About the Contributors

**Patricia Ordóñez de Pablos** is a professor in the Department of Business Administration in the Faculty of Economics and Business of the University of Oviedo, Spain. Her teaching and research interests focus on the areas of strategic management, knowledge management, intellectual capital measuring and reporting, organizational learning, human resources management and IT. She serves as Executive Editor of the International Journal of Learning and Intellectual Capital and the International Journal of Strategic Change Management. She also serves as Associate Editor of Behaviour and Information Technology.

**Miltiadis D. Lytras** is lecturer at the American College of Greece. His research focuses on Semantic Web, knowledge management and e-learning, with many publications in these areas. He has co-edited 25 special issues in International Journals (e.g., IEEE Transaction on Knowledge and Data Engineering, IEEE Internet Computing, IEEE Transactions on Education, Computers in Human Behavior, Interactive Learning Environments, Journal of Knowledge Management, Journal of Computer Assisted Learning, etc.).

**Jose Emilio Labra Gayo** obtained his PhD in Computer Science Engineering in 2001 at the University of Oviedo with distinction. Since 2004, he is the Dean of the School of Computer Science Engineering at the University of Oviedo and he is also the main researcher of the Semantic Web research group WESO. The group collaborates is focused on practical applications of semantic web and linked open data and has been involved in several projects with industrial partners and public administrations. Apart from teaching at the University of Oviedo, He has been regularly invited to teach in several doctorate or postgraduate courses in the Universidad Técnica Federico Santa María, in Chile, or the Universidad Pontificia de Salamanca, in Madrid, Spain. His research interests are Semantic Web technologies and Programming Languages and Web Engineering, where he has published a number of
papers in selected conferences and journals. He participates in several committees, such as the European Semantic Web Conference, the International Conference on Web Engineering, and the International Workshop on Social Data on the Web.

* * *

**Jose María Alvarez** received a Master’s Degree in Computer Science (2007) and a Bachelor’s Degree in Computer Science (2005) from the University of Oviedo. In June 2008, he was rewarded with the “Best Final Degree Project in Computer Science” by the Official Association of Computer Engineers of Asturias (Spain) thanks to his project “Activation of concepts in ontologies through the Spreading Activation Technique”. From 2005 to 2010, he worked at the R&D Department in the Semantic Technologies area within CTIC Foundation; more specifically, he worked in projects related to Semantic Web services, rule based systems, search systems, linked data, and others. During this stage, he participated in several research projects in different research programmes: PRAVIA project-PCTI Asturias cod. IE05-172 (Regional scope), PRIMA-Plan Avanza-cod. TSI-020302-2008-32 (National scope) and ONTORULE-FP7 cod. 231875 (European scope). He now holds a position as Assistant Professor at the Department of Computer Science within the University of Oviedo and he is also senior researcher at WESO Research Group (University of Oviedo). He has defended his PhD dissertation (2012) about e-procurement and Linked Data supervised by Dr. José Emilio Labra Gayo.

**Lucas de Ramos Araújo** holds a degree in Computer Science from the Federal University of the Juiz de Fora (UFJF) in Brazil, and now works with commercial semantic web applications.

**Elena Baralis** has been a full professor at the Dipartimento di Automatica e Informatica of the Politecnico di Torino since January 2005. She holds a Master’s Degree in Electrical Engineering and a PhD in Computer Engineering, both from Politecnico di Torino. Her current research interests are in the field of database systems and data mining; more specifically on mining algorithms for very large databases and sensor/stream data analysis. She has published over 80 papers in international journals and conference proceedings. She has served on the program committees or as area chair of several international conferences and workshops, including VLDB, IEEE ICDM, ACM SAC, DaWak, ACM CIKM, and PKDD.

**Giulia Bruno** holds a Master’s Degree and a PhD in Computer Engineering from Politecnico di Torino, Italy. She is currently working in the field of database and data mining. Her activity is focused on anomaly detection in temporal and medical
databases and on geographical information system development. She is also investigating data mining techniques for clinical analysis, particularly the extraction of medical pathways from electronic patients’ records and classification of physiological signals to detect unsafe events in patients’ monitoring, and microarray data analysis to select genes relevant for tumor classification.

**Tania Cerquitelli** has been an assistant professor at the Dipartimento di Automatica e Informatica of the Politecnico di Torino since October 2011. She received a Master’s Degree in Computer Engineering and a PhD from the Politecnico di Torino in Italy, and a Master’s Degree in Computer Science from the Universidad De Las Américas Puebla. Her research interests include the design of innovative algorithms to efficiently perform large-scale data mining, novel and efficient data mining techniques for sensor readings, and innovative algorithms to extract high level abstraction of the mined knowledge (e.g., generalized association rules). She has been a teaching assistant in different databases and data mining courses at the Politecnico di Torino since 2004-2005.

**Silvia Chiusano** has been an assistant professor at the Dipartimento di Automatica e Informatica of the Politecnico di Torino since January 2004. She holds a Master’s Degree and a PhD in Computer Engineering, both from Politecnico di Torino. Her current research interests are in the areas of data mining and database systems, in particular integration of data mining techniques into relational DBMSs, and classification of structured and sequential data.

**Alessandro Fiori** received a European PhD from Politecnico di Torino, Italy. He has been a project manager at the Institute for Cancer Research and Treatment (IRCC) of Candiolino, Italy since January 2012. His research interests are in the field of data mining, in particular bioinformatics and text mining. His activity is focused on the development of information systems and analysis frameworks oriented to the management and integration of biological and molecular data. His research activities are also devoted to text summarization and social network analysis.

**Dominik Fiser** is a former student in the Department of Software Engineering, Charles University, Prague. In his master’s thesis, he designed framework for assisted annotation of websites. His interests include searching with Semantic information, web resource annotations, and web development.

**María N. Moreno García** is Associate Professor at the University of Salamanca in Spain. She is the head of the Data Mining Research Group of the University of Salamanca. She has published more than 100 papers in international journals and
About the Contributors

cconference proceedings. She is co-author of several book chapters and has co-edited national and international books. She is a reviewer of journals indexed by ISI Journal citation reports and she has been member of the scientific committee of numerous international conferences. Her research interests are in the areas of Web Mining, Semantic Web and software engineering.

Alberto Grand has been a PhD student at the Dipartimento di Automatica e Informatica of the Politecnico di Torino since January 2010. He holds a Master’s Degree in Computer Engineering from Politecnico di Torino and a Master’s Degree in Computer and Electrical Engineering from the University of Illinois, Chicago. His current research interests are in the field of data mining, with particular emphasis on large-scale data mining. He is also currently involved in the development of information systems and analysis frameworks oriented to the management and integration of biological and molecular data at the Institute for Cancer Research and Treatment (IRCC) of Candiolo, Italy.

Antonio Garrote Hernández is a PhD student at the Universidad de Salamanca. His main research area is linked data APIs, trying to combine the architectural principles of RESTful architectures and the core concepts of linked data and Semantic Web technologies. He has also been involved in the design and implementation of open source libraries like RDFStore-JS, making it possible for developers to apply linked data technologies in their own web projects. He has presented different papers at linked data and REST design conferences and workshops, such as W3C’s Web Conference or the First International Workshop on RESTful Design.

José Emilio Labra has been the Associate Professor in the Department of Computer Science at the University of Oviedo since 1992. In 2001, he obtained a PhD in Philosophy in Information and Computer Science with the dissertation “Developing Modular Language Processors through Reusable Semantic Specifications.” This research was awarded with the Extraordinary Doctorate Award. Since 2004, he has been the Dean of the Computer Engineering School at the University of Oviedo. From a research point view, he is focused on (but not restricted to) the application and development of innovative solutions with Semantic technologies. In this context he is the main researcher of the WESO Research Group at the Department of Computer Science and he is involved in several research projects at different scopes: regional, national and European. Finally, he is the author of more than 50 scientific publications and member, reviewer, and part of the program committee of the main conferences and journals in his research area like the International Conference on Web Engineering, Social Data on The Web, Workshop on Web Services or ACM. He is currently editor of different special issues of the IGI Global journal.
Matthias Lange studied computer science at the Otto-von-Guericke University in Magdeburg, Germany. In 1999, he received a Master’s Degree. In 2006 he received a Ph.D. in Computer Science from the Otto-von-Guericke University in Magdeburg. Between 1999 and 2001 he worked as scientific assistant at the University Magdeburg in the Institute of Technical Information Systems in Bioinformatics research projects with focus to database integration. Between 2002 and 2006 he worked at Leibniz Institute of Plant Genetics and Crop Plant Research Gatersleben (IPK), Germany, as Bioinformatician in research projects with focus to information systems and data networks. Since 2007 he has worked as postdoc in the research group Bioinformatics and Information Technology at the same institute. His research focus is information retrieval, search engine technology, and primary data management. Furthermore, he coordinates the central lab information systems in the IPK, is responsible for IPK datacenter activities in the frame of the DataCite consortium, and works in the EU research project to build up a trans-national data infrastructure for plant genomics data.

Ivo Lasek is a PhD student at the Department of Software Engineering, Charles University, Prague, and Faculty of Information Technology, Czech Technical University, Prague. He is a member of SWING Research Group. His research interests include Semantic Web and Linked Data and Information Filtering (particularly news filtering). He is a co-founder of a popular Czech Web price comparison portal.

Salvador Lima received his PhD in Computer Science from the Universidade Portucalense Infante D. Henrique do Porto (Portugal) in 2011 and earned his M.S. in Computer Science from the Universidade Nova de Lisboa (Portugal) in 1995. He is a Professor Adjunto in the Escola Superior de Tecnologia e Gestão of the Instituto Politécnico de Viana do Castelo, having taught several disciplines in the area of software engineering, namely algorithms, data structure, programming languages, and modeling. His interest areas lie in software engineering, Web engineering, Semantic Web, ontological engineering, Semantic technologies in tourism and social sciences in the context of new technologies.

Hendrik Mehlhorn studied bioinformatics at the Martin Luther University in Halle-Wittenberg, Germany, and is currently a PhD candidate there. His main research interests aim at pattern recognition, sequence analysis, and the integration of biological networks. Currently, he is working as a research associate at the Leibniz Institute of Plant Genetics and Crop Plant Research Gatersleben (IPK Gatersleben), Germany.

Rubens Nascimento Melo is a Senior Professor and Researcher in the field of Databases at the Computer Science Department of the Pontifical Catholic University of Rio de Janeiro, PUC-Rio. He holds a B.S. in Electronic Engineering (1968), a
About the Contributors

M.S. (1971), and a PhD (1976) in Computer Science from the Air Force Institute of Technology (ITA) in Sao Paulo. Currently, he is Associate Professor at PUC-Rio, where he leads the Database Research Lab (TecBD). One of his current interests is the application of Database Technology to distance learning. In this field he has also served as Director of the Centre of Distance Education under the Vice-Rectory for Academic Affairs of PUC-Rio.

José Moreira received his PhD in Computer Science and Networks from the École Nationale Supérieure des Télécommunications de Paris (France) and the Faculdade de Engenharia da Universidade do Porto (Portugal) in 2001. He is currently an Assistant Professor at the Department of Electronics, Telecommunications and Informatics of the Universidade de Aveiro and a researcher at IEETA, a non-profit R&D institute affiliated with the same university. His background includes programming languages, data structures, and databases. His main research interests cover spatiotemporal database systems and geographical information systems. He is also interested in Web Semantics and spatiotemporal data mining.

Ahsan Morshed is an Information Management Specialist in the Knowledge and Capacity for Development (OEKC) Group at the Food and Agriculture Organization of UN (FAO). Before joining FAO, Mr. Morshed was a PhD student at the University of Trento in Italy, a Research Developer at ECTRL Solutions in Trento, Italy, as well as an Assistant Programmer at the Bangladesh Open University, in Gazipur, Bangladesh. During his career, Mr. Morshed has focused on semantic web technology, ontologies, taxonomies, thesauri, information retrieval, and text classification, especially as it affects digital libraries and Linked Open Data. He is the author of several scientific papers. His current work addresses the question of “KOS mapping” within the agricultural related information domain, in particularly at FAO addressing the AGROVOC thesaurus and the AGROVOC Concept Server. Mr. Morshed has won numerous awards, including the Graduate Scholarship from the University of Trento, Italy, as well as the Summer School Scholarship from the Free University of Bozen-Bolzano in Italy, and also the Junior Scholarship from the Ministry of Primary Education in Bangladesh. He is a member of the Institute of Engineers in Bangladesh, an associate member of the Bangladesh Computer Society, as well as a member of the program committee DESWeb2010 STAKE 2011, MTSR2011, SerSy2012. Mr. Morshed earned a B.S. in Computer Science and Engineering from the Ahsanullah University of Science and Technology in Bangladesh and a M.S. in Engineering and Information Management System (EMIS) from the Royal Institute of Technology in Sweden.
About the Contributors

**Martin Necasky** is an assistant professor at the Department of Software Engineering, Charles University, in Prague. He is a member of the SemWeX and XRG research group. His research interests include conceptual modeling, integrity constraints, data semantics and similarity, data integration, data evolution, and adaptability and service-oriented architectures.

**Ladislav Peska** is a PhD student in Software Engineering at Charles University, in Prague. His research interests include recommender systems—design, algorithms, usage, testing, user preferences and implicit user feedback, social networking, and the process of Web semantization.

**Luis Polo** has been the coordinator of the Semantic Technologies Unit in CTIC since 2007. His activity involves the management of CTIC participation in research projects at a national and European level (especially FP7 calls), and the analysis and design of Semantic-oriented solutions for business needs based on W3C standards. He has also participated in the Rule Interchange Format W3C Working Group. Furthermore, he is very active in dissemination activities with 20 publications focused on the application of Semantic technologies to problems in the industry.

**Alejandro Rodríguez-González**, PhD, is a Post-Doctoral Researcher of Bioinformatics Group at the Centre for Plant Biotechnology and Genomics (UPM-INIA), Polytechnic University of Madrid. His main research interests are the Semantic Web, artificial intelligence, and biomedical informatics field, with a particular interest in the creation of medical diagnosis systems. He has a degree in Computer Science, a M.S. in Computer Science and Technology in the Specialty of Artificial Intelligence, a M.S in Engineering Decision Systems and a PhD in Computer Science. He has published several papers in international journals and edited various special issues in high quality journals. He also has participated in the organization of several workshops in top international conferences such as the International Semantic Web Conference, the Extended Semantic Web Conference, and others.

**Emilio Rubiera** is a philologist at the Semantic Technologies Unit within CTIC Foundation. Since 2005 he has worked on projects related to Semantic Web technologies, documental databases, rule based systems, search systems, linked data, and others. He is also author of several publications in the Semantic Web area, including conferences, journals, and books. Currently, he is developing his PhD about lexical resources and linked data.
About the Contributors

Kamaljeet Sandhu is a Senior Lecturer of Accounting and Information Systems at the School of Business, Economics and Public Policy of the University of New England. He earned his PhD in Information Systems from Deakin University in Melbourne. His teaching and research expertise are in electronic services and services management at universities, corporate governance, accounting information systems, management accounting, asset management, and e-learning.

Uwe Scholz studied Computer Science in Köthen/Anhalt and Magdeburg, Germany. In 1995 he got his Master’s Degree in Computer Science from the Otto-von-Guericke-University in Magdeburg, Germany. In 2002 he earned a PhD in Computer Science from the Otto-von-Guericke-University in Magdeburg. Between 1995 and 1996 he worked as part of the scientific staff in a third-party funded project of the Country Saxony-Anhalt “New Production Systems - Experimental Factory”, Institute of Technical and Business Information Systems at Otto-von-Guericke-University. From 1996 to 2001, he was employed as part of the scientific staff at the research group in Bioinformatics/Medical Informatics, at the Institute of Technical and Business Information Systems. Between 2001 and 2003 he worked as Bioinformatician at Leibniz Institute of Plant Genetics and Crop Plant Research in Gatersleben, Germany. Since 2003 he has been the head of the research group Bioinformatics and Information Technology at the same institute. In his research he worked on the development of molecular biological databases and data integration of different data domains (e.g., sequence, marker, transcript, metabolic, or phenotypic information). The sequence analysis is an additional research interest of his. He worked in the assembly of next-generation sequencing data of crop plant genomes and transcript based sequences.

Falk Schreiber obtained a PhD (2001, Dr. rer. nat.) and a habilitation in Computer Science (2006) from the University of Passau in Germany. –From 2001 to 2002 he worked as a Research Fellow and Lecturer at the University of Sydney in Australia. Since 2003, he has been head of a research group at the Leibniz Institute of Plant Genetics and Crop Plant Research (IPK) in Gatersleben, Germany. In 2007, he was appointed Professor of Bioinformatics at the Martin Luther University in Halle-Wittenberg, Germany and Bioinformatics Coordinator at the IPK. Falk Schreiber’s research focuses on the modeling, analysis, and visualization of biological networks in their spatial and temporal embedding as well as the visual analytics of multimodal and multidimensional biological data.

Sean Wolfgang Matsui Siqueira is an Assistant Professor of Applied Informatics at the Federal University of the State of Rio de Janeiro (UNIRIO) in Brazil, where he teaches courses in databases, information systems, and Semantic Web.
He holds a M.S. (1999) and a PhD (2005) in Computer Science, both from the Pontifical Catholic University of Rio de Janeiro (PUC-Rio) in Brazil. His research interests include knowledge representation, semantic web, ontologies, information integration, semantic models, user models, e-learning, social web, and music information systems. He has experience in the computer science area, with focus on information systems and technology-enhanced Learning. He has participated in some international research projects and has published more than 70 papers for conferences, journals, and books.

**Jairo Francisco de Souza** is an Assistant Professor at of Computer Science at the Federal University of the Juiz de Fora (UFJF) in Brazil, where he teaches courses in Software Engineering and Semantic Web. He holds a M.S. (2007) from Federal University of Rio de Janeiro (UFRJ) and he is a PhD candidate in the Pontifical Catholic University of Rio de Janeiro (PUC-Rio), Brazil, both in the computer science area. His research interests include knowledge representation, Semantic Web, ontologies, information integration, and semantic models.

**Peter Vojtas** is a Computer Science professor in the Department of Software Engineering at Charles University. He also has a M.S. Suma Cum Laude in Theoretical Cybernetics and a PhD in Mathematical Logic from Charles University. He got Professor Titulaire in Mathematical Informatics from the President of Slovak Republic and Doctor of Science from Czech Academy of Science. His research interests include computational intelligence, connecting Web to the user, process of the Web semantization, modeling, learning, querying user preferences uncertainty and preferences in databases and indexes, among others. He was advisor of more than 10 PhD students who successfully defended their theses.
