About the Contributors

John Wang is a Professor in the Department of Information & Operations Management at Montclair State University, USA. Having received a scholarship award, he came to the USA and completed his PhD in Operations Research from Temple University. Due to his extraordinary contributions beyond a tenured full Professor, Dr. Wang has been honored with a special range adjustment in 2006. He has published over 100 refereed papers and seven books. He has also developed several computer software programs based on his research findings. He is the Editor-in-Chief of International Journal of Applied Management Science, International Journal of Operations Research and Information Systems, and International Journal of Information Systems and Supply Chain Management. He is the Editor of Data Warehousing and Mining: Concepts, Methodologies, Tools, and Applications (six-volume) and the Editor of the Encyclopedia of Data Warehousing and Mining, 1st (two-volume) and 2nd (four-volume). His long-term research goal is on the synergy of operations research, data mining, and cybernetics.

Mohammad Mourhaf AL Asswad is a PhD candidate at the School of Information Systems Computing and Mathematics, Brunel University. He holds an MRES (Master of Research) Degree from Brunel University and a bachelor of Control and Electronic Engineering from Aleppo University, Syria. His research interests focus on the adoption of ontologies for the development of flexible and adaptable software and Web applications. Moreover, he is interested in Linguistic analysis and its employment in software applications. Mohammad has published and presented his work in several international conferences. Mohammad is a program committee member of the WEBIST International Conference.

Leonelo Dell Anhol Almeida is a PhD candidate on Awareness in Collaborative Systems at the Institute of Computing, University of Campinas, Brazil. He obtained his master’s degree in Computer Science from Federal University of Paraná. His research interests involve awareness in collaborative systems, Human-Computer Interaction, Universal Design, and Accessibility. He is engaged in multidisciplinary projects that investigate the barriers faced by people while using computers considering scenarios of vast economical and social diversity as the Brazilian. From the participation in those projects and from his doctoral research he recently published works in international conferences (e.g. International Conference on Informatics and Semiotics in Organisations’09, HCI International’09), in national journal (Brazilian Journal of Computer Science in Education), and a book chapter focused on web accessibility.
Costin Bădică received the M.Sc. and Ph.D. in Computer Science from University of Craiova, Romania in 1990 and 1999, respectively. In 2006 he also received the title of Professor of Computer Science from University of Craiova. He is currently with the Department of Software Engineering, Faculty of Automatics, Computers and Electronics of the University of Craiova, Romania. During 2001 and 2002 he was Post-Doctoral Fellow with the Department of Computer Science, King’s College London, United Kingdom. His current research interests are at the intersection of Artificial Intelligence, Distributed Systems and Software Engineering. He authored and co-authored more than 100 publications related to these topics as journal articles, book chapters and conference papers. He has prepared special journal issues and co-edited 4 books in Springer’s Studies in Computational Intelligence series. He co-initiated and he is co-organizing the Intelligent Distributed Computing – IDC series of conferences that is being held yearly. He is member of the editorial board of 4 international journals. He also served as PC member of many international conferences.

M. Cecília C. Baranauskas is Professor at the Institute of Computing, UNICAMP, Brazil. She received a B.Sc. and M.Sc. in Computer Science and a Ph.D. in Electrical Engineering at UNICAMP, Brazil. She spent a sabbatical year in the UK, as Honorary Research Fellow at the Staffordshire University and as a Visiting Fellow at the University of Reading, working with Prof. Kecheng Liu’s Applied Informatics with Semiotics Lab (2001-2002). She also received a Cátedra Ibero-Americana Unicamp-Santander Banespa to study accessibility issues on software engineering at Universidad Politécnica de Madrid (2006-2007). Her research interests have focused on human-computer interaction, particularly investigating different formalisms (including Organizational Semiotics and Participatory Design) in the analysis, design and evaluation of societal systems. She is leading several projects investigating the use of these formalisms in design contexts of e-Citizenship and e-Inclusion. Former IFIP TC13 representative, currently she is member of the BR-CHI (an ACM SIGCHI local chapter) Executive Council and member of the Special Committee for HCI at SBC (Brazilian Computing Society).

Sanghamitra Bhattacharyya is an Associate Professor in Organizational Behaviour and Human Resource Management in the Department of Management Studies, Indian Institute of Technology, Madras. Her areas of interest include, among others, group and team dynamics, management of organizational change, cross cross-cultural management issues, international human resource management practices, and growth strategies of BPO sector in India. She has published widely in various national and international peer reviewed journals and presented papers at conferences both in India and abroad. In addition to her academic activities, Dr. Bhattacharyya has undertaken consultancy projects with various Indian corporate in Chennai and Kolkata. She is a metallurgical engineer from Bengal Engineering College, and obtained her doctoral degree (FPM) from Indian Institute of Management Calcutta in the area of Organizational Behaviour. Prior to joining academics, Dr. Bhattacharyya has had industry experience of nearly ten years at various organizations (both manufacturing and service sectors) in public and private sector undertakings in India.

Vânia Paula de Almeida Neris is a PhD. candidate in Computing Science at the University of Campinas (UNICAMP), Brazil and was a visitor student at the Informatics Research Centre (IRC) at the University of Reading, UK. She graduated in Computer Engineering and received a Master degree in Computer Science at the Federal University of São Carlos (UFSCar), Brazil. Her actual research
focus on the design of interactive systems, especially tailorable user interfaces. She has been publishing in several journals (*e.g.* Scientometrics, ACM E-Learn magazine, Brazilian Journal of Computer Science in Education) and international conferences (*e.g.* IFIP TC13 Conference on Human-Computer Interaction - INTERACT, Human-Computer Interaction International - HCII, International Conference on Informatics and Semiotics in Organisations - ICISO, International Conference on Enterprise Information Systems - ICEIS).

Sergio de Cesare is currently a Lecturer and Director of Postgraduate Studies in the Department of Information Systems and Computing at Brunel University. Sergio’s work focuses on the adoption of ontologies in software engineering as a means to develop and evolve information systems that are increasingly flexible and adaptive to change. His research interests relate to the foundational principles and concepts of semantic modelling, the role of semantic models in making sense of real-world domain knowledge and the development of ontology-based development tools and techniques. Sergio has over 50 peer-reviewed publications in leading journals and conferences and has organised several international events related to modelling in software engineering including a series of ACM OOPSLA workshops on the general theme of ‘Semantics in Systems Development’. Sergio is also currently the Managing Editor of the European Journal of Information Systems.

Leonardo Cunha de Miranda is a PhD. candidate in Computer Science at the University of Campinas (UNICAMP), Brazil, He received a Master degree in Computer Science at the Federal University of Rio de Janeiro (UFRJ), Brazil. His actual research focus on Interaction Design in Interactive Digital Television (iDTV), especially building a new physical artifact of interaction with iDTV. He has been publishing in several international conferences, *e.g.*, International Conference on Informatics and Semiotics in Organisations (ICISO), International Conference on Human-Computer Interaction (HCII), International Conference on Interfaces and Human Computer Interaction (IHCI), IADIS International Conference on WWW/Internet (ICWI), and Latin American Conference on Human-Computer Interaction (CLIHC).

José Figueiredo, Professor in the Engineering and Management Department of IST – Lisbon Technology Institute – Technical University of Lisbon, is an Electronic Engineer with an MBA in Information Management and a PhD in Industrial Engineering. Always being involved in the university teaching he started two small companies in the information technologies sector. He currently teaches Project Management and Information Management. He is currently the Vice-President of the research unity of the Engineering and Management Department in IST and the coordinator of the department’s master course in industrial management (MEGI). He published several papers in international journals, book chapters, and conference proceedings.

Dieter Gstach studied Economics and Mathematics at the University of Vienna where he received his doctoral degree in 1993 after a postdoctoral education at Vienna Institute of Advanced Studies. Since 1991 he holds the position of an Assistant Professor at Vienna University of Economics and Business Administration where he was tenured 2001. His research, documented in many publications in various international scholarly journals, covers, amongst other areas, methodological and empirical issues in efficiency and productivity measurement, the macroeconomic role of housing markets, input-output analysis and property taxation schemes. This is for most of which he also serves as regular referee. Furthermore, he does consulting for various governmental and semi-private institutions.
Göran Goldkuhl, PhD, is professor in information systems at Linköping University and guest professor at Stockholm University, Sweden. He is the director of the Swedish research group VITS (www.vits.org), consisting of 25 researchers. He has published several books and more than 150 research papers at conferences, in journals and as book chapters. He is currently developing a family of theories and methods, which all are founded on socio-instrumental pragmatism; theories as Workpractice Theory, Business Action Theory, Information Systems Actability Theory; and methods for business process modeling, problem analysis, e-service design, user-interface design, information modeling and IS evaluation. He has a great interest in pragmatic and qualitative (interpretive) research methods and he has contributed to the development of Multi-Grounded Theory, (a modified version of Grounded Theory) and Practical Inquiry (a special kind of action research). He has been active in international research communities such as Language Action Perspective (LAP), Action in Language, Organisations and Information Systems (ALOIS), Enterprise Interoperability, Organisational Semiotics and AIS SIGPrag. He is main responsible for PhD education in information systems at Linköping University and has been the supervisor for 20 PhD dissertations and 41 Licentiate theses. At the moment he is responsible for and actively working with several e-government research projects.

Geoffrey Greenfield is a doctoral student in Information Systems at the UQ Business School, The University of Queensland. Geoffrey has over 25 year’s business experience and applies his knowledge and experience in his volunteer role as the President of a NFP organisation. His research interests include technology acceptance by NFP workers, trust development, attitude development, and computer-mediated communication.

Elaine Cristina Saito Hayashi is a PhD Candidate in Computing Sciences at the Institute of Computing at University of Campinas (UNICAMP), Brazil. She graduated at Mackenzie University and has a specialization in Telecommunications from University of Industrial Engineering (UniFEI), both in the state of São Paulo, Brazil. She received her Master’s degree from the University of Campinas (UNICAMP). Her research interests include Information and Communication Technology, interaction design and usability. She is currently member of a research team focusing on promoting digital cultures among the less favored Brazilian citizens. She has presented her research in some international conferences including HCI International, ACM SAC and IFIP World Computer Congress (WCC).

Jeffrey Hsu is an Associate Professor of Information Systems at the Silberman College of Business, Fairleigh Dickinson University. He is the author of numerous papers, chapters, and books, and has previous business experience in the software, telecommunications, and financial industries. His research interests include human-computer interaction, e-commerce, IS education, and mobile/ubiquitous computing. He is Managing Editor of the International Journal of Data Analysis and Information Systems (IJDAIS), Associate Editor of the International Journal of Information and Communication Technology Education (IJICTE), and is on the editorial board of several other journals. Dr. Hsu received his PhD in Information Systems from Rutgers University, a MS in Computer Science from the New Jersey Institute of Technology, and an MBA from the Rutgers Graduate School of Management.
Malinka Ivanova is a Senior Assistant Professor at Technical University – Sofia, College of Energetics and Electronics, Bulgaria. She obtained her PhD degree in Automation of Engineering Labour and Systems for Automated Design (Exploration and Design of eLearning Platforms) and master’s degree in Electronics and Automation both from Technical University - Sofia. In the area of eLearning her research interests include eLearning platforms, the influence of Internet technologies on education, knowledge management, learning design, teaching/learning in 3D environments, personal learning environments. She is author and co-author of more than 50 publications, including journal articles, books, book chapters and conference papers. She received several awards and grants related to her research topics. Her teaching courses are in the fields of Electronics and Computer Science.

T.J. Kamalanabhan is a Ph.D in Organizational Psychology, he has done his M.Phil in Organizational Psychology and P.G.D.M - Post-graduate Diploma in Business Management. He has around 20 Years of experience in academics and consultancy projects. He is has obtained a Fulbright fellowship for research and teaching at the Department of International Business, Washington State University, Pullman, USA in 2002, he has been awarded DAAD Fellowship to visit Germany under (German Academic Exchange Programme) to do research in Entrepreneurship at the Department of Management, University of West Saxony, Zwickau, Germany in 1998, He is a regular visiting faculty at the department of Management and Law, Multimedia University, Melaka, Malaysia, University College of Technology and Management Malaysia, (KUTPM) Shah Alam, Selangor, Malaysia Faculty of Management, Multimedia University, Cyberjaya, Malaysia, University College of Technology and Management Malaysia, (KUTPM) Shah Alam, Selangor, Malaysia and a visiting Research fellow at KNU University, Daegu, South Korea.

Dain Kaplan received a Bachelor’s degree from the University of California in Irvine, and a Master’s degree from the Tokyo Institute of Technology, where he has also continued on to the Ph.D. program, researching computational linguistics. His research interests include textual entailment, citation analysis, and stylistic analysis.

Melih Kirlidog is an associate professor in the Computer Engineering Department of Marmara University, Istanbul, Turkey. He holds a BSc in Civil Engineering from Middle East Technical University, Turkey. He is also the holder of MBA (in MIS) and PhD degrees from University of Wollongong, Australia. He has worked as an ICT analyst and consultant for over twenty years in Turkey and Australia. His current research interests include intercultural ICT development and implementation, ICT in developing countries, decision support systems, and community informatics. Since November 2002 he works as a full time academic. His articles appeared in Information Technology & People, Online Information Review, IEEE Technology and Society Magazine, and Electronic Library. Aygul Kaynak was born in Corum, Turkey in 1980. She completed her primary and high school educations in several schools in Istanbul. She received her BSc degree in mathematical engineering from Yildiz Teknik University, Istanbul in 2001 and her MSc degree in computer engineering from Marmara University, Istanbul in 2004. She attended several seminars and trainings about internet banking technologies in various subjects. She is currently working in one of the multinational banks in Turkey. She has taken an active role on analyzing internet banking application of the mentioned bank, specifying customers’ requirements and working on their development. She is married.
About the Contributors

**Mark Lycett** is a Professor in Information Systems Development at Brunel University, and researches the complex dynamics that couple people, process, information and technology. His research interests relate to the principles and mechanisms of adaptation/evolution in the natural and social realm and how they can be brought to fruition using modern technologies, in particular to guide and improve people’s experience with technology. Mark has published his work in a number of leading journals and conferences and is engaged in ongoing research with a number of organizations. Prior to returning to education, he spent a number of years in industry, primarily in project management.

**Carleen Maitland** is an Associate Professor in the College of Information Sciences and Technology at Penn State University. Her research focuses on inter-organizational coordination across multiple forms of organizations, both non-profit and for-profit, focusing on the technologies that support and hinder such coordination.

**Edgar Maldonado** received his PhD from the Pennsylvania State University. His research interests are national-level information and telecommunication policies specifically directed at how the development and use of Open Source technologies can positively impact the public, private, and voluntary sectors.

**Artur Marques** teaches at the ESGTS (Management and Technology School of Santarém) and is a PhD student in Engineering and Management at the IST (Lisbon Technology Institute). He graduated in Computer Engineering, has an MsC in Engineering Policy and Management of Technology, and an MsC in Internet and E-Commerce. His research interests include the social and organizational impacts of information technology, Web user experience, and Internet business models.

**Stuart Moran** is a researcher at the Informatics Research Centre, University of Reading, UK; where he also obtained his BSc in Computer Engineering and PhD in Informatics. While his initial interests were in hardware design, this soon shifted focus as he began to view the importance of humans and their interaction with computer systems. This led to his current more human-oriented research interests in pervasive computing, technology acceptance and persuasive technologies.

**Keiichi Nakata** is Reader in Social Informatics at the Informatics Research Centre, Henley Business School, University of Reading, UK. He obtained his PhD in Artificial Intelligence from the University of Edinburgh, UK, and M.Eng. and B.Eng. in Nuclear Engineering from the University of Tokyo. His research interests lie at the interface between technology and people, in the areas of computer-supported collaborative work, cognitive systems engineering, and information systems. His editorial board memberships include New Generation Computing, International Series on Computer Supported Cooperative Work, and Automated Experimentation. His previous appointments include International University in Germany, The University of Tokyo, and GMD.

**Yuri Nishihori** is a Professor of English at the Faculty of Music, Sapporo Otani University, and an emeritus professor of Hokkaido University, Hokkaido, Japan. She received her M.Phil. in applied linguistics from the University of Reading, U.K. and M.A. in literature from Hokkaido University, Japan. Her research interests include applied linguistics, English teaching methodology and educational technology. She has presented her research at several international conferences, including the International
About the Contributors

Chizuko Kushima is a professor at the University of Electro-Communications, Tokyo, Japan. She received her M.A. and Ph.D. in international media and communication studies from Hokkaido University, Japan. Her research interests include corpus linguistics, computer supported collaborative learning, educational technology and development of teaching materials. She presented her research at the WorldCALL 2008. Her articles appeared in the Journal of ARELE (Annual Review of English Language Education in Japan) and the Japan Information-Culturology Society. She is also conducting active research in the field of computer supported teacher training. She received the Excellent Paper Award with co-authors of this paper at the 2008 Conference on Education for Information Processing in Japan.

Toshio Okamoto obtained his PhD from Tokyo Institute of Technology. He is a professor at the University of Electro-Communications, Graduate School of Information Systems, Japan. He is the president of the Japanese Society for Information and Systems on Education, and is the director of e-Learning Center at the University of Electro-Communications. His research interests include e-Learning systems, Computer Supported Collaborative Learning systems, and curriculum development of IT education. He is also a convener of WG2 (Collaborative Technology) of LTSC/ISO SC36 (Learning Technologies Standards Committee).

Elvira Popescu is Assistant Professor at the Software Engineering Department, University of Craiova, Romania and a member of the Multimedia Applications Development Research Center at the same university. She obtained her Ph.D. degree in Information Systems from the University of Craiova, Romania and the University of Technology of Compiègne, France (double degree) in 2008. Her research interests include technology enhanced learning, adaptation and personalization in Web-based systems, intelligent and distributed computing. She authored and co-authored more than 40 publications, including journal articles, book chapters and conference papers. She received several scholarships and participated in several national and international research projects. Dr. Popescu is actively involved in the research community by serving as program committee member and reviewer for numerous conferences, and co-organizing three international workshops in the area of social and personal computing for web-supported learning communities.

Anguelina Popova is a PhD student at the University of Utrecht, the Netherlands. She is researching the educational value of podcasts and their effectiveness for learning with a focus on stimulating students’ reflection and deep learning. She also has research interests in using Web 2.0 technologies for learning, mobile learning and personal learning environments. She holds a Ms in Educational Technologies and an Ms in Politics in Europe from the University of Nice-Sophia Antipolis, France. She has presented her research on podcasting on several European and international conferences, including Toward a Philosophy of Telecommunications Convergence, Budapest 2007; Junior Educational Researchers (JURE), Leuven 2008; ED-MEDIA, Vienna 2008; European Conference on Educational Research (ECER), Vienna 2009;
About the Contributors

World Conference on Educational Sciences (WCES), Istanbul 2010. She has published an article on podcasting in co-authorship with Dr. Palitha Edirisingha from Beyond Distance Research Alliance, UK, for the STRIDE handbook 2009 and in the Procedia - Social and Behavioral Sciences Journal (ISSN: 1877-0428), Vol. 2, Issue 2, (2010). Anguelina Popova is holder of the prestigious grant of the Huygens Scholarship Programme for excellent students, attributed by the Dutch Ministry of Education, Culture and Science.

Anguelina Popova is holder of the prestigious grant of the Huygens Scholarship Programme for excellent students, attributed by the Dutch Ministry of Education, Culture and Science.

Sapna Poti is currently pursuing doctoral program in the Department of Management Studies, Indian Institute of Technology, Madras. She has about 15 years of industry experience in the human resources and business consulting. Her previous stints were in the consulting practice of Deloitte in Human Capital Advisory Services and Hewitt Associates in the Talent Organization Consulting division, primarily in the southern and eastern region of India. Sapna Poti’s dissertation topic will be, “Evaluation of a change program in the context of ERP implementation in India”. She has published in national and international peer reviewed journals.

Harold Robinson is a PhD student in the College of Information Sciences and Technology at Penn State University. His research focuses on inter-organizational coordination between humanitarian relief, governmental and military organizations.

Fiona H. Rohde, PhD, is an Associate Professor within the UQ Business School, The University of Queensland. Her primary research activities involve the area of outsourcing, and also the area of data quality and information management and its effect of information retrieval. Fiona worked for KPMG in the Computer Audit Division before joining the school approximately 15 years ago.

Neil Rubens is an Assistant Professor at the Graduate School of Information Systems, University of Electro-Communications. He received Ph.D. in Computer Science from Tokyo Institute of Technology, M.Sc. from the University of Massachusetts. His research interests include machine learning, artificial intelligence and heuristics.

Biresh K. Sahoo is Professor of Economics at the Xavier Institute of Management, India. He obtained his doctoral degree from Indian Institute of Technology Kharagpur, India. He has been recipient of three prestigious fellowships: Postdoctoral Fellowship awarded by the Japan Society of the Promotion of Science, Japan; Lise Meitner Fellowship awarded by the Board of Austrian Science Fund, Austria and Postdoctoral Fellowship awarded by the Administration Board of Fundo Regional Da Ciência E Technologia, Portugal. His research on applied production frontier analysis has appeared in several scholarly journals such as Annals of Operations Research, European Journal of Operational Research, International Journal of Production Economics, International Journal of Systems Science, International Journal of Operations Research, Journal of Operations Research Society of Japan, Journal of Quantitative Economics, Socio-Economic Planning Sciences, etc. He has co-authored with Jati Sengupta a monograph titled ‘Efficiency Models in DEA’ published by Palgrave Macmillan, London. He also serves as a regular referee for the most of these aforementioned journals.
Andrea Sterbini, Ph.D., is full-time Researcher in Computer Science at the Computer Science Dept. of Sapienza University of Rome, Italy. He teaches Computer Architectures, C Programming and Robotic courses. His main research interest is the usage of AI techniques and social collaboration in e-learning. He strongly supports Free Software and Open Standards.

Satoko Sugie is a graduate student in the Graduate School of International Media, Communication & Tourism Studies, Hokkaido University, Japan. Her interests include Chinese language education and educational technology. She has worked as a research assistant in the fields of Web design and development of e-learning contents at the Information Initiative Center, Hokkaido University. She is also an experienced teacher of Chinese at Sapporo University and is well-known as a capable interpreter of the Chinese language. With her expertise, she is undertaking particularly unique research in the field of collaborative learning between China and Japan. She has presented her research at the 7th International Conference on New Technologies in Teaching and Learning Chinese.

Andrea H. Tapia is an Associate Professor in the College of Information Sciences and Technology at Penn State University. Her research focuses on the functional and structural elements of organizations engaging in technological change and coordination across boundaries.

Louis-Marie Ngamassi Tchouakeu is a PhD student in the College of Information Sciences and Technology at Penn State University. His research focuses on information and communication technology (ICT) use for inter-organizational coordination and social networks among humanitarian organizations.

Marco Temperini is an Associate Professor at the Department of Computer and System Sciences, Sapienza University of Roma where he also has got a PhD in Computer Science in 1992. Marco teaches ‘Programming Techniques’ and ‘Programming of the Web’ in degree courses of the Faculty of Information Technology Engineering at Sapienza. His recent research activity is on theory and technology of web-based distance learning, social and collaborative learning and web-based participatory planning.

Ruben Xing received his Ph.D., Master of Science (M.S), and Master of Arts (M.A) in from Columbia University, New York. Having worked for more than 15 years, Dr. Xing has held senior IT management positions at several large financial conglomerates like Merrill Lynch, Citigroup, First-Boston/Credit Suisse in metropolitan New York. His current research interests include Broadband and Wireless Communications, the Internet transformations and security, Disaster Recover/Business Continuity Planning, and Supply Chain Management.
Yuichi Yamamoto is an assistant professor in the Research Division of Media Education at the Information Initiative Center, Hokkaido University, Japan. He received his M.S. and Ph.D. in chemistry from Hokkaido University, Japan. His research interests include educational technology and computational chemistry. He has done extensive research in the fields of distance learning and computer supported collaborative learning. He has presented his research at several international conferences, including the International Conference on Computers in Education (ICCE) and the International Conference on Information Technology Based Higher Education and Training (ITHET). He received the Best Poster Presentation Award at the 15th International Conference on Computers in Education with co-authors, Prof. Nishihori and Dr. Sato. Haruhiko Sato is an assistant professor in the Division of Synergetic Information Science, Graduate School of Information Science and Technology, Hokkaido University, Japan. He received his M.S. and Ph.D. in information science from Hokkaido University, Japan. His research interests include automated theorem proving, formal verification and software engineering. He has presented his research at several international conferences, including IJCAR (International Joint Conference on Automated Reasoning) and RTA (international conference on Rewriting Techniques and Applications). He has been published in the journal of IEICE Transactions on Information and Systems. He was awarded the Best Paper Award of the 2010 IAENG International Conference on Computer Science.

Yanli Zhang is Assistant Professor in the Management and Information Systems Department at Montclair State University. She graduated with a PhD in Management concentrating on strategy and international business from Rutgers University in May 2007. Her research interests are in strategy and decision making, technological innovation, and networks and knowledge. Her paper on “Inter-Firm Networks and Innovation” won the Doug Nigh award for the most innovative paper in the International Management Division at the Academy of Management 2007 Annual Conference. She obtained a BA in Economics from Beijing University, China; and worked as an economic analyst in the Ministry of Foreign Affairs, China, and a management consultant in Accenture, Beijing office.

Kang Zhao is a PhD student in the College of Information Sciences and Technology, the Pennsylvania State University. His current research interests include complex networks, computational social and organizational simulations, social computing, and agent-based systems.
