About the Contributors

**Süphan Nasır**, Ph.D. is currently Associate Professor at İstanbul University, Faculty of Economics. She is the vice chair of Business Administration Department and also chair of Production Management and Marketing discipline. She is the Editor-in-Chief of International Journal of E-Entrepreneurship and Innovation (IGI Global) and Associate Editor of Yükseköğretim Dergisi/Journal of Higher Education. She is the advisory board member of Journal of Higher Education and Science, The Society of Digital Information and Wireless Communications (SDIWC) and International Congress on Trends in Higher Education: Innovations and Entrepreneurship (ICTHE2012). She contributes several international congresses as Executive Board Member such as International Summit of Istanbul Economists and The International Higher Education Congress: New Trends and Issues (UYK-2011). Customer relationship management, consumer behavior, mobile marketing, innovation management and entrepreneurship are the scope of her interest area. Her articles were published in reputable books, international journals and conferences. She received several scientific publication and best presenter awards.

* * *

**José Antonio Ariza Montes** has a PhD in Economic and Business Science as well as Principal Lecture of the Human Resources Area in the School of Business and Economic Science -ETEA- (Universidad de Córdoba). Researcher and professor, has published numerous articles in scientific magazines and is author of several books: Gestión integrada de personas. Una perspectiva de organización (in collaboration) (Desclée De Brouwer, 1999), El reto del equilibrio: Vida personal y profesional (Desclée De Brouwer, 2002), Dirección y Administración Integrada de Personas (in collaboration) (McGraw-Hill, 2004).

**Malaika Brengman** (PhD in Applied Economics, University of Ghent) (UG), is Associate Professor at the Vrije Universiteit Brussel (VUB), where she teaches Marketing, Strategic Marketing Management, Consumer Behaviour and Market Research. She started her academic career as Assistant Professor at Hasselt University, where she has also been lecturing in Marketing Communications, e-Business, Services Management and Customer Relationship Management. She has also been guest lecturing at other academic institutions such as Solvay Business School at the Université Libre de Bruxelles and the International School of Management at the Leti-Lovanian University in St. Petersburg, Russia. Guided by her strong interests in Retailing, Marketing Communications and Consumer Behaviour, her scientific research generally focuses on the impact of store atmospherics and consumers’ shopping motivations and behaviour, specifically also with regard to alternative distribution channels such as e-commerce and shopping in Virtual Worlds. She also studies marketing communications’ effectiveness, especially with...
regard to new media. She has published her work in well-established journals, such as the ‘Journal of Electronic Commerce Research’, the ‘Journal of Business Research’, the ‘Journal of Marketing Communications’, the ‘Journal of Retailing and Consumer Services’, the ‘Journal of Brand Management’, the ‘Journal of Product and Brand Management’, and ‘Advances in Consumer Research.’ She has presented her findings at numerous international conferences.

**Fernand Feltz** is scientific director of the department Informatics, Systems, Collaboration of the Centre de Recherche Public - Gabriel Lippmann, Luxembourg.

**Mohammed Abdou Janati Idrissi** holds a PhD degree in mathematics and computer sciences. He is a professor and researcher at ENSIAS (National Higher School for Computer Science and System analysis), Rabat, Morocco. Prof. Janati is a head of the Decision Aid Department at the ENSIAS University. His research focuses on decision-aid methods, networks optimisation and project management. In addition to his academic work, his engagements include providing expertise to a range of project management, decision aid, and business intelligence projects for many large companies. His works was published in a number of management information systems and computer science academic journals, conference publications, and books.

**Milena Janakova** is an assistant professor, researcher, and project manager at Silesian University in Opava (School of Business Administration in Karvina), Czech Republic. Janakova received her PhD in Managerial science from the Technical University of Ostrava, Czech Republic in 2001. Research interests are related to database and operating systems, Business Intelligence, Customer Relationship Management, and their applications in education and SMEs. The research objective is to increase the efficiency and effectiveness of installed applications, due to the dynamically changing needs of users and the information society. Realized analysis is based on the activation of Petri Nets with the possibility of visualization, and comparison and with other solutions.

**Farhod P. Karimov** is a doctoral scholar at the Vrije Universiteit Brussel (Belgium). He received his bachelor degree in business administration from Tashkent State Technical University (Uzbekistan) and master degree in marketing science from University of Ulster (UK). From 2002 to 2006, he was vice-president of Marketing at Ulugbek Textile joint-stock company where he was responsible for leading, directing and mentoring marketing team to success. In 2006, he started his academic career at Westminster International University in Tashkent (WIUT), where he has been lecturing on Marketing Management, Marketing Research, and Creating and Delivering Customer Value. As a guest lecturer he has also been teaching Marketing, Consumer Behavior, and Pricing Strategies in Marketing at International Business School in Tashkent. His current scientific research is focused on understanding the impacts of website atmospherics on online consumers’ shopping motivations and behavior. The aim of the research is to capture the lessons of successful models for e-businesses serving promising online segment. He is actively involved in studying the role of social-media in e-commerce and specifically how it influences the acceptance of online shopping. In addition to his interest in Internet marketing, he also studies entrepreneurial marketing and ICT research in transition economies.
About the Contributors

**Ina Kayser** is currently a research assistant and Ph.D. candidate at the University of Duisburg-Essen, Germany. She received her graduate degree in business information systems from the University of Duisburg-Essen, Germany in 2007. Moreover, she holds a Master’s degree in international studies from the University of Sydney, Australia. Her research interests include e-government participation, trust in e-government systems, and knowledge management in e-government.

**Abdelilah Khaled** is a software development engineer graduated from ENSIAS (National Higher School for Computer Science and System Analysis). He is also a PhD candidate at the same university. He conducts active research in information technology related to the elaboration of multicriteria decision models that are destined to select and evaluate enterprise systems and COTS (Commercial Off The Shelf) products. Abdelilah Khaled developed an expertise in software development and business solutions integration. He has worked as a consultant and advisor to various companies and organisations. His works was published in a number of management information systems and computer science academic journals and conference publications.

**Tobias Kollmann** is a chaired professor for e-business and e-entrepreneurship at the University of Duisburg-Essen, Germany. He graduated in 1995 from the University of Bonn, Germany, and received his doctoral degree in 1997 from the University of Trier, Germany, with a thesis on the acceptance of innovative telecommunication and multimedia systems. His research interests include e-business, e-commerce, virtual marketplaces, and, in particular, business venturing in the Internet economy.

**Patrick Krell** is research assistant and Ph.D. candidate at the University of Duisburg-Essen, Germany. He received his graduate degree from the University of Wuppertal, Germany at the Schumpeter School of Business and Economics in 2008. Moreover, he holds a Master of Business Administration degree from the University of Birmingham, UK. His research interests include e-business, e-entrepreneurship, entrepreneurship and trends within the Internet.

**Xining Li** is a professor of the School of Computer Science at the University of Guelph, Canada, and the director of the IMAGO Lab. His research interests include mobile agent system, logic programming, context-aware computing, virtual machine implementation and mobile commerce systems. Li received a PhD in computer science from the University of Calgary, Canada.

**Chen Kim Lim** is currently a PhD candidate in school of computer sciences, Universiti Sains Malaysia (USM) since year 2010. She holds both BS (Hons.) and MS in Computer Sciences from USM. Her major fields of study were in parallel and distributed system during her degrees and computer graphics during her masters. She won several medals in inter-universities and national business competitions with her final year project. Besides, she also won an international award from Keio University, Japan. She is currently focusing on crowd rendering and simulation and iPhone Operating System (iOS) development. Her research interest includes visual language programming, virtual reality, 3D immersion and computer graphics.
Jiazao Lin is a PhD student in the school of Mathematic and Statistics at Lanzhou University, China. Currently he works as a visiting scholar in the School of Computer Science, University of Guelph, Canada. His research interests include mobile computing, context-aware computing and high performance computing.

Marinela Mircea received her degree on informatics in economy from the Academy of Economic Studies, Bucharest in 2003. In February 2009, she finished the doctoral stage, and her PhD thesis has the title “Business management in digital economy”. Since 2003 she is teaching in Academy of Economic Studies from Bucharest, at Economic Informatics Department. Her work focuses on the programming, information system, business management and Business Intelligence. She published over 30 articles in journals and magazines in computer science, informatics and business management fields, and over 20 papers presented at national and international conferences, symposiums and workshops. She was member over 15 research projects with Romanian National Education Ministry, and project manager in one national research projects with title “Modern Approaches in Business Intelligence Systems Development for Services Oriented Organizations Management”. She is the author of one book and coauthor of six books.

Alfredo Romeo Molina majored in Finance at the St. Louis University (USA) in 1997. Financial analyst at the Commerce Bank of St Louis for two and a half years has entrepeneured in different projects related to the Knowledge Society. He is also author of the book “La Pastilla Roja, Software Libre y Revolución Digital”, first book written in Spanish on free software and the digital revolution. Blobject’s founder and partner, is responsible of the technology consulting area of the company.

Emilio Morales-Fernandez has a PhD in Economic and Business Science and Senior Lecturer of Organization and Management of Business and Human Resources in the School of Business and Economic Science (ETEA, Cordoba University, Spain). Researcher of the research group “Cooperatives Studies and Non Lucrative Organizations” (PAIDI SEJ-148). As researcher he has published articles in scientific magazines and is coauthor of several books (Gestion integrada de personas, Ed. Desclee De Brouwer, 1999 and 2000; and Dirección y Administracion Integrada de Personas, Ed. McGraw-Hill, 2004).

Marko Ovaskainen (PhD) is principal lecturer of Entrepreneurship and Business Administration at the Central Ostrobothnia University of Applied Sciences, Kokkola, Finland. He earned his PhD in 2010 in the field of entrepreneurship, concentrating on e-commerce and e-entrepreneurship. His research interests include entrepreneurship and e-business related topics, and he has published a number of seminar papers and articles.
About the Contributors

**Vanessa Ratten** (PhD) is a Senior Lecturer in Strategic Management and Entrepreneurship at Deakin University, Australia. Her research interests include technological innovation (including m-commerce, social cognitive theory and strategic alliances), entrepreneurship (including social entrepreneurship, international entrepreneurship and community-based entrepreneurship) and sport. She has published in numerous journals including the *Asia Pacific Journal of Marketing and Logistics*, *International Journal of Entrepreneurship and Small Business*, *Journal of High Technology Management*, *European Journal of Innovation Management*, *Journal of Management & Organisation*, *International Journal of Educational Management*, *Thunderbird International Business Review* and the *International Journal of Innovation and Technology Management*.

**Abdullah Z. Talib** obtained BS (Hons.) in mathematical sciences from University of Bradford, Britain in 1983. MS in computing science from University of Newcastle upon Tyne, Britain in 1985 and PhD in computer science from University of Wales in Swansea, Britain in 1995. He started his career as a university lecturer at Universiti Sains Malaysia (USM) in 1986 and promoted to the current position as an Associate Professor in 2003. He has also served as chairperson for information systems and computing science program at the School of Computer Sciences, USM. Currently he is the deputy dean of industry and community network in the same school. His research interests include graphics and visualisation, geometric computing, computational modelling and intelligent systems. He has published over 60 papers in conferences and journals, and served as conference organising chair, member of program committees and reviewed several papers for many international/national conferences.

**Thomas Tamisier** holds a PhD degree in computer science from the Ecole Nationale Supérieures des Télécommunications, Paris, France. His professional career was pursued at BULL S.A., Louveciennes, France and NEC Co. Kawasaki, Japan, in logic modeling and proof of electronic circuits, and then at 3D Inc., Yokohama, Japan, in real-time graphic computing and interactive software development. In 2003, he moved to the Centre de Recherche Public - Gabriel Lippmann, Luxembourg, in the department Informatics, Systems, Collaboration as a project leader. His current research interests focus on: data mining, reasoning software, formal verification, and abstract visualization. His R&D projects notably include the development of a Generic Programmable Knowledge-based Framework used to implement decision-support and taxonomic expert systems.

**Kian Lam Tan** got his BS and MS in computer sciences from Universiti Sains Malaysia (USM) in 2007 and 2008 respectively. He won several medals in inter-universities, national and international competitions with his final year project. He was a software engineer in Intel Penang, from 2008 until 2010. He returned to Universiti Sains Malaysia to further his studies. Currently, he is the PhD candidate in Universiti Sains Malaysia. His current research is in the area of graphics and simulation on mobile devices. He has published about 10 papers from his degrees, masters and Ph. D works. Besides, he has also published a paper with Intel Engineering Computing Group.

**Markku Tinnilä** (PhD) is professor of Logistics (pro tem) at the Aalto University School of Economics. He earned his PhD in 1997 in the field of business and service processes. He has published multiple articles on service, logistics and e-business related topics. His research interests include efficient service structures, business and service processes, and electronic business with innovative business models and revenue systems.
