About the Contributors

Subhasish Dasgupta is an associate professor of information systems in the School of Business, George Washington University. Dasgupta received his PhD from Baruch College, The City University of New York (CUNY). He received both his MBA and BS from the University of Calcutta (India). He has published his research in refereed journals such as Decision Support Systems, the European Journal of Information System, the Journal of Global Information Management, the Electronic Markets Journal, and the Simulation and Gaming Journal. Dasgupta has published two edited books, Internet and Intranet Technologies in Organizations and Encyclopedia of Virtual Communities and Technologies. He has also presented his research in major regional, national, and international conferences.

* * *

Abdollah Aghaie is an associate professor and head of the Industrial Engineering Department at K. N. Toosi University of Technology in Tehran, Iran. He received his BSc from Sharif University of Technology in Tehran, MSc from New South Wales University in Sydney and PhD from Loughborough University in UK. His main research interests are in Modeling and Simulation, Quality Management and Control, Social Networks, Knowledge Management, Risk Management, Internet Marketing and Ergonomics.

Demosthenes Akoumianakis is Professor at the Department of Applied Information Technology & Multimedia, Technological Education Institution of Crete. He is also the founder and Director of the interactive Software and Systems Engineering Laboratory (iSTLab, http://www.istl.teiher.gr/). Prof. Akoumianakis has published widely in referred archival scientific journals, international conferences and workshops and is the author/co-author of several books. He also serves as a member of the scientific committee for various established archival journals, international conferences and national/international standards bodies.

Somayeh Alizadeh is an assistant professor in the department of Industrial Engineering at K. N. Toosi University of Technology, Tehran-Iran. She received her BSc from Sharif University of Technology in Tehran, MSc and PhD from IUST University in Tehran. Her main research interests are in Information Technology, Data mining and Social Network.
Yacine Atif received the PhD degree in Computer Science from Hong Kong University of Science and Technology (HKUST) in 1996. After graduation, he worked at Purdue University in the USA as a Post-Doc and then joined a faculty position at Nanyang Technological University (NTU) in Singapore. Since 1999 he is with the UAE University as faculty, then Program Chair at the College of Information Technology. Dr. Atif has made a number of research contributions particularly in the areas of Semantic Web and Learning Technology. He is also involved in the Technical Programs of several research forums.

Nana Adu-Pipim Boaduo was born in Ghana. After graduating in 1973 as a professional certificated teacher from Offinso Teacher Training College, he taught at Methodist Primary School at Eduadin in the Ashanti Region of Ghana. From October 1974 to August 1976 he studied at the University Of Cape Coast at Winneba Advanced Teacher Training College campus. From September 1976 to August 1980 he worked for the Ghana Ministry of Education at Agogo State Secondary school, Agogo. From September 1980 to December 1983, he taught at Government Girls Secondary School, Kaduna State and Uavande Girls School near Aliade in Benue State both in Nigeria. While in southern Africa, he taught in secondary and high schools in Lesotho, the former homelands of Venda and Gazankulu. He studied with the College of Preceptors in the UK (1986-1988) and obtained the ACP and LCP qualifications respectively. From 1993 to 2001, Dr. Boaduo studied with Vista University for his MEd (1996) and PhD (1998) and the University of the Free State for masters in Development Studies (MDS (2001)). From March 1992 up until December 1997 Dr. Boaduo served in different capacities at Lemana College of Education as lecturer, senior lecturer and head of department. From 1998 to 2001, he was appointed Geography subject advisor in the Soutpansberg District of the Limpopo Province of South Africa. From 1999 to 2001, he was appointed as Vista University Distance Education coordinator at the Lemana College Campus, Elim in the Limpopo Province. He joined the University of Botswana from August 2004 until February 2008. He has written and published numerous articles in hard print and on line as well as presented seminar, and conference papers and organised workshops for professional teacher development. He has published eight academic textbooks with Lambert Academic Publishing, Germany in 2011 alone. Currently, he is appointed as Senior Lecturer, Faculty of Education, School of Continuing Professional Teacher Development, Walter Sisulu University at Mthatha Campus, Eastern Cape Province of South African and also serve as Affiliated Researcher: Faculty of Economic and Management Sciences, Centre for Development Support University of the Free State (Bloemfontein Campus): South Africa.

Charlie C. Chen is an Associate Professor in the Department of Computer Information Systems in the Walker College of Business at Appalachian State University in Boone, North Carolina. He received his PhD in Management Information Systems from Claremont Graduate University in 2003. He has authored more than 50 referred articles and proceedings, and he has presented his work at many professional conferences and venues. Dr. Chen has published in journals such as Communications of the Association for Information Systems, Behaviour and Information Technology, International Journal of Project Management, Information and Software Technology, and IEEE Transactions on Engineering Management. Dr. Chen is a Project Management Professional (PMP) certified by the Project Management Institute.
**About the Contributors**

**Alan J. Dubinsky** (PhD, University of Minnesota) is the Dillard Distinguished professor of marketing in the Dillard College of Business Administration at Midwestern State University, Director of CALIMT Learning and Innovation Research Center, and Professor Emeritus at Purdue University. Prior to entering academia, he was a territory manager for Burroughs Corporation (now Unisys). His research has appeared in the Journal of Marketing, Journal of Marketing Research, Journal of Retailing, Journal of the Academy of Marketing Science, Journal of Applied Psychology, Personnel Psychology, Academy of Management Journal, Leadership Quarterly, and Sloan Management Review, among others. He is a former editor of the Journal of Personal Selling and Sales Management.

**Leila Esmaeili** is a MSc student of Information Technology Engineering in field of eCommerce in University of Qom, Qom, Iran; According to her interest in social network analysis and data mining, her thesis is about recommender systems in social networks.

**Kanna Al Falahi** is currently a PhD student at the Faculty of Information Technology (FIT) in the United Arab Emirates University. She works on analyzing Online Social Networks. She published original contributions in Web Recommender Systems as well as Social Influence Maximization in Web based social networks.

**Saad Harous** obtained his PhD in computer science from Case Western Reserve University, Cleveland, OH, USA in 1991. He has more than 20 years of experience in teaching and research in 3 different countries: USA, Oman and UAE. He is currently an Associate Professor at the Faculty of Information Technology, in United Arab Emirates University. His teaching interests include programming, data structures, design and analysis of algorithms, operating systems and network. His research interests include Parallel and Distributed Computing, and the Use of Computers in Education and processing Arabic language. He has published more than 60 journal and conference papers. He is an IEEE senior member.

**Nor Laily Hashim** is a senior lecturer in the School of Computing, College of Arts and Science, UUM. She obtained a PhD in Information Technology (Monash University, Melbourne), MSc Info. Tech (Carnegie Mellon University) and Bach. Information Technology (Hons.) (Universiti Utara Malaysia). Her research interests are in software testing, software architecture, software engineering, healthcare mobile application, and social media.

**Shahizan Hassan**, a PhD degree holder from the University of Newcastle upon Tyne, United Kingdom, is an associate professor in information systems and PhD programme Director at the Othman Yeop Abdullah Graduate school of Business, Universiti Utara Malaysia. He is very active in research projects in the area of information systems evaluation, Web design and evaluation, knowledge management, electronic government, and wireless applications. He had published three books, seventeen articles in national and international journals, and more than 30 articles in seminar and conferences.

**Ching-Cha Hsieh** received her PhD degree from National Chiao-Tung University, Taiwan. Currently, she is an Associate Professor at Department of Information Management, National Taiwan University. She has a longstanding interest in qualitative research method and has written on a range of topics in IT in organization transformation and human behavior in IT society.
Chia-Lin Hsu is currently a PhD candidate in the department of business administration, National Taiwan University of Science and Technology. His research interests include consumer behavior, electronic commerce and service marketing.

Nikolas Karadimitriou is an undergraduate at the Department of Applied Information Technology & Multimedia of the Technological Education Institution of Crete and currently is in his final year of studies. Since 2011, he is a member of the Interactive Software and Systems Engineering Laboratory (iSTLab, http://www.istl.teiher.gr/) and got involved with research on visualization and social networks.

Purnendu Karmakar was born in Kolkata, West Bengal, India. He obtained his bachelor of electronics and communication engineering degree with 1st class from Kalyani Govt. Engineering College, University of Kalyani, West Bengal, India in 2002. He got his M. Tech degree in E and ECE from IIT, Kharagpur, India in 2008. Since, 2003 he worked as a lecturer in Birbhum Institute of Engineering and Technology, Suri, India. He also served as visiting lecturer in Jalpaiguri Govt. Engineering College, West Bengal, India. He is now pursuing PhD in GSSST, IIT Kharagpur. His area of interest is computer communication and networking, Wireless networks, Internet algorithms.

Lynn B. Keane is an instructor in the Integrated Information Technology program in the College of Hospitality, Retail, and Sport Management at the University of South Carolina. She teaches computer applications and IT training courses. Her research interests focus on learning in community, service and experiential learning, and new technologies to support learning and collaboration. Dr. Keane has a BS and MS from Pace University and a PhD from New York University.

Giorgos Ktistakis holds a BSc degree in Computer Science from the University of Crete and he is currently MSc student at the Department of Applied Information Technology & Multimedia, Technological Institution of Crete. He has participated in various research and development programs both National and European, as member of the interactive Software Technologies & System Engineering Laboratory (iSTLab, http://www.istl.teiher.gr/). He has a wide range of skills in programming and his research interests are: eLearning, public APIs, social networking and human-computer interaction.

Mikko O. J. Laine is a doctoral student at the Department of Industrial Engineering and Management at Aalto University School of Science, where he has also received his M.Sc. degree. His doctoral research examines open innovation in the online media. His other areas of research interest include entrepreneurship and organizational behavior. He has been a visiting scholar at Stanford University and University of California, Berkeley, and has presented his work in various international conferences. Currently, he is also working as a project manager and researcher at BIT Research Centre at Aalto University. Previously he has worked in the telecommunications and mobile software industries in various roles including project manager.
About the Contributors

Chien-nai Lin received her PhD degree from department of information management, National Taiwan University. Before engaging in the academic filed, she had worked at IBM as a System Engineer and at Chunghwa Telecom, Taiwan as an IT researcher. She holds MS/MIS degree from Boston University, bachelor’s degree in MIS from National Sun Yat-Sen University, Taiwan. She is currently an independent researcher. She focuses her interests on human behavior in virtual world, especially Internet addiction in adolescents and Internet isolation in aged people.

Yu-Tzu Lin is the instructor of International Business Administration Program (IBAP) at International Trade Institute (ITI) in Taiwan. Prior to her appointment at ITI, she received her PhD from the Information Management department at the National Taiwan University. Her research focuses on applying qualitative research method to understand how the adoption and diffusion of IT innovation within organizations shapes and it shaped over time by its changing institutional and technological contexts. She is the recipient of the Best Thesis Award from Taiwan Information Management Doctoral Consortium in 2011. Her PhD thesis addresses the importance of discourse in shaping the interpretation and understanding of IT innovation in financial industry. Her research work has appeared in a variety of journals and conferences, including Journal of Information Management, ICIS, PACIS, HICSS, and AOM.

Kamna Malik, PhD, is associate professor of IT Management at U21Global Graduate School, Singapore. She has handled diverse roles in software and IT infrastructure projects, management education, research and consulting. Her broad teaching and research focus lies in enabling better use of IT for improved business value. Her work has appeared in international publications including Emerald, IEEE, IGI Global, McGraw-Hill, MIT, and Springer. She consistently volunteers as a conference organizer and also as a guest editor and reviewer for refereed international journals.

B. Dawn Medlin is Professor and Chair of the Department of Computer Information Systems and the Co-Director of the Center for Advanced Research on Emerging Technologies, John A. Walker College of Business, at Appalachian State University in Boone, NC. She has published in journals such as The Journal of Information Systems Security, Information Systems Security, International Journal of Electronic Marketing and Retailing, and the International Journal of Healthcare Information Systems and Informatics. Dr. Medlin’s academic profile includes Université d’Angers and Addis Ababa University in Ethiopia.

Giannis Milolidakis holds a BSc degree (in Applied Information Technology & Multimedia) from the Technological Education Institution of Crete in 2007. Since 2008, he is a PhD student in Euromed Marseille Ecole de Management, France. His research is broadly related to practice-based theory and its implications for information systems. Currently is an affiliated researcher of the Interactive Software and Systems Engineering Laboratory (iSTLab, http://www.istl.teiher.gr/) and has become involved in various national and European Research and Development projects.
Behrouz Minaei-Bidgoli obtained his PhD degree from Michigan State University, East Lansing, Michigan, USA, in the field of Data Mining and Web-Based Educational Systems in Computer Science and Engineering Department. He is working as an assistant professor in Computer Engineering Department of Iran University of Science & Technology, Tehran, Iran. He is also leading at a Data and Text Mining research group in Computer Research Center of Islamic Sciences, NOOR co. Qom, Iran, developing large scale NLP and Text Mining projects for Farsi and Arabic languages.

Niyoosha Jafari Momtaz earned a bachelor’s degree in computer engineering from Bu-Ali Sina University, Hamedan-Iran. She received her master’s degree in Information Technology from K. N. Toosi University of Technology, Tehran-Iran. Her research has focused on social network analysis in marketing activities. She is also interested in the fields of consumer behavior in electronic commerce, data mining and metaheuristic algorithms.

Mahdi Nasiri is a PhD student in the Department of Computer Engineering in Iran University of Science & Technology, Tehran, Iran. He has worked on data mining and link analysis.

Karen P. Patton is an assistant professor in the Integrated Information Technology program at the University of South Carolina, Columbia, SC. She teaches IT project management, telecommunications, and networking. Her research interests include executive IT management issues, mobility technology management, and IT curriculum development. She has a BS from Purdue University, an MS from the University of Minnesota, and a PhD from the New Jersey Institute of Technology. She is the author of Data Networking Made Easy for small business owners and has published articles in Communications of the Association for Computing Machinery, Communications of the Association for Information Systems, Cutter IT Journal, and the International Journal of Computers, Systems and Signals.

Juhana Peltonen is a doctoral student at the Department of industrial engineering and management at Aalto University School of Science. In his doctoral research, he examines the performance of small entrepreneurial firms in recession. Mr. Peltonen holds a MS degree in software engineering from Tampere University of Technology. Prior to his doctoral studies, he worked as a project manager in the software industry specializing in mobile infrastructure and applications, and managed research projects at Aalto University. He has also been a visiting scholar at Stanford University and presented his work at the Academy of Management Meeting, Strategic Management Society Conference, and the Babson College Entrepreneurship Research Conference.

Rajarshi Roy was born in Kolkata, West Bengal, India. He obtained his BE degree in electronics and telecommunication with 1st class (Hons.) from Jadavpur University, Kolkata, West Bengal, India in 1992. He got his MS (Engg.) degree in ECE from IISc, Bangalore, India in 1995. He got his PhD in electrical engineering from Polytechnic University, Brooklyn, NY, USA in 2001. He is now serving department of E and ECE, IIT, Kharagpur, India as an associate professor. His area of interest is communication networks, internet algorithms, information systems, queuing and optimization.
About the Contributors

**Mohd Samsu Sajat** is a lecturer at Universiti Utara Malaysia (UUM). He has a Bachelor Degree in Information Studies majoring in Information System Management from Universiti Teknologi MARA (UiTM) and Master of Science in Information Technology from UUM. He is certified as Cisco Network Associates (CCNA), Cisco Certified Network Professional (CCNP) and EC-Council Certified Security Specialist (ECSS). He is actively doing research in networking including grid computing and Wi-Fi security and currently involves in social media research.

**Mohd Fo’ad Sakdan**, a PhD degree holder from the University of Hull, United Kingdom, is an Associate Professor in Conflict Management at School of Law, Governance and International Studies, Universiti Utara Malaysia (UUM). He is very active in research projects in the area of conflict management and election. To date, he had completed thirteen research projects funded by various agencies. He has vast teaching experiences in Conflict management.

**Norshuhada Shiratuddin** is a professor in IT specializing in Design Research. She obtained her PhD in Computer and Information Sciences (Uni. of Strathclyde, Glasgow), MSc IT (Uni. of Nottingham, UK) and BSc (Hons) Maths, Stats and Computing (Uni. of Manchester, UK). Her research interests are in multimedia development, social media usage, mobile advances and e-learning. She has published in more than 30 journals. Currently, she is the Dean of the School of Multimedia Technology and Communication, Uni. Utara Malaysia (UUM).

**Aku Valtakoski** is a post-doc researcher at the BIT Research Centre of Aalto University School of Science. His research interests include understanding the impact of service provision on organizational learning, firm performance and industry evolution. Currently, he is working in a research project studying the provision of knowledge-intensive services by manufacturing firms. He has presented his work at international management conferences, including Academy of Management meetings and European Academy of Management conferences. He gained his PhD degree from Aalto University, and also holds M.Sc. and M.Soc.Sc. degrees from University of Helsinki.
About the Contributors

Sandra A. Vannoy is an Assistant Professor in the Department of Computer Information Systems in the Walker College of Business at Appalachian State University in Boone, North Carolina. She received her PhD in Information Systems from the University of North Carolina at Greensboro in 2010. Her research has appeared in such journals as *Information Systems Research* and *Communications of the ACM*, among others. Dr. Vannoy has presented her research at international conferences including the International Conference on Information Systems (ICIS), Americas Conference on Information Systems (AMCIS), and the Institute for Operations Research and the Management Sciences (INFORMS). She serves as a Co-Editor of the *International Journal of Dependable and Trustworthy Information Systems*.

George Vlachakis holds a BSc degree in Applied Information Technology from the Technological Education Institution of Crete in 2011 and he is currently MSc student at the Department of Applied Information Technology & Multimedia of the Technological Institution of Crete. Since 2011, he is a member of the Interactive Software and Systems Engineering Laboratory (iSTLab, http://www.istl.teiher.gr/).

Chingning Wang is an assistant professor at the National Sun Yat-Sen University. She earned her PhD at the Syracuse University in the United States. Her current research interests include social commerce, organizational communication, media management and IT professional management.

Cou-Chen Wu is professor of business administration at National Taiwan University of Science and Technology. He received his PhD in management science and operations research from the University of California, Berkeley. Her research interests are brand management, high-tech marketing, strategic marketing, consumer behavior, and electronic commerce. His work has appeared in journals such as *European Journal of Marketing, European Journal of Operational Research, African Journal of Business Management, Journal of Product & Brand Management, Journal of Consumer Behaviour, The Scientific World Journal, and Journal of Operational Research Society*.

Guoying Zhang is an assistant professor of management information systems at the Dillard College of Business Administration, Midwestern State University. She received her PhD in information systems from the University of Washington. Her research interests include information security, social networks, and economics of information systems. She has published in Decision Support Systems, International Journal of Networking and Virtual Organisations, Journal of International Technology and Information Management, Journal of Selling and Major Account Management, Southwestern Business Administration Journal.
