About the Editor

Kees van Slooten is a member of the faculty of technology and management, department of business information systems, at the University of Twente. He has a Ph.D. from the University of Twente and a Msc in Information Science and Mathematics. Before coming to the university, he had been active in systems analysis, design, programming, and consultancy. Now, he is supervising Ph.D. projects in the area of situation-specific business modeling aiming at implementing enterprise-wide information systems and e-commerce applications. He is teaching the following subjects: Information; Advances in Information Systems Development; and Information Systems for Co-operative Work. He has been a member of program committees of several international conferences and working groups. He is active in editing international journals and he published many articles in the area of information systems modeling.
