Abdulaziz Al Ateeqi works as doctor of veterinary medicine in the Animal Health Department at the Public Authority of Agriculture Affairs and Fish Resources, in Kuwait. He holds a bachelor of Veterinary Medicine and Animal Resources. His interests include impact of RFID on Livestock Traceability.

Walter W. Austin is a professor of accounting at Mercer University, Macon, Georgia. He has a Ph.D. in accounting from the University of Georgia and is a CPA. He is a retired Air Force officer, having served as a personnel officer, auditor, and United States Air Force Academy faculty member. He has served as an expert witness or consultant, calculating lost profits, and economic damages in over 50 cases in state and Federal courts.
Linda L. Brennan is a professor of management at Mercer University in Macon, Georgia. She conducts research and consults in the areas of technology impact assessment, process and project management, and instructional effectiveness. Brennan has been published in scholarly and practitioner-oriented journals. Her most recent book, *Operations Management*, was published by McGraw-Hill in 2010. A licensed professional engineer, she received her Ph.D. in industrial engineering from Northwestern University, her MBA in policy studies from the University of Chicago, and her B.I.E. in industrial engineering from the Georgia Institute of Technology.

Julia Davis, PhD, is an assistant professor in counselor education and the coordinator of the student affairs counseling program at SUNY Plattsburgh in Plattsburgh, N.Y. She teaches graduate courses in student affairs, counseling, assessment, and research methodology. Her scholarly interests include international and global education, college student development, and instructional technology and pedagogy.

Alicia Roberts Frank, Ed.D. is an assistant professor in Teacher Education at SUNY Plattsburgh in Plattsburgh, N.Y. Her background is in special education and literacy, and she has taught children with disabilities in the first through 12th grades. Currently she teaches both undergraduate and graduate classes in childhood education and special education, including literacy for special-education teachers and social contexts of learning. Her research interests are reading disabilities, including students with exceptional needs in general-education classes, and teacher preparation.

András Gábor is an associate professor at the Department of Information Systems of Corvinus University of Budapest. He is an economist and graduated from the Karl Marx University of Economics. He has a second degree in Computer Science (1979), earned his Ph.D. in 1983 and has been a CISA (Certified Information Systems Auditor) since 1999. He is an Associate Professor, the Head of the Department of Information Systems and of the Technology Transfer Centre of the Budapest University of Economic Sciences and Public Administration. He is also the head of the Information Management Division of the Information Technology Foundation of the Hungarian Academy of Science. His research interests include systems design, information management, intelligent systems and knowledge management. He was a visiting scholar at Harvard Business School 1995, the University of Amsterdam, (1990-1995), the Imperial College of Science and Technology, 1986, DePaul University, Department of Computer Science and Information Systems, Chicago, USA, 1985, and Imperial Chemical Industries, Pharmaceutical Division, UK, 1975. He is the holder of the Award for Excellence of the President of the Hungarian Academy of Sciences.
About the Contributors

Michael J. Heymann is an undergraduate student at SUNY Plattsburgh majoring in childhood education with a concentration in English. A member of Omicron Delta Kappa National Leadership Society and NCAA Cross-Country/Track and Field Team Captain, he hopes to pursue a masters degree in literacy education.

A. Karantjias has obtained the Degree of Electrical and Computer Engineering from University of Patras in 2000 and a PhD in Computer Science from National Technical University of Athens in 2005. He is currently Assistant Professor at the Department of Computer Science of University of Piraeus. His current research interests include identification, design and evaluation of synchronous security and interoperability issues on enterprise architectures and advanced wireless information systems.

Andrea Kő is an associate professor at the Department of Information Systems of Corvinus University of Budapest. She graduated from ELTE (Eötvös Lóránd University of Budapest) in 1988 and has an MSc in mathematics and physics. She achieved a Doctorate (University Doctor in Computer Science) in 1992, PhD in Management and Business Administration in 2005 and has been a CISA (Certified Information Systems Auditor) since 2010. Her research interests include information management, knowledge management, business intelligence and IT audit. She participated in several R&D projects and she has published numerous papers in her field.

Barna Kovács is a research associate at the Department of Information Systems of Corvinus University of Budapest. He is an economist and graduated from the Corvinus University of Budapest in 2003. He received his Ph.D. in the topic of managing information overload in organizational workflow systems in 2011. His research interests include systems design, information management. He was a visiting scholar at University of Kuopio (Finland) in 2005. He participated various national and European Union research projects.
Keith Levine is an alumnus of Quinnipiac University, earning a Bachelor of Science in Accounting in 2009. He also received the degree of Master of Business Administration in Finance from Quinnipiac in 2010. Keith is a 2009 Quinnipiac University School of Business Charter Oak Society Scholar, and received the Dean's Emerging Leader Award in 2010. He attained the rank of Eagle Scout in 2004. Keith began his career in Assurance Services with Ernst & Young in 2010, with CPA licensure pending in New Jersey.

Ivan Magdašćenić is assistant at the University of Zagreb, Faculty of Organization and Informatics in Varaždin, Croatia. He received his B.S. and M.S. degrees in Electrical Engineering with a major in Telecommunications and Information Science from the University of Zagreb, in 2000 and 2003, respectively. The research topic of his Master thesis was “Business Documents Interchange”. He has been working as a research assistant at the Faculty of Electrical Engineering and Computing, University of Zagreb from 2000 to 2003. He received his Ph.D. degree in Computer science 2009. The thesis title was “Dynamic generation of ontology supported Web services for data retrieval”. His research interests are in e-Business, Web technology, Semantic Web technology and generative programming. He is leader of technical committee in project of Introduction of e-Invoice in Croatia and he is a member of National council for electronic business. He is author and coauthor of many scientific and technical studies and research papers.

Annette Mills is a Senior Lecturer at the University of Canterbury (New Zealand). Annette holds a PhD in Information Systems from the University of Waikato (New Zealand). She has published a number of refereed articles in journals and edited books including Information and Management, Computers and Education, and Journal of Knowledge Management. She currently serves on the editorial boards for the Journal of Cases on Information Technology, Journal of Global Information Management, and the International Journal of e-Collaboration. Her research interests include social computing, technology adoption and usage, and service expectations.

Ulrich Remus is a Senior Lecturer at the University of Canterbury, New Zealand. He holds a Masters in IS from the University of Bamberg and a PhD from the University of Regensburg, Germany. Ulrich’s area of research includes process and knowledge management as well as the development of large enterprise systems. Ulrich has authored and co-authored more than fifty papers in journals, books and major IS conference proceedings. His work has appeared in leading international journals, such as Information Systems Journal, Business Process Management Journal, Journal of Knowledge Management and Knowledge and Process Management.
Kamel Rouibah is an Associate Professor of information systems, College of Business Administration, Kuwait University. He holds a PhD in Information Systems from Ecole Polytechnique of Grenoble, France. His research interest focuses on management information system, information technology acceptance, diffusion, and satisfaction, e-commerce. He has authored/co-authored over 50 research publications in peer-reviewed reputed journals and conference proceedings. He was involved in several European projects. His publications appeared in several leading journals such as: Journal of Strategic Information System, IT & People, Journal of Global Information Management, Computers in Human Behaviour, and Computers in Industry; He has received the excellence younger researcher award from Kuwait University for the academic year 2001/2002. He directed many funded research projects, and has served as the program committee member of various international conferences. Dr Rouibah sits on the Editorial Board of several Information system journals: such as Journal of Global Information Management; Journal of Electronic Commerce in Organizations (JECO); International Journal of e-Adoption; International Journal of Handheld Computing Research.

Samia Rouibah is an assistant Professor at the Gulf University for Science & Technology. She holds a PhD from the University of Joseph Fourrier (University of Grenoble 1, France). Her current research interests include computer support decision making, motivational determinants of information technology adoption, e-commerce, m-commerce, and performance impact of IT. Her publication appeared in several journals: Journal of Strategic Information System, International Journal of Computer Integrated Manufacturing, Robotics & Computer Integrated Manufacturing Journal, Journal of Decision System, and Arab Journal of Administrative Sciences.

Heidi L. Schnackenberg, PhD, is a professor in teacher education at SUNY Plattsburgh in Plattsburgh, NY. Specializing in educational technology, she currently teaches both undergraduate and graduate classes on the use of technology to enhance teaching and learning in the P-12 classroom, social issues in education, and ethical issues in educational technology. Her various research interests include the integration of technology into pedagogical practices and the legal and ethical implications of western technologies in non-western and third world cultures.

Edd Schneider, PhD, is an associate professor in the department of computer science, organizational leadership, and technology at SUNY Potsdam in Potsdam, N.Y. He joined SUNY Potsdam from London Metropolitan University in the UK in 2003. Specializing in digital media production, Dr. Schneider teaches courses on interactive media, web design, desktop publishing, and motion graphics. His
About the Contributors

Dr. Schneider's research interests involve the construction, measurement, and uses of virtual world spaces. Dr. Schneider also produces digital media for a range of industry clients, both in the United States and in China.

**T. Stamati** has obtained a Degree in Computer Science from National and Kapodistrian University of Athens (Greece) in 1998. She also holds an MPhil Degree in Information Systems from University of Manchester Institute of Science and Technology (UMIST) (UK), an MBA Degree from Lancaster University Business School (UK) and a Phd in Information Systems from Informatics and Telecommunications Department from National and Kapodistrian University of Athens (Greece). She has extensive experience in top management positions in leading IT companies of the Greek and European private sector. She is currently Research Fellow at the Department of Informatics and Telecommunications of National and Kapodistrian University of Athens. Her current research interests include information systems, electronic and mobile government, service science, e/m-commerce, SOA and cloud computing.

**Lindsay Stuart** is a PhD candidate of the Information Systems department at the University of Canterbury (New Zealand). Lindsay’s PhD thesis examines the role of organizational culture in the implementation of enterprise systems. His research interests include culture, enterprise systems, educational administration and web application development.

**Neven Vrček** is full professor at the University of Zagreb, Faculty of Organization and Informatics, Varaždin, Croatia. His area of research and professional interest are Software Engineering and Electronic Business. He is member of various professional and scientific associations related to wide aspects of ICT use and organizational development. Occasionally he works as business and ICT consultant.

**Zachary Warner** is a doctoral student in educational psychology at the University at Albany, State University of New York. He holds graduate degrees in educational psychology and methodology and adolescent education from the State University of New York as well as an undergraduate degree in mathematics. A former high school math teacher, his research interests include assessment and testing. Currently he is working with a team examining rubric-referenced self-assessment in middle school classrooms.

**Bruce White** is a professor of computer information systems at Quinnipiac University in Hamden Connecticut. He has chaired the ISECON (Information Systems Education Conference) four times, was the AITP-EDSIG Information Systems
About the Contributors

Educator of the Year in 2008, a winner of the Center of Excellence in Teaching at Quinnipiac University in 2008, and a winner of the Outstanding Faculty Award at Quinnipiac University in 2011. He has also served as chair of the Computer Information Systems department at Quinnipiac University and is an active accreditation reviewer for information systems programs under ABET.
