Julie Mariga is an Associate Professor of Computer Information Systems and Technology at Purdue University in West Lafayette, Indiana, USA. Her areas of interest include collaborative computing, mobile computing and increasing under-represented groups in the Information Technology field. Professor Mariga is an award-winning teacher at Purdue University. She has won a university-level teaching award, two school-level teaching awards, and three department-level teaching awards. Professor Mariga co-authored the textbook *Client/Server Information Systems: A Business Oriented Approach* (1999), is a contributing author to *The Internet Encyclopedia* (2002), both of which are published by John Wiley & Sons, Inc. She also has written 11 referred conference articles. Professor Mariga is a member of various professional organizations, including Information Resources Management Association (IRMA), where she served as track chair for Mobile Computing and Commerce, as well as Minorities in Information Technology, and International Association of Computer Information Systems (IACIS).

Latif Al-Hakim is an independent consultant specializing in information systems design. Currently, he is the Lecturer of Logistics and Operations Management in the Department of Economics and Resources Management Faculty of Business at the University of Southern Queensland, Australia. His experience spans 34 years in industry, research and development organizations and universities. Dr. Al-Hakim received his first degree in Mechanical Engineering from Basrah University in 1968. His master’s degree (1977) in Industrial and Systems Engineering and doctorate (1983) in Management Science were awarded from the University of Wales, UK. Dr. Al-Hakim has held various academic appointments and lectured on a wide variety of interdisciplinary Management and Industrial Engineering topics. He has published extensively in facilities planning and systems modeling. Research papers
have appeared in various international journals and have been cited in other research and postgraduate work. His current research interest is on supply chain management. He has supervised several DBA and masters students in topics related to his current interest. Starting with designing of information and quality systems, Dr. Al-Hakim’s involvement with the industry continued in the form of consultancy and technical advising. He has consulted in the automotive, aerospace, house appliance, metals, plastics, clothing, food and service industries. In addition to teaching and consulting, he has conducted technology transfer courses and seminars in various fields of advanced manufacturing.

Leila Alem is a Senior Research Scientist at CSIRO Mathematical and Information Sciences, Australia. Her research spans a variety of HCI/cognitive psychology/AI research issues, as focused through investigations into systems that support human learning. Her specific interests are in the areas of learner-centered design, models of skill development, dynamic and individualized instructional planning and learner and student modeling. She is currently exploring the area of online negotiation agents’ systems in e-commerce, specifically, exploring the means for supporting the formation of a coalition among those agents. She has published in several international conferences and journals, and has an active participation in the international research community (member of conference program committees, initiator of workshops, and reviewer of PhD and master’s theses).

Akhilesh Bajaj is Assistant Professor of Information Systems Management at the H. John Heinz III School of Public Policy and Management at Carnegie Mellon University, USA. He received a BTech in Chemical Engineering from the Indian Institute of Technology, Bombay, a master’s degree in Business Administration from Cornell University, and a doctorate in Management Information Systems (minor in Computer Science) from the University of Arizona. He has published more than 25 referred articles in journals, books and academic proceedings. Dr. Bajaj’s research deals with the construction and testing of tools and methodologies that facilitate the construction of large organizational systems, as well as studying the decision models of the actual consumers of these information systems. He is on the editorial board of the Journal of Database Management. He teaches graduate level courses on basic and advanced database systems, as well as enterprise wide systems. Dr. Bajaj’s information is available at http://bajaj.heinz.cmu.edu/MyInfo/.

Ulrike Baumöl is Program Manager of the post-graduate program, Executive Master of Business Engineering, and Assistant Professor at the University of St. Gallen, Switzerland. She received her master’s degree in Business Administration (1992) from the University of Dortmund, Germany. As a research assistant at the University of Dortmund from 1992 through 1998, she received her doctoral degree, with a dissertation on software target costing (1998).
Pratyush Bharati is an Assistant Professor in the Management Science and Information Systems Department of the College of Management at the University of Massachusetts, USA. He received his PhD from Rensselaer Polytechnic Institute. His present research interests are in management of IT for service quality, diffusion of e-commerce technologies in small and medium sized firms and Web-based decision support systems. His research has been published in several international journals including Communications of the ACM and Decision Support Systems. He is a member of the Association of Computing Machinery and Association of Information Systems.

Pak Yuen P. Chan received his Masters of Commerce (Honours) degree in Information Systems from the University of Canterbury. He currently works as a Programmer for the Applied Technology Center, Hong Kong University of Science and Technology.

Abhijit Chaudhury is a Professor of Management Information Systems at Bryant College, USA. He received his bachelor’s and master’s degrees in Engineering. He has a PhD in Information Systems from Purdue University. He is a very active researcher, with around 40 papers and presentations completed in the U.S. in the last 10 years. Dr. Chaudhury has taught at the University of Texas, Austin, the Babson College, the University of Massachusetts and the Bentley College. His research has been published in several journals including Information Systems Research, Communications of ACM, several transactions of IEEE, and the Journal of Management Information Systems. He is an author of a textbook entitled E-Commerce and E-Business Infrastructure, published by McGraw-Hill Publishers. Another two books of his on mobile-commerce and business modeling have been published by Kluwer Publishers.

Qiyang Chen is Associate Professor of Management Information Systems in the School of Business at Montclair State University, USA. He received his doctorate in Information Systems from the University of Maryland in Baltimore, a master’s degree from China Space Academy and a bachelor’s degree from the National University of Defense Technology in China. His research interests, publications and industry consulting activities are in the areas of strategic issues in MIS, database design and data modeling, human-computer interaction, and soft computing.

Bishwajit Choudhary is a Management Consultant with experiences from European companies in banking, consulting, telecom and professional services sectors. He has worked with technology forecasting, industry analyses, vendor assessment, realizing business cases, developing new product concepts for range of emerging solutions in banking, digital security, electronic-IDs, mobile-commerce and smart cards. He has successfully concluded several Pan-European partnerships, high-profile sales

Jong-hoon Chun received his bachelor’s degree in Computer Science from University of Denver, Colorado, USA, in 1986 and master’s and doctorate degrees in Computer Science from Northwestern University, Evanston, IL, in 1988 and 1992, respectively. He taught at the University of Oklahoma from 1992 to 1995. He is currently an Associate Professor at the Department of Computer Science and Engineering, Myung-Ji University, Korea, and CEO of CoreLogiX, Ltd., Korea.

Renzo Gobbin received his Masters in Applied Science from the University of Canberra and his Bachelor of Arts from Australian National University, Australia. He is currently a multi-disciplinary PhD by research student at the University of Canberra in the School of Information Sciences and Engineering. His area of research is in the areas of artificial intelligence, intelligent agents communication, philosophy and the application of intelligent agents technology to e-commerce and e-Learning.

Markus Greunz has been a Research Assistant and doctoral student at the Media and Communications Management Institute of the University of St. Gallen, Switzerland, since November, 1999. He is member of the research group, Media Platforms and Management (MPM) with a research focus on new methods and technologies for the design and implementation of media platforms. He holds a master’s degree in Management Information Systems from Johannes Keppler University, Linz, Austria, with a focus in the fields of software engineering, multimedia application development and knowledge, and process management. Prior to joining the doctoral program at the institute he was a software developer at the Ars Electronica FutureLab, Linz, Austria.

Ric Jentzsch is a Senior Lecturer at the University of Canberra in the School of Information Sciences and Engineering, Australia. He has a PhD from University of New South Wales, Australia and a Masters in Computer Information Systems from Colorado State University, USA. His research interest is in the area of diffusion and application of e-business for small to medium enterprises (SME), enabling technologies for small to medium enterprises (SME), intelligent agents – use, business models, applications, and frameworks for e-business.

Boris Jukic, PhD, is an Assistant Professor of Management Information Systems at George Mason University, USA. Dr. Jukic earned a bachelor’s degree in Computer Science and Electrical Engineering from University of Zagreb, Croatia in 1991; a master’s degree in Business Administration from Grand Valley State University in 1994; and a doctorate in Management Science and Information
Nenad Jukic, PhD, is an Assistant Professor of Information Systems at Loyola University, Chicago, USA, where he also serves as a coordinator for graduate courses and programs in the areas of Data Warehousing, Business Intelligence, and e-Commerce. Dr. Juki was born and raised in Croatia, where he received a bachelor’s degree in Electrical Engineering and Computer Science from the University of Zagreb in 1991. He received a master’s degree (1993) and his doctorate (1997) in Computer Science form the University of Alabama. Dr. Juki conducts active research in various information technology related areas, including database management, e-business, data warehousing, and data mining. His work was published in a number of journal and conference publications. Aside from academic work, his engagements include work for U.S. military and government agencies, as well as consulting for corporations that vary from start-up to Fortune 500 companies.

Dongkyu Kim received his bachelor’s and master’s degrees in Computer Science and Statistics from Seoul National University, Seoul, Korea in 1995 and 1997, respectively. He has completed the doctoral program in Computer Science and Engineering at Seoul National University and oversees the development of the Content Management System at CoreLogiX, Ltd.

Jeuk Kim received a bachelor’s degree in Oceanography in 2000, and the master’s of science degree in 2002 from Seoul National University, Seoul, Korea. He works for Daewoo Information Systems Co., Ltd.

Kiryoong Kim received his bachelor’s degree in Statistics from Seoul National University, Seoul, Korea, in 2001. He is in the master’s course at the School of Computer Science and Engineering, Seoul National University. His current research interests include the electronic catalog and information systems.

Ryszard Kowalczyk is a Principal Research Scientist at CSIRO Mathematical and Information Sciences, Australia. He has several years of basic research and industrial R&D experience in the area of Intelligent Systems involving knowledge-based systems, fuzzy systems, evolutionary systems, and intelligent agent systems for decision support and automation in mission critical enterprise solutions. After a number of years with a corporate R&D division of a major Australian corporation, Dr. Kowalczyk joined the Commonwealth Scientific and Industrial Research Organization (CSIRO) in 1996, where he led the Applied Artificial Intelligence R&D
Group in carrying out research on intelligent software agents for e-commerce, e-business and e-service delivery. He also spent a year with INTERSHOP Research, where he led research in intelligent software agents for e-negotiation in dynamic e-commerce. Dr. Kowalczyk has a number of patents in the area of intelligent agents, and several publications, including four edited books and more than seventy research papers in books, journals and international conference proceedings. He has been a regular reviewer for *IEEE Transactions on Systems, Man and Cybernetics, IEEE Transactions on Fuzzy Systems, International Journal on Information Sciences, International Journal on Knowledge and Information Systems, ACS Journal of Research and Practice in Information Technology, Journal of Applied Systems Studies, Computational Intelligence Journal*, the *International Journal of Computers and Electrical Engineering*, and the *International Journal of Applied Artificial Intelligence*. He has been a member of and has organized a steering and program committee for several international conferences and workshops.

**Ighoon Lee** received his bachelor’s and master’s degrees in Computer Science and Statistics from the University of Seoul, Korea in 1996 and 1998. He has finished the doctoral program in Computer Science and Engineering at Seoul National University.

**In Lee** is an Assistant Professor in the Department of Information Management and Decision Sciences at the College of Business and Technology, Western Illinois University, USA. He received his master’s degree in Business Administration from the University of Texas at Austin and his doctorate from the University of Illinois at Urbana-Champaign. He is a member of IRMA, INFORMS, DSI, and ACM. His current research interests include e-commerce development methodology, agent-oriented enterprise modeling, and intelligent manufacturing systems.

**Sang-goo Lee** received the bachelor’s degree in Computer Science from Seoul National University, Seoul, Korea, in 1985, and master’s and doctorate degrees in Computer Science from Northwestern University, Evanston, IL, in 1987 and 1990, respectively. He taught at the University of Minnesota from 1989 to 1990. He is currently an Associate Professor at the School of Computer Science and Engineering, Seoul National University, Korea.

**Markus Lenz** is a Research Assistant and doctoral student in the research area of Business Media at the Media and Communications Management Institute of the University of St. Gallen. He joined the institute in March 2000 and is a member of the Competence Center Electronic Markets. He has a master’s degree in Business Administration, with a major in Strategic Management and Marketing, from Ludwig-Maximilians-University in Munich, Germany. Prior to joining the doctoral program, he worked for the Indo-German Chamber of Commerce in Bombay, India and as a consultant for Simon-Kucher & Partners in Bonn, as well as for CSC Ploenzke in Cologne.
K. Y. R. Li, MSc, PhD, CEng, MIEE, MACS, is a Senior Lecturer at Monash University, Australia. His current research interests include mobile agents, automatic essay scoring using LSA, virtual project office, Web-based project evaluation using AHP and culture issues of e-business/V-business. His aim is to develop cost-effective business solutions utilizing emerging technologies. For the last few years, he has initiated a number of industrial collaborative research programs. Some of the successful multimedia intranet-based developments are: an induction program for Bristol Myers Squibb, competency testing for detective training at the Victoria Police and a just-in-time training program for nurses at South Health Network in Melbourne. Besides teaching and research, he also consults.

Chang Liu is Assistant Professor of Management Information Systems at Northern Illinois University, USA. He received his doctorate of business administration from Mississippi State University in 1997. His research interests are electronic commerce, Internet computing and telecommunications. His research works have been published in Information & Management, International Journal of Electronic Commerce and Business Media, Journal of Computer Information Systems, Mid-American Journal of Business, and Journal Informatics Education Research. Dr. Liu teaches database and electronic commerce courses.

Brian Mackie, PhD, is Assistant Professor of Management Information Systems at Northern Illinois University, USA. He received his doctorate in business administration from the University of Iowa in 1999. His research interests are database, networks and electronic collaboration. Dr. Mackie teaches Database and Operating Environments.

Jack Marchewka is an Associate Professor and the Barsema Professor of Management Information Systems in the Department of Operations Management and Information Systems (OMIS) at Northern Illinois University, USA. In addition, he is also the Director of the Business Information Technology Transfer Center (BITTC) His current research interests include IT project management, electronic commerce and knowledge management. His articles have appeared in the Information Resources Management Journal, Information Technology and People, and the Journal of International Information Management.

Annette M. Mills is a Senior Lecturer in Information Systems with the Department of Accounting, Finance and Information Systems at the University of Canterbury (New Zealand). She holds a PhD in Information Systems from the University of Waikato. Her research interests include technology adoption, IS education, electronic commerce, and IT in developing countries.

Fiona Fui-Hoon Nah is an Assistant Professor of Management Information Systems at University of Nebraska–Lincoln, USA. Previously, she was a member

Manoj Parameswaran, PhD, is an Assistant Professor of Information Systems at the Decision and Information Technologies Department, R.H. Smith School of Business, University of Maryland, USA. He earned a doctorate in Management Science and Information Systems from the University of Texas at Austin in 1999. He holds a joint appointment with the Institute for Systems Research, and is a research associate at the Center for Research in Electronic Commerce at the University of Texas, Austin. His research and teaching interests include logistics of digital products, electronic markets, telecommunications, and industrial organization in the digital economy. He has worked on network resource allocation for unicast and multicast distribution of multimedia products. His article on economic issues of electronic commerce was featured in The Financial Times.

Sang-uk Park received a bachelor’s degree in Computer Science and Engineering from Myung-Ji University, Korea, in 1999. He is a Technical Staff Member of CoreLogiX, Ltd., and is developing the Content Management System.

Bernhard Rumpe currently holds a fellowship position at the Technische Universität Munich, Germany, awarded from the Bavarian Government. His main interests are the methods and techniques for the development of business systems. These include the impact of new technologies and application areas, such as e-commerce, to companies, as well as the methodical and technical issues of realizing these systems. He contributed, in various publications, to the UML standardization, as well as to development and enhancement of software engineering processes. He is an author/editor of eight books, among them the UML Adaptation for Frameworks (UML-F). He is Editor-in-Chief of the new Springer International Journal on Software and Systems Modeling (www.sosym.org).

Ada Scupola is an Assistant Professor at the Department of Social Sciences, Roskilde University, Denmark. She holds a PhD in Business Administration from the same department, an MBA from the University of Maryland, College Park, USA, and a master’s degree in Information Systems from the University of Bari, Italy. Her research interests are adoption and diffusion of IT (with particular focus on SMEs),
business value of IT, strategic management of IT and electronic commerce. Her research has appeared in many books, international journals, such as the *Journal of Information Sciences* and the *Journal of Global Information Technology Management*, and in international conferences such as HICCS. She is on the editorial review board of the *Journal of Information Technology in Organizations*.

**Abhishek Sharma** is a graduate student at Loyola University of Chicago Graduate School of Business, USA. He received a bachelor’s degree in Technology (1997) and a master’s degree in Business Administration (2002) from the same university. His main areas of research interest include wireless devices and their impact on various business perspectives, Internet-based peer-to-peer networking systems, and database/data warehousing systems.

**Thomas Stiffel** is Research Assistant and doctoral student at the Institute of Information Management, University of St. Gallen, Switzerland. He received his master’s degree in Industrial Engineering and Management (1999) from University of Karlsruhe, Germany. His research focus is on business model innovation and transformation in the new economy.

**John Wang** is a Professor in the Department of Information and Decision Sciences at Montclair State University (MSU), USA. Having received a scholarship award, he came to the USA and completed his doctorate in Operations Research at Temple University in 1990. He worked as an assistant professor at Beijing University of Sciences & Technology, China, for two years. In the fall of 1992, he transferred to MSU. Dr. Wang received his tenure in 1997, and was promoted to full professor in 2000 for his outstanding and extraordinary contributions. Dr. Wang has published 72 papers in referred journals and conference proceedings, as well as two research books. He has been an active member of five renowned professional organizations. He has served as session chairman and track chair seventeen times on the most prestigious international and national conferences. His research activities and articles have been well received, enabling him to build a reputation with other significant professionals in his field. He was invited to serve as a referee for *Operations Research* (a flagship journal) and *IEEE Transactions on Control Systems Technology* (a very prestigious journal). He has also developed several computer software programs based on his research findings. Dr. Wang is a highly accomplished and well-established operations research scholar. His current research interests include optimization, nonlinear programming, and manufacturing systems engineering. A long-term goal is to study the synergy of operations research and cybernetics.

**Merrill Warkentin** is a Professor of Management Information Systems in the College of Business & Industry at Mississippi State University, USA. He has authored more than 100 articles, chapters and books. His research, primarily in E-
Commerce, virtual teams, system security, and expert systems, has appeared in such journals as MIS Quarterly, Decision Sciences, Information Systems Journal, Decision Support Systems, Communications of the AIS, Electronic Markets, Information Systems Management, Journal of Knowledge Engineering & Technology, Journal of Electronic Commerce Research, Logistics Information Management, ACM Applied Computing Review, Expert Systems and Journal of Computer Information Systems. Professor Warkentin is a co-author of Electronic Commerce 2002: A Managerial Perspective (2e) (Prentice Hall, 2002) and editor of Business-to-Business Electronic Commerce: Challenges and Solutions (Idea Group Publishing, 2002). He is currently an Associate Editor of Information Resources Management Journal and the Journal of Electronic Commerce in Organizations, and is a Guest Editor of two special issues of the Journal of End User Computing. Dr. Warkentin has served as a consultant to numerous companies and organizations, and has been a featured speaker at more than one hundred industry association meetings, executive development seminars, and academic conferences. He has been a lecturer at the Army Logistics Management College and, since 1996, he has served as National Distinguished Lecturer for the Association for Computing Machinery (ACM). Professor Warkentin received bachelor’s and master’s degrees, and his doctorate, from the University of Nebraska-Lincoln. He can be reached at mwarkentin@acm.org and www.MISProfessor.com.

Robert Winter is Professor and Director of the Institute of Information Management, University of St. Gallen, Switzerland. He is also Director of St. Gallen’s postgraduate program, Executive Master of Business Engineering. He received master’s degrees in Business Administration (1984) and Business Education (1986) from Goethe University, Frankfurt, Germany. As a research assistant with Goethe University from 1984 through 1994, he received a doctorate for his work in the field of multi-stage production planning (1989) and venia legendi for his work on formal semantics of conceptual information systems design (1994). His research interests include business engineering/information systems development, information systems architectures, and information logistics (particularly data warehousing and enterprise application integration).

F. Xue holds a bachelor’s degree in Computer Science. He earned a master’s degree in Information Technology at the University of Newcastle in 2000. He has worked as a professional system engineer specialized in Client-Server system developments. His professional qualification includes MCSE plus Internet Certificate. He completed the project for his master’s degree in Business Systems Research at Monash University in 2001. He currently lectures at the School of Multimedia Systems of Monash University, Australia, with a major research interest in mobile agent technology for business.
Fan Zhao is a doctoral student in the Management Information Systems program at the University of Nebraska–Lincoln, USA. He received his master’s degree in Textile Engineering from Georgia Institute of Technology in 2000, where he carried out research in developing digital imaging applications for the textile industry. His current research interests are in human-computer interaction and enterprise resource planning.

Wenli Zhu is a Usability Engineer at Microsoft Corporation, USA. She received her bachelor’s degree in Management Information Systems from Tsinghua University, Beijing, China, in 1989. She received her master’s degree and doctorate in Industrial Engineering (Human Factors) from Purdue University, West Lafayette, Indiana, USA, in 1991 and 1995, respectively. Dr. Zhu has worked in the software industry for more than eight years, mainly in designing and evaluating human-computer interfaces. Her research interests include human-computer interaction, usability engineering, technology adoption and software product development methodology.
