About the Authors

**Claire A. Simmers** received her PhD from Drexel University, Philadelphia, Pennsylvania in strategic management. She is currently an assistant professor in the management and information systems department at the Erivan K. Haub School of Business at Saint Joseph’s University, Philadelphia, Pennsylvania. She teaches courses at the undergraduate, MBA and executive level in business policy, international management, and developing managerial skill sets. Her research interests are: strategic decision-making, work/life issues, and understanding the sociotechnical interface in using the Internet. Her work has been published in *Behaviour and Information Technology,* the *Journal of Business and Economics Studies,* and the *Journal of Organizational Behavior.* She is an active member of the Academy of Management, the Strategic Management Society, and the Information Resources Management Association.

***

**Asokan Anandarajan** is an accountant by profession and is a member of the Chartered Institute of Management Accountants (UK). He has a master’s degree in business administration (MBA) and a master’s degree in philosophy.
(M.Phil) from Cranfield University in England. He obtained his PhD in accounting from Drexel University in 1994. He is currently an assistant professor of accounting and information systems at New Jersey Institute of Technology. His research interests include developing models for predicting bankruptcy of corporations and valuation of companies. Anandarajan has authored 20 publications in journals such as *Accounting Horizons*, *Auditing: A Journal of Theory and Practice*, *Research in Accounting Regulation*, *Advances in Management Accounting*, *Advances in Public Interest Accounting*, *Management Accounting*, and *Journal of Cost Management*, among others.

**Uzoamaka P. Anakwe** is an associate professor of management at the Lubin School of Business, Pace University, Pleasantville, New York. She received her PhD in organizational behavior from Drexel University, Philadelphia. She has published articles in the *Journal of International Business*, *Journal of Managerial Issues*, *Journal of Global Information Management*, *Information Technology and People*, *International Journal of Organizational Analysis*, *International Journal of Manpower*, *Performance Improvement Quarterly* and has forthcoming articles in the *Journal of Management Education*, *International Journal of Information Management*, and *Journal of Research on Computing in Education*. Her current research interests encompass information technology implementation, Internet usage in emerging economies, knowledge management, and conflict management within a multicultural context.

**Adam Bosnian** joined Elron Software in May 2000. With more than 13 years of marketing and sales experience, he has been instrumental in new market development and rapid revenue growth for emerging technology companies. Bosnian brings a strong background in strategy development, corporate partnering, marketing communications, product life-cycle management and
strategic partner relations. Bosnian holds a BS in electrical engineering from Worcester Polytechnic Institute, where he graduated with highest honors and as a member of the Tau Beta Pi National Engineering Honor Society.

**Eunyoung Cheon** received a master’s degree in computer science from the University of Southern California and master’s degree in management of information systems from Claremont Graduate University. Her research interests include e-business, virtual workplace, reengineering organizations, management of information systems, and synthetic wood material. She is a cofounder of TA WOOD and works as a researcher and consultant.

**Steve Clarke** received a BSc in economics from the University of Kingston Upon Hull, an MBA from the Putteridge Bury Management Centre, the University of Luton, and a PhD in human-centred approaches to information systems development from Brunel University—all in the United Kingdom. He is a reader in systems and information management at the Luton Business School, University of Luton. His research interests include: social theory and information systems practice; strategic planning for information systems; and the impact of user involvement in information systems development. Major current research is focused on approaches to information systems and strategy informed by critical social theory.

**Elayne Coakes** is a senior lecturer in business information management at the Westminster Business School, University of Westminster, teaching mainly in the strategies for information management field. Her research interests lie in the sociotechnical aspects of information systems. As a member of the BCS Sociotechnical Group she is active in promoting this view of information systems development and is currently principal editor of a book of international contributions to this field, *The New SocioTech: Graffiti on the Long Wall*, published by Springer-Verlag in April 2000. A follow-up book *Knowledge Management in the Sociotechnical World: The Graffiti Continues*, is due for publication late 2001 by Springer, and in addition she is a joint editor of a book due to be published in 2002 by Idea Group Publishing called *Socio-Technical and Human Cognition Elements of Information Systems*. She is also involved in a research group at Westminster looking at knowledge management. Coakes is an associate editor of *OR Insight* with special responsibility for knowledge management and is currently involved in editing a special edition of the journal *JORS* on knowledge management and intellectual capital. She has published a number of conference papers and articles in journals such as *Information and Management*,...
Management Decision, CAIS, Engineering Requirements, as well as several chapters in books.

Patrick W. Devine is a graduate student pursuing his doctorate in management information systems at Drexel University. He received his BS and MBA from Saint Joseph’s University. While at Saint Joseph’s he received the 1998 Graduate Business award. His current research interests include: e-commerce, legal and ethical dimensions of Internet usage, and knowledge management systems.

Kristin Eschenfelder is an assistant professor at the University of Wisconsin-Madison School of Library and Information Studies. Her current research falls in the area of social informatics and focuses specifically on the social nature of large Web information systems and how we can improve the human and technical processes required to manage them. Eschenfelder also conducts research in the areas of information policy, looking at how our information and telecommunications laws and regulations shape our configuration and use of information and communications technologies.

Mark Griffiths is a chartered psychologist and reader in psychology at the Nottingham Trent University. After completing his PhD on fruit machine addiction (University of Exeter, 1987-1990), he secured his first lectureship at the University of Plymouth (1990-1995). Since then, he has established an international reputation for himself in the area of gambling and gaming addictions, which culminated in the award of the prestigious John Rosecrance Research Prize for “outstanding scholarly contributions to the field of gambling research” in June 1994 and the 1998 Celej Prize for best paper on gambling. He has published over 80 refereed research papers and has published over 250 other articles in a variety of outlets.

Magid Igbaria is a professor of information science at Claremont Graduate University and at the Leon Recanati Graduate School of Business Administration, Tel Aviv University. He holds a BA in statistics and an MA in information systems and operations research from Hebrew University and received a PhD in computers and information systems from Tel Aviv University. Igbaria has published articles on managing in a virtual environment, e-business, virtual workplace, computer technology acceptance, IS personnel, management of IS, economics of computers, computemtrical approaches in IS, and international IS in Applied Statistics, Behaviour & Information Technology, Communications of the ACM, Computers & Operations Research,
Shin-Ping Liu is a PhD candidate in interdisciplinary information science at the University of North Texas. Liu is the chief scientist at Transfinity Corporation, located in Las Colinas, Texas, and is responsible for the direction of research and development and project management. Prior to joining Transfinity, she was a multimedia Web designer specializing in streaming video, audio, and synchronized multimedia presentations for the Special Education Institute. Liu has patents and patents pending in compression and content delivery systems. Her degrees include an MS in Computer Science from the University of North Texas and a BBA from Tunghai University in Taiwan.

Shane Meakim received his BS in management information systems and economics from the University of Nebraska-Lincoln. He currently works for JD Edwards as a technical consultant. He is also an adjunct professor at the Arapahoe Community College in Colorado, where he teaches a variety of computer courses in the information systems program. His research interest is in information security as it pertains to consumers and companies in society today.

Guus G. M. Pijpers is chief information officer (CIO) at Philips Electronics in Eindhoven, the Netherlands. Previously he worked as information manager, IT
auditor and management consultant at Akzo Nobel, KPMG and Philips Electronics. He received his PhD in management and computer science from Eindhoven University of Technology, the Netherlands, in 2001. He holds a master’s degree in management science and a master’s degree in computer science from the Open University, The Netherlands. His work, interests and research focuses on the use of information and information technology by higher management levels in an organization as well as the adoption, use, and effects of e-business on business processes and organizational entities. Personal homepage: www.guuspijpers.com. E-mail: ask@guuspijpers.com.

Ivan T. Robertson is deputy vice-chancellor at UMIST and director of the SHL/UMIST Research Centre in Work and Organizational Psychology. He is a chartered psychologist, fellow of the British Psychological Society and fellow of the British Academy of Management. His work experience includes several years in industry/national government as an occupational psychologist. Robertson has an international reputation for his work on psychological assessment in organizational settings. Since taking up an academic post in 1979 he has produced 25 books and over 150 scientific articles/conference papers. With Prof. Cary Cooper he founded the business psychology company Robertson Cooper Ltd. in 1999. His professional and consultancy activities focus on a range of issues including personnel selection assessment and development. He has advised many public and private sector organizations including the Cabinet Office, the Commission for Racial Equality, the Cooperative Bank, UBS and the UK Atomic Energy Authority.

Christopher Ruth is vice-president of supply chain management for Bass Hotels and Resorts. Prior to that, he spent several years in the information systems, systems integration and aerospace industries for General Electric and Lockheed Martin. Ruth has coauthored the book Developing Expert Systems Using 1st Class, (Random House, 1988). He has also served as an adjunct faculty member for George Mason University (Fairfax, Virginia) and has developed and instructed various courses in managerial applications for microcomputers for the Department of Defense. His research interests include technology adoption, structural equation modeling, business-to-consumer electronic commerce systems, and business-to-business e-procurement systems.

Keng Siau is a J. D. Edwards professor and an associate professor of management information systems (MIS) at the University of Nebraska, Lincoln (UNL). He received his PhD degree from the University of British Columbia (UBC), where he majored in management information systems and minored in cognitive psychology. Siau is currently the editor-in-chief of the
Journal of Database Management. He has published more than 35 journal articles that have appeared in MIS Quarterly, Communications of the ACM, IEEE Computer, Information Systems, ACM’s Database, Journal of Database Management, Journal of Information Technology, International Journal of Human-Computer Studies, Transactions on Information and Systems, and others. In addition, he has published over 55 refereed conference papers in proceedings such as ICIS, ECIS, HICSS, CAiSE, WITS, IRMA, and HCI. He has edited two books, three journal special issues, and five proceedings—all of them related to systems analysis and design. He has served as the organizing and program chairs for the International Workshop on Evaluation of Modeling Methods in systems analysis and Design (EMMSAD) (1996–2001). Siau’s primary research interests are in object-oriented systems development using unified modeling language (UML), mobile commerce, enterprise e-business, enterprise resource planning (ERP), and Web-based systems development.

C. A. Srinivasan is professor emeritus and retired head of the Department of Accounting at Drexel University. His research interests include management control systems, and accounting information systems with emphasis in security issues.

Lyndal Stiller-Hughes is a senior manager with Accenture (formerly Andersen Consulting). She is a graduate member of the British Psychological Society and associate member of the Australian Psychological Society. While on leave from Accenture, Stiller-Hughes completed her MSc in organizational psychology at the Manchester School of Management, UMIST, in 2000. She has worked extensively as a change management consultant with both public and private sector organizations in the UK, Australia, Malaysia and the US, covering a range of issues associated with the implementation of change, including technology integration, employee communications and involvement, change readiness and impact analyses, training and development.

Beth Archibald Tang, a Web designer, has expertise in information architecture, accessibility, and database design. With Internet experience that complements library studies, Tang has presented on searching Web sites effectively and designing accessible and usable sites. She is a contributing writer on these topics and others for both print and online industry magazines, such as Federal Computer Week, and First Monday. In addition, her interests converge at knowledge management, effective e-learning, learning styles, and accessible design. To that end, she is a contributing editor to Learning Circuits and an adjunct instructor for the University of Virginia. Tang
obtained her MA in secondary education from West Virginia University. She can be reached via e-mail at bethtang@yahoo.com.

**Dennis Tucker** is the chief technical officer of Transfinity Corporation in Las Colinas, Texas. He is a computer science graduate from the University of North Texas. An expert in e-commerce, compression and content delivery systems, Tucker has previous experience as a senior software engineer and project manager and has patents and patents pending in compression and content delivery systems. Prior to coming to Transfinity, Tucker was owner and CEO of an ISP. As CTO, he is responsible for the design and direction of the Transfinity development effort.

**Andrew Wenn** is a lecturer in the School of Information Systems at Victoria University of Technology, Melbourne, and is currently undertaking his PhD in the History and Philosophy of Science Department at the University of Melbourne. His main field of research is the nexus between the social and the technical, particularly in the area of global information systems. This chapter is the result of an as yet incomplete study into the way the users, designers and technology are co-constituting one particular information service. Wenn has also published in the area of Internet-based education and e-commerce and small businesses in Australia.

**Dianne Willis** is a senior lecturer in information management at Leeds Metropolitan University. Her research interests include sociotechnical issues surrounding the implementation of new technology in business and social environments and gender issues in the field of ICT, particularly factors influencing participation levels in both academic and practical fields. Willis is a member of the BCS Sociotechnical Group and has recently coedited a book entitled *The New SocioTech: Graffiti on the Long Wall*, published by Springer-Verlag. A second book in the same series is currently under preparation. She is presently engaged in research into the effects of e-mail on communication patterns in educational establishments. She is also an associate editor of *OR Insight*.
