Index

150W Metal Halide 160

A
AC magnetic measurements 209
alumina plate 211-212
ANOVA 279, 282, 285, 290
anthropometric dimensions 128, 130-131
Atomic Force Microscopy (AFM) 62

B
ballast 154-156, 160-161, 163-166
ballistocardiogram (BCG) 224, 227
description 225
mathematical model 231
sensing 234, 241
waves 226-228
ballistocardiography 224-226, 228, 231, 234-237, 241-242, 244-246
bomb 293-298, 300
bomb calorimeter 293-296, 298, 300
measurement uncertainty 293
bubble collapse time 39, 42, 45, 48, 51, 53

calculus of variation 167, 170
decision making 25, 194-196, 203, 205, 207-208
rule 198, 201
deionized water (DI water) 178
Device Under Test 26
dielectric liquids 252-254
digital Beckmann Thermometer 295
digital imaging 145, 150-152
digital multimeters (DMM) 28
digital signal processor (DSP) 179
digital-to-analog converter (DAC) 179
DigSILENT PowerFactory 1-3, 7
double layer capacitance 179
Doubly-Fed Induction Generators 1
dynamic power 90
Dynamic Voltage and Frequency Scaling (DVFS) 91
Index

E
Earliest Deadline First (EDF) 88, 92
electrical circuits 156
Electrochemical Impedance Spectroscopy (EIS) 178
electromagnetic radiation 66, 71
electromagnetism 72, 167, 175
ElectroMechanical film (EMFi) sensors 224
electro-motive force (emf) 210
electronic board 154-156
  block diagram 155-156
electronic circuit 60, 76-79, 85, 90, 160
  energy consumption
  optimization 90
  Euler equation 167, 170-175

F
Fast-Fourier Transform (FFT) algorithm 46, 52
Fast Rumor Agents protocol (FRA) 135
  algorithm 139
first integrals 167-168, 174
flooding 136
forking 137, 144
fuzzy logic algorithm 194
F wave 227-228

G
Gaussian noise disturbance 116-119
  generalized motion equation 167
global reliability 203-206
gold nanocomposite material (GNM) 60
GPIB protocol 35
gross calorific value 293, 298, 300
G wave 227-228

H
Hall probes 211, 213-214, 218, 222
  H-bridge 156-159, 161, 163
heart rate (HR) 75
  electronic circuit block diagram 79
  irregular pulse removal 82, 84
  missing pulse detection 76, 83-84
  pulse detection 81
  sensing circuit 79
  software process 80
High Intensity Discharge (HID) lamps 154
  block diagram 155
History zone array 138-139
Holcik and Moudr model 233
Human Computer Interaction (HCI) 75
  human error 275-276, 278, 290-292
  experiments 276
  person-related factors 275, 280, 290
  work-related factors 275, 278, 284, 290
Huygens sphere 69-70
H wave 227-229, 241

I
iCal 31-35
iCOLOUR 28
impedance
  analyzers 179
  based wireless sensor network 178-180, 182, 184, 186-192
  signal 129-130
induction generator 1-5, 7-9
Ineffective Registrations Attempts (IRA) 266
inertia displacement 14-15
infrared absorption reflectometry 76
interactive educational environments 75
inter-breath interval (IBI) 105
inter-events characterization 117-118
inter-event time 102, 125-126
Internet-enabled calibration 24-27, 29-31, 34-38
  Croatia 25
  fat client approach 30
  historical development 28
  hybrid approach 30
  thin client approach 30
  types 27
INVITE transactions 261, 272
iOTDR 28
iPIMMS 28-29
ISO 14253-1 195-199, 205, 207
iVR 28
I wave 227, 229-230

J
J wave 227, 229-230

K
KCC Corporation 185
kerosene 252-255
Kohden model 231
Korabor Aluminum Primer RP140 185
Korethan Topcoat UT6581 185
K wave 227, 230
Index
