Latif Al-Hakim is the chair of Supply Chain Design Program at the University of Southern Queensland, Australia. His experience spans 40 years in industry, research and development, and academic institutions. He received his first degree in Industrial Engineering in 1968. His MSc (1977) in Systems Engineering and PhD (1983) in Management Science were awarded from the University of Wales (UK). Dr Al-Hakim’s research interest is on system design, innovation, information quality, and healthcare informatics. He is the author and editor of 13 books, 12 book chapters, and more than 100 journal and conference papers. Dr. Al-Hakim established the first international journal focused on information quality. Dr. Al-Hakim has been awarded the title of Honorary Senior Lecturer at the Imperial College, London (UK) and Honorary Senior Researcher from the University of South Australia, Australia.

Chen Jin is a professor of Department of Innovation, Entrepreneurship, and Strategy in Tsinghua SEM. He is also the Director, Research Center for Technological Innovation of Tsinghua University. He received his Bachelor in chemical process control in the Department of Chemical Engineering from Zhejiang University in 1989 and Ph.D. in Management Engineering in the Department of Management also from Zhejiang University in 1994. Dr. Chen Jin was the visiting scholar of MIT Sloan School of Management in 1998 and the visiting fellow of SPRU of Sussex University of UK. Dr. Chen Jin has focused the research on management of research, technology, and innovation, and has published more than 600 articles on various journals and proceedings of international conferences, including Technovation, R&D Management, Research Technology Management, IEEE Transaction on Engineering Management, International Journal of Technology Management. He co-edited Innovation in Business and Enterprise: Technologies and Frameworks in 2010 at IGI Global.

Murad Ali, MBA, is a postgraduate fellow at Inha University South Korea. He is research assistant at the Graduate School of Business Administration, Inha University, South Korea. His area of research interests include but not limited to strategic management, innovation and technology management, indigenous technological innovation capabilities in developing countries, knowledge management, and HRM/OB. His approach is quite interdisciplinary. He has presented his research work in different international conferences and his work has been published in various proceedings and international journals. He teaches various courses on strategic management, innovation management, knowledge management, and organizational behavior.
**Leticia Antunes Nogueira** is Brazilian and she holds a Master of Sciences in Economics and Business Administration, with special competences in Innovation and entrepreneurship, from Aalborg University, in Denmark. Her interests revolve around innovation and entrepreneurship in the paradigms of sustainable development and ethical businesses and management. During her master program, Leticia has participated in the Globelics activities—which is a network of scholars focused on the competence building aspects of innovation—mostly in relation to inclusive development and low-carbon development. She is now on the path of developing a research proposal for PhD studies, focused on knowledge and entrepreneurial management.

**Jahan Ara Peerally**’s research interests encompass mainly the activities of multinational enterprises in developing and emerging economies. Her publications have focused on technological innovation capability creation and acquisition in foreign multinational and domestic enterprises located in developing countries. Her other interests are related to the socio-economic development effect of multinational enterprises in developing and emerging economies. She has published scientific articles in peer-reviewed books and journals and teaching case studies with accompanying teaching notes in peer reviewed journals as well. She is the recipient of two prestigious awards namely the Fulbright Scholarship (2004-2005) and The European International Business Academy (EIBA) award for the Most Promising Young Researcher in International Business (2005-2006).

**Guilherme Baptista da Silva Maia** is senior economist at the Brazilian Development Bank (BNDES). He has worked at the Financial and International Divisions and currently he is manager at Agricultural and Social Inclusion Division, coordinating sectoral studies. He has a Ph.D. and a Master of Science in Economics from Instituto de Economia of Federal University of Rio de Janeiro. He is also an Associate Professor at the Master Degree in Business Economics of Candido Mendes University. His main areas of interest are associated with competitiveness and Brazilian macroeconomic issues. In the last two years, as coordinator of research of Agricultural and Social Inclusion Division at the Brazilian Development Bank, he and his team published many papers in Revista BNDES and BNDES Setorial regarding financing agricultural activities for small farmers in low-income areas.

**D. K. Bhattacharyya** is Ph.D. in Management from University of Calcutta. He has served in industry in Training and Organizational Development function for about 15 years. Thereafter for last two decades, he has worked with several Management Institutes in India. Presently, he is attached as Professor of Xavier Institute of Management, Bhubaneswar, India. Prof. Bhattacharyya has extensive consultancy experience in HR, Quality Management, and Organizational Development and Restructuring areas. He has published 25 Books on HR management areas with Oxford, Pearson, PHI, etc., and has contributed more than 100 papers in various journals of international repute. Quality Management is one of his core areas of research and teaching.

**José A. Borello** studied geography at the universities of Cuyo (Mendoza, Argentina) and Cincinnati (Ohio), and completed a B.A. and an M.A. in geography at the University of Ottawa. He also holds a Ph.D. in planning from Virginia Tech (1993). Since 1995, he has been associated professor at the Instituto del Conurbano, Universidad Nacional de General Sarmiento (UNGS), Argentina, where he coordinates the Area of Urban Economic Systems and the teaching program in Geography. He is also

a researcher at the National Council for Scientific and Technical Research (CONICET), Argentina. He specializes in economic geography and in the study of production systems and innovation. In the last decade, he has carried a number of research projects with Gabriel Yoguel and other researchers at UNGS and other universities in Argentina. Recently, he has been working on film and audiovisual production and consumption.

Gerardo Breard. Foreign Trade Degree (Quilmes National University), Master on Information Systems Engineering (National Technological University), PhD Candidate in Management Sciences at La Plata National University, had a scholarship at the National Council of Scientific and Technical Research. He participated in different research programs at REDES research center and Quilmes National University. He also was a consultant research for UNDP and ECLAC (United Nations). Nowadays, he is a team member of the Employment and Business Dynamic Observatory at the Ministry of Labor. His main research issues are the impact of information and communication technologies, innovation processes, and their impact over employment and knowledge management schemes in the productive structure.

Elena Castro-Martínez was awarded a PhD in Industrial Chemistry in 1983. Since 2004, she works as a tenured scientist at INGENIO (CSIC-UPV). Her research interests are in the field of innovation studies and, specifically, science and innovation policy and interactions between science and innovation. She works on R&D projects financed by national, regional and European funds and participates in research and knowledge transfer contracts with different entities (regional governments, research bodies and enterprises). From 1988 to 1994, Elena managed science-industry collaboration through programs supported by the Spanish National R&D Plan; among others, she was responsible for setting up the network of Technology Transfer Offices (TTO) in Spanish universities and public research bodies. From 1995 to 2004, she led the Technology Transfer Office of CSIC in Valencia.

Bruno De Conti is lecturer at the University of Campinas (Brazil) and researcher of the Center for Current Trend and Policy Research at the same university (Cecon/UNICAMP). He has a PhD degree from the University of Paris 13 (France) and the University of Campinas (Brazil). He worked for two years at the Brazilian Development Bank (BNDES), at the Agricultural and Social Inclusion Division. His main areas of interest are International Economics, Monetary Economics, and Brazilian Economy.

Valéria Delgado Bastos is M.Sc. in Economics from the Instituto de Economia of Federal University of Rio de Janeiro (UFRJ) and is currently senior economist at the Brazilian Development Bank (BNDES). Having been previously in charge of economic researches on industrial sectors, mainly on pharmaceutical and chemical industries, she currently holds the position of Advisor to the BNDES’s President at the Area of Economic Research. During the past few years, she has published on the Brazilian innovation system and mechanisms of financing innovation in biotechnology, agriculture, and green chemistry. Before working at BNDES, she held various positions in the Brazilian government, such as Deputy Director of Fund Raising and International Cooperation at the Brazilian Federal Innovation Agency (FINEP), Director of Licensing and Technology Transfer at the Brazilian Patent and Trade Office (INPI), and macroeconomics adviser to the Minister of Finance, the Minister of Health, and at the Brazilian House of Representatives.
Mónica Elizabeth Edwards Schachter received her Ph.D from the University of Valencia, Spain (2003) and Engineering and Innovation projects (ABD, 2006). She is trained in both natural and social sciences; she holds Degrees in Science Education and Electronic Engineering and a Diploma in Knowledge Management for the Latin American Faculty of Social Sciences in 2004 (FLACSO, Mexico). Mónica is full researcher at INGENIO, a joint Institute of the Spanish Council for Scientific Research and the Polytechnic University of Valencia (Spain). She is also Lecturer on Creativity and Corporate Social Responsibility in the Master of Science and Innovation Management, sponsored by the Organization of Ibero-American States (OEI). Previously, she was Lecturer at National University of Cordoba and Engineer responsible for managing the Infrared and Nuclear Magnetic Resonance Spectroscopy Laboratory. She is the author and coauthor of over 100 papers in scientific journals and conference proceedings and is blogger of Tendencias21, a science diffusion magazine.

Dulce D. Elazegui is currently a University Researcher III at the Center for Strategic Planning and Policy Studies, College of Public Affairs and Development, University of the Philippines Los Baños. She obtained a Master’s degree in Technology Policy and Innovation Management from Maastricht Economic Research Institute on Innovation and Technology in the Netherlands. She also holds a Master’s degree in Agricultural Development Economics from the Australian National University. She attended the Summer Certificate Course on Sustainable Environmental Management at the University of California-Berkeley under the Beahrs Environmental Leadership Program. Her research interests include policy and governance in science and technology, agriculture, natural resources and environment. She has been involved in collaborative research and extension work on agricultural biotechnology with some prestigious international organizations.

Timothy Esemu is a lecturer and Head of Department for Marketing and International Business at Makerere University Business School (MUBS), Uganda. He obtained his doctorate from the Graduate School of Business, University of Cape Town in 2012 and has research interests in innovation, knowledge management, firm value creation, competitiveness, governance, and internationalisation. His research interests include strategic management, corporate social responsibility, air transportation and logistics, and team performance appraisal.

Linda M. Peñalba is an associate professor at the Institute of Governance and Rural Development, College of Public Affairs and Development, University of the Philippines Los Baños (UPLB). She obtained her Master of Science degree in Agricultural Economics from UPLB and her Ph.D. in Environmental Science from the University of Wisconsin-Madison. Her research interests are in the fields of agrarian studies; rural development; resource economics; climate change adaptation; science and technology policy; and social, institutional, and economic aspects of natural resource management. In view of her involvement in major regional research projects, she is a member of several regional research networks. She has number of publications on biotechnology regulatory policies and climate change adaptation in Southeast Asia.

Nebojša Radojević is presently a Ph.D. candidate in International Business at HEC Montréal (Canada) and has more than 15 years of work experience in project and program management, consulting, and e-Government. His publications and current research focus on emerging markets as the new context of innovation in general and on reverse innovation in particular, as well as on doing business in and with India. Further themes of his academic interest include innovation management, innovation metrics, and links between corporate governance and innovation. Nebojša holds an MBA from HEC Montréal, a Masters of Computer Science from Dresden University of Technology (Germany), and professional credentials in project management.

Hakikur Rahman is an academic over 27 years has served leading education institutes and established various ICT4D projects funded by ADB, UNDP, and World Bank in Bangladesh. He is currently serving as a Post Doctoral Researcher at the University of Minho, Portugal, under the Centro Algoritmi. He has written and edited over 25 books, more than 50 book chapters and contributed over 100 articles.
About the Contributors

on computer education, ICTs, knowledge management, open innovation, data mining, and e-government research in newspapers, journals, and conference proceedings. Graduating from the Bangladesh University of Engineering and Technology in 1981, he has done his Master’s of Engineering from the American University of Beirut in 1986 and completed his PhD in Computer Engineering from the Ansted University, BVI, UK, in 2001.

Sebastian Rotondo is Industrial Economist (General Sarmiento National University) and Local Economic Development Specialist (UNGS). He participated in different research programs in universities, public offices, and international organism. He published many book chapters, articles, and documents in traditional and electronic reviews. Nowadays, he works at the Employment and Business Dynamic Observatory at the Ministry of Labor. His research is oriented to the impact of business dynamics on job creation and destruction, delimitation of local economic areas, and local labor markets. Since 2008, he has been researching about the effects of innovation over employment and the impact of ICT adoption on employment dimensions in Argentina.

Yelena V. Smirnova is a senior lecturer and Ph.D. student in the Department of Management at Kazakhstan’s Suleyman Demirel University (SDU), where she also received her bachelor’s degree in economics and master’s degree in management. She holds an M.B.A. degree in entrepreneurship from Kingston University in Chicago. Her Ph.D. thesis is on university-industry knowledge collaboration. She has published several conference and journal papers on innovation development of Kazakhstan and compiled five books of lectures on management. Yelena V. Smirnova has become a Highly Commended Award-Winner at the Literati Network Awards for Excellence 2013 for writing an impressive paper entitled “Perceptions of Corporate Social Responsibility in Kazakhstan.”

Tim Turpin is a sociologist and Professorial Fellow at the Centre for Industry and Innovation Studies at the University of Western Sydney, Australia. He is a science, technology, and innovation policy analyst with a particular interest in the local and global processes through which knowledge is produced, managed, and diffused. He has carried out fieldwork and published widely on science and innovation systems, research culture, institutional change, and research policy in Australia and throughout the Asia-Pacific region with a particular focus on South East Asia.

Eric Wood is Professor of Innovation and Entrepreneurship at the University of Cape Town. He has a variety of international research collaborations and has published in leading entrepreneurship journals. He is an entrepreneur, business angel, and non-executive director in two tech ventures. Seeing organizations become more rewarding for all their stakeholders lights Eric’s fire.

Hongru Xiong received the Doctor’s degree from School of Economics and Management, Tsinghua University, in 2012, and also accomplished his joint PhD study in Dept. of International Development, University of Oxford, from 2009 to 2010. He is currently an Economist in State Power Economic Research Institute, State Grid Corporation of China and also a postdoctor in China Institute for Reform and Development (CIRD) as well as a senior member in Chinese Society of Technology Economics. His research interests include technology economics, innovation management, strategy, and public policy. His papers appear in some international academic journals as well as well-known international confer-
Ying Ying was born in China on Sep.13, 1987. She finished her B.Sc. degree in Business Administration in Zhejiang University and now is a PhD student majored in Business Administration, at School of Management, Zhejiang University. Her research interests cover innovation search, international business, and innovation network in industrial clusters. She is a member of Academy of International Business. Her work has been presented at some major conferences including AIB, Globelics conference, and published journals in Studies in Science of Science (in Chinese).

Oliver Yu, President of the STARS Group, is an expert on technology innovation and resource strategy planning. He is also an Executive in Residence and Adjunct Professor at San Jose State University, and a Consulting Associate Professor at Stanford. In 2014, he is invited to be a Visiting Professor on Asian Business Innovation Strategy at Kyushu University in Japan. Prior to founding STARS in 2000, Dr. Yu was Director, Energy and Technology Strategies, at SRI International from 1989 to 2000, managing technology strategy projects worldwide. Before SRI, he was for 15 years Planning Manager at Electric Power Research Institute, responsible for energy industry analysis and institute-wide research planning. Dr. Yu holds a PhD from Stanford and has published over 80 papers and 5 technical books, including Technology Portfolio Planning and Management by Springer. He is currently Vice Chair of the Silicon Valley Chapter of the IEEE Technology Management Council.
