About the Contributors

Maiga Chang is Assistant Professor in the School of Computing Information and Systems, Athabasca University (AU), Athabasca, Alberta, Canada. His researches mainly focus on mobile learning and ubiquitous learning, museum e-learning, game-based learning, educational robots, learning behavior analysis, and data mining in e-learning. He is the local chair of the 2nd IEEE Digital Game and Intelligent Toy Enhanced Learning (DIGITEL 2008) and general co-chair of the 4th International Conference on e-Learning and Games (Edutainment 2009). He serves several peer-reviewed journals, including AU Press and Springer’s Transaction on Edutainment, as editorial board members. He has participated in 73 international conferences/workshops as a Program Committee Member and has (co-)authored more than 93 book chapters, journal and international conference papers. He has been a member of the International Who’s Who of Professionals since 2000. In September 2004, he received the 2004 Young Researcher Award in Advanced Learning Technologies from the IEEE Technical Committee on Learning Technology (IEEE TCTL). He is a valued IEEE member for twelve years and also a member of ACM, AAAI, INNS, and Phi Tau Phi Scholastic Honor Society.

Chen-Wo Kuo is currently in charge of international licensing matters at the National Palace Museum, Taipei, Taiwan. He is a section chief in the marketing and licensing department. He has two Master degrees. One is MBA (master of business administrative) and the other is CIS (Computer Information System). His major studies are related to e-government policy-making, digital archives, e-learning, digital divide, and culture creative industry. Besides that, he is planning how to reform of the institutional image and innovative design value-added business model.

***

Michele Andreolli is currently employed as junior developer in the Multimedia Group of the Foundation. He graduated on 2007 in Informatics from the University Of Trento, Italy, with a thesis titled: “Advanced Funcionality for the Visualization and Trasmission of Georeferenced Data”. He is currently working for the project, commissioned from the Provincia di Tento, called “Trento, Ieri, Oggi e Domani” (Trento, Yesterday, Today and Tomorrow), dealing with the reconstruction of the city of Trento in different ages. He is also involved in the “NetConnect” project, a European project in the field of cultural heritage and new technologies, in partnership with many European Universities, enterprises and authorities.
**Lilianna Aniola-Jedrzejek**, senior lecturer, teaches English for Specific Purposes at the Department of Foreign Languages, Poznan University of Technology, Poznan, Poland. She has a PhD in physics and became interested in online teaching/learning when she took a one-semester online course on designing Internet courses at Heriot-Watt University, Edinborough, Great Britain, in 1999. Since then she has coordinated three European Union projects within the Leonardo da Vinci programme (one project currently underway), with the purpose of introducing instructional technology components to language learning. Since 2002 she has conducted, with Boehm, four online projects between students of Poznan University of Technology, Poland, and Saginaw Valley State University in Michigan, USA.

**Robert Ariew** is Professor of French and Member of the Interdisciplinary PhD Program in Second Language Acquisition and Teaching (SLAT) at the University of Arizona, Tucson, Arizona, USA.

**Diane Boehm** is Director of Instructional Support Programs at Saginaw Valley State University, a regional state university in east-central Michigan. Her responsibilities include directing a university Writing Center in which approximately 25% of all sessions are conducted with non-native speakers of English from other cultures. This experience, together with frequent travels to visit friends and universities in former Eastern European countries and Russia, led to the desire to open the world of other cultures to her students. Since 2002 she has conducted, with Aniola-Jedrzejek, four online projects between students of Saginaw Valley State University in Michigan, USA, and Poznan University of Technology, Poland.

**Nian-Shing Chen** is professor of the Department of Information Management, National Sun Yatsen University, Taiwan. He is currently a visiting professor at the University of Queensland, Australia. He has published over 230 research papers in international refereed journals, conferences and book chapters. His research areas include e-learning, knowledge management and the use and development of online synchronous learning and wireless technologies to enhance learning.

**Martha Christopoulou** is a PhD student in Art, Craft and Design Education at Roehampton University. She is an art educator in primary education. Currently she works for the Greek Education Office in London as a Greek Language teacher in Greek Language Classes. Martha is also a practicing artist (icon-painter). Among her research interests is the importance of culture and cultural heritage in people’s life; the ways that art reflects culture that produced it; and the ways that art combines social and personal expression.

**Lauren Cifuentes** is associate professor in the Educational Technology Program at Texas A&M University where she teaches integrating technology into the curriculum, computer graphics for learning, and instructional design. Her primary research interests are in design considerations for collaborative environments including distance partnerships and in the effects of shared multimedia.

**Giuseppe Conti** works as Senior Scientist at Fondazione Graphitech since 2003. In 2002 he received a PhD degree at the University of Strathclyde, Glasgow, UK on the implementation of a Virtual Reality (VR) system for urban planning. During his working experiences he has been working for various engineering firms in Italy and abroad. He has been active in a number of European, local and industrial projects in the field of Geographical Information Systems and web services for Geographical Informa-
About the Contributors

Raffaele De Amicis is the General Manager of GraphiTech. Furthermore, he is member of the Board of Trustees of the INI-GraphiTech Foundation (www.inigraphics.net) and Chairman of the INI-GraphiTech Steering Committee. Since 2005 he belongs to Experts Board Member Panel for Mathematics and Information Technology and Industrial and Information Engineering of the CIVR, Italian Committee for Evaluation of Research of the Ministry of Education (www.civr.it). His research interests are in computer aided design, virtual reality, advanced 3D interaction techniques, multimodal interactions and shapes semantic. More details about can be found at the following web site www.graphitech.it.

Mats Deutschmann started his research career in the domain of language pragmatics and corpus linguistics but has since then expanded into the field of computer aided language learning (CALL). Over the past five years, he has taught and developed language courses for Internet distribution and has also conducted extensive research into the use of different innovative techniques in language learning. The tools researched include Key stroke logging and the use of virtual worlds in education. Deutschmann has also conducted several studies of the language pragmatics of e-learning, and how a social context is created in such environments. Deutschmann currently holds a position as Senior Lecturer at Mid Sweden University.

Hamdi Erkunt is currently a faculty in Bogazici University, Educational Technology department. Having a background in Teaching English and technology, he holds an EdD degree from Boston University, School of Education, Educational Media and Technology program. His earlier research interest in rather conventional but innovative use of technologies in education, computers as cognitive tools and intellectual as well as faculty training partners have shifted to computer supported collaborative learning and socially distributed knowledge creation or knowledge building. He teaches for understanding using CSCL courses on education and technology, computer networks and communication, and e-learning. Teaching for him is analogous to fine fine-tuning minds for surpassing themselves in distributed creative thinking of communities of practice who are intentional learners of various domains of expertise.

Jui-Chu Fan received her MBA degree at the Department of Information Management, University of Illinois at Urbana—Champaign. She is currently a senior lecturer of the Department of Information Management, National Sun Yat-sen University, Taiwan. Her research interests include e-learning and e-service.

Yakut Gazi is a PhD candidate in educational technology and a senior IT consultant with Instructional Technology Services at Texas A&M University, USA. Her research interests include collaboration and communication in online environments, and the impact of culture and technology on the way people interact.

Gabrio Girardi is been working in the GraphiTech Foundation since 2005. He holds a MEng in Engineering. He graduated with a thesis on “Texture-based 3D modelling of timber elements”. In the past few years he has been involved in a large number of industrial and European projects dealing with the application of 3D computer graphics in the product development process as well as in the Cultural Heritage domain.
**Hitoshi Isahara** received the B.E., M.E. and PhD degrees in electrical engineering from Kyoto University, Kyoto, Japan, in 1978, 1980, and 1995, respectively. He is an Executive Researcher of the Computational Linguistics Group and a Director of the Thai Computational Linguistics Laboratory (TCL) at the National Institute of Information and Communications Technology (NICT), Japan. He is a Guest Professor at Kobe University Graduate School of Engineering, Japan, and a part-time lecturer at Kyoto University Graduate School of Human and Environmental Studies and Doshisha University. He is a President-elect of the International Association for Machine Translation (IAMT), and a President of the Asia-Pacific Association for Machine Translation (AAMT). He is working for the Knowledge Information processing Technologies Committee at the Japan Electronics and Information Technology Industries Association (JEITA) and chairs one of its subcommittees.

**Jiyou Jia** is an associate professor in Department of Educational Technology, Beijing University, China. He got PhD from Institute for Interdisciplinary Informatics, University of Augsburg, Germany. He was visiting scholar in Free University Berlin and Korea Advanced Institute of Science & Technology. He teaches courses for graduate students: Education, Educational Technology and AI; and Emerging Technologies for Education. His research interests include Educational Technology, AI and CALL. He took part in several national and international projects from Natural Science Foundation, Ministry of Education and Ministry of Science and Technology, Capital Beijing, and Korea Foundation for Advanced Studies. He is the founder of a famous English learning website WWW.CSIEC.COM, which applies NLP technology in English education. Dr. Jia has published more than 20 papers in international journals and refereed conferences. He won awards from Peking-University, Ministry of Science & Technology and Ministry of Education China, Chinese Association of Education Technology, and Association of American Artificial Intelligence.

**Min Kang**, received the BSc degree in physics and the MSc degree in electronic engineering from the University of Electronic Science and Technology of China in 1985 and 1988, respectively, and the PhD degree in statistical physics at Kobe University in 1996. From 1996 to 2000, she was an assistant professor in the centre of information processing, Kansai International University, Japan. In 2000, she moved to Kobe University. From August of 2007 to January of 2008, she was a visiting scholar in the Adaptive Technology and Resource Centre at the University of Toronto. She is currently an Associate professor in the Graduate School of Intercultural Studies at Kobe University in Computers and Communication. Her current research interests include development of e-learning tools and CALL applications and practice use of statistical approaches in the tools.

**Katsunori Kotani** has been an Assistant Professor of the School of English Language and Communication at Kansai Gaidai University, Osaka, Japan since 2006. He received the M.A. and Ph.D degrees in English linguistics from Graduate School of English Linguistics at Kansai Gaidai University, in 1998 and 2004 respectively. From 2002 to 2008 he was a Funded Researcher of Computational Linguistic Group of Knowledge Creating Communication Research Center at National Institute of Information and Communications Technology (NICT), Kyoto, Japan. He has been working for the Committee for Seeking Future Direction of MT at the Asia-Pacific Association for Machine Translation (AAMT) and the Knowledge Information processing Technologies Committee at the Japan Electronics and Information Technology Industries Association (JEITA).
Rita Kuo received the BS and MS degrees in information and computer engineering and the PhD degree in electronic engineering from Chung-Yuan Christian University, Chung Li, Taiwan, R.O.C., in 2000, 2002, and 2007, respectively. She is now an assistant professor in the department of digital design, MingDao University, ChangHua, Taiwan, R.O.C. Her research interests include e-learning, adaptive test, cognitive theory, intelligent agent technology, and mobile learning. She currently is the publication chair of the 4th International Conference on E-Learning and Games (Edutainment 2009). She has participated in more 4 international conferences as a Program Committee Member and has authored 29 book chapters, journal and conference papers.

Takeshi Kutsumi was born in 1965. He has been engaged in developing machine translation systems at Sharp Corporation, Nara, Japan. He is a Junior Manager of Development Department I, Advanced Technology Development Center, Information Systems Group at Sharp Corporation. He received the M.E. degree in Precision Engineering from the Graduate School of Engineering at Osaka University, Osaka, Japan, in 1990.

Niki Lambropoulos is an Interaction Design Consultant and a Greek language teacher. She holds two BAs, a Diploma, an MA in ICT in Education and she is finishing her PhD in Learning Technologies, at Learning Technology Research Institute, London Metropolitan University. Among her research interests is the combination of sociability and usability in Interaction Design for Human Computer Interaction, with a special interest in group-ware for online communities and eLearning environments, as well as their employment and effectiveness toward Ubiquitous Computing. She has published widely in the field and prefers working online.

Wei-Peng Lien received the BA degree in the Fu-Jen Catholic University, Taipei, Taiwan, and the M.A. degrees in New York Institute of Technology, New York, USA. She is now a lecturer in the Department of Visual Communication Design, Shu-Te University, Kaohsiung, Taiwan, R.O.C. Her research interests include Image Communication, Communication Technology, Education Technology, Curriculum Design in Video/Audio, and E-learning. She currently is the committee of the International Senior High School Intelligent Ironman Creativity Contest 2009. She was the planner of the World Games 2009 Kaohsiung Poster Contest, the research of film observation, the creativity project of new immigrants in Yan Chao and the executive director of Youth Southern Taiwan Film Festival and also the judge of the International Senior High School Intelligent Ironman Creativity Contest in 2006 and 2008 and creativity contest of Kaohsiung National Tax Administration, Ministry of Finance, in 2008 and 2009.

Eva Lindgren, Faculty for Teacher Education, holds a doctorate in English linguist. She has published in L1 and L2 writing, keystroke logging, revision, self-assessment, and writing development. Her research interests further include foreign language learning and the role of reflection for the promotion of noticing and language awareness.

Zhenjiang Miao received the BS degree in electrical engineering from Tsinghua University, Beijing, in 1987 and the M.S. and PhD degrees in electrical and computer engineering from Beijing Jiaotong University, in 1990 and 1994, respectively. Then he did research at INPT and INPA in France respectively. He then joined Notel and RIM, researching related device of network and communication. Since 2004, he has been working in Institution of Information Science where he is engaged in a wide range of speech related research activities.
Yue Ming received the BS. degree in communication engineering from Beijing Jiaotong University, Beijing, in 2006 and the MS degrees in Human-computer Interaction from Beijing Jiaotong University, in 2008. Now she focus on Mandarin speech recognition and evaluation.

Karen L. Murphy is associate professor emeritus in the Educational Technology Program at Texas A&M University and faculty developer with the School of Education, Western New Mexico University, Silver City. Her research interests include collaborative learning and the impact of culture in online learning environments.

Terence Patrick Murphy is associate professor of Rhetoric and Composition in the Department of English at Yonsei University in Seoul, South Korea. He has written widely on both the stylistics of fiction and second language writing in such journals as Language Learning and Technology; JNT: Journal of Narrative Technique; Style; Narrative; Language and Literature, Cultural Critique, and the Journal of Literary Semantics.

Bolanle A. Olaniran is a professor in the Department of Communication Studies at Texas Tech University. His research includes: Communication technologies and Computer-Mediated Communication, Organization communication, Cross-cultural communication, and Crisis Management and Communication. He has authored several articles in discipline focus and interdisciplinary focus Journals (i.e., Regional, National, and International) and edited book chapters in each of these areas. He has served as consultant to organizations at local, national and government level. His works have gained recognition such as the American Communication Association’s “Outstanding Scholarship in Communication field,” Who is who among College Teachers. He is also the recipient of TTU 2006 Office of the President’s Diversity, 2007 President’s Excellence in Teaching Awards and nominated for 2007 TTU Chancellor’s Distinguished Teaching Award. His recent international invited lecture was a lecture series in Knowledge Learning, Information & Technology (KLIT) Workshop organized by Taiwan Normal University and the National Christian University in Taiwan.

Nektaria Palaiologou holds a bachelor, master and doctoral degree in Education (University of Athens) and has followed post-doctoral studies in Education and Culture (University of London). Until now, Dr. Nektaria Palaiologou has taught at the Department of Pre-primary Education-Democritus University, Department of Special Needs Education-University of Thessaly, Marasleion Didaskaleion-University of Athens and at Higher Police Academy. Since 2002, Dr. Nektaria Palaiologou is affiliated with the Department of Technology Education and Digital Systems of the University of Piraeus where she is teaching the Pedagogical and Assessment modules as a visiting lecturer. She is the co-writer of three books in Greek (1. Intercultural Pedagogy, 2. Designing and Implementing Educational Programmes, 3. School attainments of immigrant pupils in Greece) as well as author and co-author of published papers in international journals in the broader field of Education with intercultural dimensions. For communication and co-operation, her e-mail is: npal@unipi.gr

Jeremy Palmer is a PhD candidate in the Interdisciplinary Program in Second Language Acquisition and Teaching (SLAT) at the University of Arizona, Tucson, Arizona, USA. His academic specialty is the teaching of Arabic.
Eleonora Pantano graduated at University of Calabria (Italy) in Management Engineering in 2005. Currently, she is going to complete her PhD course on “Psychology of Programming and Artificial Intelligence.” The dissertation will focus on a consumer perception model of local products. Her main research interests focus on the interdisciplinarity existing among: Marketing (with emphasis on consumer behavior, decisional processes involved and cultural motivations, territorial marketing and retailing), Communication (both from the psychological and economic point of view), and on the related instruments.

Stefano Piffer is a member of the technical staff at Fondazione Graphitech, where he works on issue related to high-quality interactive graphics within Geographical environments. Nowadays he is working on issues related to access and distribution of geographical information. His work covered a wide variety of computer graphics topics, including real-time simulation, general-purpose computation on GPUs and shading language. He received the MD in Telecommunications Engineering in 2004 from the University Of Trento, Italy with a work on the adaptive antennas synthesis, antenna design, adaptive signal processing and adaptive beamforming.

Ichiko Sata received the BA degree in English literature from the University of Kitakyushu, Fukuoka, Japan, in 1984. She has been engaged in developing machine translation systems at Sharp Corporation, Nara, Japan. She is Manager of Development Department I, Advanced Technology Development Center, Information Systems Group at Sharp Corporation. She served as a committee member of Committee for Seeking Future Direction of MT at the Asia-Pacific Association for Machine Translation (AAMT). She is a committee member of the Knowledge Information processing Technologies Committee at the Japan Electronics and Information Technology Industries Association (JEITA).

Anders Steinvall is Senior Lecturer in English at Umeå University. His particular research interests lie in the field of cognitive linguistics and its application to lexical semantics, discourse analysis and second language learning.

Kirk P. H. Sullivan, Department of Language Studies, Umeå University is a Reader in Phonetics and Educational Work. He holds a PhD from the University of Southampton, UK and has lived in Sweden for 15 years. His research interests include first and second language literacy, assessment, and forensic linguistics.

Assunta Tavernise, PhD in Psychology of Programming and Artificial Intelligence, is a Contract Professor in Psychology at University of Calabria. She collaborates in national and international projects for the realization of technological tools able to improve learning; in particular, she worked in the following projects: “Virtual Museum Net of Magna Graecia” (financed by the Regional Operational Programme 2000-2003) and “Connecting European Culture through New Technology – NETConnect” (Culture 2000 European Programme). Her fields of interest are: Educational Technologies, Edutainment, Emotional Expressions in “Talking Heads,” Narrative Psychology, Interactive Theatres and Virtual Agents.

Lorna Uden has published over 140 papers in conferences, journals, chapters of books and workshops. She co-authored the book, ‘Technology and Problem - Based Learning’, published by IGI publishers. Professor Uden is program committee member for many international conferences and workshops. She

Kosmas Vlachos is a teacher of English who has worked in Greek State Primary schools for 13 years. He holds a BA in English Literature and Civilization and a M. Ed. in ELT. He is a PhD candidate in the Aegean University. His research deals with Computer Assisted Language Learning and more specifically with teaching English to young learners using Network Based Language Teaching and Computer Mediated Communication. He has been engaged with pre service and in service teacher training. He has currently cooperated with the Department of English of the University of Athens in pre service teacher training course. He has published widely in papers in conferences, conventions, seminars, workshops and ESL/EFL journals. He has also studied School Management in the Hellenic Open University. His interests include Language Learning and ICT, Learners’ and Teachers’ Motivation, Teacher Education, Language learning and Intercultural Awareness, Evaluation within educational systems, and European projects.

Chun-Wang Wei received his MBA degree at the Department of Business Education at the National Changhua University, Taiwan. He is currently a lecturer with the Management Information System Department at Far East College, Taiwan. His research interests include e-learning and knowledge management.

Heather N. Warren is currently a graduate student and Teaching Assistant in the Department of Communication Studies at Texas Technology University, Lubbock Texas, USA. Ms Warren received her BA in General Studies from Texas Tech University and is currently completing her thesis in Family Communication. Her research interests are family communication, instructional communication and internet communication technologies.

Indi Marie Williams received her Masters in Communication Studies from Texas Technology University, Lubbock, Texas, USA. Ms. Williams received a BA in Sociology from the University of Texas at Austin and a second BA in English from the University of North Texas, Denton, Texas, USA. Her research interests include virtual learning communities, web 2.0 e-learning, instructional communication in distance education, human-computer integration, internet culture, and the anticipation of future interaction in online relationship development.

Takehiko Yoshimi has been an associate professor of the Faculty of Science and Technology at Ryukoku University, Shiga, Japan since 2004. He received the M.E. degree in computer science from the Graduate School of Computer Science at the University of Electro-Communications, Tokyo, Japan, in 1987. He earned the PhD degree from Graduate School of Science and Technology, Kobe University, Kobe, Japan, in 1999. After graduation, he was a Researcher at the Institute of Behavioral Sciences (IBS), and was engaged in developing machine translation systems at Sharp Corporation, Nara, Japan. From 2004 to 2008 he was an Expert Researcher of Computational Linguistic Group of Knowledge
Creating Communication Research Center at National Institute of Information and Communications Technology (NICT), Kyoto, Japan.

Rita Zaltsman, PhD, has worked for years in education both in the private and academic sectors. After settling down in Germany she graduated from Reutlingen Technical University and worked in a software firm in Stuttgart. Both interests - teaching and computers - led her to The State University of West Georgia (USA) where she specialized in distance learning instruction. Her dissertation theme was: “Conflict Paradigm in Cross-Cultural Distance Learning Settings.” She is a freelancer, currently developing e-learning courses on cross-cultural communication for the International Center of Modern Education in Prague, publishing articles on e-learning issues and contributing to German and international conferences. Her main research interests are web-based discourse analysis, cross-cultural e-learning, conflicts in e-learning communities and psycholinguistics. E-mail: rzaltzma@yahoo.de
