Elias G. Carayannis (caraye@gwu.edu) is a professor of Science, Technology, Innovation and Entrepreneurship. He is the co-Founder and co-Director of the Global and Entrepreneurial Finance Research Institute (GEFRI) and Director of Research on Science, Technology, Innovation and Entrepreneurship in the European Union Research Center (EURC) at The George Washington University School of Business. Dr. Carayannis' teaching and research activities focus on the areas of strategic government – university and industry R&D partnerships, technology road-mapping, technology transfer and commercialization, international science and technology policy, technological entrepreneurship and regional economic development. Dr. Carayannis has several publications in both academics and practitioners, US and European journals such as IEEE Transactions in Engineering Management (IEEE TEM), Research Policy, Journal of R&D Management, Journal of Engineering and Technology Management, International Journal of Technology Management, Technovation, Journal of Technology Transfer, Engineering Management Journal, Journal of Growth and Change, The Review of Regional Studies, International Journal of Global Energy Issues, International Journal of Environment and Pollution, Le Progres Technique and the Focus on Change Management. He has also published eleven books to date on science, technology, innovation and entrepreneurship with CRC Press, Praeger/Greenwood Press, Palgrave/MacMillan Press and Edward Elgar, plus several more under contract. He is Editor-in-Chief of The Book Series on Science, Technology, Innovation and Entrepreneurship (Edward Elgar), The Book Series on Technology, Innovation and Knowledge Management (Springer), the International Journal of the Knowledge Economy (Springer) and the International Journal of Social Ecology and Sustainable Development (IGI Global). He is also Associate Editor of the International Journal of Innovation and Regional Development and on the Editorial Board of the IEEE TEM and the International Journal of Nuclear Knowledge Management, as well as on the Board of Directors for the International Association for the Management of Technology (IAMOT). He has consulted for several technology driven government, private and large organizations, as well as small organizations such as the World Bank, the European Commission, the Inter-American Development Bank, the US Agency for International Development, the National Science Foundation Small Business Innovation Research Program, the National Institute of Standards and Technology Advanced Technology Program, the National Coalition for Advanced Manufacturing (NACFAM), the USN CNO Office, Sandia National Laboratories’ New Technological Ventures Initiative, the General Electric Corporate Training & Development Center, Cowen & Co, First Albany International, Entreprises Importfab and others. He is fluent in English, French, German and Greek and has a working knowledge of Spanish. He is citizen of the United States of America and the European Union.

Thorsten D. Barth is an academic entrepreneur. He is a political scientist, a doctoral student at the University of Vienna, Austria, and an entrepreneur in Germany and Austria. As an academic entrepreneur his task is to combine political science with economic practice. With David F.J Campbell was his first publication as a co-author “Wie Können Demokratie und Demokratiequalität Gemessen Werden?” (“How Can Democracy and the Quality of Democracy be Measured?”) in the Journal of SWS-Rundschau (2009).

David F. J. Campbell is a Research Fellow at the Institute of Science Communication and Higher Education Research (WIHO), Faculty for Interdisciplinary Studies (iff), University of Klagenfurt (http://uni-klu.ac.at/wiho); Lecturer in Political Science at the University of Vienna; and Quality Manager and Quality Researcher at the University of Applied Arts in Vienna. Campbell co-edited Demokratiequalität in Österreich: Zustand und Entwicklungsperspektiven (Leske + Budrich, 2002) (“Democracy Quality in Austria”) and Knowledge Creation, Diffusion, and Use in Innovation Networks and Knowledge Clusters (Praeger, 2006), and his articles on innovation and society have been published in several international journals. Campbell teaches (taught) at the University of Klagenfurt, University of Vienna, and George Washington University in Washington, D.C. (Elliott School of International Affairs). His two research focuses concentrate on research about knowledge and research about democracy and the quality of democracy.

George S. Campbell is a retired computer specialist who was manager of systems engineering at IBM Austria and of education at IBM ROECE (responsible for the Eastern European countries), both located in Vienna, Austria. His current interests are languages and genealogy. His personal website can be visited under: http://www.georgescampbell.com.

Saif Syed Omar recently graduated from the Stevens Institute of Technology, with a Master’s degree in Information systems. Currently, he works for Credit Suisse in IT Project and Program Management group. Mr. Omar has been actively involved in project management research especially in large scale public sector IS/IT initiatives. He received a bachelor’s degree in Electronics and Communication from RNS Institute of Technology, India and worked for Perot systems TSI (now a part of Dell Services) as a part of the Enterprise Resource Planning (ERP) division.

Hiroshi Osada studied under the late Dr. Kaoru Ishikawa in the Graduate School of Engineering, University of Tokyo. After graduating, Professor OSADA joined Asahi Chemical Co., Ltd where he was engaged in business planning, new product development, the formulation of global strategies and quality management. Professor OSADA also served as a Board Director of Asahi Research Centre Co., Ltd. From 1999, Professor OSADA started his teaching career joining the Department of Eco-social Systems Engineering in University of Yamanashi, Faculty of Engineering and the Graduate school of the same university. In April 2005, Professor OSADA was appointed to his current position, Professor of Department of MOT (Management of Technology), Graduate School of Innovation Management, Tokyo Institute of Technology. Professor OSADA also has been awarded several prizes for his excellent literature on the study of TQM such as QC prize from the Union of Japanese Scientists and Engineers,
About the Contributors

the Nikkei Quality Control Literature Prize from Japan Newspaper Company and the Quality Technology Prize from Japanese Society for Quality Control.

**Peerasit Patanakul** is an Assistant Professor at Stevens Institute of Technology, NJ USA. His research encompasses project portfolio management, multiple project management, strategic and value-focused project management, and large-scale government projects and programs. His work was published in *IEEE Transactions on Engineering Management, International Journal of Project Management, Project Management Journal,* and *Systems Engineering*. Dr. Patanakul received a B.E. in Chemical Engineering from Chulalongkorn University, Thailand, an M.S. in Engineering Management, and a Ph.D. in Systems Science/Engineering Management from Portland State University, Oregon USA.

**Helga Pülzl** is Assistant Professor of Comparative Politics at the Department of Political Science at the University of Salzburg and since 2005 she is a visiting professor in the Erasmus Mundus Programme on European Forestry. Starting with January 2010 she is Vice President of the Austrian Political Science Association (ÖGPW). In 2010 Pülzl was awarded an Erwin Schrödinger Fellowship by the Austrian Science Fund and will be a Visiting Research Fellow at Rutgers University, USA. Pülzl is the author of *The Politics of Forests* (Die Politik des Waldes, Vienna Böhlau Publisher 2010). Her current research interests are: interpretative policy analysis, comparative forest and environmental policy analysis, the development of sustainability indicators, and impact assessment.

**Fasil Taddese** has acquired Diploma in Automotive Mechanics prior to his undergraduate study. He received his Bachelor of Science in Industrial Engineering from Mekelle University. Upon completion he joined Mekelle University in the Department of Industrial Engineering as full time academic staff. He continued his post grad study in Indian Institute of Technology Roorkee, India and received Master of Technology in Mechanical and Industrial Engineering majoring in Production and Industrial Systems Engineering. Currently, he is research scholar in Tokyo Institute of Technology, Japan in endeavour to acquire his PhD.

**Alice B. M. Vadrot** is a Research Fellow at the The Interdisciplinary Centre for Comparative Research in the Social Sciences (ICCR) (www.iccr-international.org) and PhD student at the University of Vienna in the field of Political Science. Her two research focuses concentrate on research about the science-policy interface in biodiversity governance and the governance of health and medical knowledge.

**Doris Wydra** is Assistant Professor at the Department of Political Science and Sociology at the University of Salzburg and coordinator of the Salzburg Centre of European Union Studies. Her research focus is on the development of democracy in the European Union and new approaches towards democracy and democratic processes.
