About the Contributors

**John Wang** is a professor in the Department of Information & Operations Management at Montclair State University, USA. Having received a scholarship award, he came to the USA and completed his PhD in Operations Research from Temple University. Due to his extraordinary contributions beyond a tenured full professor, Dr. Wang has been honored with a special range adjustment in 2006. He has published over 100 refereed papers and seven books. He has also developed several computer software programs based on his research findings. He is the Editor-in-Chief of *International Journal of Applied Management Science, International Journal of Operations Research and Information Systems*, and *International Journal of Information Systems and Supply Chain Management*. He is the Editor of *Data Warehousing and Mining: Concepts, Methodologies, Tools, and Applications* (six-volume) and the Editor of the *Encyclopedia of Data Warehousing and Mining*, 1st (two-volume) and 2nd (four-volume). His long-term research goal is on the synergy of operations research, data mining and cybernetics.

***

**Heli Aramo-Immonen**, D.Sc (Tech), has 15 years career as an engineer in international business development, vendor management, purchase and supply chain management, in various managerial and expert positions. Since 2004 she has been a researcher and since 2009 lecturer in Tampere University of Technology (TUT). She has performed 2006 and 2007 as a Head of Industrial Sector in Adult Education Center JAKK. Her research is focused specially on project management and knowledge management. Present position is Lecturer of Industrial Management and Engineering at TUT Pori, Finland. She has positions of trust in international scientific conferences and journals.

**Muhammed A. Badamas** has a Ph.D. in Computer Science and holds a COMPTIA Certificate on IT Project Management. He was a Research and computer consultant before taking up appointment at Morgan State University School of Business and Management in 1999. Dr. Badamas teaches Introduction to Computer-Based Information Systems and Management Information Systems courses. He has published several refereed journal articles, conference presentations, several refereed conference proceedings and book chapters. He is a reviewer for 5 academic journals. His areas of interests include: Global information systems, internet, project management, management information systems, and information security.

**Alexander Baumeister** is full Professor of Managerial Accounting in the Faculty of Law and Business at Saarland University, Germany, where he additionally holds the position of Vice President for Planning and Strategy. Baumeister studied business and economics at the University of Hohenheim, where he obtained his doctorate in 2001 and finished his post-doctoral habilitation, a German particularity, in
2007. He has received several awards for his research work (e.g., Südwestbank Award 2002, ACATIS Value-Award 2003, Rudi Häussler Award 2007, Südwestmetall Award 2008, Werner-Kern-Award 2009), and for his teaching as well (e.g., Teaching Award of the Ministry of Science, Research and Arts of the State of Baden-Württemberg 1997, Education Prize 2002 of the Confederation of the German Employers’ Associations). His areas of particular research are project, risk and warranty management, lifecycle costing, budgeting, software development management and pricing decisions.

**Fernando Cabezas-Isla** is a PhD student at the Computer Science Department of the Universidad Carlos III de Madrid in Spain. His research interests include software engineering, human factors in technology and semantic technologies. He finished his Bachelor’s degree in Computer Science on 2009 at the Universidad Carlos III de Madrid.

**Yuval Cohen** is the head of the Industrial Engineering program at the Open University of Israel. His areas of specialty are production planning, industrial learning, design of manufacturing control systems, and logistics management. He has published several papers in these areas. He served several years as a senior operations planner at FedEx Ground (USA) and received several awards for his contributions to the hub and terminal network planning. He received his Ph.D. from the University of Pittsburgh (USA), his M.Sc. from the Technion — Israel Institute of Technology, and B.Sc. from Ben-Gurion University. He is a Fellow of the Institute of Industrial Engineers (IIE), and a full member of the Institute for Operations Research and Management Sciences (INFORMS).

**Ricardo Colomo-Palacios** is an Associate Professor at the Computer Science Department of the Universidad Carlos III de Madrid. His research interests include applied research in Information Systems, Software Project Management, People in Software Projects and Social and Semantic Web. He received his PhD in Computer Science from the Universidad Politécnica of Madrid (2005). He also holds a MBA from the Instituto de Empresa (2002). He has been working as software engineer, project manager and software engineering consultant in several companies including Spanish IT leader INDRA. He is also an Editorial Board Member and Associate Editor for several international journals and conferences and Editor in Chief of International Journal of Human Capital and Information Technology Professionals.

**Evetta Culler** has fourteen years experience in Information Technology project management and systems development with Kenco Management Service, Hanes Brands, Sabre Incorporated, and US Airways. Also she is an adjunct professor at High Point University.

**Yang Fan** is Associate Professor of Project Management in the Department of Global Management and Strategy at Western Carolina University. Dr. Fan earned his BS from Huadong Petroleum University in 1985. He earned his first MS and his PhD in 1999 from the China University of Petroleum. He earned his second MS from South Dakota School of Mine and Petroleum in 2004.

**Alexander Floren** studied Business Administration at Saarland University in Saarbruecken. His majors were Managerial Accounting, Operations Research and Logistics as well as Audit. To gain his title as Diplom-Kaufmann he wrote his thesis about the usability of stochastic networks for a figure-based project controlling. At the moment, he is a doctoral candidate in Managerial Accounting at Saarland University.
About the Contributors

Angel García-Crespo is the Head of the SofLab Group at the Computer Science Department in the Universidad Carlos III de Madrid and the Head of the Institute for promotion of Innovation Pedro Juan de Lastanosa. He holds a PhD in Industrial Engineering from the Universidad Politécnica de Madrid (Award from the Instituto J.A. Artigas to the best thesis) and received an Executive MBA from the Instituto de Empresa. Professor García-Crespo has led and actively contributed to large European Projects of the FP V and VI, and also in many business cooperations. He is the author of more than a hundred publications in conferences, journals and books, both Spanish and international.

Behnaz Gholami is an independent researcher. She received her MBA, Information Technology Management from Multimedia University in Malaysia. She holds BSc degree in computer software engineering from Shiraz Islamic Azad University, Iran. Her research interests include IT Project Management, Knowledge Management, Business Intelligence, Web 2.0, and Transformation of IT in Organizations Business Process.

Peter Haried is an assistant professor of information systems at the College of Business Administration, University of Wisconsin-La Crosse. He received his PhD in management science with a concentration in management information systems from the University of Wisconsin-Milwaukee. His current research interests include information technology outsourcing; ethics and information technology; information systems strategy and electronic commerce trust formation. He has published research articles in major scholarly journals, including: Project Management Journal, Journal of IT Case and Application Research, Academy of Information and Management Sciences Journal and Business and Professional Ethics Journal. His work has been presented and published in the nationally and internationally refereed Conference Proceedings. A number of manuscripts are currently under review with scholarly journals.

Markus Ilg is Professor of Managerial Accounting in the Department und Management and Business Administration at the Vorarlberg University of Applied Sciences, Austria. Ilg studied business and economics at the University of Hohenheim, where he obtained his doctorate in 2005. Ilg co-headed the competence team Financial Controlling at zeb/, a business consultancy focused on the financial services sector located in Munster, Germany. He specialized in the areas of sales management, value based risk and return management as well as reporting. His areas of particular research are controlling and finance with an emphasis on banking and its application in the context of software development.

Stephanie Ivey is an Assistant Professor and A2H Fellow with the Department of Civil Engineering at the University of Memphis. Her primary research interests are in freight modeling, truck safety, and transportation policy. She is also involved in multiple Safe Routes to School (SRTS) projects for the City of Memphis, and is a member of the Tennessee SRTS State Network. Dr. Ivey is part of the ITE Transportation Education Council, and serves as the Vice President for the West Tennessee Branch of the American Society of Civil Engineers. She also conducts research in engineering education, and is particularly interested in factors influencing engineering student recruitment and retention.

Mastura Jaafar is currently a lecturer in the programme of construction management at the Universiti Sains Malaysia for the School of Housing, Building and Planning. She has working experience as a project manager for contracting firms before pursuing her PhD in strategic management. She is currently
involved in several research projects and consultancies related to project and procurement management for public sector. She has presented her research papers in international and national conferences. She also has published research articles in international and local journals.

**Hannu Jaakkola** is a Professor of Software Engineering at the Tampere University of Technology, Pori. He is the Director of Pori Doctor School and the Head of the Centre of Software Expertise (CoSE). He holds a Doctor of Philosophy (Eng.) degree from the Tampere University of Technology and a Bachelor of Business Administration from the University of Tampere. He also holds a part-time professor (docent) in Information Technology, University of Lapland. He is a Director of the Pori eMBA Programme and the Pori Management Training Programme. He has positions of trust in several international and national scientific organizations and journals.

**Harri Keto** has 15 years career in software business in Finland. Since 2001 he has been a senior researcher and since 2003 lecturer in Tampere University of Technology (TUT). His research is focused on process ontology and especially a conceptual framework to capture process conceptions. Present position is Lecturer of Software Engineering at TUT Pori, Finland.

**Arkin Kong Chung King** is currently holding a post of project manager in Lamy Construction Sdn Bhd which is one of the construction firms in Serawak, Malaysia. He obtained his Msc in Project Management from Universiti Sains Malaysia. His research interest is related to project management.

**Ioannis Koskosas** is an Assistant Professor at the University of Western Macedonia in the department of Mechanical Engineering and Telecommunications. His main research interests lie in the areas of financial derivatives, information systems security, organizational behaviour, and e-banking. Mr. Koskosas holds a degree in Economics, an MSc in Money, Banking and Finance and a PhD in Information Systems and Computing Science.

**Mark Leeney** is a native of Ireland, received his undergraduate degree in mathematical science from University College Dublin, Ireland and his postgraduate degrees (M.A. and Ph.D.) in mathematics from Kent State University, Ohio. He worked for four years post doctorate at Muhlenberg College, Allentown, PA and then returned to Ireland where he taught at University Colleges in Cork and Galway before settling in Letterkenny in the North West. He received an M.Sc. in Computing in 1999 through the training for trainers program.

**Mary Lind** had been a college professor for twenty five years. Her current research interests are in the areas of innovation, computer mediated communication channels, virtual teams, and the impact of technology on firm performance and service quality. She has published in *Organization Science, Management Science, Information Systems Research, Information and Management, IEEE Transactions in Engineering Management, Work Study, International Journal of Quality & Reliability Management,* and the *European Journal of Information Systems*. She is a member of a member of AITP and board member of their EDSIG, DSI, Academy of Management, and the ACM.
**Martin Lipinski** is Director of the Intermodal Freight Transportation Institute at the University of Memphis and Ensafe Professor in the Department of Civil Engineering at the University of Memphis. He received his Bachelors, Masters, and Ph.D. degrees from the University of Illinois, Urbana – Champaign and a certificate in Highway Traffic from Yale University. He has over 30 years experience in transportation engineering. Prior to assuming the Director’s position he served as Chairman of the Civil Engineering Department at the University of Memphis for 15 years. He is a registered engineer in Tennessee and Mississippi and a registered Professional Traffic Operations Engineer (PTOE).

**Adrián Hernández López** is a PhD student at the Computer Science Department of the Universidad Carlos III de Madrid in Spain. His research interests include applied research in People in IT, Human Aspects in IT and Software Process Improvement. He finished his Bachelor’s degree in Computer Science on 2007 and his Master’s degree in IT Science specialized on Software Engineering on 2009 at the Universidad Carlos III de Madrid. He has been working as software engineer in several companies including Telefónica and INDRA.

**Sivagnanasundaram Manikavasagam** is a fulltime research scholar in the Department of Management Studies, NITT. He is pursuing research in Self Service Technologies in Banks.

**Sandy Mehlhorn** is a lecturer of Land Surveying and Geomatics at the University of Tennessee at Martin. Her primary research interests include disaster recovery of highway networks, engineering education and geographic information systems. Her primary teaching areas include surveying methods, global positioning systems and geographic information systems. Dr. Mehlhorn is currently a member of the Institute of Transportation Engineers, American Society of Civil Engineers and is a licensed Professional Engineer in the state of Tennessee.

**San Murugesan** is an adjunct professor in the School of Computing and Mathematics at the University of Western Sydney in Australia, and an independent business, IT, and education consultant. Dr. Murugesan has vast experience in academia and industry, and his area of interests include green computing, Web 2.0 and 3.0, cloud computing, mobile computing, Web engineering, e-business, and information systems. He is Fellow of the Australian Computer Society (ACS), and a distinguished visitor and tutorial speaker of the IEEE Computer Society. He is editor of the *Handbook of Research on Web 2.0, 3.0, and X.0: Technologies, Business, and Social Applications*, Information Science Reference (2009) and Associate Editor for five international journals. Dr. Murugesan served in various senior positions at Southern Cross University and the University of Western Sydney (Australia), Multimedia University (Malaysia) and the Indian Space Research Organization (Bangalore, India).

**Thamaraiselvan Natarajan** has been involved in research, consultancy and training in the area of brand management, marketing metrics, services marketing and strategic marketing. He was awarded doctoral degree and MBA from National Institute of Technology Trichy, India.

**Michael Racer** is an Associate Professor in the Marketing and Supply Chain Management Department at The University of Memphis. His primary research interests are in optimization and heuristic development, including supply chain management applications. His PhD is in Operations Research.
from the University of California at Berkeley. He is currently the Associate Director of the Enterprise Simulation and Optimization Lab, and Associate Director of the Center for Biofuels Energy and Sustainable Technologies.

**Saraswathy R. Aravinda Rajah** is a fulltime research scholar in the Department of Management Studies, NITT. Her management research currently centers on employer branding and talent management strategies in IT industries.

**Shai Rozenes** obtained his PhD in Industrial Engineering from the Coventry University in the United Kingdom. His major field of expertise are: project management, supply chain management and service management. He was involved in international research within European and international research networks. Dr. Rozenes has published in refereed scientific journals and conferences. He is the former chair of Industrial Engineering department at the Ruppin School of Engineering. Dr. Rozenes is also a consultant in industry.

**Arik Sadeh** is a senior lecturer at Holon institute of Technology in Israel. Dr. Sadeh earned his Ph.D. degree at Texas A&M University in 1986. He worked for an American high tech solar energy company in financial and business planning of huge scale projects. He held a research position in the Department of Statistics and Operations Research of the Agricultural Research Organization (ARO). Since 1995, Dr. Sadeh has been a senior member in the academic staff of the Management of Technology Department at the Holon Institute of Technology. He conducts research projects in the disciplines of risk, project and operations management, ethics and e commerce, economics, and finance.

**Nikolaos Sariannidis** is an Assistant Professor at the Department of Financial Applications, School of Management and Economics, Technological Education Institute of Western Macedonia. He holds a B.A. in Statistics and Actuarial Sciences, a Master’s of Science (MSc) in Investment Analysis, and a PhD in International Economic Relations and Development. His research interests lie in the areas of banking, equity markets, derivative securities markets, the foreign exchange market, corporate finance, market microstructure and cognate areas.

**António Trigo** is an Assistant Professor of Computer Science at Coimbra Institute of Accounting and Administration. He has received his PhD in Informatics from the University of Trás-os-Montes e Alto Douro and his research interests include IS management, IS strategy, IS function and organizational impacts of IT/IS solutions. António has more than five years of experience as a software developer having produced IT/IS solutions for such companies as Portugal Telecom, Cabo Verde Telecom, Meditel, Telesp Celular and Portuguese National Institute of Statistics.

**João Varajão** is a Professor of Computer Science at the Engineering Department of the University of Trás-os-Montes e Alto Douro, in Portugal. His current research includes information systems management, software project management and enterprise information systems. He received his PhD and his MSc from the University of Minho, Portugal. He has over one hundred publications, including books, book chapters, refereed publications, and communications at international conferences. He serves as associate editor and member of editorial board for international journals and has served in
several committees of international conferences. He is also the co-founder of CENTERIS – Conference on ENTERprise Information Systems.

**Ofer Zwikael** is a senior lecturer at the Victoria Management School at the Victoria University of Wellington. Dr. Zwikael is also active with the Project Management Institute (PMI), as the Research Director of the New Zealand PMI Chapter Executive Board, and as an accredited Project Management Professional (PMP®). He has led, trained, mentored, and consulted projects and programme groups in dozens of organisations in New Zealand, Asia and Europe, including Motorola, Nestle, Teva, and Nationwide Bank (UK). He has also led workshops, keynote presentations, and seminars around the world.
