Adjunct Professor at Rio de Janeiro State University. He holds a B.Sc. in Civil Engineering from the Military Institute of Engineering, Brazil, and an M.Sc. in Civil Engineering and a D.Sc. in Production Engineering from the Federal University of Rio de Janeiro. He also holds an M.Sc. in Management Studies from the Oxford University, U.K. He was a World Bank consultant in Educational Technology and is an invited member of the Technical Board of the Working Group WG 8.5 (Informatics in the Public Administration) of the IFIP (International Federation for Information Processing). His research interests lie on IT for Development, e-Government, e-Business, Strategic Use of IT, and Actor-Network Theory.
Takahiro Kimura received the M.E. from Nara Institute of Science and Technology, Japan in 2006. He is currently working for Nihon Unisys, Ltd., Japan. His research interests include service oriented architecture, Web service, legacy migration.

Markus Kirchberg is an Expert at the Hewlett-Packard Laboratories Singapore and an Adjunct Assistant Professor at the Department of Computer Science in the National University of Singapore. Markus obtained his Ph.D. from Massey University, New Zealand and his Master of Sciences in Computer Science from Clausthal University of Technology, Germany. His major research interests include Cloud Computing, (Privacy-aware) Data and Record Management, Distributed Systems, Service-oriented Computing, and Transaction Processing.

Takeshi Kurosawa received his B.S., M.S., and Dr. degrees in Mathematics from Keio University, Tokyo, Japan, in 2001, 2003, and 2009, respectively. He joined NTT (Research and Development) in 2003. He was engaged in research on demand analysis for telecommunications and internet services and on a service-choice behavior model using discrete choice theory from 2003 to 2010 in NTT laboratories. He is currently a lecturer of Department of Mathematical Information Science, Tokyo University of Science. He is a Member of the Institute of Electronics Information and Communication Engineers (IEICE) of Japan, Operations Research Society of Japan, and Mathematical Society of Japan (ORSJ).

Serhat Kurt is an assistant professor in the School of Education at Ataturk University, Erzurum, Turkey. He received his PhD degree in Education from University of Illinois at Urbana-Champaign. His research interests include teachers and technology adoption, Web 2.0 and the semantic web and their implications for education, open education and accessible education.

Abey Kuruvilla is an Assistant Professor in Operations Management at the University of Wisconsin-Parkside. He has a B.Tech Degree in Mechanical Engineering from University of Kerala, India and M.S. and Ph.D. degrees in Industrial Engineering from the University of Louisville, KY. Dr. Kuruvilla’s research interests are Ambulance Diversion in Emergency Medical Systems, Healthcare Management and Operations Management in the Service Sectors, particularly the tourism industry. He has also developed a research interest in the online language learning industry. His work has been published or accepted for publication in the International Journal of Information Systems in the Service Sector, Journal of Current Research in Global Business, and the Review of Business Research.

Lorraine S. Lee (*) is an Assistant Professor of Accounting at the Cameron School of Business at the University of North Carolina Wilmington. She received a BS from Duke University in Computer Science and an MBA from the University of South Carolina and recently completed her Ph.D. in Business Administration at the University of South Carolina. Before receiving her Ph.D., Lorraine spent 10+ years as a project manager and software developer. Her research interests include health information systems and accounting information systems. She has published in the International Journal of Production Economics, Internal Auditor, and eService Journal.
About the Contributors

Xiaolin Li is an assistant professor of e-Business and Technology Management at Towson University. He received his PhD in Management Systems from Kent State University. Dr. Li’s current research emphases are supply chain management, and the adoption, continuation, and valuation of technological innovations. His research has been published or accepted for publication in Journal of the Association for Information Systems, International Journal of Operational Research, Journal of Information Systems Education, International Journal of Learning and Intellectual Capital, Journal of Current Research in Global Business, and Journal of Global Commerce Research. His research has also won the “Distinguished Research Paper Award” (in innovative education track) from the Decision Science Institute 40th Annual Conference (2009) and “Honorable Mention Best Student Paper Award” from Midwest DSI Annual Conference (2006). Dr. Li is an associate editor for Journal of Global Commerce Research.”

Linda Lin is a graduate student in the department of Engineering and Technology Management at Portland State University. She received her BS in Electrical Engineering and Computer Science from the University of California, Berkeley. Prior to returning to school full time, she worked as an engineer in the semiconductor industry. Her current research interests include technology management, platform strategy, service development, service innovation, organizational dynamics, and electronic commerce.

Shijun Liu is an associate professor of the School of computer science and technology at Shandong University, China. He obtained his BS degrees in Oceanography from Ocean University of China, and MS and PhD degree in computer science from Shandong University, China. His current research interests center around services computing, with a focus on enterprise services computing and services system for manufacturing.

Ken-ichi Matsumoto received the B.E., M.E., and Ph.D. degrees in Information and Computer sciences from Osaka University, Japan, in 1985, 1987, 1990, respectively. Dr. Matsumoto is currently a professor in the Graduate School of Information Science at Nara Institute of Science and Technology (NAIST), Japan. His research interests include software metrics and measurement framework. He is a senior member of the IEEE, and a member of the ACM, IEICE, IPSJ and JSSST.

Xiangxu Meng grew up in Shandong Province of China and joined Dept. of Computer Science of Shandong University in 1985, from which he received B. S. and M.S. Degrees in 1982 and 1985, respectively. He obtained Ph.D. degree from Institute of Computing Technology, Chinese Academy of Science in 1998. His research interests include service computing, grid computing and enterprise computing.

Francis McGuire is currently an Alumni Distinguished Professor of Parks, Recreation and Tourism Management at Clemson University. He has a Bachelor’s of Science degree from Cornell University, a Master’s of Science degree from the Pennsylvania State University, and a Doctor of Philosophy degree from the University of Illinois. He has been a faculty member for approximately 30 years and in that time has served in a variety of roles including acting chair, graduate coordinator and faculty representative to the Clemson University Board of Trustees. He has received various recognitions for his service including being named as the South Carolina Governor’s Professor of the Year in 2004.
Bahaudin G. Mujtabe is Department Chair for Management as well as an associate professor of management, human resources and international management. In the years 2003-2005, he was director of institutional relations, planning and accreditation for Nova Southeastern University at the H.Wayne Huizenga School of Business and Entrepreneurship in Fort Lauderdale, Florida. As director, he was responsible for the planning of accreditation reviews in all locations throughout the United States of America and abroad. Bahaudin’s areas of research include ethics, management, and cross-cultural management practices.

Erez Nadir is a senior physician in the department of neonatology at Hillel Yaffe Medical Center. He holds a MD degree from Tel-Aviv Universirt and a specialist in Pediatrics and Neonatology. Dr. Nadir acts as a Neonatal Resuscitation Program (NRP) instructor and serves as the quality auditor of the Neonatal Intensive Care Unit at Hillel Yaffe Medical Center. He is a member of the Israeli Medical Association and the Israeli Association of Neonatology.

Masahide Nakamura received the B.E., M.E., and Ph.D. degrees in Information and Computer Sciences from Osaka University, Japan, in 1994, 1996, 1999, respectively. From 1999 to 2000, he has been a post-doctoral fellow in SITE at University of Ottawa, Canada. He joined Cybermedia Center at Osaka University from 2000 to 2002. From 2002 to 2007, he worked for the Graduate School of Information Science at Nara Institute of Science and Technology, Japan. From 2007 to 2009, he moved to Graduate School of Engineering at Kobe University. He is currently an associate professor in Graduate School of System Informatics at Kobe University. His research interests include the service-oriented architecture, Web services, the feature interaction problem, V&V techniques and software security. He is a member of the IEEE, ACM, IEICE, and IPSJ.

Ken Nishimatsu got his B.E. and M.E. from Waseda University, Tokyo, Japan, in 1995 and 1997, respectively. He joined NTT in 1997. He was assigned to a research and development center in NTT. He was engaged in research on demand analysis for telecommunications and internet services using a theory of Discrete Choice Analysis. He is currently in charge of the network operation and the quality control to ensure Quality of Service in NTT East Corporation. He is a member of the Institute of Electronics Information and Communication Engineers (IEICE) of Japan, Information Processing Society of Japan (IPSJ) and Operations Research Society of Japan.

Alexandre Ferreira Oliveira is a researcher at the e:lab – Research Laboratory on e-Government and e-Business - Brazilian School of Public and Business Administration of Getulio Vargas Foundation. He is also a professor at Federal Center of Technological Education Foundation and an invited professor at the executive education programs at Getulio Vargas Foundation. He has held executive positions at the telecommunication industry in Brazil. He holds a B.Sc. in Electronic Engineering at the Federal University of Rio de Janeiro and an MBA at the Brazilian School of Public and Business Administration of Getulio Vargas Foundation. His research interests lie on CRM, e-Business, Strategic Use of IT and Logistics.
Luca Quadrifoglio graduated with the Laurea in Chemical Engineering (1996) from the Politecnico of Milan and worked for Snamprogetti for five years. He then received his M.S. in Engineering Management (2002) and Ph.D. (2005) degrees from the Daniel J. Epstein Department of Industrial and Systems Engineering at USC in Los Angeles, California. Then he worked as a Postdoctoral Research Associate at the USC’s DHS CREATE until August 2006, when he joined the Faculty of the Zachry Department of Civil Engineering at Texas A&M University in College Station, Texas. Dr. Quadrifoglio published several papers in top rated Journals, won the 2006 Pritsker Doctoral Dissertation Award (3rd place) and the 2004 CUTC National Student Award for best publication in Science and Technology. His research interests are related to the broad field of Operations Research and include Transportation Systems Modeling and Design, Performance/Risk/Decision Analysis, Scheduling Algorithms, Innovative Transit/Logistics Solutions.

Marilú Montenegro Sánchez is Teaching Assistant in the Computer Science Department, Carlos III of Madrid University. She received her PhD in Computer Science of the Carlos III of Madrid University and her Computer Science Master in Cantabria University, Spain. She has worked as Software Project Manager and System Analyst in several companies. Her research interests include Software Project Management, Human Resource Management, Information Systems and Knowledge Management.

Chung-Wei Shen received his Bachelor in Transportation and Communication Management Science (2001) from the National Cheng Kung University, Taiwan. He then received his M.S. in Civil Engineering (2003) from National Taiwan University, Taiwan and worked for Department of Transportation of Taipei City Government. He is now a Ph.D. candidate in the Department of Civil Engineering at Texas A&M University – College Station. His research interests are related to the Transportation Systems Modeling and Optimization, Heuristic Algorithms. His current area of focus is the Operation and Design Strategies for ADA Paratransit Services in Rural Area.

Madjid Tavana is a Professor of Management Information Systems and Decision Sciences and the Lindback Distinguished Chair of Information Systems at La Salle University where he served as Chairman of the Management Department and Director of the Center for Technology and Management. He has been a distinguished research fellow at NASA’s Kennedy Space Center, NASA’s Johnson Space Center, Naval Research Laboratory - Stennis Space Center, and Air Force Research Laboratory. He was awarded the prestigious Space Act Award by NASA in 2005. He holds an MBA, a PMIS, and a PhD in Management Information Systems. Dr. Tavana received his post-doctoral diploma in strategic information systems from the Wharton School of the University of Pennsylvania. He is the Editor-in-Chief for the International Journal of Strategic Decision Sciences, the International Journal of Enterprise Information Systems, and the International Journal of Applied Decision Sciences. He has published in journals such as Decision Sciences, Interfaces, Information Systems, Annals of Operations Research, Information and Management, Journal of the Operational Research Society, Computers and Operations Research, and Advances in Engineering Software, among others.
Markku Tinnilä is Professor of Logistics (pro tem.) at the Department of Business Technology, Helsinki School of Economics (HSE), Finland. His research interests include efficient service structures and business processes, as well as, the emerging business models in multi-channel electronic business. He has published several articles and books on these topics, and has presented the results in several international conferences.

Krishnamurthy Vidyasankar obtained his B.E. in Electrical Engineering from Thiagarajar College of Engineering, Madurai, India in 1968, M.Tech. in Electrical Engineering from Indian Institute of Technology, Kanpur, India in 1970 and Ph.D. in Computer Science from University of Waterloo, Canada in 1976. After serving in the Department of Computing Science, The University of Alberta, Edmonton, Canada, in 1974–1977, he joined Memorial University in 1977 where he is currently a Professor in the Department of Computer Science. His research areas include: (i) transactional aspects in database and information systems, Web services, and e-contracts and (ii) shared variable constructions, mutual and group mutual exclusion algorithms, and transactional memory in distributed computing.

Gad. Vitner holds B.Sc. and M.Sc. degrees from the Technion Israel Institute of Technology and a Ph.D. degree in Industrial and Systems Engineering from USC in L.A. He was a staff member in Ben-Gurion University and after few years held senior positions in various manufacturing and service companies. Ten years ago he returned to academia where he developed a new school of engineering and acted as the school dean for 6 years. His research interests are; quality management, project management, health care management, product and service design, operations management and service management.

Gang Wang received the PhD degree in Management Sciences and Engineering from Fudan University. He was a Senior Research Associate at Department of Information Systems of City University of Hong Kong. His current research interests include decision support systems, artificial intelligence, and business intelligence. He is currently a Professor at Kean University, USA.

Yawei Wang is currently an Assistant Professor in the Department of Marketing at Montclair State University, New Jersey. She holds a Ph.D. in Recreation and Tourism Management from Clemson University, South Carolina. Her research focuses on travel and tourism, especially on mature tourism and aging issues. Her teaching interests include introduction to marketing, introduction to leisure & tourism, behavioral concepts in leisure and tourism, research methods in leisure and tourism. Prior to joining Montclair State University, she worked with the Gerontology Research Interdisciplinary Team in the College of Health Education & Human Development at Clemson, South Carolina.

Frank Wolf is on the faculty of Nova Southeastern University’s H. Wayne Huizenga School of Business and Entrepreneurship, 3301 College Avenue, Ft Lauderdale, Florida, 33313-7796, telephone (954)-262-5000 or (802) 388 9911. He teaches weekend MBA courses in Operations Management and General Management best practices, and has a research interest in international supply chains, sustainability, and alternative conflict resolution. Wolf entered academic life after an industry career with major US corporations working in engineering, operations research, and general management as general manager of a wholly owned IT subsidiary. He also held an appointment to the White House Fellowship (PIE) and served at the United Nations as a non-governmental representative (NGO), prior to starting two entrepreneurial firms in IT database services. He is currently an active arbitrator and mediator with FINRA, the Financial Industry Regulatory Authority, formerly NASD and NYSE.
**About the Contributors**

**Chunxiao Xing** is a professor at the Research Institute of Information Technology, Tsinghua University, China. He received the Ph.D. degree from the Department of Automatic Control, Northwestern Polytechnical University, Xi’an, China. His research interests include data-driven systems, digital library systems and e-commerce. He is a member of the IEEE.

**Shmuel Yurman** is the Director of the Neonatal Department and NICU at Hillel Yaffe Medical Center since 1978. He holds a MD degree from Tel-Aviv University and is a specialist in Pediatrics and Neonatology. In 2007 he received the approval for the ISO 9001:2000 standard for the NICU. Dr. Yurman is a lecturer of Neonatology in the Faculty of Medicine of the Technion in Haifa. Dr. Yurman is the Chairman of the Israel Forum of Neonatal Directors and a member of the Israel Medical Association, the Israel Pediatric Association, the Israel Neonatal Association, and the National Consulting Committee of Obstetrics, Neonatology & Genetics.

**Faramak Zandi** is an Assistant Professor of Information Systems and Chairman of the Industrial Engineering Department at Alzahra University in Iran. He holds a PhD in Industrial Engineering. His research interests include information technology, enterprise architectures, decision making, quality management systems and transportation planning. He has published in *Knowledge Management Research and Practice, Journal of Intelligent Transportation Systems, Business Process Management Journal, Benchmarking: An International Journal, International Journal of Information Technology and Management, International Journal of Business Information Systems*, and *International Journal of Mathematics in Operational Research*.

**Yong Zhang** has received his BS and MS degree in software engineering from software college, Shandong University, China. Currently, he is enrolled at the school of computer science and technology, also in Shandong University, as a PhD candidate working on services computing, grid computing. His current research interests include SOA, Web Service, grid computing and services oriented computing, enterprise interoperability.

**Bin Zhou** is an Assistant Professor in the College of Business and Public Administration, Kean University, USA. He obtained his Ph.D. and MBA degrees in Management Science and Supply Chain Management from Rutgers Business School, Rutgers University. His research interests include theory and application of supply chain management, operations strategy, logistics and transportation, production and inventory systems, and information technology. His research work has appeared in *International Journal of Production Economics, European Journal of Operational Research, International Journal of Systems Science*, among others. Professor Zhou also serves in the editorial board of *International Journal of Information Systems and Social Change*.

**Lizhu Zhou** is a professor at the Department of Computer Science and Technology, Tsinghua University, China. His areas of research interest include high confidence software, database systems, search engines and data mining. He is a member of the ACM.
