About the Contributors

**B. K. Tripathy** a senior professor in the school of computing sciences and engineering, VIT University, at Vellore, India. He has published more than 190 technical papers in various international journals, conferences, and book chapters and has guided 14 scholars for their PhD degrees in both mathematics and computer science. He is associated with many professional bodies like IEEE, ACEEE, ACM, IRSS, AISTC, ISTP, CSI, AMS, and IMS. He is in the editorial board of several international journals like CTA, ITTA, AMMS, IJCTE, AISS, AIT, and IJPS and is a reviewer of over 40 international journals like *Mathematical Reviews*, *Information Sciences*, *Analysis of Neural Networks*, *Journal of Knowledge Engineering*, *Mathematical Communications*, *IEEE Transactions on Fuzzy Systems*, and *Journal of Analysis*. His research interest includes fuzzy sets and systems, rough sets and knowledge engineering, data clustering, soft computing, granular computing, theory of multisets, list theory, content-based learning, remote laboratories and social networks.

**D. P. Acharjya** received his Ph. D in computer science from Berhampur University, India; M. Tech. degree in computer science from Utkal University, India in 2002; and M. Sc. from NIT, Rourkela, India. He has been awarded with Gold Medal in M. Sc. Currently he is an Associate Professor in the school of computing sciences and engineering, VIT University, Vellore, India. He has authored many national and international journal papers and five books: *Fundamental Approach to Discrete Mathematics, Computer Based on Mathematics, Theory of Computation; Rough Set in Knowledge Representation and Granular Computing; Introduction to Information Technology and Computer Programming* to his credit. He is associated with many professional bodies CSI, ISTE, IMS, AMTI, ISIAM, OITS, IACSIT, CSTA, IEEE and IAENG. He was founder secretary of OITS Rourkela chapter. His current research interests include rough sets, formal concept analysis, knowledge representation, data mining, granular computing and business intelligence.

**Vikramaditya Bhandari** obtained his B. Tech. (Chemical Engineering) from VIT University, India. He started his professional career as a graduate engineer trainee with Nutra Specialties Pvt Ltd, India and later joined Sanskar Chemicals and Drugs Pvt Ltd., India as project engineer where he was involved in production planning, process scheduling, optimization and defining standards for quality control and assurance. He is currently working as process engineer for Shasun Pharma Solutions Limited, Dudley, UK. His areas of work include designing process streams for new product introduction, preparing engineering flow diagrams, carrying out environmental impact assessment, modeling emission rates for
About the Contributors

submission to environmental authorities, solvent management, scaling up processes from lab scale to plant scale, equipment mapping along with initiation time, scheduling time cycle and performing utility requirement calculations.

**Félix Biscarri** received the B.Sc. degree in electronic physics and the Ph.D. degree in computer science from the University of Seville, Seville, Spain, in 1991 and 2001 respectively. He is currently a coordinating professor of power electronic with the polytechnic, University School of Seville. His research areas include electricity markets, electrical customer classification, and fraud detection in the power electric industry.

**Jesús Biscarri** received the B.Sc. and Ph.D. degrees in electronic physics from the University of Seville, Seville, Spain, in 1982 and 2001, respectively. He has been working in Endesa since 1985 at IT, Measure and Non Technical Losses Control Areas. Currently, he is also collaborating as an associate professor at the Polytechnic University School of Seville.

**Ritu Chauhan** is currently working as assistant professor in department of biotechnology, Amity University, India. Her Ph.D. research area includes Spatial Data Mining; concentrating on clustering data mining under the supervision of Dr. Harleen Kaur in computer science at the Hamdard University, India. She has published numerous research papers in international journals and chapter in an edited book. Her main research interests area include analysis of data using retrieval process with application towards clinical databases, decision making healthcare databases and several visualization techniques.

**David K. Daniel** obtained his B. Tech (Chemical Engineering) from the University of Kerala, India; M. Tech (Chemical Engineering) from Calicut University, India. He received his Ph. D (Biotechnology) from the IIT-Kharagpur, India. At present, he is working as professor in the chemical engineering division, School of Mechanical and Building Sciences, at VIT University, Vellore, India. His research interests include bioprocess development, optimization and modeling, alternate fuels, microbial fuel cells and biosensors development. He is the recipient of the best teacher award by the VIT University followed by the certificate of appreciation from VIT University in recognition of the research efforts for publishing in refereed journals. He has also received JEC-Asia 2013 innovation award for recycling category. Dr. David is an active member of the IE, IICE and Biotech Research Society of India.

**Raja Das** is an assistant professor in the school of advanced sciences, VIT University, India. He received his M. Sc. (Applied Mathematics) from National Institute of Technology, Rourkela, India; and PhD from Sambalpur University, India. His area of research interest includes mathematical modeling, optimization and soft computing. He has published more than ten research papers in the international journals and presented more than four articles at different international and national conferences.

**Paramartha Dutta** did his Bachelors and Masters in Statistics from the Indian Statistical Institute, Calcutta, India. He afterwards completed his M. Tech. (Computer Science) from the same institution. He received PhD (Engineering) from the Bengal Engineering and Science University, Shibpur. At present, he is working as a professor in the department of computer and system sciences of the Visva Bharati University, India. He has coauthored four books and has also one edited book to his credit. He has published about hundred papers in various journals and conference proceedings, both international and national. Dr. Dutta is a life member of OSI, CSI, ISCA, ISTE, IUPRAI; member of ACM and IEEE.
About the Contributors

P. Geethanjali  received her B.E. (Electrical and Electronics Engineering) from University of Madras, Tamilnadu, India. She obtained M. Tech (Electrical Drives and Control) from Pondicherry Engineering College, Pondicherry University, Puducherry, India; and Ph. D from VIT University, Vellore in 2012. At present, she is working as an associate professor in school of electrical engineering, VIT University, Vellore, India. Her research interests include bio-signal processing using soft computing techniques, development of assistive devices, renewable energy, and applications of renewable energy.

Juan Ignacio Guerrero received the Ph.D. Degree in industrial informatics from the University of Seville, Spain, in 2011; and the B.Sc. Degree in computer science from University of Seville, in 2006. He works as professor and researcher in University of Seville. His research areas include artificial intelligence, neural networks, expert systems, data mining and evolutionary computation focus on utilities and smart grids.

D. H. Manjaiah is currently working as a professor at the department of computer science, Mangalore University, India. In addition, he is the board of studies of Mangalore University, India. He received PhD from Mangalore University, India; M. Tech. from National Institute of Technology, Surathkal, India, and B.E. from Mysore University, India. He has authored more than 70 research papers in international and national reputed journals and conferences. His name appears in the editorial board of many international journals and is a committee member of various technical bodies like AICTE, UGC. His research interest includes advanced computer networking, mobile / wireless communication, wireless sensor networks.

Arun G Ingale obtained his PhD (Biotechnology) from Sant Gadge Baba Amravati University, India. He was the founder head of department of biotechnology, Dr. Babasaheb Ambedkar Marathwada University, India. Dr. Ingale is president of society for biotechnology and bioinformatics, India. His name appears in the editorial board of many international journals. In addition, he has published many research papers of international repute. He has received the award as a Fellow of Society of Sciences (FSSc), Dumka and MIF fellowship by Matsuame International Foundation, Japan. His research interest includes immunology, structure-function prediction, lectin biosensor, glyco nanobiotechnology, genomics, proteomics, and bioinformatics. He has submitted protein and nucleotide sequences on NCBI and viral protein models are being submitted in PDB database.

Sanjay Kumar Jena is professor in the department of computer science and engineering, National Institute of Technology, Rourkela, India. His areas of research interest include database engineering, parallel algorithm, artificial intelligence and neural computing, computational machines, Network security. He is the principal investigator of information security education and awareness project for MIT, Government of India at National Institute of Technology, Rourkela, India.

Ramesh Kannan obtained his Bachelor’s degree in civil engineering from Hindustan College of Engineering, Chennai and master’s degree from college of engineering, Guindy, Chennai. He is currently working as assistant professor in the department of civil engineering, VIT University, India. His area of research includes constructability assessment, concrete formwork systems, structural optimization and network based project management. He is currently pursuing his Ph. D in VIT University, India.
About the Contributors

has published many research papers in international, national and international conferences. He is also interested in the Digital Typography and Photography.

Kijpokin Kasemsap received his BEng degree in Mechanical Engineering from King Mongkut’s University of Technology Thonburi, his MBA degree from Ramkhamhaeng University, and his DBA degree in Human Resource Management from Suan Sunandha Rajabhat University. Now he is a special lecturer at Faculty of Management Sciences, Suan Sunandha Rajabhat University based in Bangkok, Thailand. He has 17 years of engineering and management experiences in multinational corporations. He has numerous original research articles in top international journals, conference proceedings, and book chapters on business management, human resource management, and knowledge management published internationally.

Harleen Kaur works in the Hamdard University, India. She has served in United Nations University – IIIGH, Malaysia as a research fellow focusing on information technology in Healthcare. She holds a Ph.D. in Computer Science on the topic of applications and social impact of data mining techniques in health care management. She researches broadly in the fields of information technology in healthcare, big data analytics, knowledge discovery, data mining and its applications. She serves as an editorial board member of the peer-reviewed journals and a member of several international bodies like ACUNS. She has contributed to several international publications in refereed journals, conferences, books and is the editor of the book on ICTs and the Millennium Development Goals: A United Nations Perspective published by Springer.

Pabitra Mohan Khilar has completed his B. Tech. (CSE) from Mysore University, India; M. Tech. (CSE) from NIT, Rourkela, India; and Ph.D. (Distributed Computing) from IIT, Kharagpur, India. He has been working as a faculty in the department of computer science & engineering, at NIT, Rourkela, India. He has published a number of books and book chapters in various reputed publishers around the globe. His area of interest is fault tolerant computing, high performance computing and distributed wired and wireless networks. He has guided one Ph.D. and more than 100 under graduate and post graduate students in computer science and engineering. He is member of various professional bodies such as IEEE, CSI, IETE, IE, OBA, and ACS. He has been awarded with IBM faculty award and IE Gold Medal. He has served in the capacity of editor-in-chief, editor, reviewer in many reputed international and national journals.

Geetha Mary A. received her M. Tech. in computer science and engineering from VIT University, Vellore, India in 2008 and B.E. from University of Madras, Tamil Nadu, India in 2004. At present, she is working at VIT University as Assistant Professor-Senior. She is currently doing her PhD at VIT University. Her field of interest spans and is not limited to computer science and health care management. Her research interests include security for data mining, databases and intelligent systems. Ms Geetha is associated with professional bodies IAENG and CSTA.

Carlos Leon de Mora received the B.Sc. degree in electronic physics in 1991 and his Ph.D. degree in computer science in 1995, both from the University of Seville, Seville, Spain. At present, he is working as a full professor of the electronic technology department at the University of Seville. He is acting as
an advisor of 6 doctoral thesis dissertations; professor of the “Chair Telefonica” and chief information officer at the University of Seville; head of more than 30 research projects, head of the research group of electronic technology and industrial informatics (15 PhDs); and Vice-rector. He has published more than 100 papers and conference contributions, and member of the International Program Committee in more than 50 international scientific meetings. His research areas include knowledge-based systems, data mining and computational intelligence focus on utilities system management. Dr Leon is IEEE senior member.

Sudipta Mahapatra obtained his M. Tech. and Ph.D. degree in Computer Engineering from IIT, Kharagpur. He was in the electronic systems design group of Loughborough University, UK, as BOYSCAST fellow of DST Government of India. He is presently working as an associate professor in the electronics and electrical communication engineering department of IIT, Kharagpur. His areas of research interest include image and video compression, optical and wireless networks, parallel and distributed Systems.

Rocío Millán received the B.Sc. degree and the Ph.D. degree in economics and business administration from the University of Seville, Seville, Spain, in 1985 and 1996, respectively. She worked as professor of economic theory and finance in this university for more than ten years and is working for Endesa as Metering Control Deputy Director. Her research areas include public deficit, energy futures markets, and NTLs detection in electricity companies.

Iñigo Monedero received the B.Sc. and Ph.D. degrees in computer science from the University of Seville, Seville, Spain, in 1994 and 2004, respectively. He joined the automatics and robotics department for two years and he has been a professor in the electronic technology department of the University of Seville since 1998. His research areas include artificial intelligence, expert systems, and data mining in the power electricity industry.

Varun Kumar Ojha did his B. Tech. (CSE) from West Bengal University of Technology, India and did his M. Tech. (CSE) from Kalyani Government Engineering College, India. He is pursuing his PhD in Computer Science & Engineering from Jadavpur University, India. He is working as fulltime research fellow at Visva-Bharati University, India. He has published one book, one chapter and about eight research articles in international journals and conferences. He is associated with ACM and IEEE.

Mrutyunjaya Panda received his PhD (Computer Science) from Berhampur University, India; Master in communication system engineering from Sambalpur University, India; MBA in HRM from IGNOU, India; and BE (ETC Engineering) from Utkal University, India. He is presently working as a professor in the department of ECE, Gandhi Institute for Technological Advancement, India. He has published about 45 papers in international and national journals and conferences, and 5 book chapters. He is acting as a member of various international journals. His active area of research includes data mining, intrusion detection and prevention, social networking, mobile communication, wireless sensor networks, trust management. He is a member of various professional bodies such as IEEE, MIR Labs, KES, IAENG, ACEEE, IETE, CSI, and ISTE.

G. N. Patel is currently working as senior professor at Birla Institute of Management Technology (BIMTECH) a leading B-School in India in the area of decision science. He has published more than 100 research papers in leading national and international journals. He guided 8 candidates for their Ph.D
About the Contributors

and currently 10 students are working under him for their doctoral degree. His area of interest includes frontier analysis and mathematical programming. He is invited by many Indian and overseas universities and institutions for his talk.

Manas Ranjan Patra holds a Ph.D. degree in computer Science from the Central University of Hyderabad. Currently, he is the director of the computer centre at Berhampur University in addition to his teaching assignment in the PG department of computer science. He is actively engaged in research and teaching for more than 25 years. As a United Nations Visiting Fellow, he worked at the International Institute for Software Technology, United Nations University, Macau; and Institute for Development and Research in Banking Technology, Hyderabad. His research interests include service based computing, applications of data mining, and e-Governance. He has supervised 5 Ph.D. students and has more than 100 publications in journals and international conferences to his credit. He is a life member of CSI, ISTE and OITS, and a fellow of ACEEE.

P. Payaswini received her M. Sc. (Computer Science) from Mangalore University, Mangalore, India and at present perusing her Ph. D (Computer Science) at Mangalore University, India. She is awarded with DST - INSPIRE fellowship available for first rank holders in master degree for pursuing Ph.D. Her research areas are advanced computer networks and mobile communication system. She has authored many research papers in international, national journals and conferences to her credit.

M. K. Pradhan is an assistant professor in the department of mechanical engineering, Maulana Azad National Institute of Technology, Bhopal, India. He received his M. Tech and PhD from National Institute of Technology, Rourkela, India. His area of research interest includes modeling, analysis and optimization of manufacturing processes and systems. He has published more than 25 research papers in the international journals and presented many articles at international and national conferences. He is a life member of ISTE, IACSIT, IAENG and IE (I).

Bibhudatta Sahoo is an assistant professor in the department of computer science and engineering, NIT Rourkela, India. His technical interests include performance evaluation methods and modeling techniques in distributed computing systems, networking algorithms, scheduling theory, cluster computing and Web engineering. He is associated with several R & D projects sponsored from Government of India.

Sreekumar is currently working as an associate professor in the area of decision science at Rourkela Institute of Management studies, Rourkela in India. He obtained his PhD from Sambalpur University, India; and M. Sc. (Applied Mathematics) from NIT, Rourkela, India. He has published more than 40 research papers in leading national and international referred journals. He participated and presented papers in both national and international conferences. His area of interest includes application of DEA for efficiency measurement, multi criteria decision making and supply chain management. He is associated with professional bodies OITS and CSI.
