Pervaiz Alam is a Professor in the Accounting Department at Kent State University, USA. His research interest is in the areas of financial accounting, auditing, and decision support systems. He has recently published in the Journal of Corporate Communications, Decision Sciences, and International Journal of Intelligent Systems in Accounting Finance & Management.

David Booth earned his Ph.D. from the University of North Carolina at Chapel Hill. He currently holds the rank of Professor in the Department of Management & Information Systems at Kent State University, USA. His teaching and research interests include applied and robust statistics, artificial intelligence, wavelet analysis, quality control and operations management. His recent research has appeared in Decision Sciences, Journal of Quality Technology, Technometrics, Journal of Chemical Information and Computer Science, Business Process Management Journal, Journal of Manufacturing Systems and other similar journals.

Robert T. Chi is Professor of Information Systems at California State University, Long Beach, USA. He obtained his Ph.D. from the University of Texas at Austin and his M.S. from the University of Wisconsin at Madison. His teaching interests include decision support systems, data base management and system analysis, data communication, e-commerce, strategic information systems and Web development. He has received teaching awards at the University of Texas-Austin and has published more than 40 journal and conference articles in Journal of Decision Support Systems, Annals of Operations Research, Journal of Operational Research Society, Journal of Management Information Systems, Journal of Electronic Commerce Research and many others. He is the founder and Co-Editor of Journal of Electronic Commerce Research.

Scott Dellana is an Associate Professor and the Chair of the Decision Sciences Department at East Carolina University, USA. He received his Ph.D. in Engineering Management from the University of Missouri-Rolla. He is currently researching and writing papers in the areas of quality and artificial intelligence applications and has been published in a variety of journals. He has extensive industry experience in civil and aerospace engineering.
Ashutosh Dixit (Ph.D., Georgia Institute of Technology) is an Assistant Professor of Marketing at Terry College of Business, University of Georgia, Athens, Georgia, USA. He received a CIBER award to study in Japan and was an AMA-Sheth Doctoral consortium fellow. He was a runner-up, and his dissertation received an honorable mention, in the George Day Doctoral Dissertation Award Competition. He has won Terry Sanford Awards twice and the Coca-Cola Center for Marketing Award once for his research on the growth of discounters and on predatory pricing. His research interests include electronic commerce, pricing, and neural network modeling.

David Enke received his Ph.D. in Engineering Management from the University of Missouri - Rolla (UMR) in 1997. He was an assistant professor of System Science and Industrial Engineering at the State University of New York-Binghamton before returning to UMR as an Assistant Professor within the Engineering Management Department. His research interests involve the development of smart and intelligent systems, specifically using neural networks, knowledge-based systems, and data mining techniques in the areas of financial forecasting, financial engineering, investment, capital planning and budgeting, and electrical load and price forecasting.

Dorothy M. Fisher is Professor of Information Systems at California State University, Dominguez Hills, USA. She received an M.A. from Duke University and a Ph.D. from Kent State University. Dr. Fisher has had broad consulting experience with private firms as well as educational institutions. During the past 15 years, she has authored/co-authored more than 30 papers that appeared in the Journal of Computer Information Systems, the Journal of Systems Management, the Journal of Applied Business Research, the Journal of Business Management, and other academic and professional journals. Currently, she is the managing editor of the Journal of Electronic Commerce Research.

Michael Y. Hu is Professor of Marketing, Graduate School of Management, Kent State University, USA. He earned his M.S. and Ph.D. in Management Science/Marketing from the University of Minnesota. He has received the Distinguished Teaching Award from Kent State University and has published more than 100 articles in the areas of artificial neural networks, marketing research, and international business. His articles have appeared in the Annals

**Ming S. Hung** is Professor Emeritus of Operations Research at Kent State University, USA. His main areas of interests are neural networks and mathematical programming. His writings have appeared in *Operations Research, Management Science*, and *European Journal of Operational Research*, among others.

**Melody Y. Kiang** is Professor of Computer Information Systems at California State University, Long Beach, USA. She received her M.S. in MIS from the University of Wisconsin, Madison, and Ph.D. in MSIS from the University of Texas at Austin. Prior to join CSULB, she was associate professor at Arizona State University. Her research interests include the development and applications of artificial intelligence techniques to a variety of business problems. Her research has appeared in *Information Systems Research (ISR), Management Science, Journal of Management Information Systems, Decision Support Systems, IEEE Transactions on SMC, EJOR*, and other professional journals. She is an Associate Editor of *Decision Support Systems* and Co-Editor of *Journal of Electronic Commerce Research*.

**Douglas M. Kline**, Ph.D., is currently Associate Professor of Information Systems in the Department of Information Systems and Operations Management at the University of North Carolina at Wilmington, USA. His research interests include neural network theory, methodology, and applications, and information system design. His research has appeared in *Computers & Operations Research, OMEGA, IEEE Transactions on Systems, Man, and Cybernetics, the Journal of Business Strategies*, and others.

**Rob Law** is an Associate Professor of Information Technology at the School of Hotel & Tourism Management at The Hong Kong Polytechnic University. Prior to joining The Hong Kong Polytechnic University in 1995, he worked in the Saskatchewan Institute of Applied Science and Technology, University of Regina, and Bell Northern Research/Northern Telecom in Canada. Dr. Law actively serves the professional and research bodies in hospitality and tourism.
His research interests include hotel and tourism information technology, hospitality and tourism forecasting, and computer assisted hospitality education. His research papers have been published by the leading hospitality and tourism journals.

Kidong Lee earned his Ph.D. in Management Systems at Kent State University. He is currently Assistant Professor of Management Information Systems at the University of Incheon in South Korea. He has published in *Expert Systems with Applications*, *The Chemist* and other similar journals.

Leong-Kwan Li was born in Hong Kong. He was attracted to mathematics when he studied at the Chinese University of Hong Kong. There, he received his first degree and a M.Ph. degree. After teaching in a high school, he continued his study at the University of Southern California in Los Angeles. In addition to applied mathematics, he gained an M.S. degree in Electrical Engineering as well as his Ph.D. degree in Mathematics. His research interests are mainly in applicable applied mathematics including neural networks, numerical analysis, optimization, mathematical modeling and also financial mathematics.

Bradley H. Morantz is a Consultant to the Viral Immunology Center of the Georgia State University Department of Biology (USA), working on automated immunoassays. Dr. Morantz received his Ph.D. from the Decision Sciences Department of Georgia State University, with a minor in Computer Science. His M.S. is also in Decision Sciences. He has a B.S. in Computer Information Systems and Electrical Engineering, with additional course work in semiconductor devices and applied mathematics. His area of research is machine cognition utilizing hybrid artificial intelligence methods. He has been an invited speaker at various schools and universities as well as the IEEE.

Satish Nargundkar is an Assistant Professor in the Department of Management at Georgia State University, USA. He has published in the *Journal of Marketing Research*, the *Journal of Global Strategies*, and the *Journal of Managerial Issues*, and has co-authored chapters in research textbooks. He has assisted several large financial institutions with the development of credit scoring models and marketing and risk strategies. His research interests include data mining, CRM, corporate strategy, and pedagogical areas such as Web-based training. He is a member of the Decision Sciences Institute.
Wan-Kai Pang obtained his Ph.D. degree in Statistics from the University of Southampton (UK) in 2000. He has been working in the Department of Applied Mathematics at The Hong Kong Polytechnic University for almost 20 years as a lecturer in Statistics. His current research interests include computational statistics, Markov chain Monte Carlo methods, statistical reliability and Bayesian modeling.

Leonard J. Parsons is a Professor of Marketing Science in the Dupree College of Management at the Georgia Institute of Technology, USA. He has been a member of the Graduate Management Admission Council’s Research and Test (GMAT) Development Committee, chair of the American Statistical Association’s Section on Statistics in Marketing, and a member of the Advisory Board of the American Marketing Association’s Marketing Research Special Interest Group among other activities. He has served as marketing departmental editor of Management Science and associate editor of Decision Sciences, and has been on the editorial boards of the Journal of Marketing Research, the Journal of Marketing, and the Journal of Business Research.

Ray Pine has been with the School of Hotel and Tourism Management at The Hong Kong Polytechnic University since 1987, including three years as Head. His Ph.D. in Technology Transfer in the Hotel Industry is from Bradford University in the UK, and he is a Fellow of the Hotel and Catering International Management Association. Professor Pine serves on the editorial boards of seven journals, is Asia regional editor for International Journal of Contemporary Hospitality Management and Journal of Tourism and Hospitality Planning & Development, and has authored or co-authored four books, eight book chapters and more than 50 pieces of refereed work.

Jennifer Lewis Priestley is a Doctoral Student in the Department of Management at Georgia State University (USA), studying Decision Sciences. She has written papers on model development and knowledge management. She holds an M.B.A. from The Pennsylvania State University. Her previous work included positions with MasterCard International, VISA EU, Andersen Consulting and AT&T. Her research and teaching interests include data mining, business analysis and knowledge management.

Murali Shanker is an Associate Professor in the Department of Management & Information Systems, College of Business, Kent State University, USA. He received his Ph.D. from the Department of Operations and Management
Science at the University of Minnesota. His current research is in developing task-allocation strategies for distributed simulation models, and in conducting statistical analysis of the behavior of neural networks as applied to classification and prediction problems. He has published in journals like *Annals of Operations Research, Decision Sciences, Journal of the Operational Research Society, INFORMS Journal on Computing*, and *IIE Transactions*, among others.

**Suraphan Thawornwong** received his Ph.D. in Engineering Management from the University of Missouri - Rolla in 2003, and his M.B.A. and M.S. in Industrial Engineering from the University of Missouri - Columbia in 1999 and 2000, respectively. He is currently a senior analyst at the Risk Management Unit of Thailand Securities Depository Co., Ltd., a subsidiary of the Stock Exchange of Thailand (SET). His research interests include applications of computational intelligence, particularly neural networks and genetic algorithms, for financial forecasting and business decision-making.

**Marvin D. Troutt** is a Professor in the Department of Management & Information Systems and in the Graduate School of Management at Kent State University, USA. He is an Associate Editor of *Decision Sciences* Journal and a Fellow of the Decision Sciences Institute. He received his Ph.D. in Mathematical Statistics from The University of Illinois at Chicago. His publications have appeared in *Decision Sciences, Management Science, Journal of the Operational Research Society, European Journal of Operational Research, Operations Research, Decision Support Systems, Naval Research Logistics, Statistics*, and others. His current research interests include the statistics of performance data and applications of optimization.

**Steven Walczak** is an Associate Professor of Information Systems in the Business School at the University of Colorado at Denver, USA. He received his Ph.D. in Artificial Intelligence from the University of Florida, his M.S. in Computer Science from the Johns Hopkins University, and his B.S. in Mathematics from the Pennsylvania State University. Dr. Walczak has worked in industry for more than six years solving complex programming problems and is currently in his 12th year as an academic. His research interests are in applications of artificial intelligence including neural networks to various business and medical problems, knowledge management, and developing intelligent agents for information retrieval and other tasks. Dr. Walczak is

David West is an Associate Professor in the Decision Sciences Department at East Carolina University, USA. He received his Ph.D. in Operations Management from the University of Rhode Island. He is currently researching and writing papers in the area of artificial intelligence applications and has been published in a variety of journals. He has extensive industry experience in chemical engineering.

Thomas Whalen holds a Ph.D. in Systems Science from Michigan State University, USA. Dr. Whalen’s research focuses on the application of approximate reasoning to decision making under generalized uncertainty, especially in the fuzzy area between ignorance and risk. Whalen has published more than 100 papers in major conference proceedings and academic journals, including Human Systems Management, International Journal of Man-Machine Studies, IEEE Technology and Society Magazine, and IEEE Transactions on Systems, Man and Cybernetics. Whalen is a senior member of the Institute of Electrical and Electronics Engineers and a member of the board of directors of the North American Fuzzy Information Processing Society.

Wing-Tong Yu is an Assistant Professor in the Department of Business Studies at the Hong Kong Polytechnic University. He obtained his Ph.D. in Finance from the University of Southampton, UK. His research interests include banking and financial markets, application of mathematical techniques in the pricing of debt and derivative securities, and credit analysis.
