About the Contributors

**Mehdi Khosrow-Pour** (DBA) received his Doctorate in Business Administration from the Nova Southeastern University (FL, USA). Dr. Khosrow-Pour taught undergraduate and graduate information system courses at the Pennsylvania State University – Harrisburg for 20 years where he was the chair of the Information Systems Department for 14 years. He is currently president and publisher of IGI Global, an international academic publishing house with headquarters in Hershey, PA (www.igi-global.com). He also serves as executive director of the Information Resources Management Association (IRMA) (www.irma-international.org) and executive director of the World Forgotten Children’s Foundation (www.world-forgotten-children.org). He is the author/editor of over twenty books in information technology management. He is also the editor-in-chief of the *Information Resources Management Journal*, the *Journal of Cases on Information Technology*, the *Journal of Electronic Commerce in Organizations* and the *Journal of Information Technology Research* and has authored more than 50 articles published in various conference proceedings and journals.

* * *

**Akbar Kary Dolat Abadi** is a faculty member of Shahid Sattari University. He holds a BSc in electrical engineering and MSc in opto electronic optic branch of electrical engineering. He has been teaching in University for about 15 years and led more than 100 theses. Her main research interests include WDM, DWDM, network, Information technology and its applications. He had some printed articles in these subjects.

**Saad Alflayyeh** is a Ph.D. student of Manufacturing and Technology Management at the College of Business and Innovation, University of Toledo. He received his MBA degree from the University of Toledo. His research interests are global supply chain management, technology transfer, innovation, e-business and manufacturing strategy. His current work focuses on the economics of alternative energy.

**Oualid Ben Ali** has obtained a Ph.D. degree in Computer Science from Laval University (Quebec, Canada) (supervised by Bernard Moulin since 2001). He is mainly interested in using multiagent systems to simulate behaviors and phenomena in 2D-3D geographic virtual spatial environments. Then he received a 2 years - MARIE-CURIE scholarship to work in the Hull York Medical School (York, UK) and in the Hull Immersive Virtual Environment (HIVE) (Hull, UK) as an EVAN post-doctoral fellow. Currently, he is an assistant professor at the University of Sharjah, in the College of Business Administration, MIS Department. His current research interests include Modeling and Simulation, E-Government, Geographic Information Systems, Data Analysis (OLAP and Data Mining), Artificial Intelligence, MultiAgent Systems, etc.
Yvonne Lederer Antonucci received her Ph.D. in Information Systems from Drexel University. She is an Associate Professor at Widener University in the Accounting and Information Management Department in addition to being the SAP Alliance Coordinator and Director of the Business Process Innovation Center of Excellence. Yvonne teaches graduate and undergraduate level classes in information systems, enterprise systems, and business process management. She has published in numerous international journals, books, and conferences in the areas of business process management, information technology outsourcing, inter-organizational trust and collaboration, workflow management, and enterprise systems.

Ali Assadian is currently an MBA student at University of California, San Diego. He has a Master’s degree in Urban Affair Management from University of Tehran. He, also, has a bachelor degree in Electrical Engineering from K.N. Toosi University of Technology. His areas of interest and research include sustainable development, social and environmental development, energy management/conservation, and technology development. He has publications in different journals addressing sustainability, urban affairs, and energy management.

Barry Blundell is a physicist and chartered engineer with broad ranging transdisciplinary research interests. His main areas of research activity relate to the development and characterisation of innovative 3-D display and haptic interfaces, sustainable computing, the ethical application of digital technologies, and the social impact and history of data gathering and analysis technologies. In relation to his work concerning 3-D systems, he has particular interests in medical, engineering, and educational applications. He has held academic positions in a several countries and is the author of twelve books.

Richard Brody is the Rutledge Professor of Accounting in the Anderson School of Management at the University of New Mexico. He earned his Ph.D. from Arizona State University, his M.S. from Colorado State University and his B.S. from the University of Delaware. He is a Certified Public Accountant, a Certified Fraud Examiner and a Forensic Certified Public Accountant. Professor Brody’s research addresses issues related to forensic accounting, auditing and corporate governance. Recent research has focused on issues such as corporate fraud, identity theft, mandatory auditor rotation, the outsourcing of income tax returns to India and the impact of corporate governance structure on auditor judgment.

Stephen Burd is an Associate Professor of Management in the Anderson School of Management at the University of New Mexico. He earned his Ph.D. from Purdue University in 1983. His teaching and research interests include computer and software architecture, system and network administration, healthcare technology and cost-effectiveness, and database management. He is Associate Director for UNM’s Center for Information Assurance Research and Education and is Secretary and Treasurer of the New Mexico Telehealth Alliance. He is a Certified Public Accountant licensed in Maryland.

Stephen K. Callaway is an Assistant Professor in the Department of Management at the University of Toledo, where he teaches courses in strategic management and entrepreneurship. His research interests include technology management and entrepreneurship. He has multiple publications, including journals such as Journal of High Technology Management Research and International Journal of Organizational Analysis.
About the Contributors

Alain Yee-Loong Chong is currently a postdoctoral fellow in the Department of Industrial and Systems Engineering, The Hong Kong Polytechnic University. He received his BSc and MSc (Distinction) from Coventry University, UK, and PhD from the Multimedia University, Malaysia. His research interests include supply chain management, e-business adoption and service science. To date, he has published in more than 50 peer reviewed international journal and conference papers. He is a Member of the Institute of Electrical and Electronics Engineers (IEEE). He is also the editor of the *International Journal of Modelling in Operations Management* and *International Journal of Network and Mobile Technologies*.

Seng-cho T. Chou is Professor of Information Management at National Taiwan University. He received his Ph.D. in Computer Science from the University of Illinois at Urbana-Champaign. Before joining NTU, he had worked at Jet Propulsion Lab in Pasadena and the Chinese University of Hong Kong. He has been an advisor on a number of IT projects in both the public and private sectors. His research interests include information and knowledge management, service science and innovation, and Web technologies and applications.

Tzy-Yuan Chou is a deputy division chief in the Financial Data Center of the Ministry of Finance in Taiwan. She was awarded her Ph.D in 2009 by the National Taiwan University in Taiwan. With more than fifteen years of practicing information systems project management; she has significant experience in systems projects, programs, and development. Tzy-Yuan Chou has been awarded several prizes from her government for successful completion of critical projects, including the best Application Certification prize from the Ministry of Interior of Taiwan in 2007-2008 for a tax e-filing system. Currently, she is in charge of major tax system for the Taiwan government budgeted at over 3 billion USD. Her research involves aspects of he profession that have presented unique challenges, including the motivation of IS personnel and program management. James Jiang is the Distinguish Professor of IS in the Research School of Business and School of Accounting and Business Information Systems, The Australian National University (ANU), Australia. Currently, he is also an honorary Distinguished Chair Professor of Management, National Taiwan University, Taiwan. Prior to join the ANU, he was in the academic positions in the U.S. Professor Jiang’s research interests are IS Project/Program Management and Service Quality. He has published over 150 academic journal articles on these areas. He has served as on the editorial boards of Information Resources Management Journal, International Journal of IT Project Management, Information & Management, and MIS Quarterly.

Hossein Dabbagh has a bachelor’s degree in “Management”, a master’s degree in “Philosophy”. His current major research interests are in “Western Philosophy” and “Ethics”.

Richard J. Goeke received his Ph.D. in Management Systems from Kent State University. He is an Assistant Professor in the Accounting and Information Management Department at Widener University, where he teaches undergraduate and graduate level classes in information systems, systems analysis, and database management. Prior to joining Widener, Richard spent 17 years in industry in information systems, accounting, marketing, and management. His research has been published in *Quality Management Journal, International Journal of Operational Research, Business Process Management Journal, Information Resources Management Journal*, and *Communications of the ACM*. His current research interests include business process management, enterprise resource planning, and data warehousing.
Christian Ikas has been an analyst at the Chair for Information Systems, Technische Universitaet Muenchen, since 2009. His research focuses on issues pertaining to the fields of E-Government and process management. He takes special interest in facilitating a resource-efficient and citizen-oriented provision of public services. He has assisted in the design of an E-Government maturity model as well as a publication concerning E-Government services tailored to the needs of expatriates.

Karthik N. S. Iyer is an Associate Professor of Marketing at the College of Business, University of Northern Iowa. He earned his Ph.D. from Oklahoma State University. His current research focuses on assessing the impact of IT on supply chain management, supply chain collaboration and capabilities, alliances and organizational learning. Dr. Iyer’s research has been published in scholarly journals including Industrial Marketing Management, Transportation Research Part E: Logistics and Transportation Review, Journal of Business Logistics, International Journal of Physical Distribution and Logistics Management, Information & Management, and the Journal of the Academy of Marketing Science.

Marlen Jurisch is a doctoral candidate in Information Systems at the Department of Informatics, Technische Universitaet Muenchen. She has executed several qualitative and quantitative studies in process management and E-Government. Since 2010, she is a co-project leader for a study funded by the German Federal Ministry of the Interior which examines the efficient design of interorganizational eGovernment processes. Prior to joining her PhD program, she worked for Booz Allen Hamilton and SAP Research in their American and German offices. She has research interests in E-Government, process management and organizational change management.

Gary Klein is the Cougar Professor of Information Systems at the University of Colorado in Colorado Springs. He obtained his Ph.D. in Management Science from Purdue University. His research interests include project management, technology transfer, and mathematical modeling with over 150 academic publications in these areas. He served as Director of Education for the American Society for the Advancement of Project Management, is a Fellow of the Decision Sciences Institute, and is an active member of the Project Management Institute. He serves on the editorial board of the International Journal of Information Technology Project Management and the Journal of the Association of Information Systems and serves as an AE for MIS Quarterly and SE for the Pacific Asia Journal of the Association of Information Systems.
**About the Contributors**

**Helmut Krcmar** holds the Chair for Information Systems at the Department of Informatics at Technische Universitaet Muenchen (TUM) since 2002. He is a member of the Department of Informatics and the Faculty of Business Administration as well as a member of the “Carl von Linde-Akademie”. Since 2004, he is a member of the Program Faculty of the Elite Graduate Program “Finance and Information Management (FIM)” in the Elitenetzwerk Bayern. Until May 2007, he was Academic Director of the Executive Training Program ¡communicate!. Since January 2004, he is Board Member of the Center for Digital Technology and Management (CDTM) at Technische Universitaet Muenchen. His research interests include Information and Knowledge Management, IT-enabled Value webs, Service Management, Computer Supported Cooperative Work, Information Systems in Health Care and E-Government.

**Sofia Kyratzi** received her PhD (2007) degree in Computer Graphics and Geometric Modeling from the Department of Product and Systems Design Engineering of the University of the Aegean, and her MSc (2002) in Medical Informatics from Aristotle University of Thessaloniki. She also holds a BSc (2000) in Mathematics from Aristotle University of Thessaloniki. From 2001 to 2002, she worked as a researcher in the Informatics and Telematics Institute of CERTH in Thessaloniki. The last two years she has been employed as an instructor in the Department of Product and Systems Design Engineering (University of the Aegean). Her research interests include geometric and solid modeling, computer graphics, computer aided sketching, image understanding and computer vision.

**Brett J. L. Landry**, PhD, CISSP is the Ellis Endowed Chair of Technology Management, Associate Professor and Director of the Center for Cybersecurity Education at the University of Dallas. Over the last twenty years, Landry has worked in infosec in the public and private sectors and has published numerous journal articles in the ACM Journal of Educational Resources in Computing (JERIC), Communications of the ACM (CACM), Decision Sciences Journal of Innovative Education, International Journal of Services and Standards, Journal Business Ethics, Journal of Organizational Change Management, and others.

**Xin (Robert) Luo** is an Assistant Professor of Management Information Systems and Information Assurance in the Anderson School of Management at the University of New Mexico, USA. He earned his Ph.D. in Information Systems from Mississippi State University. His teaching and research interests include information assurance, e-commerce/m-commerce, and cross-cultural management. His research has been published in journals including Journal of the Association for Information Systems, European Journal of Information Systems, Communications of the ACM, Decision Support Systems, Communication of the Association for Information Systems, Journal of Organizational and End User Computing, Information Management and Computer Security, Cross-Cultural Management, Journal of Information Privacy and Security, International Journal of Information Security & Privacy, Information Systems Security, and Journal of Internet Banking and Commerce, etc.

**Sathiadev Mahesh** is a Professor in the College of Business at the University of New Orleans. He received his Ph.D. from Purdue University. He has an M.B.A. from Oklahoma State University and degrees in Engineering from the I.I.T. Madras and University of Madras, India. His research has been published in many journals including Decision Sciences, Omega, the Journal of Organizational Change Management, and the Journal of Health & Human Services Administration. His primary interest lies in the area of systems development. He has worked on many systems development projects and has experience with a wide range of business applications. In addition, Dr. Mahesh has worked in process improvement, including process quality improvement.
Nick-Naser Manochehri received his Ph.D. (2001) in Applied Technology, from the University of North Texas, USA, his MS in Software Engineering and bachelor’s in Computer Science. He has several years of industrial experience as a software developer and senior instructor in the area of IT at SBC Communications Inc. in Dallas Texas. He also worked as an assistant professor in the department of IS at SQU in Oman. He is currently an assistant professor in the college of Business and Economics, department of Accounting & Information Systems at the Qatar University. His research area of interest includes: IT, TQM, e/mobile Commerce, e-learning & educational Technology.

Samar Mouakket is an associate professor in the MIS department at the University of Sharjah, UAE. She received her Ph.D. in 1996 in Management Information Systems from Sheffield University, UK. Her research interests include systems analysis and user requirements determination during systems development, Geographic Information Systems, Data Analysis (OLAP and Data Mining), and the deployment and utilization of different business information systems, such as ERP systems, as well as web-based business applications, such as e-commerce, e-government and e-banking.

Mostafa Nejati is an industrial engineer (Isfahan University of Technology), Master of Urban Affairs Management (University of Tehran), and currently a PhD researcher in the School of Management, Universiti Sains Malaysia (USM). His research areas of interest include (but are not limited to) sustainable development, knowledge management, project management, healthcare, youth and poverty research. He has had numerous publications in renowned international journals including ISI and Scopus indexed ones. Mr. Nejati is also the Editor-in-Chief of Global Business and Management Research Journal, and acts as an executive editor, editorial board member or reviewer of some esteemed journals published by renowned publishers including Elsevier, Emerald, and IGI Global.

H. Jim Nelson is an assistant professor of Management Information Systems at Southern Illinois University, Carbondale. He received his BS in Computer Science from California Polytechnic State University, San Luis Obispo, and his MS and PhD in Information Systems from the University of Colorado, Boulder. His research interests include developing theoretically grounded models of information systems quality, investigating how people make IT paradigm shifts, and determining the business value of information technology. Dr. Nelson generally teaches the more technical courses in information systems including object oriented technology, systems analysis and design, database theory and practice, and business data communications.

Roshanak Rouzbehani has a bachelor’s degree in “Management”, a master’s degree in “IT Management”. Her current major research interests are in “Knowledge Management” and “Business Ethics”.

Fatemeh Saghafi is an assistant professor at the Iran Telecommunication Research Center (ITRC). She holds a BSc in Communication engineering and MSc & PhD in Industrial engineering. She has been working for about 15 years in ITRC. Her main research interests include e-government development and implementation, system simulation, foresight, performance management systems, knowledge management, social network and decision-making science.
About the Contributors

Nickolas S. Sapidis is currently a Professor of “Computational Design and Analysis of Machine Elements” with the Department of Mechanical Engineering of the University of Western Macedonia (Kozani, Greece). Prior to that, he was a faculty member with the Department of Product and Systems Design Engineering of the University of the Aegean (Syros, Greece). He holds a Diploma in Naval Architecture & Marine Engineering (1985), an M.A. in Applied Mathematics (1987) and an M.S. in Mechanical Engineering (1988). He received his PhD in Mechanical and Aerospace Sciences from the University of Rochester in 1993. N. Sapidis is on the editorial board of these international scientific journals: International Journal of Visual Analytics for Advanced Information Management, Computer-Aided Design, Virtual and Physical Prototyping, International Journal of Product Lifecycle Management, Computer-Aided Design and Applications, Mathematical Problems in Engineering, International Journal of Product Development, Computer Graphics and CAD/CAM, International Journal of Design Engineering, and International Journal of Computer Aided Engineering and Technology. N. Sapidis has been pursuing research on “Design of Mechanical Products”, “Computer-Aided Design (CAD)”, “Computer-Aided Engineering (CAE)”, “Solid Modeling”, “Geometric Modeling of Surfaces”, “Geometric Algorithms”, “Virtual Engineering”, and “Computer Graphics”. He is the author of more than 50 papers on the above subjects. His research has been implemented in industrial CAD/CAE-software systems by the Massachusetts Institute of Technology (MIT) and companies including General Motors (GM), Intergraph and Tribon Solutions. N. Sapidis has taught at the Hellenic Air Force Academy, the National Technical University of Athens, the University of Athens and the Polytechnic University of Catalunya (Spain). Also, he has been providing education/training services to MIT as well as to major Greek corporations like Elefsis Shipyards and the Bank of Greece. His industrial experience on CAD/CAE includes GM R&D Center and GM Design Center (USA), as well as the Marine Technology Development Co (Greece). N. Sapidis has served on the Program Committee of more than 40 international conferences, and was an “invited Keynote Speaker” for 7 international conferences. N. Sapidis has given “invited lectures” at numerous conferences, Universities and corporations in Asia, Europe and the US.

Carol Saunders is currently Professor of Management at the University of Central Florida. She served as General Conference Chair of ICIS’99 and Telecommuting ’96. She is an AIS Fellow and has served on a number of editorial boards, including a three-year term as Editor-in-Chief of MIS Quarterly. She currently is the Senior Editor of the IS Research Perspectives section of Journal of the Association of Information Systems (JAIS). She recently returned from Austria as the Distinguished Fulbright Scholar at the Wirtschafts Universitaet – Wien (WU). Her current research interests include the organizational impacts of information technology, overload, backsourcing, virtual teams, virtual worlds, and time. Her research is published in MIS Quarterly, Information Systems Research, Journal of MIS, Journal of AIS, Communications of the ACM, Information Resources Management Journal, Academy of Management Journal, Academy of Management Review, and Organization Science.

Alessandro Seazzu is the director of UNM’s Center for Information Assurance Research and Education (CIARE). Through CIARE, UNM has been designated by the NSA and DHS as a Center of Academic Excellence in Information Assurance and was recently selected as the host site for one of the FBI’s Regional Computer Forensics Laboratory. He has been a faculty member with the Anderson School since 1995. His areas of research and study have been in virtual environments in security and human behavior in security.
Kolsoom Abbasi Shahkooh received her MSc in Information Technology from University of West England Bristol in the UK. She has been working at the Iran Telecommunication Research Center (ITRC) as a researcher for about 7 years. Her main research interests include e-government development and implementation, enterprise interoperability, foresight, information technology, e-commerce and decision-making science.

Armin Sharafi is a doctoral candidate in Information Systems at the Department of Informatics, Technische Universitaet Muenchen. He has carried out research on IT-related areas such as process management, evaluation of workflow systems and E-Government. During that time he worked in and acquired several projects funded by public authorities (German Federal Ministry of the Interior, Bavarian Research Alliance etc.) and industry. Prior to joining his PhD program, he worked for Axel Springer, Pirelli Tyres and DaimlerChrysler. His recent research and teaching interests are data mining, knowledge discovery in databases, new product development, engineering change management and business games.

T. Sridhar has over 20 years of experience in the Networking domain where his work has involved technology consulting, software architecture and development. He received his BE in Electronics and Communications Engineering from the College of Engineering, Guindy, Anna University, Madras, India, and his Master of Science in Electrical and Computer Engineering from the University of Texas at Austin.

R. P. Sundarraj is currently a Professor of Information Systems at Qatar University’s Accounting and Information Systems department. Prior to that, he has held tenured faculty positions at the University of Waterloo, Canada, and at Clark University, USA. Professor Sundarraj obtained his Bachelors in Electrical Engineering from the University of Madras, India, and his MS and Ph.D. in Management and Computer Sciences from the University of Tennessee, Knoxville. His teaching and research encompass the development of methodologies for the efficient design and management of emerging information systems, as well as the use of parallel computing for solving large-scale problems. His work has been supported by grants and research contracts in different countries. Professor Sundarraj has published in various national and international journals such as Mathematical Programming, IEEE Transactions, ACM Transactions and European Journal of Operational Research. In addition, he has provided e-commerce solutions for marketing and inventory-management problems arising in Fortune 100 companies.

Kenneth R. Walsh is an Associate Professor in the Department of Management, Information Systems Group at University of New Orleans. Before returning to academia, Dr. Walsh was a Senior Systems Analyst at Exxon Corporation where he developed database software for oil well support and maintenance and other management applications. He received a Ph.D. in Information Systems from the University of Arizona in 1996. His research has been published in Information & Management, Communications of the ACM, and a number of other information systems journals. His research interests include network computing models, structured modeling group support systems (SM-GSS), Internet support for education, and applications of virtual reality technology. Dr. Walsh has taught a wide variety of management information systems courses at both the graduate and undergraduate levels.
About the Contributors

Ian A. Willson, currently a Technical Fellow with The Boeing Company, is an associate editor of the International Journal of Visual Analytics (IJVA). He received his Ph.D. in Artificial Intelligence and Management Sciences from the University of Toronto where he also held a SSHRC post-doctoral fellowship. Ian’s dissertation and national post-doctoral fellowship culminated in the publication of many research papers in refereed journals such as the European Journal of Operational Research, Fuzzy Sets and Systems and The International Society for Optical Engineering. He taught undergraduate and graduate courses at the University of Toronto and has been an invited speaker at numerous conferences and universities worldwide. He has advanced the state of the art in data and analytics, first at the IBM Software Laboratory and then at Management Science Associates, where he created innovative analytical software for the first Massively Parallel Processing computer. His research interests also include psychology, marketing, management science and computer science domains such as artificial intelligence, user interface design, heuristics, visualization and many aspects of analytics and relational database technology. Ian also serves as Vice-Chairperson of the Teradata Product Advisory Council.

Petra Wolf heads the public information management Research Group at the Chair for Information Systems of the Technische Universitaet Muenchen. Among her main research interests are business process management for E-Government, public sector reengineering and knowledge management. She has been involved in numerous research projects dealing with information needs of managers in public administration, questions of IT governance in public sector, business to government processes or methods for efficiency assessment of E-Government solution. Currently her research group focuses on questions concerning the efficient design of interorganizational E-Government processes.

Yu “Andy” Wu is an assistant professor in the Department of Information Technology and Decision Sciences, College of Business at the University of North Texas. He received a Ph.D. in Management Information Systems from the University of Central Florida. Andy’s primary research interests include social networks and information security. His articles appeared in journals such as Informing Science, Journal of Organizational and End User Computing, Communication of the Association for Information Systems, International Journal of Networking and Virtual Organizations, and the proceedings of a number of international conferences. Before his academic career, Andy had seven years’ experiences in various business and management positions.

Mehdi Shami Zanjani is Assistant Professor of Information Technology Management at the Faculty of Management, University of Tehran. He has a bachelor’s degree in “Industrial Management”, a master’s degree in “Information Technology Management”, and a PhD in “Systems Management” from the University of Tehran. His professional experience includes ten years, three of which were spend as senior consultant of “Programme Management” at “Iran Tax Administration Reform Programme”. He also has several consulting experiences to SMEs and government agencies in the field of “Knowledge Management”. He has been teaching “Knowledge Management Process”, “Project & Programme Management”, “Systems Analysis & Design” and “Management Information Systems” for six years. His current major research interests are in “Knowledge Management Mechanisms” and “Programme Management”.
