About the Contributors

Zongwei Luo is a Senior Researcher at the E-business Technology Institute, The University of Hong Kong (China). Before that, he was working at the IBM TJ Watson Research Center in Yorktown Heights (NY, USA). He also served as the Affiliate Senior Consultant to ETI Consulting Limited. His research has been supported by various funding sources, including China NSF, HKU seed funding, HK RGC, and HK ITF. His research results have appeared in major international journals and leading conferences. He is the founding Editor-in-Chief of the International Journal of Applied Logistics and serves as an Associate Editor and editorial advisory board member in many international journals. Dr. Luo’s recent interests include applied research and development in the area of service science and computing, innovation management and sustainable development, technology adoption and risk management, and e-business model and practices, especially for logistics and supply chain management.

* * *

Gningue Mame Bigué is a PhD student at CERENE (Centre d’Etude et de Recherche en Economie et gestion logistique) located in Le Havre University, France. Her research interests include Supply Chain Management and Risk Management. Her PhD thesis is entitled “Security risk management in global supply chain”.

Jaouad Boukachour is an Associate Professor at the Department of Computer Sciences, University Institute of Technology, University of Le Havre, France. He received his PhD in computer science from the University of Rouen, France and Accreditation to Supervise Research from the University of Le Havre, France. His primary research interests are in Scheduling problems, Hard optimisation, Supply chain and Logistics Information System. Jaouad Boukachour has more than 30 referred research papers. He has supervised a number of PhD researchers in areas such as logistics and scheduling aircraft landings. Currently, he is supervising six PhD students working on traceability, modeling road traffic and vehicle routing and presently acts as scientific director of various research projects.

Roman Boutellier PhD is since 1st October 2008 Vice President Human Resources and Infrastructure of ETH Zurich. He is professor and leads the chair for technology and innovation management at the department of management, technology, and economics (D-MTEC) at ETH Zurich since 2004. Since 1999 Prof. Dr. Boutellier is adjunct professor at the University of St. Gallen (HSG). In 1979 he received his PhD in mathematics and worked as postdoctoral fellow at the Imperial College in London. His works appeared in R&D Management, Harvard Business Manager, ZFO and Drug Discovery Today. Roman Boutellier has held several leading positions in the industry and he is member of the board of directors.
of several Swiss large-scale enterprises. The focus of his research is the management of technology driven enterprises with a specific focus on innovation.

C. D. Cheng, the Managing Director of NDI Automation, received his Bachelor and Master degrees from Harbin Institute of Technology (HIT), China, his Ph.D degree from Beijing University of Aeronautics and Astronautics (BUAA), China, in 1990, 1995, and 1999, respectively. From 2000 to 2004, he was a Research Fellow in the Department of Electrical and Computer Engineering at the National University of Singapore (NUS) and Temasek Laboratories at the Nanyang Technological University (NTU), Singapore, respectively. Dr Cheng has been leading a technical team to provide a wide range of technical supports in South-East Asia seaports and warehouses. He co-authored 4 books at IGI Global, USA. Dr Cheng is a member of IES (Institution of Engineers, Singapore) since May 2010.

Markus Eurich works as a scientific collaborator at the Swiss Federal Institute of Technology Zurich with a research focus on business models for information and communication technology (ICT) innovations. He belongs to the research group of Prof. Dr. Roman Boutellier at the Department of Management, Technology, and Economics (D-MTEC). He also works in the ‘Internet Applications and Services’ research program at SAP Research in Zurich. He joined SAP in 2001 and mainly worked in research and in the fields of internal business consulting and customer relationship management in Germany and India. He is involved in the European research project SENSEI (“Integrating the Physical with the Digital World of the Network of the Future”), in which he is leading in the area of business modeling and value creation.

Yulian Fei is a associate professor at the College of Computer Science & Information Engineering, Zhejiang Gongshang University, China. She received his PhD in management science and engineering from Zhejiang gongshang University, China. Her primary research interests are in information management and dataming.

Yudi Fernando is a PhD candidate from the School of Management, Universiti Sains Malaysia. He is an MBA graduate from the School of Management, Universiti Sains Malaysia, Penang, Malaysia. He earned his first degree in management from Universitas Andalas, Indonesia. His current research interests are internal marketing, internal service quality, supplier relations and logistics. Thus far, he has published in several journals such as International Journal of Information Management, Journal of Accounting, Management and Economics Research, International Journal of Productivity and Quality Management, International Journal of Value Chain Management, Journal of Technology Management and Innovation, International Journal Logistics Systems and Management, International Journal Logistics Systems and so on. He is corresponding author.

Charles H. Fredouet, MBA, Ph.D, is a professor of supply-chain management at Le Havre University (LHU)’s School of Logistics. After 20 years of research in the field of information and decision-support systems, Prof. Fredouet turned to global logistics management (transportation network and logistics process modelling and simulation, local and global performance modeling and measurement); he has more than 50 publications in business administration and management reviews and conferences. A former vice-president of Le Havre University, Prof. Fredouet heads LHU’s School of Logistics research center; he is a member of the Supply Chain Council and reviewing for TRB’s International Trade and
Transportation Committee. He presently acts as scientific director of various research projects accounting for more than USD 650,000 of public/private grants.

**Brigita Gajšek**, born 1974 in Celje, Slovenia, graduated at the Faculty of mechanical engineering in 1998 and received a master’s degree in Organization and Management of Information Systems from the Faculty of organizational science at the University of Maribor in 2003. For several years she worked in metal processing industry as project manager before she was elected teaching assistant at the Faculty of logistics at University of Maribor in 2007. Her research interests comprise technique and technology in logistics. She is currently working towards her PhD thesis.

**Fereshteh Ghahremani** is MS student in electronic commerce at K. N. Toosi University of technology. She received her bachelor’s degree in information technology from Shiraz University of technology. Her current primary research interests are in supply chain management, electronic learning, electronic health records and e-health systems.

**Sina Golara** is a MS student in e-commerce at the university of K. N. Toosi of Tehran, Iran. He received a BSc in industrial engineering from the university of K.N. Toosi in 2010. His primary research interests are in supply chain management, information sharing, mathematical optimization and metaheuristics.

**Roman Gumzej**, born 1970 in Maribor, Slovenia, received a doctorate in computer science and informatics from University of Maribor in 1999. He worked both in industry (Institute of Information Science, IZUM Maribor) and academia (University of Maribor), before he was elected assistant professor at the Faculty of electrical engineering and computer science at University of Maribor in 2004. He was a visiting researcher at ifak e.V. Magdeburg, Germany in 2002 and at the Chair of Computer Engineering at Fernuniversität in Hagen, Germany in 2007. Currently he is assistant professor at the Faculty of logistics at the same university. His research interests comprise all major areas of hard real-time computing with special emphasis on operating systems, co-design and quality-of-service in embedded and logistics applications. He has conducted a national and co-operated in several national and international research projects. He has authored or co-authored several refereed book chapters, and about 40 journal publications and conference contributions, and is involved in international professional organizations and program committees of several conferences.

**Mahmod Sabri Haron** is a marketing lecturer at the School of Management Universtiti Sains Malaysia. His received a PhD from the Management Centre University of Bradford, UK, and his MBA and B.Sc in International Business from Bridgeport, CT. He also has a Diploma in Business Studies from Institute technology Mara, Malaysia and Pg. Diploma in research method from Bradford, UK.

**Peter Hills** is the Director and Chair Professor of Kadoorie Institute, the University of Hong Kong. His research interests centre on the relationship between environmental and sustainability issues and the policy-making process. Over the years, his personal research agenda has moved on from an early interest in transport-environment issues and applications of environmental impact assessment (EIA), to energy-environment problems and more recently to environmental policy processes, environmental governance, sustainable development and ecological modernisation. He has acted as a consultant
to various international organizations, including The United Nations Development Programme, The United Nations Economic and Social Commission for Asia and the Pacific, The Asian Development Bank, The International Labour Office, The Asian and Pacific Development Centre, and The European Union. He has recently been working as a consultant for the EU-funded Urban Environmental Planning Programme – Vietnam which has been assisting the Ho Chi Minh City University of Architecture to upgrade its urban planning programmes.

**Jun Hu** is a lecturer at the College of Computer Science & Information Engineering, Zhejiang Gongshang University, China. He received his PhD in industrial engineering from Tongji University, China. His primary research interests are in strategy management, supply chain & logistics management and management theory.

**Ertian Hua** is a professor at the College of Computer Science & Information Engineering, Zhejiang Gongshang University, China. He received his PhD in mechanical engineering from Shanghai University, China. His primary research interests are in product innovation management and mechanical theory.

**W. J. Huang** is currently an undergraduate studying in the department of Electrical & Computer Engineering in National University of Singapore (NUS). His interest includes algorithmics, programming and embedded system design.

**Luo Jing** earned her Master of Art majoring in English in Northwestern Polytechnic University of China with an emphasis on applied linguistics, translation and cross-cultural communication. Now she works as a teacher in Shenzhen Tourism College of Jinan University. Her research focuses on tourism English, business English and culture. Zhang Xiaohong is a postgraduate student of Shenzhen Tourism College of Jinan University. In view of the significance and the developmental trend of tourism in future, she selected tourism management as her main research fields. She has participated in some research and development projects such as the Intangible Cultural Heritage research activity. Her research interests include ecotourism, rural tourism and cultural tourism development & protection. She has some publications in some international conferences under the guidance of Dr. Zhang mu.

**C. C. Ko** received the B.Sc. and Ph.D. degrees in Electrical Engineering from Loughborough University of Technology, U.K. He is currently a Professor in the Department of Electrical and Computer Engineering, National University of Singapore. His current research interests include communications, Internet experimentation and education. He is a Senior Member of IEEE and has written over 250 technical publications in these areas. He has served as an Associate Editors of the *IEEE Transactions on Signal Processing*, *the IEEE Transactions on Antenna and Propagation*, and the *ETRI Journal*. He is also an Editor for the *EURASIP Journal on Wireless Communications and Networking*.

**Jacqueline C. K. Lam** is a post-doctoral fellow at the Kadoorie Institute, the University of Hong Kong. Her current research focuses on the design and implementation of environmental regulation and the effects on technological environmental innovation, especially with reference to electric vehicles and biofuels development and adoption in Hong Kong, China, USA and UK. Recently, she has also applied the theory of transitional management in the transition to low-carbon energy and transport technologies.
in these countries. Other ongoing research topics of hers include the relationship between open innovation, environmental performance and corporate competitiveness.

Tang Lei is a postgraduate student of Shenzhen Tourism College of Jinan University. In view of the significance and the developmental trend of tourism in future, she selected tourism management as her main research fields. She has participated in some research and development projects such as the Intangible Cultural Heritage research activity. Her research interests include eMarketing in tourism and cultural tourism development & protection. She has done some researches in eMarketing and finished a paper on intangible cultural heritage under the guidance of Dr. Zhang mu.

Tobias Mettler received his PhD in business information systems of the University of St. Gallen. He is senior researcher at SAP Research, Campusbased Engineering Center (CEC) St. Gallen, Switzerland. His research interests include issues related to design science research, systems analysis, electronic commerce, and electronic healthcare.

Subrata Mitra is a Professor of Operations Management at the Indian Institute of Management Calcutta (IIMC), Kolkata, India. Prof. Mitra is a Fellow (Ph.D.) of IIMC. He has over thirteen years of experience in industry and academics. He has research interests in inventory control, logistics and supply chain management, and has published in international journals such as European Journal of Operational Research, Omega, Journal of the Operational Research Society, Asia Pacific Journal of Operational Research and Supply Chain Forum: An International Journal. Prof. Mitra is a past Fulbright Senior Research Fellow, and he serves on the Editorial Review Board of the Journal of Supply Chain Management.

Zhang Mu is a professor and Chief of the GIS & Tourism Laboratory at the Shenzhen Tourism College of Jinan University, China. He earned his Bachelor and Master degree both major in Geography and later received a diploma and a Ph. D degree in Geography from Fujian Normal University of China, mainly focus on the GIS application in resources development and environment protection. In his postdoctoral research, he also engaged in GIS technology applications and the projects researches have involved agriculture, land use and tourism planning. Since 1985, he has been working as a teacher in college and university for more than 23 years and involved in several national and local government R&D projects. His research interests include geography, e-commerce in tourism, tourist resources development & planning, and the GIS application in tourism. He has more than 70 publications to his credit in Chinese and international journals or conferences in these areas.

Ozan Özcan is a doctoral student at the University of South Florida in the Industrial and Management Systems Engineering Department. He completed his master studies in the Industrial Engineering Department at the Marmara University in Istanbul-Turkey, where his research focus was Decision Making. His research interests are social network analysis and the creation of eco-efficient products and processes. He also has over four years of work experience including one year as a senior management consultant within The Scientific and Technological Research Council of Turkey. He is currently member of ASEM, INFORMS, IIE, and Institute for Supply Management.
**Roberto Pinto** is an assistant professor at the University of Bergamo. He graduated in Management Engineering from the Politecnico di Milano, and received his PhD in logistics and production at the University of Brescia. His current research interests focus on the logistics and supply chain management area, with specific activities devoted to the supply chain risk management field.

**Fabiana Pirola** holds a master degree in management engineering and she is currently a PhD student in logistics and supply chain management at University of Bergamo. In 2008 she joined the International Logistics Program - master of engineering in logistics and supply chain management at MIT-Zaragoza Logistics Center in Spain. In 2010, she has been a PhD visiting student at the Bowling Green State University (Ohio, USA). Her PhD and main research area is supply chain risk management with particular focus on the supply side.

**Christian Ploberger** is a PhD student at the Department of Political Science and International Studies, University of Birmingham (GB). He already participated in academic research projects which a focus on regional economic development, conducted by the Department of Economics, University of Salzburg, as well as conducting academic research project on his own for the provincial government of Salzburg, Department of Economics, with a focus on European regional innovation policies strategies. Recently he participated in another research project organised by the University of Melbourne, with a focus on Academic Research Networks. He also hold a position as a project assistant at the Department of Economics (provincial government of Salzburg) with a focus on regional economic development strategies and various teaching assignments at British Universities.

**Kingsley Reeves** is an assistant professor at the University of South Florida in the Industrial and Management Systems Engineering Department. He completed his doctoral studies in the Industrial and Operations Engineering Department at the University of Michigan, Ann Arbor where his research focus was Engineering Management. His research interest centers on the creation of value across the extended supply chain. He has over ten years of work experience within the Automotive Practice of PricewaterhouseCoopers, LLP. Kingsley worked six years as an engineer at Ford Motor Company. He is currently member of INFORMS, ASEE, and Academy of Management.

**Norizan Mat Saad** is currently a lecturer in marketing at Universiti Sains Malaysia, Penang, Malaysia. He earned his Ph.D., from the Management Centre, University of Bradford, UK, his MBA from the University of Hull, UK and his BBA (Hons) in marketing from Coventry University, UK. He has published scholarly papers in internationally refereed journals and proceedings. In summation, his works have been published in five journals including two published under widely cited Emerald journals. It should be noted, that one article has been published in the European Journal of Marketing. As an acknowledgement, EJM is one of the most referred international journals in marketing area and is included in ISI Social Sciences Citation Index recently. Dr. Norizan has also published about twenty articles in international conferences.
About the Contributors

Chen Shan is a postgraduate student of Shenzhen Tourism College of Jinan University. In view of the significance and the developmental trend of tourism in future, she selected tourism management as her main research fields. She has participated in some research and development projects such as the Intangible Cultural Heritage research activity. Her research interests include event tourism and tourism influence. She has finished and contributed a paper on intangible cultural heritage.

Mohammad J. Tarokh has received his PhD from University of Bradford and now he serves as associate professor and chairman of the information technology group in industrial engineering department at K. N. Toosi University of Technology. He has been author or co-author of more than 60 research papers, mostly in the area of supply chain management. He also has been in charge of more than 50 research and business projects during his professional life in Iran. His research interests include supply chain management, customer relationship management, knowledge management and business intelligence.

Claudia Villalonga is an associate researcher at SAP Research Zurich, Switzerland, and a PhD candidate at the Wearable Computing Lab of ETH Zurich, Switzerland, since 2008. She received her MSc Telecommunication Engineering at the Universitat Politècnica de Catalunya, Spain, in 2006. She wrote her Master Thesis at NEC Laboratories Europe in Heidelberg, Germany, under the title “A Proxy based Solution for the Local Discovery of Self Promoting Services”. She has worked on several European projects: SENSEI, an Integrated Project in the EU’s Seventh Framework Programme in the Information and Communication Technologies (ICT), and the IST FP6 European projects MobiLife, MAGNET Beyond and SPICE, in which she led the Mobile Ontology group. Her primary research interests are in the internet of things, the real world internet, semantics and ontologies, context recognition, and context-awareness.

Xinzhou Wei is an Associate Professor at Department of Electrical Engineering and Telecommunications Technology, New York City College of Technology/CUNY, U.S.A. He received his Ph.D. in computer science from the City University of New York, U.S.A. His research interests include public key cryptography, network security, digital signal processing, and image processing.

Feng Xiao-na is a postgraduate student of Shenzhen Tourism College of Jinan University. In view of the significance and the developmental trend of tourism in future, she selected tourism management as her main research fields. She has participated in some research and development projects such as the Intangible Cultural Heritage research activity. Her research interests include Intangible Cultural Heritage tourism and cultural tourism development & protection. She has finished and contributed a paper on intangible cultural heritage.

Suhaiza Hanim Mohamad Zailani is an Associate Professor of Operations Management at the Graduate School of Business, Universiti Sains Malaysia. She received a PhD and MSc from Lancaster university, United Kingdom and B.S. degree from Universiti Putra Malaysia. She has been teaching for the past 10 years as well as being involved in a few management consultancies focusing on the areas of operations management. She has more than 150 Research Publications in International/ National Seminars and Journals. She is quite comfortable in operations related projects. Her areas of interest are supply chain, logistics, and transportations by involving in few important projects, which are suited to her capability.
Xiaowen Zhang is an Assistant Professor at Department of Computer Science, College of Staten Island/The City University of New York (CUNY), U.S.A. He received a PhD in electrical engineering from Northern Jiaotong University, China, and a PhD in computer science from the City University of New York, U.S.A. His research interests include cryptography, information security and privacy, RFID, and wireless communication.

Zhanyang Zhang is an Associate Professor at Department of Computer Science, College of Staten Island/CUNY, U.S.A. He received his PhD in Computer Science from the City University of New York, U.S.A. His research interests cover wireless ad-hoc and sensor networks, underwater acoustic networks and RFID. Prior join CUNY, he was a member of technical staff (MTS) at Bell Labs/Lucent Technologies and worked on 3G wireless networks and data security.
