About the Contributors

**Patricia Ordóñez de Pablos** is a Professor in the Department of Business Administration in the Faculty of Economics and Business of the University of Oviedo, Spain. Her teaching and research interests focus on the areas of strategic management, knowledge management, intellectual capital, organizational learning, human resources management, information technologies, and Semantic Web. She serves as Associate Editor of *Behavior and Information Technology*. She is author of numerous papers published in leading academic journals such as *Computers in Human Behavior, Journal of Knowledge Management, Information Management Systems, International Journal of Technology Management, Journal of Universal Computer Science*, etc. She has published books in Springer and IGI-Global.

**Robert D. Tennyson** is Professor of Educational Psychology at the University of Minnesota. He is editor of a professional journal, *Computers in Human Behavior*. He also serves on editorial boards for seven other peer-reviewed journals. His research and publications include topics on problem solving, concept learning, intelligent systems, testing and measurement, instructional design, and advanced learning technologies. He has directed sponsored workshops and advanced study institutes in Germany, Greece, Norway, Spain, and Taiwan. He has authored over 300 journal articles, books, and book chapters.

* * *

**Yacine Atif** received the PhD degree in Computer Science from Hong Kong University of Science and Technology (HKUST) in 1996. After graduation, he worked at Purdue University in the USA as a Post-Doc and then joined a faculty position at Nanyang Technological University (NTU) in Singapore. Since 1999, he is with the UAE University as faculty, then Program Chair at the College of Information Technology. Over the last decade, he led several initiatives that are designed to create a rich learning environment to help promote the transformation of teaching and learning through the innovative use of technology. His teaching, scholarship, and academic excellence have been acknowledged by several awards including Best Teaching Award, Best Funded Project Award in the area of Electronic Transfer of Educational Media and Resources, and Excellence in Academic Services Award from the UAE University. He has made significant research contributions to the general field of educational technologies. He introduced the concept of “learning patterns,” bringing together the ideas of educational design patterns with architectural abstractions used in software engineering. His learner-centered research approach has been applied to several empirical studies and integrated into real-life instructional settings to enrich learning experiences.
**About the Contributors**

**Neeta Baporikar**, Professor (Strategic Management and Entrepreneurship) is currently on an academic assignment with Sultanate of Oman, Ministry of Higher Education (MOHE), as Head, Scientific Research Department Salalah College of Applied Sciences. With more than a decade of experience in industry, consultancy, and training, she made a lateral switch to research and academics in 1995. Dr. Baporikar holds D.Sc (Management Studies) USA, PhD in Management, University of Pune INDIA with MBA (Distinction) and Law (Hons.) degrees. Apart from this, she is also an External Reviewer Oman Accreditation Council, Accredited Management Teacher, Qualified Trainer, Doctoral Guide, and Board Member of Academics and Advisory Committee in accredited B-Schools. Reviewer for international journals, she has to her credit several refereed research papers and authored books in the area of Entrepreneurship, Strategy, Management, and Higher Education.

**Constanţa-Nicoleta Bodea** is professor at the Academy of Economic Studies (AES), Bucharest, Romania. She taught project management and artificial intelligence. She is the president of the Project Management Romania Association, and chair of the Education & Training Board of the International Project Management Association – IPMA since 2007. She managed more than 20 R&D and IT projects in the last ten years. She is author of 11 books and more than 50 papers on Project Management, Information Systems, and Artificial Intelligence, being honored by IPMA with the Outstanding Research Contributions in 2007.

**Ramona Cantaragiu** is a PhD candidate at the Faculty of Business Administration from the Bucharest University of Economic Studies (ASE), Romania. She also has a background in Cultural Anthropology and her previous work includes papers regarding the conceptualization of academic entrepreneurship and the links between entrepreneurs’ risk preference and need for achievement. Her research interests combine the two academic fields in the area of the anthropology of entrepreneurship, with a particular emphasis on emerging fields of study such as academic and social entrepreneurship seen as social constructs.

**Maria-Iuliana Dascălu** is a lecturer/assistant professor for data structures and algorithms, programming languages, Web programming, systems engineering and compiler techniques within the Department of Engineering Taught in Foreign Languages at Politehnica University of Bucharest (UPB) and a researcher in the field of applied computer science. She defended her PhD thesis on July 2011 in economic informatics, at the Bucharest Academy of Economic Studies (ASE). She has a Master Degree in Project Management from the same university and a Bachelor Degree in Computer Science from the Alexandru-Ioan Cuza University, Iasi, Romania (2006). Her research relates to computer-assisted testing with applications in e-learning environments for project management, competences development systems, and their benefits to adult education. Maria Dascălu is a Certified Project Management Associate (2008). She also conducted a research stage at the University of Gothenburg, Sweden, from October 2009 to May 2010.

**Athanasios Drigas** is a Senior Researcher at N.C.S.R. Demokritos. He is the Coordinator of Telecoms and founder of Net Media Lab since 1996. From 1985 to 1999, he was Operational manager of the Greek Academic network. He has been the Coordinator of Several International Projects, in the fields of ICTs, and e-services (e-learning, e-psychology, e-government, e-inclusion, e-culture, etc.). He has published more than 200 articles, 7 books, 25 educational CD-ROMs and several patents. He has been a member of several International committees for the design and coordination of Network and ICT activities and of international conferences and journals.
Amruta Gahlod is presently working as a Faculty Research Associate at Institute of Management Technology Nagpur. She has done her MBA in Finance and Marketing and pursuing Ph.D in Business Management from Nagpur University. She has 2 years of experience in Academics, 21 months (current) in Research and in core banking of 1 year. She has assisted Dr. Veena Pailwar in Third edition of Economic Environment of Business. She has 8 International publications in various journals and conferences on his credit. Her areas of interest are Finance and Business Research Methods, International Financial Management, Project & Capital Management with Financial Strategies.

Spyros T. Halkidis is an Informatics Teacher at the Model Experimental School of the University of Thessaloniki and a member of the Computational Systems and Software Engineering Laboratory, Department of Applied Informatics, University of Macedonia, Greece. He received the BS and MS degrees in computer science from the University of Crete, Greece in September 1996 and July 1998 respectively. He also received the MBA degree from the University of Macedonia in October 2000. From December 2003, he worked towards his Ph.D. degree in software security, which he received in April 2008. Since September 2011, he is a teacher at the Model Experimental School of the University of Thessaloniki. His current research interests include applied cryptography, software engineering, and technology enhanced learning.

Wendy Hardman is an Adjunct Professor for Faculty of Health Sciences and the Faculty of Education at the University of Ontario Institute of Technology. Her research focuses on online training design and how to implement it successfully in workplace settings. Her other research interests include gender issues related to learning and factors that influence successful training.

Rabindra Ku. Jena is presently working as an Associate professor (Information Technology) at Institute of Management Technology, Nagpur, India. He has degrees in M.Sc, M.Tech (Computer Science & Engineering) and PhD from Indian Institute of Information Technology and Management, Gwalior, India. He has more than 15 years of experience in teaching and research. He has more than 50 research publications in various refereed international journals/conferences. He is the editor/guest editor of many journal of repute. He is also in the editorial board of many national and international journals and reviewer of various journals from Elsevier, IGI, Inderscience, ACTA Press, Academy Publisher, etc.

Jayant G. Joshi received B.E. degree in Electronics and Telecommunication Engineering from Amravati University, Amravati, India and M.S. (Electronics & Control) post graduate degree from Birla Institute of Technology and Science (BITS), Pilani, Rajasthan, India in 1994 and 1996 respectively. He is working as Lecturer in Electronics (Senior Scale) at Department of Electronics and Telecommunication, Government Polytechnic, Nashik, (Maharashtra State), India. His total teaching experience is 18 years. He has published the books on Mechatronics (New Delhi, PHI Learning Private Limited, India, 2006) and Electronic Measurement and Instrumentation Systems (New Delhi, Khanna Book Publishing Pvt. Limited, New Delhi, India, 2000). He has published approximately 60 papers in the International and National Journals and conferences. His research interests include Mechatronics, Instrumentation systems, metamaterial and microstrip patch antennas and engineering education system. He is a member of Institution of Electronics and Telecommunication Engineers (IETE), New Delhi, India, Associate Member of Institution of Engineers (India), Life Member of Indian Society for Technical Education, New Delhi, India and Life Member of Instrument Society of India.
About the Contributors

Lluís Jovell is an Associate Professor of International Economic at the Autonomous University of Barcelona (Spain), BA in Economics and Commercial Sciences and studies in Law (University of Barcelona), Master in Applied Economics (Autonomous University of Barcelona), and PhD in Administration and Business Management (Ramon Llull University). He was a sub-director of the Business Management School (Autonomous University of Barcelona at Sabadell) during 5 years. President of the Research Institute of the Information Society and Knowledge (3iSIC). Founder and Director of the Masters Programme in Marketing, Commerce, and Distribution of the Autonomous University of Barcelona (since 1999). He is Director of Citius Programme (Autonomous University of Barcelona and Autonomous University of Madrid) and member of its academic commission. He is member of the Academic Commission of the Postgraduate University Institute of Madrid and Director of the Master in Commercial Direction and Marketing. He is Director of different UAB Masters and trainings programme blended in company in International Business Management, Marketing, and Retailing. He has taken part in numerous research projects and consultancy for multinational companies. Member of the Editorial Review Board of the International Journal of Asian Business and Information Management (IJABIM). Member of the Scientific Committee of the International Applied Economics Congress.

Luckson Muganyizi Kaino is a professor in the Department of Mathematics Education in the College of Education at the University of South Africa (UNISA), South Africa, and teaches mathematics and technology education courses. He is a graduate of the University of Salzburg, Salzburg, Austria, with a PhD in mathematics education. He also has an MSc and BSc degrees from the University of Dar es Salaam in Tanzania. He has a teaching experience and research of about 20 years in the field of mathematics education, educational research, curriculum development, and evaluation. He has taught at the University of Swaziland in Swaziland, Limpopo University in South Africa, and the University of Botswana in Botswana. He served as a Head of Department at the Department of Mathematics, Science & Technology Education at the University of Botswana before joining UNISA. He also worked as a Principal Curriculum Developer at the Institute of Education in Tanzania. Professor Kaino has widely researched and published in mathematics and technology education and won many research awards and grants. He has been a guest speaker at a number of international academic forums, and he is a member of many professional organizations. Currently, Prof. Kaino is the Coordinator/Liaison Officer of the Organization for Social Science Research in Eastern and Southern African (OSSREA) South African Chapter.

Choshi Kasanda is a professor of mathematics education at the University of Namibia in the Department of Mathematics, Science, and Sport Education and is the founding head of this Department. Prof. Kasanda is currently the Deputy Dean in the Faculty of Education and coordinates several activities of the Faculty and serves on the University Senate and Council of the University of Namibia. He has prepared mathematics and Science teachers in Zambia and Namibia and has supervised and examined several Masters and Doctoral students in both countries. Prof. Kasanda is the current Chairperson of the Southern African Association for Research in Mathematics, Science, and Technology Education (SAA-RMSTE) – Namibian Chapter, having recently stepped down as Secretary of Organization for Social Science Research in East and Southern Africa-Namibia Chapter and was one of the inaugural members of this organization. Prof. Kasanda has widely published in books and journals on Mathematics teaching and learning, gender, instruction, and ethnomathematics. His research interests are in instruction, gender, ethnomathematics, and technology.
Dimitris Kouremenos is an Electrical and Computer Engineer and an associate of Net Media Lab of N.C.S.R. “Demokritos” since 1998. His research interests include e-services (e-learning, e-culture, e-government, e-health, e-business, e-commerce, etc), as well as sign language issues in the domain of computer science. He is the author of 10 articles in the domain of computer science.

Paul Morrissey is a visiting scholar with the Centre for East Asian Studies at the University of Bristol. His interests are in the broad areas of political, economic, social, and historical aspects of East Asia, and centres on neo-liberalism and higher education. He is currently examining the role of reputation management in HE governance in the newly emerging economies. He has had wide experience in the field of education in general, starting his career in the secondary sector, and spending some years in the development and management of vocational education in FE.

David Mtetwa is a professor of mathematics education in the Department of Science and Mathematics Education at the University of Zimbabwe. Apart from teaching a range of courses, Professor Mtetwa also supervises doctoral students in mathematics and science education. He has been extensively involved in school-based continuing professional development of science and mathematics teachers in the field in his country through a national Dutch (NUFFIC) funded in-service program called Science Education In-Service Teacher Training (SEITT) that produced a significant impact on the science and mathematics teaching in schools. He has also inspired and contributed immensely to other professional development initiatives with both national and regional flavor such as the Southern African Association for Research in Mathematics, Science, and Technology Education (SAARMSTE) – Zimbabwe Chapter, and the Norwegian (NUFU) funded doctoral research schools (Graduate Studies in Science, Mathematics, and Technology Education [GRASSMATE] and Productive Learning Cultures [PLC]) that have produced about 40 PhD graduates from the Southern African region. Professor Mtetwa’s research interests lie in the area of psychology of learning and instruction in mathematics. He is currently exploring aspects of learner processing of mathematical material within authentic and less authentic learning-task environments.

Carmen Păunescu is a Full Professor at the Faculty of Business Administration from the Bucharest University of Economic Studies (ASE), Romania. Prof. Paunescu holds a Ph.D. in Economics from ASE. Her qualifications include: University of Rome “La Sapienza”, Italy – 2002-2003, Government scholarship; Loyola University in New Orleans, USA – 2004-2005, Senior Fulbright Grantee; Harvard Business School, Boston, USA – EECPCL 2007; IMTA 2008, Bled, Slovenia; and EEC 2009, Maastricht, Holland. Her research interests lie in the areas of organization’s maturity assessment, entrepreneurial management and leadership, social entrepreneurship, academic entrepreneurship, women entrepreneurship, and corporate entrepreneurship in the field of renewable energy.

Montserrat Peñarroya is Director of the Research Institute of the Information Society and Knowledge (3iSIC), Consultant Manager in Digital marketing and Professor of Digital Marketing in a different masters of national and international universities. Bachelor in Tourism, Postgraduate in Marketing and International Trade, and Masters in Information Society and Knowledge. He was CEO of Digital Commerce S.A.; Founder & CEO of Alt64 Digital and Founder & CEO of Quadrant Alfa S.l., companies specialized in Digital Marketing. Member of the advisory group for the creation of 2Bdigital Internationalization of the Catalunya Government. And is a consultant in Electronic Commerce, Digital Marketing, and SMEs by PIMESTIC Digitizing, by SDE - ICIC (Catalan Institute of Cultural Industries) and the Barcelona Chamber of Commerce.
About the Contributors

Yue Qiu is an Associate Professor in the Information College, Capital University of Economics and Business, and is the branch secretary of Management and Science Department. She holds a Ph.D. degree in Engineering from BeiHang University. His research focuses on risk management, IT-based engineering education, and low carbon economy, with more than 20 publications in academic journals, such as *Journal of System Simulation, Computer Engineering and Applications*, etc. She was also the committee member in Discrete System Simulation Professional Committee, Chinese Association for System Simulation.

Lorayne Robertson is the Graduate Program Director in Education and an Assistant Professor at the University of Ontario Institute of Technology. Her research interests include transformative aspects of teaching and learning with digital technologies, and policy analysis, specifically in the areas of critical media literacy and preservice education.

José Manuel Saiz-Álvarez has a PhD in Economics & Business Sciences, Autonomous University of Madrid (Spain). PhD in Political Sciences and Sociology, Pontifical University of Salamanca (Spain). Director for BA Doctoral Studies, Nebrija University (Spain). President of FIEC Institute. He has been Director of the American Business Program (ABP-Spain), the European Business Programme (EBP-Spain), and co-Director of the Interuniversity Research Group about the New Europe (Group N2E), Nebrija University (Spain). Visiting Professor at Universities and Research centers in Europe and America. Research Fellow, York University (Canada). Member in scientific committees of international journals. Author of numerous publications in his specialty.

George Stephanides received the PhD degree in Applied Mathematics from the department of Applied Informatics, University of Macedonia, Thessaloniki, Greece. He is professor in the Computational Systems and Software Engineering Laboratory, Department of Applied Informatics, University of Macedonia. His current research and development activities include the applications of mathematical programming, security and cryptography, and application-specific software. He is a member of the American Mathematical Society.

Shigeki Sugiyama has been working on various fields from Industrial Engineering, Control, Artificial Intelligence, Neural Networking, Virtual Reality, E-learning, Embedded Technology, Computer, to Consciousness Studies for more than 30 years and have presented more than 70 papers. He also put much attention on Service Science, especially on a network behavior in a scalable situation. And he has touched upon setting up a science park project about the matters of IT during 1994 – 1999 and he has done some cooperative research works with Universities in US and in Europe in Information Technologies. He has been a lecturer at Gifu Univ. and was a lecturer at Nagoya Management Junior College. Dr. Eng. from University of Gifu.

Katerina Tsarava is an undergraduate student in the department of Applied Informatics, University of Macedonia, Greece. Her current field of study focuses on technology enhanced learning and multimedia learning, making use of Learning Management Systems, concept and ontology mapping.
**Pantelis Venardos** received the Ph.D. degree in History and Philosophy of Sciences and Technology from the department of Applied Mathematical and Physical Sciences, National Technical University (NTUA), Athens, Greece. He is a professor of mathematics and logic at the Model Experimental School of the University of Thessaloniki. His current research and development activities include the applications of new technologies in mathematical education and history of science. He is a member of the Hellenic Mathematical Society.

**John Vrettaros** is a Project Manager and an associate of Net Media Lab of N.C.S.R. “Demokritos” since 2000. His research interests include e-services (e-learning, e-culture, e-government, e-health, e-business, e-commerce, etc.), as well as environmental issues and renewable energy sources. He is the author of 30 articles in the domain of computer science.

**Yiping Yang** is a Professor in the Information College, Capital University of Economics and Business, and is the dean of Information College. He holds a Ph.D. degree in Computer Science from Capital University of Economics and Business of China. His research focuses on MIS, IT-based engineering education, the development and application of Multimedia Technology, Industrial Economics, Software Engineering, and Network, with more than 40 publications in academic journals, such as *Research on Economics & Management, Journal of Capital University of Economics and Business*, etc. He served as Director in China Information Industry Association and Executive Director in Education Branch of Beijing Computer Users Association. He was also the Committee Member of Test Committee of National Applied Information Technology Certificate.

**Xi Zhang** is a Peiyang Distinguished Professor, in the College of Management and Economics, Tianjin University, China. He holds a Bachelor degree in Management from University of Science and Technology of China, and Ph.D. degree in Information Systems from City University of Hong Kong. His current research interests focus on Knowledge Management, Mobile Commerce, Business Innovation for Virtual World, and Big Data Management, with almost 50 publications in top-tier international academic journals, such as *Journal of Management Information Systems, IEEE Transactions on Engineering Management, Computers in Human Behavior, Behavior & IT, Journal of Social Psychology, Journal of Applied Social Psychology, HICSS*, etc. He served as associate editor in *Decision Analytics*, and editorial board in *Journal of Global Information Technology Management, International Journal of Knowledge Management, International Journal of Asian Business and Information Management*, etc. He was also the committee member in international conference on knowledge management (ICKM). Currently, he is the senior member in international association on computer science and information technology (IACSIT), and member of AIS.
