About the Authors

Book Editor
Mehdi Khosrowpour is currently an Associate Professor of Information Systems at Penn State Harrisburg. He is the editor-in-charge of the Information Resources Management Journal and Information Management. In addition, he also serves on the editorial review boards of six other international information systems journals.

Contributing Authors
Paul Darbyshire is a lecturer in the Department of Information Systems at Victoria University of Technology, Melbourne Australia. He lectures in Object Oriented systems, C and Java programming, and has research interests in the application of Java and Web technologies to the support of teaching. Paul’s current research is into the use of the Web for university subject management and the use of AI techniques for the development of second generation Web based teaching support software.

Paul Hendriks (Ph.D. in social science, 1986, University of Nijmegen, The Netherlands) is an Associate Professor of Management Information Science. He has worked at the Free University of Amsterdam and the University of Nijmegen where he is currently a member of the Nijmegen Business School. His current research interests include the role of information and communication technology in knowledge management. He has published several books on research methodology, geographical information systems and computers. He has also published in such journals as The International Journal of Geographical Information Science, Information and Management, Knowledge-Based Systems, Decision Support Systems, Expert Systems With Applications and Knowledge and Process Management.

Sherif Kamel, Ph.D. is an assistant professor of management support systems at the American University in Cairo. He is also the Director of the Regional Information Technology Institute in Cairo, Egypt. His research interests include management support systems and information technology transfer to developing countries and its implications on socioeconomic development. He is a graduate of London School of Economics and Political Science and the American University in Cairo. He designed and delivered professional development programs in information systems applications for public and private sector.
organizations in different countries in Africa, Asia, the Far East and Eastern Europe. He is one of the founding members of the Internet Society of Egypt. He serves on the editorial and review boards of a number of information systems and management journals and has published several articles and chapters on the application of information and communication technology in developing countries.

Kihyun Kim is a graduate student majoring in Management Information Systems at the University of Nebraska – Lincoln. He is also a research fellow at the Hyundai Research Institute in South Korea. He received his M.B.A. and B.S. degrees from Korea University in South Korea. His research interests and consulting experiences include business process reengineering, management of strategic information systems, Internet technology in e-commerce, and issues in object-oriented systems design and development.

Mathew J. Klempa is a consultant in the application of computer information systems. He has taught at the University of Southern California and the California State University. He holds a B.S. in Mathematics/Economics from Allegheny College, M.S. in Management Science, M.B.A. in International Business, and Ph.D. in Business Administration from the University of Southern California. His doctoral majors were Decision Support Systems and Corporate Policy and Strategy. He was formerly a corporate planning officer for a major bank holding company, systems analyst, and operations research analyst. His research interests include organization impacts of information technology; the interaction among information technology and organization structures, control mechanisms, culture, learning, work processes, and performance; business process change; business process reengineering; management of innovation; information technology diffusion; and cognitive and individual differences in DSS use.

Fui Hoon (Fiona) Nah is Assistant Professor of Management Information Systems at the College of Business Administration, University of Nebraska – Lincoln. She received her Ph.D. in Management Information Systems from the University of British Columbia in 1997. Her current research interests are in evaluating information systems for supporting group decision making, using information technology to overcome human cognitive biases, designing and evaluating knowledge management systems, and assessing theory building in information systems research.

Nancy L. Russo received her Ph.D. in MIS from Georgia State University. Currently she is an Associate Professor in the Operations Management & Information Systems
Department at Northern Illinois University. In addition to on-going studies of the use and customization of system development methods, her research has addressed web application development, the impact of enterprise-wide software adaption on the IS function, IT innovation, and IS research and education issues. Her work has appeared in *Information Systems Journal*, *Journal of Information Technology*, *Journal of Computer Information Systems*, *System Development Management*, *Journal of Systems and Software*, and various conference proceedings.

**Arno Scharl** (scharl@wu-wien.ac.at) holds a Ph.D. and M.B.A. from the Vienna University of Economics and Business Administration where he is employed as assistant professor in the MIS Department (electronic commerce research group). Additionally, he received a Ph.D. and M.Sc. from the University of Vienna, Department of Sports Physiology. Currently spending a semester as visiting research fellow at the University of California at Berkeley (Fisher Center for IT & Marketplace Transformation), his research and teaching interests focus on the various aspects of Web information systems modeling, commercial electronic transactions, adaptive hypertext, and the customization of electronic catalogs.

**Dirk Vriens** (Ph.D. in policy science, 1998, University of Nijmegen, The Netherlands) is an Associate Professor of Management Information Science. He is currently working at the Nijmegen Business School, University of Nijmegen. His research interests include information management, knowledge management and business intelligence. Dirk Vriens also works as a senior consultant for a consultancy firm specializing in business intelligence.

**Andrew Wenn** lectures in the Department of Information Systems at Victoria University of Technology. He has interests in the area of internet based education, particularly where it can be utilized to enhance the learning experience and enable students to have increased access to learning materials. Andrew’s main field of research is the nexus between the social and the technical, particularly, in the area of global information systems.

**Tammy Whalen** is a Customer Systems Consultant at Bell Nexxia, a subsidiary of Bell Canada specializing in broadband telecommunications and internetworking. She is also a graduate student in the Master of Business Administration program at the University of Ottawa and is writing her thesis on the business case for distance learning.

**David Wright** is a Full Professor at the University of Ottawa. He has provided distance education using a variety of technologies and is currently sponsored by the federally funded Network of Centers of Excellence in Telelearning to investigate cost effective distance education alternatives and their economic impact. He has 25 fully refereed publications in a range of journals, plus many conference papers, and is the author of the book *Broadband: Business Services, Technologies and Strategic Impact* published by Artech House, Boston. He is coauthor of the book *Telelearning via the Internet* published by Idea Group in 1999.

**W. L. Yeung** completed his PhD in Computer Science in UK in 1992 and has since been teaching in universities in both UK and Hong Kong. He is currently an assistant professor at the Lingnan College in Hong Kong. His research interests are in systems development methodology and the development of business Web applications.
