Gavin J. Baxter is a lecturer in the School of Computing at the University of the West of Scotland. His research focuses on the subject area of Enterprise Social Media but more specifically the implementation of Web 2.0 technologies in organisations for the purposes of organisational learning. His other research areas include the applicability of blogs as communication and knowledge sharing tools in organisational project-based environments. He also researches about the application of Web 2.0 technologies in educational contexts having worked on a number of EU funded projects associated with this topic, namely “Web 2.0 European Resource Centre.” He is currently involved in the “European Network for the Integration of Web 2.0 in Education and Work.”

Aleš Bourek, MD, PhD, heads the Center for Healthcare Quality, Masaryk University. For 27 years, he has taught how to understand and use information (skills, attitudes, benefits, limitations, risks, techniques, and technologies) in health informatics seminars, and as a gynecologist, is active in the area of assisted reproduction. He worked for DG SANCO, WHO and World Bank, is the president of the European Society for Quality in Health Care, board member of Central and Eastern European Society
About the Contributors

Theodore E. Davis, Jr., Ph.D., is an Assistant Professor at State University of New York College at Buffalo, as well as the Vice President, Chief Administration Officer, at J.B. and Associates, a small advisory firm that specializes in the areas of management, and public relations by furnishing assistance to management of private, nonprofit, and public small to medium size organizations. Dr. Davis has over 20+ years’ success building, aligning and restructuring organizations to achieve operational excellence and sustainable financial gains. His wide-ranging experience spans startups, turnarounds, hybrid/multi-operational businesses, non-profits, academia and M&A, as well as being a noted speaker. Dr. Davis received a Ph.D. from Southern Illinois University, a M.B.A. from University of Pittsburgh, and a B.A. from Chicago State University. Dr. Davis received several awards for outstanding teaching qualities, classroom creativity, leadership, and innovation, and continued dedication to students. He is a member of the several community and professional service organizations, including the Academy of Management, and the Black Chamber of Commerce. Moreover, he is a member of the Board of Directors of several nonprofit organizations. He teaches both undergraduate and graduate courses, specializing in Human Resource Management and Strategic Management. In addition, he has published several articles in the fields of Strategic Management, Human Resource Management, and Entrepreneurialism. Dr. Davis lives in Glencoe, Illinois, a northern suburb of Chicago with his two children. When not working, Dr. Davis enjoys listening to music and attending concerts, as well as chess, literature, poetry, and collecting stamps and coins.

Helen Ewing is the director of the Doctor of Health Sciences program and Associate Professor at the Arizona School of Health Sciences, A.T. Still University. Dr. Ewing is a registered nurse with a BN and MN from the University of Calgary and a DHSc in health science from Nova Southeastern University. Dr. Ewing’s research interests focus on studying issues impacting global health, online education, healthcare leadership, academic integrity, and nursing.

Stylianos Hatzipanagos is Senior Lecturer in the Centre of Technology Enhanced Learning at King’s College London. He is a Fellow of the Centre for Distance Education at the University of London. His research portfolio includes learning design and evaluation of online learning environments, formative assessment and technology-enhanced assessment, computer mediated communication and computer supported collaborative work, open educational resources, social media and social networking in an educational context. He has edited books and peer reviewed journal special issues on social media and assessment. He has developed and led successful research funding applications and participated in research projects at a national (UK) and European level.

Anne Koch is a graduate of Duquesne University and is an Instructor in the School of Education at Duquesne University in Pittsburgh, PA. Dr. Koch is also an elementary teacher, curriculum developer, and oversees the math collaborative for the district. She sits on the Technology and Literacy committee for Technology Assessment in Health Care, European Health Futures Forum, and member of several journal editorial boards. He collaborates with people and institutions interested in quality and accountability improvement in healthcare and healthcare education. He loves to think, reflect, and spend time with his family and friends, enjoys skiing and hiking in extreme locations, meeting and hosting people abroad and at home. His general attitude is “I am not a complete idiot - some parts are still missing.”
for the International Reading Association. Dr. Koch’s research interests include the use of technology in education within an elementary setting, as well as college students’ perceptions and use of technology during their student teaching experience. Her present research reflects technology in an elementary school, during the implementation of a district initiative with BYOD (Bring Your Own Device). In her spare time, she spends much time with her four children and five grandchildren.

**Joseph C. Kush** is a graduate of Arizona State University and currently is an Associate Professor in Education at Duquesne University in Pittsburgh, PA. He is also the Director of the Doctoral Program in Educational Leadership and Instructional Technology. His research interests include issues related to assessment and test fairness, using technology to enhance learning, and music technology. He has published numerous peer reviewed journal articles, has written book chapters, and is a previous contributor to IGI serving as the co-editor for the book *Technology Implementation and Teacher Education: Reflective Models*. He is an accomplished guitarist and uses McIntosh computers exclusively.

**Ying-Chen Lee** received the B.S. and M.S. degrees both in Department of Bio-Industry Communication and Development from National Taiwan University. Her research interests include distance education, Web design, and evaluation of learning performance. Currently, she is the Ph.D. candidate of the Graduate School of Global Information and Telecommunication Studies of Waseda University, Tokyo, Japan.

**Tung-Cheng Lin** is an associate professor in the Department of Information Management at National Taipei University of Nursing and Health Sciences (NTUNHS). Currently, he is the supervisor of Academy of Taiwan Information Systems Research and the reviewer of assist service sector technology development plan initiated by the Ministry of Economic Affairs, Taiwan, R.O.C. He received his doctorate in Business Administration from National Taipei University in 2003. From 2004 to 2010, he headed the Teaching Information Division, Computer Center at NTUNHS. He has published papers in some professional journals such as *Cyberpsychology, Behavior, and Social Networking*, *International Journal of Distance Education Technologies*, *The Journal of Nursing Research*, *International Journal of Gerontology*, and others. He currently focuses on the research of information education, telemedicine, e-commerce, and information behavior.

**Simon Lygo-Baker** has worked in academic development for over ten years and is currently a senior lecturer in higher education at the University of Surrey. He has developed a range of accredited postgraduate programmes and established, in collaboration with academic staff, specific programmes and courses for departments, and groups of staff aimed to enhance the learning opportunities for students. Initially Simon gained a degree and MA in Politics before completing a PGCEA. His doctoral research considered the role of values and identity within higher education.

**Gary F. McKenna** is a research assistant in the School of Computing at the University of the West of Scotland. His research areas include the application of e-portfolios for PDP in higher education as well as web-based personal tutoring systems, eLearning, multimedia, and virtual learning environments. His other areas of research include educational learning theory and the psychology of learning, adult learning and continuing education, curriculum development, in addition to professional and personal development.
**Sherri Melrose** is an Associate Professor in the Centre for Nursing and Health Studies at Athabasca University, Athabasca, Alberta, Canada. Dr. Melrose is a registered nurse with an MEd and a PhD in education from the University of Calgary. Dr. Melrose’s research interests include examining the experiences of health care professionals as they continue their education in online learning environments and the kinds of instructional responses that best facilitate student success.

**Sharon L. Moore** is a Professor in the Centre for Nursing and Health Studies at Athabasca University. Dr. Moore is a registered nurse and registered psychologist with an MEd in counselling psychology from the University of Calgary and a PhD in nursing from the University of Texas at Austin. Her research interests focus on hope and aging, knowledge translation for the assessment and prevention of suicide in older adults, and on strategies that foster student success and community in online learning.

**Matthew A. Robby** has extensive experience and expertise in leadership and applied research. He is currently the UNESCO Chair of Applied Research in Education for the Higher Colleges of Technology in the United Arab Emirates. Before that, he served as the Chair of Applied Academic Program Research for the 17 Colleges of the Higher Colleges of Technology (2011-2013), Executive Director of Evaluator Services in California (2008-2010), District Program Evaluator for Riverside County Public Schools (2000-2008), and Research Associate (1997-2000) at California State University. Dr. Robby specializes in performing formative evaluations to support program development and to enhance quality and effectiveness. His expertise is also in managing/directing accountability systems. Dr. Robby has performed many process/impact studies for school districts, colleges and universities, government agencies, and community programs. He has received a number of national and regional awards during his career. Dr. Robby is a member of the American Evaluation Association.

**Shelly R. Roy** Roy is an adjunct professor at Fairmont State University/Pierpont Community and Technical College in Fairmont, West Virginia, and is a Student Advisor at the University of Charleston, in Charleston, West Virginia. She earned the degree of Doctor of Executive Leadership from the University of Charleston, in Beckley, West Virginia in 2013. She earned a Master of Science in Strategic Leadership from Mountain State University in 2008, and a Bachelor of Science in Organizational Leadership from Mountain State University in 2007. Her research interests include trait emotional intelligence and higher education, trait emotional intelligence and leadership, virtual leadership, crisis leadership, teaching effectiveness, and many other areas.

**Joachim P Sturmberg** (MBBS, DORACOG, MFM, PhD, FRACGP) is Conjoint A/Prof of General Practice in the Department of General Practice, The Newcastle University, Newcastle, Australia. He is a graduate from Lübeck Medical School, Germany, where he also completed his PhD. Since 1989, he works in an urban group practice on the NSW Central Coast, with a particular interest in the ongoing patient-centred care of patients with chronic disease and the elderly. Since 1994, he pursues systems and complexity research with an inquiry into the effects of continuity of care on the care processes and outcomes. Since then his research has expanded and includes the areas of understanding the complex notion of health, health care and healthcare reform, showing that health is an interconnected multi-dimensional construct encompassing somatic, psychological, social and semiotic or sense-making domains, that health care has to embrace the patient’s understanding of her health as the basis for effective and efficient care, and that an effective and efficient healthcare system ought to put the patient at the
centre. He is joint chief editor of the Forum on Systems and Complexity in Medicine and Healthcare in the *Journal of Evaluation in Clinical Practice*.

**Nobuyoshi Terashima** received the Ph.D. degree in Engineering from Tohoku University. Currently, he is the professor of the Graduate School of Global Information and Telecommunication Studies of Waseda University, Tokyo, Japan. He was the president of ATR Communication Systems Laboratories during 1991 to 1996. He became a professor of Waseda University in 1996. Since then, he has been engaged in the research and education concerning multimedia engineering, information technology and artificial intelligence and those impacts on human beings and society.

**Revathi Viswanathan** works as Professor in English, in B. S. Abdur Rahman University, Chennai, India, and has 20 years of teaching experience at the collegiate level. Has conducted doctoral research in Self-Directed Learning at the tertiary level and also specialized in using technology for language teaching. A teacher trainer and conducts workshops on using various technological tools for teaching the target language. Has conducted research projects to train students in developing communication skills with the help of advanced technological tools such as podcasts, mobile devices and blogs, to list a few. He likes to present papers in national and international conferences. He has authored three books, a chapter in the *Handbook of Research on Web 2.0 and Second Language Learning*, and a few articles in refereed journals.

**Kristina Zgodavova**, PhD., is one of the leading Slovak experts in the field of quality engineering and management. She served as vice-rector for strategy and development at the Alexander Dubček University in Trenčín in the years 2007 – 2010. She is the author of two monographs, several university textbooks, and teaching aids. Led several domestic and foreign projects and participated in the development of curricula and textbooks for courses in various fields of the industry and services. She attended a number of invited lectures in a speech to foreign universities, conferences, symposia and seminars. She serves as the guarantor of Integrated Management Systems and Quality Engineering study programs and IMPROHEALTH centre at the Technical University of Kosice, member of the working group of the Slovak Accreditation Commission established by government of Slovak Republic for monitoring and independent evaluation of the quality of education, research, development, artistic, and other creative activity of the universities. Currently, she deals mainly with improving the education quality and healthcare quality.
