About the Contributors

Dimitris Kanellopoulos is a member of the Educational Software Development Laboratory (ESD-Lab) in the Department of Mathematics at the University of Patras, Greece. He received a Diploma in Electrical Engineering and a PhD in Computer Science (Multimedia Communication) from the University of Patras. Since 1990, he has been a Research Assistant in the Department of Electrical and Computer Engineering at the University of Patras and involved in several EU R&D projects. His research interests include: multimedia communication, multimedia networks, intelligent information systems, knowledge representation, and e-learning technologies. He has many publications to his credit in international journals and conferences in these areas. He serves as an editorial board member and reviewer in some refereed journals.

* * *

Antônio J. G. Abelém Antônio is a Doctor in Computer Science by PUC/RJ (2003) and Adjunct Professor of the Federal University of Pará, where he is the Director of the Center of Technology of Information and Communication of this Institution. He participates in the Post-Graduation Program (Master and Doctorate) of the Department of Electrical Engineering (PPGEE) and of the Post-Graduation Program (Master) of the Department of Computer Science (PPGCC) of UFPA, as a Researcher Professor ministering subjects and instructing dissertations and theses. His interests in research are in the areas of architectures of computer networks, selective diffusion (multicast), wireless networks and mobile systems, optical networks, QoS, and QoE. He acted in the work group that researched solutions in Wireless Mesh Network (GT-Mesh, fase 2), passed in the publication of the RNP of 2007/2008, in conjunction with researchers of UFF and of UFPR.

Michael Adeyeye is a Research Fellow at the Cape Peninsula University of Technology, South Africa. He is also a Research Associate at the University of Cape Town, South Africa, where he earned his second Master and PhD degrees. His research interests include Web and multimedia service mobility technologies and context awareness, multimodal and multi-channel access, Web 2.0 and mobile applications, and Next Generation Network (NGN) applications and services. He is a member of the IEEE.

Chrisoula Alexandraki is a Lecturer at the Department of Music Technology and Acoustics of the Technological Educational Institute of Crete and a PhD candidate in Systematic Musicology at the University of Hamburg. Her research interests are in Music Technology and specifically in the fields of Networked Music Performance and Machine Listening. She has participated in a number of National
and European research projects, and she was the coordinator of the DIAMOUSES project. In the past, she has worked as an R&D Engineer at the Institute of Computer Science of FORTH as well as for Sony Research in Brussels. She received an MSc degree in Music Technology from the University of York (UK) in 1998, and a Degree in Physics from the University of Athens (Greece) in 1996.

Laith Al-Jobouri received his BSc in 1995 from the University of Technology, Iraq, and subsequently worked on a variety of wireless and microwave projects. He gained his MSc from the University of Mosul, Iraq, in 2001, and then returned to work as a project manager for national and international companies in the areas of wireless communication and cellular networks. He is now completing his research for a PhD degree at the University of Essex, UK. Laith’s research interests are in video over wireless, channel error coding, and wireless technologies.

Ismail Ali received his MSc degree from the University of Duhok, Iraq, in 2005, in the area of Automatic Verification. He received his BSc degree in Electrical Engineering in 1993 from the University of Mosul, Iraq. Currently, he is pursuing a PhD degree at the School of Computer Science and Electronic Engineering, University of Essex, UK. His current research interests include video error resilience, cross-layer optimization, and mobile video communications.

Alessandro Amirante received both his MSc Degree in Telecommunications Engineering from the University of Napoli “Federico II” in 2007 and his Ph.D. in Computer Engineering and Systems in the fall of 2010. He is currently a Senior Researcher at the Computer Science Department of University of Napoli “Federico II.” His research interests primarily fall in the field of networking, with special regard to Next Generation Network architectures and multimedia services over the Internet.

Artur Arsenio is Assistant Professor in Computer Science at Instituto Superior Técnico, Universidade Técnica de Lisboa. He led Innovation activities at Nokia Siemens Networks Portugal SA up to April 2012. Before, he worked as Senior Solution Architect leading several international R&D teams for Siemens, and as Chief Engineer represented Siemens Networks on IPTV Standardization forums. He collaborated on the creation of the interdisciplinary Institute for Human Studies and Intelligent Sciences in Cascais. He received his PhD in Computer Science from Massachusetts Institute of Technology (MIT) in 2004. He received both his MSc and Engineering Degrees in Electrical and Computer Engineering from Instituto Superior Técnico. He is the inventor of 6 international patent families, and authored/co-authored more than 80 scientific publications. He is the recipient of several scientific and innovation awards. He is the President of the MIT alumni association in Portugal.

Irene Bellver was born in Xàtiva, Valencia (Spain), October 10, 1985. She received her M.Sc. in Technical Engineering in Administrative Data Processing in 2009; she did two specializations: Systems and Network Administration and Web-Based Services and Technologies. During one year, she worked as an intern in a domotics company. Later, she worked on a research fellowship in the Polytechnic University of Valencia. She is currently Programmer Applications Analyst in the Higher Polytechnic School of Gandia. She took part in several investigation projects. She is researching in the communications and remote sensing research group at the Research Institute (IGIC). She has some papers published in international journals, and she is in the local organization of several international conferences.
Paulo Bezerra graduated as a Technologist in Data Processing from the University of Amazonia UNAMA (1997). He has a specialization in Computer Networks completed (1999) at the same university. He earned a Master in Electrical Engineering from Federal University of Pará UFPA (2010) and PhD student of the Graduate Program in Electrical Engineering from the same university. He forms part of the research group on computer networks and multimedia communication (GERCOM) acting on the following topics: management of Quality of Service (QoS) and Quality of Experience (QoE), Resource Reservation, Mobility, and Multimedia Streaming in systems of wireless networks. He is a Professor at the Federal Institute of Education, Science and Technology – IFPA and Professor and Coordinator of Teaching Computer Science, University of Amazonia – UNAMA, and Delegate to the Institutional Brazilian Computer Society – SBC.

László Bokor graduated in 2004 with M.Sc. degree in Computer Engineering from the Budapest University of Technology and Economics (BME) at the Department of Telecommunicatons. In 2006, he got an M.Sc.+ degree in Bank Informatics from the same university’s Faculty of Economic and Social Sciences. He is a Ph.D. candidate at BME, member of the IEEE, member of Multimedia Networks and Services Laboratory (MEDIANETS), and Mobile Innovation Centre Hungary (MIK), where he participates in researches of wireless protocols and works on advanced mobility management related projects (as FP6-IST PHOENIX and ANEMONE, EUREKA-Celtic BOSS, FP7-ICT OPTIMIX, EURESCOM P1857, EUREKA-Celtic MEVICO, FP7-ICT CONCERTO). His research interests include IPv6 mobility, mobile computing, next generation networks, mobile broadband networking architectures, network performance analyzing, and heterogeneous networks.

Tobia Castaldi received his degree in Telecommunications Engineering from the University of Napoli “Federico II,” Italy, in 2006. He is currently a Senior Researcher at the Computer Science Department of the University of Napoli Federico II. The main topic of his research concerns real-time applications for the next-generation Internet with special regard to the IP Multimedia Subsystem (IMS) architecture and services.

Eduardo Cerqueira received his PhD and post-doc in Informatics Engineering from the University of Coimbra (UC) in 2008 and 2009, respectively. He is an Associate Professor at Faculty of Computer Engineering of the University of Para in Brazil. His research interests include Quality of Service, Quality of Experience, Sensor Wireless and Networks, Mobility, and Multimedia. His publications include four books, four patents, and over than 50 papers in national and international refereed journals/conferences. He is founder of a series of workshops on Future Multimedia Networking (FMN). He is coordinating or participating in several national and international projects such as UbiquiMesh, MultiMesh, OTIMA, Universal, and COMAH.

Martina Deplano is a PhD student of the Department of Computer Science at the University of Turin, Italy. She started her PhD program in January 2011, after a Master degree in “Communication in the Information Society” at the University of Turin with a thesis in User Experience Design. Her research interest is related to complex systems and networks, with particular attention to techno-social networks analysis, data visualization, user experience design, interaction design, and human-machine interaction. She is one of the members of the ARCS (Applied Research on Computational Complex Systems) Group in Turin (http://arcs.di.unito.it).
About the Contributors

**Cédric Dromzée** is currently Ph.D. Student at the LIUPPA, the computer science laboratory of University of Pau (France). His thesis titled “Generic Profile for Multimedia Documents Adaptation in Pervasive Computing” is co-supervised by Sébastien Laborie and Philippe Roose. His research interests focus on context adaptation, Semantic Web technologies, Web Apps, multimedia document, profile modeling, open data, and interoperability. Since 2010, he is CEO of AEXIUM SAS, a French start-up that develops a context adaptation framework.

**Martin Fleury** holds a Maths/Physics degree from the Open University, Milton Keynes, UK. He was awarded an MSc in Astrophysics from QMW College, University of London, UK, in 1990, and an MSc from the University of South-West England, Bristol, UK, in Parallel Computing Systems, in 1991. He gained a PhD in Parallel Image Processing Systems from the University of Essex, Colchester, UK. He is currently a Visiting Fellow at the University of Essex, UK, having previously been employed as a Senior Lecturer and Director of Graduates (Research). He is an external examiner for the Arab Open University and for the Open University, UK. Martin has authored or co-authored over two hundred and thirty-five articles and book chapters as well as a book on high-performance computing. His edited book “Streaming Media with Peer-to-Peer Networks” appeared in May 2012. His current research interests center upon video communication over wired and wireless networks.

**Miguel Garcia** was born in Benissa, Alicante (Spain), December 29, 1984. He received his M.Sc. in Telecommunications Engineering in 2007 at Polytechnic University of Valencia and a postgraduate “Master en Tecnologías, Sistemas y Redes de Comunicaciones” in 2008. He is currently a Ph.D. student in the Department of Communications of the Universidad Politécnica de Valencia. He is a Cisco Certified Network Associate Instructor. He is working as a researcher in IGIC in the Higher Polytechnic School of Gandia, Spain. Until 2012, he had more than 45 scientific papers published in national and international conferences, and several educational papers. He had more than 30 papers published in international journals (most of them with Journal Citation Report). Mr. Garcia has been technical committee member in several conferences and journals. He has been in the organization of several conferences. Miguel is Associate Editor of *International Journal Networks, Protocols & Algorithms*. He is an IEEE graduate student member.

**Mohammed Ghanbari** is best known for his pioneering work on two-layer video coding for ATM networks (which earned him an IEEE Fellowship in 2001, now known as SNR scalability in the standard video codecs). He has served as an Associate Editor to *IEEE Transactions on Multimedia*. He has registered for eleven international patents on various aspects of video networking. He is the author of *Video Coding: An Introduction to Standard Codecs*, a book also published by IET press in 1999, which received the year 2000 best book award by the IEE, and the author of *Standard Codecs: Image Compression to Advanced Video Coding*, also published by the IET press in 2003. Prof. Ghanbari has authored or co-authored about 500 journal and conference papers, many of which have had a fundamental influence in this field.

**Dan Grois** received the B.Sc. degree at the Electrical and Computer Engineering Department, Ben-Gurion University (BGU), Beer-Sheva, Israel, 2002. He received the M.Sc. degree at the Communication Systems Engineering field (at the Electro-Optics Unit), BGU, 2006, and the Ph.D. degree at the Communication Systems Engineering Department, BGU, 2011. Starting from 2011, Dan is a senior
post-doctoral researcher at the Communication Systems Engineering Department, BGU. Dan has a significant number of academic publications presented at peer-reviewed international conferences and published by IEEE and Elsevier scientific journals, Wiley publisher, etc. In addition, Dan is a referee of top-tier conferences and international journals, such as the IEEE Transactions in Image Processing, Journal of Visual Communication and Image Representation, Elsevier, IEEE Sensors, SPIE Optical Engineering, etc. Dan is a member of the ACM and a Senior Member of the IEEE. Dan’s research interests include image and video coding and processing, video coding standards, region-of-interest scalability, computational complexity and bit-rate control, network communication and protocols, computer vision, and future multimedia applications and systems.

Ofer Hadar received the B.Sc., the M.Sc. (cum laude), and the Ph.D. degrees from the Ben-Gurion University of the Negev, Israel, in 1990, 1992, and 1997, respectively, all in Electrical and Computer Engineering. From August 1996 to February 1997, he was with CREOL at Central Florida University, Orlando, FL, as a Research Visiting Scientist, working on the angular dependence of sampling MTF and over-sampling MTF. From October 1997 to March 1999, he was Post-Doctoral Fellow in the Department of Computer Science at the Technion-Israel Institute of Technology, Haifa. Currently, he is a faculty member at the Communication Systems Engineering Department at Ben-Gurion University of the Negev. His research interests include: image and video compression, routing in ATM networks, flow control in ATM networks, packet video, transmission of video over IP networks, and video rate smoothing and multiplexing. Hadar also works as a consultant for several hi-tech companies, such as EnQuad Technologies Ltd. in the area of MPEG-4 and Scopus in the area of video compression and transmission over satellite networks. Hadar is a member of the SPIE and a Senior Member of the IEEE.

Sándor Imre was born in Budapest in 1969. He received the M.Sc. degree in Electrical Engineering from the Budapest University of Technology (BME) in 1993. Next, he started his PhD studies at BME and obtained Dr. Univ. degree in Probability Theory and Mathematical Statistics in 1996, Ph.D. degree in Telecommunications in 1999, and DSc degree from the Hungarian Academy of Sciences in 2007. Currently, he is carrying on his activities as Professor and Head of Dept. of Telecommunications. He is Chairman of Telecommunication Scientific Committee of the Hungarian Academy of Sciences. He participates on the Editorial Board of Infocommunications Journal and Hungarian Telecommunications. He was invited to join the Mobile Innovation Centre as R&D director in 2005. His research interest includes mobile and wireless systems, quantum computing, and communications. He has contributions on different wireless access technologies, mobility protocols, security and privacy, reconfigurable systems, quantum computing-based algorithms and protocols.

Zoltán Kanizsai is a member of IEEE. He graduated with M.Sc. degree in Computer Engineering from the Budapest University of Technology and Economics (BME) at the Department of Telecommunications in 2006. Now he is a Ph.D. student at the same department and a member of Mobile Communications and Computing Laboratory (MC2L) and Mobile Innovation Centre of BME. He assists in IPv6, mobility and multimedia related works, e.g. in former FP6-IST ANEMONE and FP7-ICT OPTIMIX projects. His research topics are: anycast-based IPv6 and MIPv6 optimization, Session Initiation Protocol with IMS over native IPv6 3G UMTS networks and computer simulations of wired and wireless IPv6 networks.
About the Contributors

**József Kovács** received his MSc degree in Information Technology at Budapest University of Technology and Economics (BUTE). He had been the System Developer at Ramsys for years and was responsible for system integration management and protocol development as part of the work in the FP6-CVIS project. He has experience in communication protocol stack implementation and open-source OS kernel engineering. His interests are in IP-based Internet technologies with special focus on IPv6 protocols, communications protocol design, protocol and system architectures in special focus on mobility. He participated in several mobility-related research projects (FP6-IST ANEMONE, EUREKA-Celtic BOSS) as part of his job at Mobile Innovation Center (MIK) at BME. Currently, he is lead developer at MTA SZTAKI, working on the FP7-ITSSv6 project.

**Sébastien Laborie** defended his Ph.D. in Computer Science in 2008 at the Université Joseph Fourier (Grenoble, France). His thesis titled “Semantic Adaptation of Multimedia Documents” was jointly co-supervised by Jérome Euzenat (EXMO team, INRIA Grenoble Rhône-Alpes) and Nabil Layaida (WAM team, INRIA Grenoble Rhône-Alpes). His research topics were (and are still) at the crossroad of multimedia document specification and adaptation, spatio-temporal quantitative and qualitative representation and reasoning, and Semantic Web technologies. Since 2010, he has been an Associate Professor at the Laboratoire d’Informatique de l’Université de Pau et des Pays de l’Adour (LIUPPA) working in the T2I team. He published several scientific papers in international conferences (ACM, IEEE, and Springer) and has co-supervised 2 postgraduate students.

**Andrew Laghos** is a Lecturer in the Department of Multimedia and Graphic Arts of the Cyprus University of Technology in Limassol, Cyprus. He holds a PhD from the Centre for Human-Computer Interaction Design of City University (United Kingdom) with specialization in e-learning, multimedia, and social networks. He holds an MSc in Interactive Multimedia from Middlesex University (United Kingdom), a BSc in Computer Science from Webster University (United States of America), and a certificate in Website Design and Development from the same university. His research interests include: online communities and social networks; multimedia; music; human-computer interaction; and communication via the Web.

**Jaime Lloret** received his M.Sc. in Physics in 1997, his M.Sc. in Electronic Engineering in 2003, and his Ph.D. in Telecommunication Engineering (Dr. Ing.) in 2006. He is a Cisco Certified Network Professional Instructor. He worked as a network designer and administrator in several enterprises. He is currently Associate Professor in the Polytechnic University of Valencia. He is the head of the research group “Communications and Remote Sensing” of the Integrated Management Coastal Research Institute, and he is the head of the “Active and Collaborative Techniques and Use of Technologic Resources in the Education (EITACURTE)” Innovation Group. He is the director of the University Expert Certificate “Redes y Comunicaciones de Ordenadores” and the University Master “Digital Post Production.” He is currently Vice-Chair of the Internet Technical Committee (IEEE Communications Society and Internet society) and the Vice-Chair for the Europe/Africa Region of Cognitive Networks Technical Committee (IEEE Communications Society). He has 1 research book, and more than 165 research papers published in national and international conferences, international journals (most of them with Impact Factor), and books. He has 11 educational books, and more than 55 papers published in international conferences, journals, and books of education. He has been the co-editor of 15 conference proceedings and guest
editor of several international books and journals. He is editor-in-chief of the international journal *Networks Protocols and Algorithms*, IARIA Journals Board Chair (8 Journals), and he is associate editor of several international journals. He has been involved in more than 160 program committees of international conferences and in many organization and steering committees. He led many national and international projects. He has been the general chair of SENSORCOMM 2007, UBICOMM 2008, ICNS 2009, ICWMC 2010, and eKNOW 2012, and co-chairman of ICAS 2009, INTERNET 2010, MARSS 2011, IEEE MASS 2011, SCPA 2011, and ICDS 2012. He is the co-chairman of IEEE SCPA 2012 and GreeNets 2012, and chair of MIC-WCMC 2013. He is an IEEE Senior and IARIA Fellow.

**Adalberto Melo** graduated as a Technologist in Data Processing from the University of Amazonia UNAMA (1997). He has a specialization in Computer Networks, completed (1999), at the same university. He is a Master student of the Graduate Program in Computer Science from Federal University of Para in Brazil (UFPA). He has experience in Computer Science with emphasis in Analysis and Development of Systems and Computer Networking. He also forms part of the research group on computer networks and multimedia communication (GERCOM) acting on the following topics: management of Quality of Service (QoS) and Quality of Experience (QoE), resource reservation, mobility, and multimedia streaming in systems of wireless networks.

**Grzegorz Mikołajczak** received his MSc degree in 1992 and his PhD in 2002 from the Faculty of Electrical, West Pomeranian University of Technology. His research interests include digital signal processing and image processing. He has written several papers on digital signal processing.

**Lorenzo Miniero** received his degree in Computer Engineering from the University of Napoli “Federico II,” Italy, in 2006. He is currently a Senior Researcher at the Computer Science Department of the same university. His research interests mostly focus on next generation networks, network real-time applications, and communication protocols, with special emphasis on the related standardization efforts.

**Irina-Delia Nemoianu** received her M.Eng in 2009 from the “Politehnica” University of Bucharest, Romania. She is currently pursuing her Ph.D. degree in the Department of Signal and Image Processing of TELECOM ParisTech, Paris, France. Her research interests include multiple description video coding, mobile ad-hoc networking, and network coding.

**Augusto Neto** is currently an Associate Professor in the Department of Computer Engineering (DETI), Federal University of Ceará (UFC), working mainly in the area of Computer Networks and Distributed Systems. Previously, he was an Associate Professor at the Institute of Informatics (INF) of the Federal University of Goiás (UFG). He graduated from the course Technologist in Data Processing from the University of Amazonia (1996), post-graduated in Computer Networking from Federal University of Pará in Brazil (1998) and obtained his Masters degree in Computer Science from Federal University of Santa Catarina in Brazil (2001). He earned his doctorate at the University of Coimbra (UC), Portugal, Department of Informatics Engineering (DEI) in October 2008. He made postdoctoral fellow at the Institute of Telecommunications, Polo University of Aveiro (Portugal). He is also a member of the Group of Computer Networks, Software Engineering and Systems (GREat) the UFC, and the Institute of Telecommunications Polo University of Aveiro.
About the Contributors

Mersini Paschou has graduated from the Department of Computer Engineering and Informatics of the University of Patras in 2007 and obtained a MSc degree in “Computer Science and Engineering” in 2009. Currently, she is a PhD candidate of the same department. She has been a member of the Graphics, Multimedia, and GIS Laboratory since 2006 and has participated in numerous national and European projects as a Software Engineer. Her research interests focus on the areas of Web services, information systems, Web technologies, and mobile Web applications.

Jakub Pęksiński holds a PhD and has graduated from the Technical University of Szczecin, Electrical division, in 1997. He obtained his EngD in Electrical Engineering in 2004. From 1997, he was employed on West Pomeranian University of Technology (before Technical University of Szczecin), in the Processing Signals and Multimedia Engineering Department. The main course of his study is related to signal processing. He has written several publications on digital signal processing.

Béatrice Pesquet-Popescu received the Engineering degree in Telecommunications from the “Politehnica” Institute in Bucharest in 1995 (highest honours) and the Ph.D. thesis from the Ecole Normale Superieure de Cachan in 1998. In 1998, she was a Research and Teaching Assistant at Universiti Paris XI, and in 1999, she joined Philips Research France, where she worked during two years as a research scientist, then project leader, in scalable video coding. Since Oct. 2000, she is with TELECOM ParisTech (formerly, ENST), first as an Associate Professor, and since 2007 as a Full Professor, Head of the Multimedia Group. She is also the Scientific Director of the UBIMEDIA common research laboratory between Alcatel-Lucent Bell Labs and Institut TELECOM. She was an EURASIP BoG (Board of Governors) member between 2003-2010, and an IEEE Signal Processing Society IVMSPTC (2008-2013) and IDSP TC (2010-2015, Vice-Chair since Jan 1st 2012) member, and an MMSP TC associate member. She is currently a member of the IEEE SPS Awards Board. Beatrice Pesquet-Popescu serves or has served as an Associate Editor for IEEE Transactions on Multimedia, IEEE Transactions on Circuits and Systems for Video Technology, IEEE Transactions on Image Processing, Area Editor for Elsevier Image Communication Journal, and Associate Editor for the Hindawi International Journal of Digital Multimedia Broadcasting Journal, Elsevier Signal Processing. She was or will be a Technical Co-Chair for the PCS2004 conference, and General Co-Chair for IEEE SPS MMSP2010, EUSIPCO 2012, and IEEE SPS ICIP 2014 conferences. In 2006, she was the recipient, together with D. Turaga and M. van der Schaar, of the IEEE Transactions on Circuits and Systems for Video Technology “Best Paper Award.” In April 2012, Usine Nouvelle cited her among the “100 who matter in the digital world” in France. She holds 23 patents in wavelet-based video coding and has authored more than 230 book chapters, journal, and conference papers in the field. She is a co-editor of the book to appear Emerging Technologies for 3D Video: Creation, Coding, Transmission, and Rendering, Wiley, 2013. Her current research interests are in source coding, network coding, scalable, and robust and distributed video compression, multi-view video, and sparse representations.

Nadia N. Qadri was awarded with her PhD degree in 2010 at the University of Essex, UK. She received her M.E(Communication Systems and Networks) and B.E(Computer Systems), from Mehran University of Engineering and Technology, Jamshoro, Pakistan in 2004 and 2002, respectively. She has ten years of teaching and research experience at renowned universities of Pakistan. Dr. Nadia is presently working as Associate Professor and In-charge Telecommunication Engineering Program at CIIT.
Wah Campus. She is also leading a research group of Wireless Networks. Dr. Nadia is author of seven book chapters in different international books, nine international conference papers and Ten reputed international journal papers. Her research interests include video streaming for mobile ad hoc networks and vehicular ad hoc networks, along with P2P streaming.

Simon Pietro Romano received the degree in Computer Engineering from the University of Napoli “Federico II,” Italy, in 1998. He obtained a PhD degree in Computer Networks in 2001. He is currently an Assistant Professor at the Computer Science Department of the University of Napoli. His research interests primarily fall in the field of networking, with special regard to QoS-enabled multimedia applications, network security, and autonomic network management. He is currently involved in a number of research projects, whose main objective is the design and implementation of effective solutions for the provisioning of services with quality assurance over premium IP networks. Simon Pietro Romano is member of both the IEEE Computer Society and the ACM.

Philippe Roose is currently Associate Professor at the LIUPPA Lab, University of Pau. He was chair of several national/international conferences, wrote and co-edited various books. He founded the ALCOOL research team (Software Architecture, Components, and Protocols) and held a first national project called TCAP – Multimedia Data flows on Wireless Sensor Networks. He is now responsible for the French National project MOANO (Models and Tools for Pervasive Applications focusing on Territory Discovery) involving several CNRS Labs and one INRIA Team. His research interests focus on software architecture, autonomic computing, adaptation in the large (document, deployments, and applications). He advised more than 8 postgraduate students and more than 8 PhD students.

Giancarlo Ruffo, PhD, is Associate Professor of Computer Science at the University of Turin, Italy, and Adjunct Professor at Schools of Informatics and Computing, Indiana University. His research interests range over the wide and multidisciplinary research area of complex systems and networks, with particular attention to socio-technical systems. He investigated research issues on social media, Web and data mining, recommendation systems, networking analysis, distributed applications, peer-to-peer systems, security, and micro-payment systems. He is the principal investigator of ARCS Group in Turin (http://arcs.di.unito.it), and he is leading several ongoing projects. He has published about 40 peer-reviewed papers in international journals and conferences.

Evangelos Sakkopoulos was born in Greece in 1977. He holds a PhD from the Computer Engineering and Informatics Department, University of Patras, Greece, 2005. He has received the M.Sc. degree with honors and the diploma of Computer Engineering and Informatics at the same institution. His research interests include software engineering, information systems, mobile Web, Web services, Web engineering, Web usage mining, Web-based education, and intranets. He has more than 40 publications in international journals and conferences in these areas.
Melih Soydemir is pursuing a MS at the Electrical and Electronics Engineering Department at Bahçeşehir University, Turkey. His research interests include embedded systems, medical image analysis, and search and retrieval systems. Currently, he is working in a Marie Curie Project under the supervision of Dr. Unay towards creating a medical image retrieval platform. He earned a BS degree in Electronics Engineering (2009) from Sabancı University, Turkey.

Michał Stefanowski started his Master course in 1995 and occupied a Research Assistant position at the Chair of Signal Processing and Multimedia Engineering in the Szczecin University of Science. He holds a PhD in Electrical Engineering, Szczecin University of Science, Poland, 2005. After obtaining his PhD in “Estimation of the Amount of Noise in Images using Finite Differences,” he suspended research activities at the university and joined Tieto Company, where he had a chance to develop his competences in embedded software development, especially in the telecommunication field (broadband access networks, radio networks). From 2006, he is Line Manager at Tieto Poland with responsibility for human resources management, technical project support, and business development.

Jesús Tomás graduated in Computer Science in 1993 at Polytechnic University of Valencia, getting the best ratings. He finished his Doctoral thesis in 2003. He worked as Software Programmer in several enterprises and freelance. From 1993, he is an Associate Professor at Polytechnic University of Valencia. He is member of the Integrated Management Coastal Research Institute. His research focuses on statistical translation, artificial intelligence, pattern recognition, and sensors networks. He has published multiple articles in national and international conferences and has multiple articles in international journals (more than 14 of these are included in the Journal Citation Report). He has been involved in several research projects related to public and private pattern recognition and artificial intelligence applied to multiple subjects (4 of them as principal investigator). He has been technical committee member in several conferences and journals. He is co-president of the International Congress INTERNET 2010.

Athanasios Tsakalidis, Computer-Scientist, Professor of the University of Patras. Born 27.6.1950 in Katerini, Greece. Studies: Diploma of Mathematics, University of Thessaloniki in 1973; Diploma of Informatics in 1980; and Ph.D. in Informatics in 1983, University of Saarland, Germany. Career: 1983-1989, Researcher in the University of Saarland. He has been student and cooperator (12 years) of Prof. Kurt Mehlhorn (Director of Max-Planck Institute of Informatics in Germany). 1989-1993 Associate Professor, and since 1993 Professor in the Department of Computer Engineering and Informatics of the University of Patras. 1993-1997 and 2001-today, Chairman of the same department. 1993-today, member of the Board of Directors of the Research Academic Computer Technology Institute (RACTI); 1997-today, Coordinator of Research and Development of RACTI; 2004-today Vice-Director of RACTI. He is one of the contributors to the writing of the *Handbook of Theoretical Computer Science* (Elsevier and MIT-Press 1990). He has published many scientific articles, having a special contribution to the solution of elementary problems in the area of data structures. Scientific interests: data structures, computational geometry, information retrieval, computer graphics, data bases, and bio-informatics.
Giannis Tzimas is currently an Assistant Professor in the Department of Applied Informatics in Management and Finance of the Technological Educational Institute of Mesolonghi. Since 1995, he is also an Adjoint Researcher in the Graphics, Multimedia, and GIS Lab, Department of Computer Engineering and Informatics of the University of Patras. He graduated from the Computer Engineering and Informatics Department in 1995 and has participated in the management and development of many research and development projects funded by national and EU resources, as well as the private sector. He also works in the Internet Technologies and Multimedia Research Unit of the Research Academic Computer Technology Institute (RACTI), as a Technical Coordinator, from 1997 until now. His research activity lies in the areas of Web engineering, Web modelling, bioinformatics, Web-based education, and intranets/extranets. He has published a considerable number of articles in prestigious national and international conferences and journals.

Devrim Unay is an Assistant Professor in the Department of Biomedical Engineering at Bahçeşehir University, Turkey. His research interests include medical image analysis, content-based information retrieval, pattern recognition and computer vision, machine learning, and machine vision and quality inspection. Unay has a PhD in Applied Sciences from Faculté Polytechnique de Mons, Belgium, and an MS in Biomedical Engineering, and a BS in Electrical and Electronics Engineering from Boğaziçi University, Turkey. During his post-doctoral years, Unay worked at Philips Research Europe as a Marie Curie Fellow. He was the co-guest editor of the special issue on “Model Selection and Optimization in Machine Learning” in the *Machine Learning Journal* (2011). He has served on the technical program committee of MMEDIA’09, ICPR’10, SIU’12, and co-organized the workshop on “medical multimedia analysis and retrieval” in ACM’11. Unay has written more than 50 publications and has 2 patents.

Manolis (Emmanouil) Viennas was born in Athens, Greece, in 1985. He received the Diploma of Computer Engineering and Informatics in 2008 and the Master degree in Computer Science and Engineering in 2010, both from University of Patras, Greece. His research interests lie in the areas of Web engineering, software engineering, mobile applications, and information systems. He is the author of more than 10 technical papers published in international journals and conferences. He is a member of the Institute of Electrical and Electronics Engineers (IEEE), the Association for Computing Machinery (ACM), the Technical Chamber of Greece, and the Hellenic Association of Computer Engineers and Communications.

Panagiotis Zervas is a Lecturer at the Department of Music Technology and Acoustics of the Technological Educational Institute of Crete. He received his PhD from the Wire Communication Lab, Department of Electrical Engineering and Computer Technology, Patras University, Greece, in 2008, and his MSc degree in “Signal and Image Processing, Theory, Applications,” from the Department of Computer Engineering, Patras University, Greece, in 2000. His research interests are in the fields of speech processing and music information retrieval. In the past, he has worked as an R&D Engineer at ATMEL HELLAS S.A and has participated in a number of national and European research projects.
