About the Contributors

Saqib Saeed is an Assistant Professor at the Computer Science department at Bahria University Islamabad, Pakistan. He has a Ph.D. in Information Systems from University of Siegen, Germany and a Master’s degree in Software Technology from Stuttgart University of Applied Sciences, Germany. He is also a certified Software Quality Engineer from American Society of Quality. His research interests lie in the areas of human centered computing, computer supported cooperative work, empirical software engineering, and ICT4D.

Christopher G. Reddick is an Associate Professor and Chair of the Department of Public Administration at the University of Texas at San Antonio, USA. Dr. Reddick’s research and teaching interests are in information technology and public sector organizations. Some of his publications can be found in Government Information Quarterly, Electronic Government, and the International Journal of Electronic Government Research. Dr. Reddick recently edited the two volume book entitled Handbook of Research on Strategies for Local E-Government Adoption and Implementation: Comparative Studies. He is also author of the book Homeland Security Preparedness and Information Systems, which deals with the impact of information technology on homeland security preparedness.

Hisham Abdelsalam holds a Master’s of Science and a Ph.D. in Mechanical Engineering (Old Dominion University, Norfolk, Virginia, USA). He obtained his Bachelor’s degree with honors in Mechanical Engineering from Cairo University (Cairo, Egypt). Dr. Abdelsalam is an Associate Professor in the Operations Research and Decision Support Department, Faculty of Computers and Information, Cairo University. In 2009, Dr. Abdelsalam was appointed as the Director of the Decision Support and Future Studies Center in Cairo University. During the past four years, D. Abdelsalam has led several consultancy and research projects and published several scholarly articles on e-government.

Emad A. Abu-Shanab earned his PhD in Business Administration, majoring in MIS area in 2005 from Southern Illinois University – Carbondale, USA. He earned his MBA from Wilfrid Laurier University in Canada and his Bachelor in Civil Engineering from Yarmouk University (YU) in Jordan. He is an Associate Professor in MIS, where he taught courses like operations research, e-commerce, e-government, introductory and advanced courses in MIS, production information systems, and legal issues of computing. His research interests are in areas like E-government, technology acceptance, and E-learning. He has published many articles in journals and conferences and authored two books in e-government area. Dr. Emad worked as an Assistant Dean for students’ affairs, quality assurance officer in Oman, and the director of Faculty Development Center at YU.
Sujana Adapa is a Lecturer in Management (Strategy & Marketing) in the UNE Business School at the University of New England (UNE), Armidale, Australia. Sujana teaches Introduction to Marketing, Marketing Strategy & Management, Services Marketing, and International Marketing units at UNE for undergraduate and postgraduate students. Her research interests relate to the adoption of technological innovations, corporate social responsibility, sales management, destination visitations, and branding. She has published research papers in reputed journals and presented her research in national and international journals.

Vanni Agnoletti earned MD, specialization in Anaesthesia and Intensive Care, University of Bologna, Italy. He has been consultant anaesthesiologist and teacher of anaesthesia. Currently, he is working at Morgagni-Pierantoni Hospital in Forlì (Italy) as tutor of anaesthesia and clinical practice. He has been a speaker and guest speaker at national and international meetings on thoracic anaesthesia-analgesia, difficult airway, operating room management, quality, and safety in medicine, and is author or co-author of 29 publications listed in PubMed.

Jaffar Ahmad Alalwan is an Assistant Professor at the Institute of Public Administration in the eastern province of Saudi Arabia. He holds a PhD from Virginia Commonwealth University in Information Systems, an MBA from the University of Scranton in Management Information Systems and Marketing, and a BS in Business Administration from King Abdul Aziz University. Alalwan has published research in the areas of strategic information systems planning, enterprise content management, electronic government, and the Semantic Web.

Erwin A. Alampay obtained his PhD in Development Administration and Management at the University of Manchester, and his MA in Development Studies at the Institute of Social Studies, The Hague. He is an Associate Professor at the National College of Public Administration and Governance (NCPAG) in the University of the Philippines. He is a Senior Editor for the Electronic Journal for Information Systems in Developing Countries (EJISDC) and recently edited the book, “Living the Information Society in Asia” (2009) ISEAS Publishing and IDRC. His research interests are in telecommunication policy, e-governance, ICT for Development, e-commerce, and the non-profit sector. He is the current Director of the Center for Leadership, Citizenship, and Democracy (CLCD) of NCPAG.

Izzat Alsmadi is an Associate Professor in the department of Computer Information Systems at Yarmouk University in Jordan. He obtained his PhD degree in Software Engineering from NDSU (USA). His second Master’s in Software Engineering is from NDSU (USA), and his first Master’s in CIS is from University of Phoenix (USA). He had a BSc degree in telecommunication engineering from Mutah University in Jordan. He has several published books, journals, and conference articles largely in software engineering different fields.

Upali Aparajita is a Professor in Social and Development Anthropology at Utkal University, Bhubaneswar (India). She earned her MA degree in Social Anthropology in 1985, and PhD degree in Developmental Anthropology in 1991, both from Utkal University. Her research interest is primarily on development issues in traditional societies in the framework of culture. She has published over thirty five research papers in journals of repute as well as in edited volumes including IGI Global publication,
dealing with various aspects of management and development highlighting cultural dimension in the development process of various societies as well as organizations. Currently, she is working in Business Anthropology and has guided few Doctoral scholars in Anthropology and Management.

Manuel Pedro Rodríguez Bolívar is an Associate Professor in accounting at Granada University (Spain). He is a member of the European Accounting Association, the World Accounting Forum, the Spanish Association of Accounting University Teachers and the Spanish Association of Accounting and Business Management. His main research interests are focused on e-government, public sector management and international public sector accounting. He is the author of numerous articles in national and international journals, including Public Money & Management, Public Administration and Development, American Review of Public Administration, Online Information Review, Government Information Quarterly, Administration and Society, Abacus, International Public Management Journal, International Review of Administrative Sciences, and Academia Revista Latinoamericana de Administración (ARLA). He has also contributed chapters to books edited by Kluwer Academic Publishers, Springer, Routledge, NovaPublishers, and IGI Global, and he is author of books published by both the Ministry of Economy and the Ministry of the Treasury in Spain.

Matteo Buccioli graduated in Clinical Engineering, University of Trieste, Italy, is the Health Information Manager at Morgagni-Pierantoni Hospital in Forlì, Italy, and is also a specialist in data management and logistic and management in operating rooms.

Charlie E. Cabotaje obtained his MSc in Governance and Spatial Information Management at the University of Twente's Faculty of Geo-Information Science and Earth Observation (ITC) in The Netherlands. He finished his post graduate Diploma in Urban and Regional Planning at the University of the Philippines’ School of Urban and Regional Planning (SURP). He currently works as a University Researcher at the Center for Leadership, Citizenship, and Democracy and as a Lecturer at the National College of Public Administration and Governance (NCPAG). He has written case studies on people’s participation in the contexts of poverty alleviation and government intervention. His research interests include environment and governance, people’s participation, ICTs, and policy studies.

Vincenzo Cavallo obtained his PhD in 2010 at IULM University. In 2004 he developed an eParticipation project that was awarded as best Public Communication Project at COMPA 2006. In 2007 he worked for the United Nations Department of Economic and Social Affairs. In 2008 he co-founded Cultural Video Foundation, an independent NGO based in Nairobi, working in the field of New Media and Social/Participatory-video productions. In 2009 he started the Urban Mirror project and developed an eParticipation platform using Ushahidi software to map public spaces and urban art in Nairobi. In 2010 he won the International Human Rights Film festival of Naples and in 2011 was awarded by the National Television Committee of Chile. In 2012 was invited to Oxford University to give a seminar about the “eParticipation ecologies of Kenya.” He is currently working on a crowd-sourcing project to map sites of memories in Kenya.
About the Contributors

Yu-Che Chen, Ph.D., is an Associate Professor in the Division of Public Administration at Northern Illinois University. Dr. Chen received his Master of Public Affairs and Ph.D. in Public Policy from Indiana University. His current research projects are on e-governance performance, government 2.0 and social media, and international implementation of eXtensible Business Reporting Language (XBRL). His most recent co-edited book is entitled “Electronic Governance and Cross-boundary Collaboration.” His e-government research can be found in scholarly journals such as Public Administration Review, American Review of Public Administration, and Government Information Quarterly. His teaching interests are in electronic government and collaborative public management. He received NIU’s MPA Professor of the Year Awards in 2007 and 2009. He is the Chair of the Technology Advisory Committee and the Chair of the Section on Science and Technology in Government for the American Society for Public Administration (ASPA).

Gregory Derekaris received the Diploma and MSc degrees in Computer Engineering and Informatics from the Department of Computer Engineering and Informatics, University of Patras, Greece, in 1997 and 2000, respectively. He is currently an Informatics teacher at high school. His main research interests include e-learning, web-based systems, GIS, and e-government. He has participated in national and EU research programs. He has published approximately 10 papers in international journals, edited volumes, and proceedings of conferences and workshops.

Hatem Elkadi was born in Egypt in 1960. He graduated from the Faculty of Engineering, Cairo University in 1983. He got his PhD at the University of Lille, France, in 1993. He is currently an Assistant Professor at Cairo University. He is Advisor for Strategic Projects at MSAD (Ministry of State for Administrative Development), and supervises a number of national e-government projects. He was the Director of the Egyptian eGovernment Services Delivery Program which was ranked 23th worldwide in 2010, and in 2008, he won the first prize for the All Africa Public Service Innovation Award. He is member of the “National Dispute Settlement Committee for ICT issues,” as well as the steering committee for the “National ID Card project.” During his carrier, he managed several successful ICT projects with the government of Egypt, private sector and NGO’s, as well as consulted for National Projects in Yemen and Kuwait.

Melissa Foster is a recent Master of Public Administration graduate from Northern Illinois University with a specialization in Public Management and Leadership. She previously worked at the Village of Berkeley, Illinois where she managed the Village’s electronic communications and website, as well as contributed to special projects and Village operations on a daily basis. She plans to continue her work in municipal government and to eventually return for her Ph.D. in Public Administration and continue research in the public sector. This chapter was completed with research compiled for her Capstone thesis paper while in the Public Administration Masters program.

Sara Gamal is a Research Assistant at the Decision Support and Future Studies Center, Faculty of Computers and Information – Cairo University. She also worked as Research Assistant at the Information and Decision Support Center, the Egyptian Cabinet. She studied Statistics and Economics at the Faculty of Economic and Political Science (FEPS) – Cairo University, at the moment she is preparing here Masters’ degree in Statistics at FEPS.
Antonio M. López Hernández is Professor of Accounting at the University of Granada. He teaches public sector management and control. His research interests are focused on the financial information disclosures on the Web (e-government), on the management system and financial information in the federal and local governments. He has published in journals such as, Government Information Quarterly, International Review of Administrative Science, American Review of Public Administration, International Public Management Journal, Online Information Review, Public Administration and Development, Public Money & Management, and Public Management Review. He has been also the author of several book chapters published in prestigious international publishers such as Kluwer Academic Publishers, Springer, and IGI Global.

Charles C. Hinnant is an Assistant Professor in the College of Communication and Information at Florida State University. His research interests include social and organizational informatics, knowledge work distributed teams, digital government, information management and policy, social science research methods, and applied statistics. He is particularly interested in how organizations employ Information and Communication Technology (ICT) to alter organizational processes and structures and how the use of ICT impacts institutional governance and knowledge production mechanisms. His has appeared or is forthcoming in journals such as Journal of the American Society for Information Science and Technology, Administration and Society, Government Information Quarterly, Journal of Public Administration Research and Theory, and IEEE Transactions on Engineering Management. He earned his B.S. and M.P.A. at North Carolina State University and his Ph.D. in Public Administration from the Maxwell School of Citizenship and Public Affairs at Syracuse University.

Rawan T. Khasawneh graduated from Yarmouk University with a Bachelor of Management Information Systems in 2011, and still a Master’s degree student specializing in Management Information System at Yarmouk University in Jordan. Rawan has research interest in e-government topics like digital divide, security issues, and adoption of e-government. Also, she works on research projects in social media and group decision support systems.

Jisue Lee is a Doctoral student in Library and Information Studies, College of Communication and Information at Florida State University. Based on her work experiences in government sectors in Korea, her research interests include social informatics, e-government, social media, and political communication. Her recent interests focus on how citizens use social media to seek and share political information and opinion, and how government agencies/organizations utilize social media channels to interact with citizens. She presented a poster on the adoption of online technology by volunteer-based organization in 13th Annual International Conference on Digital Government Research and currently participates in projects on citizens’ political communication through social network site, Twitter. She earned her B.A. in History at Ewha Womans University and her M.A. in Library and Information Science at Yonsei University in Korea.

B. K. Mangaraj is working as a Professor in Production & Operations Management Area at XLRI School of Business and Human Resources, Jamshedpur, India since 1st November, 2006. Prior to joining XLRI, he was a Professor and Head of the Department of Business Administration at Utkal University, Bhubaneswar, India. He did his MSc in Mathematics & Ph.D. in Operations Research, both from Indian
Institute of Technology, Kharagpur, India. He also holds a D. Sc degree in Development Anthropology from Utkal University, India. His areas of research interests include multi-criteria decision-making, fuzzy and stochastic optimisation, cross-cultural management, and business anthropology. Recipient of gold medals and awards for some of his research works; he has already guided nine scholars for their Ph.D. degrees in Management. Several of his publications have already appeared in reputed journals and edited volumes including IGI Global publications. He has also presented forty two research papers in various conferences and has written management teaching cases for classroom discussion. A reviewer for several edited volumes and conference proceedings, he has also been reviewing for international journals including European Journal of Operational Research, International Journal of Shipping and Transportation Logistics, Agricultural Economics, and International Food and Agribusiness Marketing. His consulting experience ranges from government to private sectors.

Lorri Mon is an Associate Professor at Florida’s iSchool, the Florida State University College of Communication and Information in the School of Library and Information Studies. She teaches in the areas of social media management, government information, and reference and information services. Her research has explored the changing nature of the provision of online information services in e-government, online education, and digital libraries, including how users approach and interact with virtual information services, and how institutions and information providers have experimented with implementing information services over a wide range of digital communication technologies including chat, e-mail, instant messaging, text messaging, social media, and virtual worlds.

Robert Jeyakumar Nathan is Bachelors in Marketing and Multimedia (MMU); Masters of Philosophy (Research in Ergonomics and Internet Marketing), Multimedia University, Malaysia. He was formerly a System Analyst for Infineon Technologies AG, a semiconductor manufacturing company based in Munich, Germany, specialising in Manufacturing Statistics and Data Analysis. He has conducted statistical, datamining and enterprisedocument and knowledge management system trainings in various plants in Asia, Europe, and North America. Mr. Nathan is currently attached to Multimedia University, Malaysia and is active in various research projects in Malaysia, Singapore, Australia, and in the Middle East. His research interests include marketing and information technology, electronic commerce, social networks technologies, usability and ergonomics, and occupational safety & health research. Mr. Nathan is an active member of the National Institute of Occupational Safety and Health (NIOSH) Malaysia and is the Assistant Secretary General for Malaysian Academic Movement; affiliated to The Education International. He currently holds Associate Lecturer position with Newcastle Business School under the University of Newcastle Australia (Singapore Campus).

M. Maina Olembo has been a PhD student at Center for Advanced Security Research Darmstadt (CASED) since January 2011. As a member of SecUSo, and under the supervision of Prof. Dr. Melanie Volkamer, the focus of her PhD work is Usable Verifiability in Remote Electronic Voting. She holds a Bachelor’s degree in Computer Science from the University of Nairobi, and a Master’s in Information Technology (System Security and Audit) from Strathmore University. Prior to starting her PhD, she was an Assistant Lecturer at Strathmore University in Nairobi, Kenya. She is a professional member of the Association for Computing Machinery (ACM).
Rebecca L. Orelli, BA Business Economics, University of Bologna, Italy, Ph.D. Management of the Public Sector, University of Salerno, Italy, is visiting scholar at London School of Economics, Accounting Department, UK. She is Lecturer in Business Economics, Department of Management, University of Bologna, Italy; affiliated with EBEN; current research interests include new public management and public services changes in local governments, management accounting and management control in public sector. More info at: www.unibo.it/faculty/rebecca.orelli.

Emanuele Padovani, BA Business Economics, University of Bologna, Italy, Ph.D. Business Administration, University of Ferrara, Italy, is Associate Professor of Public Management and Accounting in the Department of Management at the University of Bologna, Italy. She has research interests in public management with specific reference to management control systems, performance measurement for management and auditing, benchmarking, and management of outsourcing. More info at: www.unibo.it/faculty/emanuele.padovani.

Carmen Caba Pérez, Ph. D. in Governmental Accounting, is Associate Professor at the Department of Accounting and Finance at the University of Almeria (Spain). She is a foundational member of the Spanish Association of Accounting University Teachers and member of European Accounting Association. She teaches Financial Accounting and Public Sector Management and control. Her research interests are focused on the financial information disclosures on the Web (e-government), on the management system and financial information in the federal and local governments. She is author of numerous articles in national and international journals indexed at the ISI/JCR including Government Information Quarterly, Online Information Review, International Review of Administrative Sciences, American Review of Public Administration, Public Administration and Development and Public Management Review. Also, she has written some chapters to book edited by prestigious international Editorials (Kluwer Academic Publishers, IGI Global, and Springer) on different topics related to e-government.

Jim Prentzas received the Diploma degree in Computer Engineering and Informatics and the MSc and PhD degrees from the Department of Computer Engineering and Informatics, University of Patras, Greece, in 1997, 2001, and 2003, respectively. He is currently an Assistant Professor at the Department of Education Sciences in Pre-School Age, Democritus University of Thrace, Greece. His main research interests include artificial intelligence, knowledge representation and reasoning, expert systems, e-learning, web-based systems and e-government. He has been member of Program Committees of international conferences. He has participated in a number of National and EU research programs. He has published over 60 papers in international journals, edited volumes, and proceedings of conferences and workshops.

T. Ramayah has an MBA from Universiti Sains Malaysia (USM). Currently he is a Professor at the School of Management in USM. He is an avid researcher, especially in the areas of technology management and adoption in business and education. His publications have appeared in Computers in Human Behavior, Direct Marketing: An International Journal, Information Development, Journal of Project Management (JoPM), Management Research News (MRN), International Journal of Services and Operations Management (IJISOM), Engineering, Construction and Architectural Management (ECAM), and North American Journal of Psychology. He also serves on the editorial boards and program committees of many international journals and conferences of repute. In 2006 he was awarded the “AGBA
Distinguished ASEAN Scholar” for his contribution to research and publication in the ASEAN region. He was a Visiting Professor at the National Taiwan University for a month in 2007.

Markus Rohde studied psychology and sociology at the University of Bonn and is one of the founders of the International Institute for Socio-Informatics (IISI). At the moment, Dr. Rohde is working as project manager for IISI and as research leader of Community Informatics at the Institute for Information Systems, University of Siegen, Germany.

Giovanni Maria Sacco is Associate Professor of Information Systems and HCI with the Department of Informatics, University of Torino, Italy. Before that, he had worked at Purdue University, at the IBM San Jose Research Lab (in the System-R group), and at the University of Maryland, among others. Sacco’s work on security with Dorothy Denning was the first attack on key distribution protocols and one of the bases of MIT’s Kerberos. His work with Mario Schkolnick on buffer management for relational database systems introduced predictive buffer management. He introduced fragmentation, later known as recursive hash partitioning, the first sub-sort/merge join method, which is widely implemented in industry. Since the 80’s he has been active in the area of information retrieval, in which he led research and industrial projects. He introduced dynamic taxonomies (aka faceted search) and has published over 25 papers on this topic. He also holds several US patents in information technology.

T. Santhanamery was an Operation Officer for Maybank Berhad from 1996 – 2002. Her experience in the banking industry for 6 years was in the area of banking operations and handling customer service. She obtained her first degree in Economics from Universiti Utara Malaysia in the year 1996. She completed her Master’s in Business Administration (MBA) from Universiti Utara Malaysia in year 2001. She started her career in lecturing with Faculty of Business Management, Universiti Teknologi MARA Malaysia in year 2002. Currently, she is pursuing her PhD by research in the area of Technology Management in Universiti Sains Malaysia under the scholarship of Ministry of Higher Education (MOHE) Malaysia. Having experience in banking and education industry for almost 14 years, she would like to collaborate and share her experience in technology management and operation management area.

Norazah Mohd Suki is an Associate Professor at the Labuan School of International Business & Finance, Universiti Malaysia Sabah. Her research interests include E-Commerce, M-Commerce, and areas related to Marketing. She actively publishes articles in international journals. She is the editor-in-chief to Labuan e-Journal of Muamalat & Society, and member in advisory board for several outstanding journals. She has sound experiences as speaker to public and private universities, government bodies on courses related to Structural Equation Modelling (SEM), Statistical Package for Social Sciences (SPSS), Research Methodology.

Manoj A Thomas is an Assistant Professor in the Department of Information Systems at Virginia Commonwealth University. He holds a Ph.D in Information Systems, Masters in Information Systems, Masters of Business Administration and Bachelor’s in Engineering. His primary research interests focus on knowledge engineering, innovation and ICT4D. He has published in many practitioner and academic journals, and has presented at various information systems conferences. He rides and works on motorcycles when he wants to get away from the digital realm.
About the Contributors

Athanasios Tsakalidis received a Diploma degree in Mathematics from Aristotle University of Thessaloniki, Greece. Afterwards he received the diploma, MSc and PhD degrees in Computer Science from the University of Saarland in Germany. The supervisor of his PhD Thesis was Kurt Mehlhorn who is currently the Director of Max Planck Institute for Informatics. He is currently a Professor at the Department of Computer Engineering and Informatics, University of Patras, Greece. He is Director of the Graphics, Multimedia, and GIS Laboratory. His research interests include data structures, algorithms, computational geometry, GIS, databases, information retrieval, bioinformatics, multimedia, e-learning, web-based systems, and e-government. He has supervised over twenty PhD theses. He has published many papers in international journals, edited volumes, and proceedings of conferences and workshops. He was one of the 48 authors of the “Handbook of Theoretical Computer Science” published by Elsevier Science and co-published by MIT Press. He has participated in several EU research programs.

Shefali Virkar is research student at the University of Oxford, UK, currently reading for a D.Phil. in Politics. Her doctoral research seeks to explore the growing use of Information and Communication Technologies (ICTs) to promote better governance in the developing world, with special focus on the political and institutional impacts of ICTs on local public administration reform in India. Shefali holds an M.A. in Globalisation, Governance and Development from the University of Warwick, UK. Her Master’s thesis analysed the concept of the Digital Divide in a globalising world, its impact developing countries and the ensuing policy implications. At Oxford, Shefali is a member of Keble College.

Melanie Volkamer has been an Assistant Professor at the Department of Computer Science of Technische Universität Darmstadt (Germany) since February 2012. She heads the research group “SecUSo - IT Security, Usability and Society.” Before this appointment, she was a postdoctoral researcher in the group of Prof. J. Buchmann at the Technische Universität Darmstadt and coordinated the Research Area “Secure Data” at the Center for Advanced Security Research Darmstadt (CASED). She has been an advisory board member of many e-voting projects and initiatives. In particular, she acted as an OSCE election observer at the first parliamentary remote electronic election in Estonia in 2007. Furthermore, she was invited by the German Federal Constitutional Court as a technical expert for e-voting in 2008. She has presented her research at numerous conferences and to many organizations like the Council of Europe. Prof. Dr. Volkamer is a co-author of two BSI-certified Common Criteria Protection Profiles for electronic voting systems: Basic set of security requirements for Online Voting Products, and Digitales Wahlstift-System (only in German). She received her PhD on: “Evaluation of Electronic Voting: Requirements and Evaluation Procedures to Support Responsible Election Authorities” (published by Springer LNBIP), from the University of Koblenz in October 2008.
