About the Contributors

Hans W. Guesgen is a Professor of Computer Science in the School of Engineering and Advanced Technology (SEAT) at Massey University in New Zealand. His research interests include ambient intelligence, smart environments, knowledge representation, constraint satisfaction, spatio-temporal and qualitative reasoning, with more than 100 refereed papers in these areas. He holds a Doctorate in Computer Science of the University of Kaiserslautern, and a Higher Doctorate (Habilitation) in Computer Science of the University of Hamburg, Germany. Hans is a senior member of the Association for the Advancement of Artificial Intelligence (AAAI) and an honorary research associate of the Computer Science Department of the University of Auckland, New Zealand.

Stephen Marsland is Professor of Scientific Computing in the School of Engineering and Advanced Technology (SEAT) at Massey University in New Zealand. He has a degree in Mathematics from Oxford University and a PhD from Manchester University. He arrived at Massey in 2004 following postdoc positions in the US and Europe. Stephen’s research interests lie in the areas of Euler equations on diffeomorphism groups, machine learning and behaviour recognition, and complexity. He is currently supported by the RSNZ Marsden Fund.

Rodolfo Abreu is a Master student in Biomedical Engineering at Faculdade de Ciências e Tecnologia (FCT). He’s developing his thesis on “Discovery of Information on Biosignals Based on Clustering Techniques Applied to Ambient Assisted Living (AAL)” under the guidance of Professor Hugo Gamboa.

Alexander Artikis is a Research Associate in the Institute of Informatics and Telecommunications at NCSR “Demokritos,” in Athens, Greece. He holds a PhD from Imperial College London on the topic of norm-governed multi-agent systems. His research interests lie in the areas of distributed artificial intelligence, temporal representation and reasoning, artificial intelligence and law, and event-based systems. He has published papers in related journals and conferences, such as the Artificial Intelligence Journal. He has worked on the EU FP7 PRONTO project, being responsible for the event recognition work-package. He has given tutorials on several summer schools and conferences, including a tutorial on event recognition in the 2011 edition of IJCAI. He is a member of the programme committees of several international conferences, such as DEBS, AAMAS, and AAAI. He has co-organised several international workshops, including “EVENTS 2010 – Recognising and Tracking Events on the Web and in Real Life,’’ and chaired the Event Processing track in RuleML 2011.
Juan Carlos Augusto focuses his research on the design and implementation of Ambient intelligence systems, especially Smart Homes and Smart Classrooms. He has contributed to the research community with more than 160 publications, given several invited talks and tutorials, most of them related to AmI and AAL and co-chaired numerous workshops and conferences both on Ambient Intelligence and on Software Reliability. More recently, he has been Programme Chair of PH’11, IE’11, and Landscape Track Chair for AmI’11. He was appointed as Editor in Chief of the Book Series on Ambient Intelligence and Smart Environments, co-Editor in Chief of the Journal on Ambient Intelligence and Smart Environments (JAISE), both published by IOS Press; and as Editorial Board member for several other international journals in different areas of Computer Science. He is currently the technical director of NOCTURNAL (Night Optimised Care Technology for UseRs Needing Assisted Lifestyles), funded by EPSRC (UK).

Asier Aztiria is a Lecturer/Researcher at the University of Mondragon’s Polytechnical Engineering School. His research interests include artificial intelligence, machine-learning techniques, knowledge discovering applied to intelligent environments. He received his PhD degree from University of Mondragon in 2010 with the thesis titled “Learning Frequent Behaviours of the Users in Intelligent Environments.” He undertook research works at University of Ulster (UK) and Stanford University (USA).

Wilfried Bohlken studied Computer Science at the University of Oldenburg (Diploma 1999). In 2000, he worked as research associate at the Institute of Robotics and Process Control at the University of Braunschweig. From 2001 to 2008, he worked for Philips Medical Systems in the field of image processing. Since 2008, he works as research associate at the Cognitive System Laboratory, Department of Computer Science, at the University of Hamburg.

Liangliang Cao is a Research Staff Member of the Multimedia Research Group at the IBM T. J. Watson Research Center. He is working on large-scale visual recognition, action recognition, and geotagged social media. He is the key person of IBM team for federal funded ALADDIN project as well as a few other projects. Before joining IBM, he received his Ph.D. in Electrical and Computer Engineering from the University of Illinois at Urbana-Champaign in 2011, Master of Philosophy from the Chinese University of Hong Kong in 2005, Bachelor of Engineering from University of Science and Technology of China in 2003. He was awarded as a Computer Science and Engineering Fellow (2009-2010) working with Prof. Thomas Huang and Prof. Jiawei Han in UIUC. He was listed in the Facebook Fellowship Finalist (2010) and awarded an “Emerging Leader in Multimedia and Signal Processing” in IBM Watson Workshop (2010). He was a key person in the UIUC-NEC team that won ImageNet 2010 Challenge.

Chao Chen is currently a Ph.D student in the School of Electrical Engineering and Computer Science at Washington State University. He received a B.E. degree in Automatic Control from Anhui University, China, in 2005. In 2008, he received a M.S. degree in Network Communication and Control from University of Science and Technology of China, China. His interests focus on sensor network in smart environments, energy prediction and modeling, data mining and machine learning applications in health care.
About the Contributors

Sook-Ling Chua is currently a PhD student in the School of Engineering and Advanced Technology (SEAT) at Massey University. She has a BSc (Hons) in Computing from Staffordshire University and a Msc degree from the Malaysia University of Science and Technology (MUST). Her research interests include behaviour recognition, machine learning, data mining, and information theory.

Diane J. Cook is a Huie-Rogers Chair Professor in the School of Electrical Engineering and Computer Science at Washington State University. Dr. Cook received a B.S. degree in Math/Computer Science from Wheaton College in 1985, a M.S. degree in Computer Science from the University of Illinois in 1987, and a Ph.D. degree in Computer Science from the University of Illinois in 1990. Her research interests include artificial intelligence, machine learning, graph-based relational data mining, smart environments, and robotics. Dr. Cook is an IEEE Fellow.

Aaron S. Crandall is a Postdoctoral Research Associate at Washington State University’s School of Electrical Engineering and Computer Science. Dr. Crandall received a B.S. of Electrical Engineering from the University of Portland in 2001, a M.S. of Computer Science from Oregon Health and Science University in 2006, and a Ph.D. degree in Computer Science from Washington State University in 2011. His research interests include smart homes, adaptive systems, autonomous agents, artificial intelligence, machine learning, and gerontechnology.

Ana Fred, PhD in Electrical and Computer Engineering from Instituto Superior Técnico (IST), is an Assistant Professor at the Department of Electrical and Computer Engineering of IST and a researcher in the group of Pattern and Image Analysis of the Instituto de Telecomunicações (IT), Networks and Multimedia Research Area.

Anuroop Gaddam is currently pursuing his Ph.D. study with the School of Engineering and Advanced Technology, Massey University, Palmerston North, New Zealand. He has a Bachelor of Technology degree from JNTU, Hyderabad, India, and Post-Graduate Diploma from Massey University. His research interests include smart sensors, wireless sensors, smart homes, and sensor network. He is currently involved with the development of wireless sensor network for home monitoring, especially for eldercare. He has published 10 papers in different journals and international conference proceedings. The demonstration model of his research project was awarded the first prize in the 2007 International Creative Design Contest organized by the Southern Taiwan University, Tainan, Taiwan, during November 2007.

Hugo Gamboa, PhD in Electrical and Computer Engineering from Instituto Superior Técnico (IST) on Behavioral Biometrics, is the CEO of PLUX – Wireless Biosignals S.A. and Assistant Professor at the Physics Department of Faculdade de Ciências e Tecnologia (FCT – UNL).

Björn Gottfried works at the Centre for Computing Technologies at the University of Bremen, Germany, where he received his Doctoral degree in the context of Spatial Reasoning in 2005 and where he finished his habilitation in 2008. He is Research Scientist and Lecturer in the context of Artificial Intelligence, in particular image processing, and spatial and diagrammatic reasoning. Over the last ten years he published mainly in the context of spatial and temporal reasoning, image processing, and ambi-
ent intelligence, numerous journal and conference papers, has been invited as course lecturer, and holds 1 European patent and 1 US patent. He is member in the programme committees of several workshops about ambient intelligence, smart homes, and related fields and organises the annual BMI workshop on behaviour monitoring and interpretation.

**Gourab Sen Gupta** received his B.E (Electronics) degree from the University of Indore, India, in 1982, and Masters of Electronics Engineering (MEE) degree from the Philips International Institute, Technical University of Eindhoven, Holland, in 1984. After working for 5 years as a Software Engineer in Philips India in the Consumer Electronics division, he joined Singapore Polytechnic in 1989, where he worked as a Senior Lecturer in the School of Electrical and Electronic Engineering. Since September 2002, he has been a Senior Lecturer at the School of Engineering and Advanced Technology (SEAT), Massey University, New Zealand. In 2008, he was awarded a Ph.D. in Computer Systems Engineering for his research on Intelligent Control of Multi-Agent Collaborative Systems. His current research interests are in the area of embedded systems, robotics, real-time vision processing, behavior programming for multi-agent collaboration, and automated testing and measurement systems. He has published and presented over 100 research papers in various journals and conferences. He has been a guest editor for leading journals such as *IEEE Sensors Journal*, *International Journal of Intelligent Systems Technologies and Applications* (IJISTA), and *Studies in Computational Intelligence* (Special Issue on Autonomous Robots and Agents) by Springer-Verlag. He is a senior member of IEEE.

**The Anh Han** (BacGiang, Vietnam, 1983) obtained in 2007 his Bachelor degree in Computer Science at the Saint Petersburg State University, Russia, and in 2009 his M.S. double degree in Computational Logics at the Technical University of Dresden, Germany, and New University of Lisbon, Portugal (both with distinction). He earned his Ph.D. in Computer Science in May 2012 at the Department of Informatics, New University of Lisbon, where he studied cognitive modeling, evolutionary game theory, as well as how to combine these two techniques to build computational models explaining the roles of different cognitive skills in the evolution of cooperative behavior. He is recently awarded a three-year FWO postdoctoral fellowship to pursue a similar research direction at the AI Lab, Vrije Universiteit Brussel, Belgium, where he studies the evolution of preferences and group formation in dynamic networks.

**Lothar Hotz** studied Computer Science at RWTH Aachen and University of Hamburg (Diploma 1988, Dr. rer. nat. 2008). Since 2000, he is Senior Researcher at the Hamburg Informatics Technology Center (HITeC e.V.) located at the University of Hamburg. He has participated in several projects related to topics of configuration, knowledge representation, constraints, diagnosis, scene interpretation, semantic search, requirements engineering, parallel processing, and object-oriented programming languages. He has organized several international and national workshops in the area of knowledge-based configuration and is an active member of this community.

**Patrick Koopmann** studied Computer Science at the University of Hamburg with focus on Knowledge Engineering and Philosophy as minor (Diploma 2010). In 2010, he worked as Research Associate at the Cognitive Science Laboratory in the Department of Computer Science at the University of Hamburg for the CoFriend project. Currently, he is working as Technical Consultant for the German consulting company Cirquent GmbH, which is part of the NTT Data Corporation.
**About the Contributors**

**Zicheng Liu** is a Senior Researcher at Microsoft Research, Redmond. He has worked on a variety of topics including combinatorial optimization, linked figure animation, and microphone array signal processing. His current research interests include activity recognition, face modeling and animation, and multimedia collaboration. He received a Ph.D. in Computer Science from Princeton University, a M.S. in Operational Research from the Institute of Applied Mathematics, Chinese Academy of Science, and a B.S. in Mathematics from Huazhong Normal University, China. Before joining Microsoft Research, he worked at Silicon Graphics as a member of technical staff for two years where he developed a trimmed NURBS tessellator that was shipped in both OpenGL and OpenGL-Optimizer products. He has published over 80 papers in peer-reviewed international journals and conferences, and holds over 50 granted patents. He has served in the technical committees for many international conferences. He was a co-organizer of the 2003 ICCV Workshop on Multimedia Technologies in E-Learning and Collaboration, and 2010 CVPR Workshop on Human Activity Understanding from 3D Data. He served as a technical co-chair of 2006 IEEE International Workshop on Multimedia Signal Processing, and 2010 International Conference on Multimedia and Expo. He is a general co-chair of 2012 IEEE Visual Communication and Image Processing. He is an associate editor of Machine Vision and Applications journal, and a senior member of IEEE.

**Subhas Chandra Mukhopadhyay** graduated from the Department of Electrical Engineering, Jadavpur University, Calcutta, India with a Gold medal and received the Master of Electrical Engineering degree from Indian Institute of Science, Bangalore, India. He has PhD (Eng.) degree from Jadavpur University, India and Doctor of Engineering degree from Kanazawa University, Japan. Currently he is working as an Associate Professor with the School of Engineering and Advanced Technology, Massey University, Palmerston North, New Zealand. He has over 21 years of teaching and research experiences. His fields of interest include Sensors and Sensing Technology, Electromagnetics, control, electrical machines and numerical field calculation, etc. He has authored/co-authored over 240 papers in different international journals, conferences, and book chapter. He has edited nine conference proceedings. He has also edited eight special issues of international journals as lead guest editor and ten books out of which eight are with Springer-Verlag. He was awarded numerous awards throughout his career and attracted over NZ $3.5 M on different research projects. He is a Fellow of IEEE (USA), a Fellow of IET (UK), an associate editor of *IEEE Sensors Journal* and *IEEE Transactions on Instrumentation and Measurements*. He is in the editorial board of *e-Journal on Non-Destructive Testing, Sensors and Transducers, Transactions on Systems, Signals and Devices (TSSD), Journal on the Patents on Electrical Engineering, Journal of Sensors*. He is the co-Editor-in-chief of the *International Journal on Smart Sensing and Intelligent Systems* (www.s2is.org). He is in the technical programme committee of IEEE Sensors conference, IEEE IMTC conference and numerous other conferences. He was the Technical Programme Chair of ICARA 2004, ICARA 2006, and ICARA 2009. He was the General chair/co-chair of ICST 2005, ICST 2007, IEEE ROSE 2007, IEEE EPSA 2008, ICST 2008, IEEE Sensors 2008, ICST 2010, and IEEE Sensors 2010. He has organized the IEEE Sensors conference 2009 at Christchurch, New Zealand during October 25 to 28, 2009 as General Chair. He is the Chair of the IEEE Instrumentation and Measurement Society New Zealand Chapter.
**Bernd Neumann** studied Electrical Engineering at Darmstadt/FRG (Diploma 1967) and Information Theory at MIT/USA (M.S. 1968, Ph.D. 1971). Since 1982, he is Professor at the Department of Computer Science at the University of Hamburg. He leads a research group working on problems in image understanding and knowledge-based systems. He is also the chairman of the Hamburg Informatics Technology Center (HITeC e.V.) which carries out application-oriented projects with industrial partners. His scholarly work includes contributions to several AI subfields including high-level image interpretation, configuration, and diagnosis. He was the programme chairman of the 10th European Conference on Artificial Intelligence ECAI-92 and other major conferences, and is active in several national and international AI affiliations.

**Neuza Nunes** has a Master degree in Biomedical Engineering in which she developed a thesis on algorithms for time series clustering under the supervision of Professor Hugo Gamboa. She is now a Software Researcher and Developer in the R&D department of PLUX – Wireless Biosignals S.A.

**Francesca Odella** is Researcher and Assistant Professor at the University of Trento, Department of Sociology and Social Research. She graduated in Sociology of Work and Organization, as junior member of an international project on organizational perception of risk (Daimler Benz Foundation, 1998), and obtained her PhD in Economic Sociology in 2001. After the PhD, she was awarded a Post-Doctoral grant at the Department of Sociology and Social Research at the University of Trento, where, since 2006, she has been working as Assistant Professor in Methodology of the Social Sciences. She had been involved in national and international research projects in the socio-economic areas (social capital, local development) and working in international projects concerning social and organizational impact of advanced and pervasive communication technologies (Discreet European Project on Pervasive Technologies, 2006; Foundation Bruno Kessler project SoNET, 2009, Smart project on E-Inclusion in EU, 2008).

**Georgios Paliouras** is a Senior Researcher and Head of the Intelligent Information Systems division of the Institute of Informatics and Telecommunications at NCSR “Demokritos.” He holds a PhD from the University of Manchester, UK, in Machine Learning for Event Recognition. He has a long research record in artificial intelligence. His research focuses on machine learning and knowledge discovery for ontology learning, user modeling, event recognition, information extraction, and text classification. He has served as board member in national and international AI societies. He is also serving on the editorial board of international journals and has chaired international conferences in the area of AI.

**About the Contributors**

**Diliana Santos** is a finalist student of the Master’s Degree in Biomedical Engineering from Faculdade de Ciências e Tecnologia (FCT) performing thesis on “Automatic Classification of Sports Biosignals” under Professor Hugo Gamboa’s guiding.

**Ute Schmid** holds a diploma in Psychology and a diploma in Computer Science, both from Technical University Berlin (TUB), Germany. She received her Doctoral degree in Computer Science from TUB in 1994 and her Habilitation in Computer Science in 2002. From 1994 to 2001, she was Assistant Professor at the AI/Machine Learning group, Department of Computer Science, TUB. Afterwards she worked as Lecturer at the Department of Mathematics and Computer Science at University Osnabrück. Since 2004, she holds a Professorship of Applied Computer Science/Cognitive Systems at the University of Bamberg. Her research interests are mainly in the domain of high-level learning on structural data, especially inductive programming, knowledge level learning from planning, learning structural prototypes, analogical problem solving and learning. Further research is on various applications of machine learning (e.g., classifier learning from medical data and for facial expressions), and empirical and experimental work on high-level cognitive processes and usability evaluation.

**Marek Sergot** is Professor of Computational Logic in the Department of Computing, Imperial College, London, and Head of the Logic and Artificial Intelligence section. He graduated in Mathematics at the University of Cambridge and then worked in mathematical modelling before joining the Logic Programming Group at Imperial College in 1979. His research is in logic for knowledge representation and the specification of computer systems, with particular interests in legal, temporal, and normative reasoning, and the logic of action. He also has some research interests in Bioinformatics. He is the developer, with Peter Hammond, of the logic programming system APES which was widely used in the 1980s to build a variety of expert systems and other applications. With Robert Kowalski, he developed the ‘event calculus’, an approach for reasoning about action and change within a logic programming framework which is still one of the main standard techniques for temporal reasoning in AI. Recent work on action languages and temporal reasoning has focused on combining representation formalisms from AI with model checking techniques used in Software Engineering, and on logics of agency and collective action.

**Weihua Sheng** (IEEE senior member) received his Ph.D degree in Electrical and Computer Engineering from Michigan State University in May 2002. He obtained his M.S and B.S. degrees in Electrical Engineering from Zhejiang University, China in 1997 and 1994, respectively. During 1997-1998, he was a research engineer at the R&D center in Huawei Technologies Co., China. During 2002-2006, he taught in the Electrical and Computer Engineering Department at Kettering University (formerly General Motor Institute). He was promoted to associate professor there before he joined Oklahoma State University. He has participated in organizing several IEEE international conferences and workshops in the area of intelligent robots and systems. Five of his papers won the Best Paper awards and one won the Best Student Paper award in international conferences. He is the author of one US patent and more than 120 papers in major journals and international conferences in the area of robotics and automation. His current research interests include wearable computing, mobile robotics, and intelligent transportation systems. His research is supported by NSF, DoD, DEPSCoR, DoT, etc. Dr. Sheng is currently an Associate Editor for IEEE Transactions on Automation Science and Engineering.
Gita Sukthankar is an Assistant Professor and Charles N. Millican Faculty Fellow in the Department of Electrical Engineering and Computer Science at the University of Central Florida, and an Affiliate Faculty Member at UCF’s Institute for Simulation and Training. She received her Ph.D. from the Robotics Institute at Carnegie Mellon, an M.S. in Robotics, and an A.B. in Psychology from Princeton University. From 2000-2003, she worked as a researcher at Compaq Research/HP Labs (CRL) in the handheld computing group. In 2009, Dr. Sukthankar was selected for an Air Force Young Investigator Award, the DARPA Computer Science Study Panel, and an NSF CAREER award. She directs the Intelligent Agents Lab; her research is in the area of multi-agent systems and machine learning.

YingLi Tian received her BS and MS from TianJin University, China in 1987 and 1990 and her PhD from the Chinese University of Hong Kong, Hong Kong, in 1996. After holding a faculty position at National Laboratory of Pattern Recognition, Chinese Academy of Sciences, Beijing, she joined Carnegie Mellon University in 1998, where she was a Postdoctoral Fellow at the Robotics Institute. Then she worked as a research staff member in IBM T. J. Watson Research Center from 2001 to 2008. She is one of the inventors of the IBM Smart Surveillance Solutions. She received the IBM Invention Achievement Awards every year from 2002 to 2007, and the IBM Outstanding Innovation Achievement Award in 2007. She is currently an associate professor in Department of Electrical Engineering at the City College of New York from 2008. Her current research focuses on a wide range of computer vision problems from motion detection and analysis, human identification, to facial expression analysis, video surveillance, and computer vision applications to assist people with special needs. She is a senior member of IEEE and serves as an Associate Editor of the Computer Vision and Image Processing.

Xi Wang received her Bachelor’s degree in Electronic Information Engineering from Xi’An University of Technology (XAUT) in 2007. She received her Master’s degree in Electrical Engineering from University of Central Florida in 2010. Currently Xi is a PhD student in Electrical Engineering in the Intelligent Agents Lab, at University of Central Florida. Her research interests include classification in networked data, machine learning, and pattern recognition.

Mark Frederick Wernsdorfer, while exploring some problems of the philosophy of the mind during the courses he undertook in his Magister’s degree, noticed some strong connections between computer sciences and philosophy. Especially the relevance of Heidegger’s existentialist concept of “being-in-the-world” for the failing of representationalist approaches to explaining the mind influenced his further studies heavily. Therefore, he decided to extend his ongoing studies in Philosophy with a BA in Computer Science. In Philosophy, he graduated on self-awareness as logical antinomy for representationalism. In Computer Sciences, he cooperated with a graduated psychologist on the possibility and problems of explicating acquired knowledge.

Zhengyou Zhang received the B.S. degree in Electronic Engineering from Zhejiang University, Hangzhou, China, in 1985, the M.S. degree in Computer Science from the University of Nancy, Nancy, France, in 1987, and the Ph.D. degree in Computer Science and the Doctorate of Science (Habilitation à diriger des recherches) from the University of Paris XI, Paris, France, in 1990 and 1994, respectively. He is a Principal Researcher with Microsoft Research, Redmond, WA, USA, and the Research Manager of the Multimedia, Interaction, and Communication group. Before joining Microsoft Research in March
1998, he was with INRIA (French National Institute for Research in Computer Science and Control), France, for 11 years and was a Senior Research Scientist from 1991. In 1996-1997, he spent a one-year sabbatical as an Invited Researcher with the Advanced Telecommunications Research Institute International (ATR), Kyoto, Japan. He has published over 200 papers in refereed international journals and conferences, and has coauthored the following books: 3-D Dynamic Scene Analysis: A Stereo Based Approach (Springer-Verlag, 1992); Epipolar Geometry in Stereo, Motion and Object Recognition (Kluwer, 1996); Computer Vision (Chinese Academy of Sciences, 1998, 2003, in Chinese); Face Detection and Adaptation (Morgan and Claypool, 2010), and Face Geometry and Appearance Modeling (Cambridge University Press, 2011). He has given a number of keynotes in international conferences. Dr. Zhang is a Fellow of the Institute of Electrical and Electronic Engineers (IEEE), the Founding Editor-in-Chief of the IEEE Transactions on Autonomous Mental Development, an Associate Editor of the International Journal of Computer Vision, and an Associate Editor of Machine Vision and Applications. He served as Associate Editor of the IEEE Transactions on Pattern Analysis and Machine Intelligence from 2000 to 2004, an Associate Editor of the IEEE Transactions on Multimedia from 2004 to 2009, among others. He has been on the program committees for numerous international conferences in the areas of autonomous mental development, computer vision, signal processing, multimedia, and human-computer interaction. He served as a Program Co-Chair of the International Conference on Multimedia and Expo (ICME), July 2010, a Program Co-Chair of the ACM International Conference on Multimedia (ACM MM), October 2010, a Program Co-Chair of the ACM International Conference on Multimodal Interfaces (ICMI), November 2010, and a General Co-Chair of the IEEE International Workshop on Multimedia Signal Processing (MMSP), October 2011.

**Liyue Zhao** received a Bachelor’s degree in Automation from University of Science and Technology of China (USTC) in 2006 and a Master’s degree in Computer Science from the University of Central Florida in 2011. He is currently a PhD student in the Intelligent Agents Lab, Department of Electrical Engineering, and Computer Science at University of Central Florida. His research interests include machine learning, pattern recognition, and data mining.

**Chun Zhu** (IEEE member) received her Ph.D. degree in Electrical and Computer Engineering from Oklahoma State University, USA. She obtained her Master’s and Bachelor’s degrees in Electrical Engineering from Tsinghua University, China. Her research interests include machine learning for recognizing and understanding human daily activity patterns, real-time measurement and analysis, embedded system application design, and human-robot interaction using wearable computing. She is now a Software Developer at Microsoft Bing Division.
