About the Authors

Manju K. Ahuja (mahuja@garnet.acns.fsu.edu) is an Assistant Professor of MIS at Florida State University. She obtained her Ph.D. in MIS from the University of Pittsburgh. She has published in journals such as *Organization Science, Communications of the ACM, Decision Support Systems,* and the *Journal of Computer-Mediated Communications.* She taught at Pennsylvania State University and University of Pittsburgh before joining Florida State University in 1996. Prior to starting a Ph.D. program, Dr. Ahuja worked as a systems analyst designing on-line database systems for several years. Her current projects include Knowledge Integration and the Structural Evolution of a Virtual Group, Media Choices in Virtual Teams, Effects of Dispositions to Trust and Distrust on Cooperation in Project Teams, Effects of Distance in Virtual Teams, Role of Network-based Coordination Mechanisms in Organizational Design, Information Technology and the Gender Factor, The Effects of Mentoring and Work-family Conflict on IT Workers' Careers, The Effect of Gender on Communication Styles in Virtual Communities, and Effects of Task Environment on Intention to Explore Technology.

Kristoffer Bohmann (kris@iprod.auc.dk) is a Ph.D. student at the Department of Production, Aalborg University. He received his Master of Public Administration (1997) and Degree in Commerce (1998) from Aalborg University. For two years he has been working with management consulting companies in Northern Jutland. His current research interest is the usability of commercial websites.

Laku Chidambaram (laku1@aol.com) is an Associate Professor of Information Systems at the University of Oklahoma's Michael F. Price College of Business. Prior to this, he held faculty appointments at Indiana University and the University of Hawaii. Professor Chidambaram has a Ph.D. in information systems and international business from Indiana University and an MBA from the University of Georgia. He has taught a variety of information

systems courses and has received several awards for teaching excellence. His primary area of research deals with the application of information technology to support distributed group work in organizations. His work has been published in such journals such as *MIS Quarterly, Journal of MIS* and the *Journal of Organizational Computing and Electronic Commerce.* He is the editor-in-chief of a multi-disciplinary journal—the *e-Service Journal*—which combines both private sector and public sector perspectives regarding electronic services and thus bridges e-Business and e-Government. Dr. Chidambaram has served as a business consultant and lectured in several countries including Germany, the Netherlands, Norway, Singapore and the United States.

Nils Olaya Fonstad (howdy@mit.edu) is currently a doctoral student in Information Technologies at MIT's Sloan School of Management. For his dissertation, he is exploring how groups improvise in the workplace, focusing on the role of technology in their improvisations. His other research has focused on on-line, multiparty consensus-building, the role of technology in negotiation pedagogy, and on-line communities.

John E. Galvin (johngalvin@mail-me.com) is an assistant professor in the Kelley School of Business at Indiana University – Indianapolis. His areas of interest include technologies used to support group work and interactions, the impacts of technology implementation on individual behaviors, and new organization forms enabled through IT. Dr. Galvin has an MBA from Emory University and earned his Ph.D. at Florida State University in information systems. He has spent 30 years in the computing industry managing a variety of software development and corporate sponsored projects before embarking on a career in academia.

Diana Burley Gant (dbgant@indiana.edu) has a Ph.D. from Carnegie Mellon and is an Assistant Professor of Information Systems at the Kelley School of Business, Indiana University. Gant is particularly interested in the role that information technology plays in managing relationships both within and between organizations. She has published research on a variety of topics, including the impact of portable telephony on work groups, and the impact of information technologies on disaster response. As an applied researcher, she has both worked and consulted with organizations such as Bell Atlantic Mobile, the Pittsburgh Public Schools, and the American Red Cross.

Urs E. Gattiker (WebUrbs@WebUrb.dk) is the Obel Family Foundation Professor of Technology and Innovation Management in the Faculty of Engineering and Science at Aalborg University. Before entering academia he worked in Switzerland, South Africa, and the United States. He is an advisory board member of Bankinvest IT Venture, Denmark's largest venture fund and serves on several boards including Quizz People and Vupti.com. He received his undergraduate education in Switzerland and his Ph.D. in Management and Organization from Claremont University, in the United States in 1985. His research interests include entrepreneurship, technology management and innovation, information management, and gender issues. He has published extensively on these topics in a variety of journals and written and edited several books on these topics.

Paul Gray (Paul.Gray@cgu.edu) is Professor and Founding Chair of the Department of Information Science at Claremont Graduate University. He specializes in decision support systems and in data warehousing. He worked for 18 years in research and development organizations, including nine years at SRI International. Before coming to CGU in 1983, he was a professor at Stanford University, the Georgia Institute of Technology, the University of Southern California, and Southern Methodist University. He is the first editor of the *Communications of AIS* and a fellow of the Association for Information Systems. He was president of the Institute of Management Sciences for 1992-93, and was formerly president-elect, vice president and secretary of the Institute. He is on the editorial board of several journals. He is the author of over 115 journal articles and author/editor of 12 books, most recently *Decision Support in the Data Warehouse* (with H.J. Watson). He received his Ph.D. in Operations Research from Stanford University.

Magid Igbaria (Magid.Igbaria@cgu.edu) is a Professor of Information Science at the Claremont Graduate University and at the Faculty of Management, Graduate School of Business, Tel Aviv University. Formerly, he was a Visiting Professor of Decision Sciences at the University of Hawaii in Manoa, and a Professor of MIS, College of Business and Administration, at Drexel University. He has published articles in *Communications of the ACM*, *Computers & Operations Research*, *Decision Sciences, Decision Support Systems, Information & Management, Information Systems Research, Journal of Management Information Systems, Omega, Journal of Strategic Information Systems, MIS Quarterly*, among others. His current research interests focus on electronic commerce, virtual workplace, computer technology acceptance, information and computer economics management of IS, IS

personnel, and international IS. He serves in the editorial board of numerous journals. He is the co-author of the book, *The Virtual Workplace*.

Marios Koufaris (mkoufari@stern.nyu.edu) is a Ph.D. Candidate in Information Systems at the Stern School of Business of New York University. He received a B.Sc. in Operations and Information Management from the Wharton School of Business and a B.A. in Psychology from the College of Arts and Sciences, both at the University of Pennsylvania. His research interests include electronic commerce and specifically consumer behavior in web-based commerce, socio-psychological factors in IS, and hypermedia design. As of September 2000 he joined the Zicklin School of Business, Baruch College in New York City as an Assistant Professor in Computer Information Systems.

Gloria Mark (gmark@ics.uci.edu) is an assistant professor in the Information and Computer Science Department, at the University of California, Irvine. She is very active in the field of Computer Supported Cooperative Work, and her main research interests are in virtual collocation technologies, and the methodology of design and usability evaluation of collaborative technologies. Previously she has researched virtually collocated teams while at the German National Research Center for Information Technology (GMD), and at The Boeing Company.

Fred Niederman (niederfa@slu.edu) is the Shaughnessy Endowed Associate Professor of MIS at Saint Louis University. He holds a B.A. degree from the University of California, Santa Barbara and both MBA and PhD degrees from the University of Minnesota. He has previous publications in *MIS Quarterly, Decision Sciences, Strategic Information Systems,* and *DATA BASE.* His primary research areas are information systems personnel, global information systems, decision support systems, and group decision support systems. He is currently serving as the chairman of the ACM Special Interest Group on Computer Personnel Research and as an associate editor of the *Journal of Global Information Management.*

Lorne Olfman (Lorne.Olfman@cgu.edu) is Dean of the School of Information Science and Professor of Information Science at Claremont Graduate University (CGU). He came to Claremont in 1987 after graduating with a PhD in Business (Management Information Systems) from Indiana University. Olfman's research interests involve software learning and use, impact of computer based systems on organizational memory, and in the design and

adoption of systems used for group work. Olfman's publications in journals (including *MIS Quarterly*, *Journal of MIS*, and *Communications of the ACM*) and conference proceedings (including the *International Conference on Information Systems* and the *Hawaii International Conference on System Sciences*) span these three research areas.

Jo Ann Oravec (oravecj@uwwvax.uww.edu) received her MBA, MA, MS and PhD degrees from UW-Madison. She taught public policy at Baruch College of the City University of New York and also taught management and computer science at UW-Madison. She served as chair of the Privacy Council of the State of Wisconsin, the nation's first state-level council focusing on information technology and privacy issues. She has written several books and dozens of articles on computers and society topics; she has also developed software and worked for public television. She is now on the faculty of the College of Business and Economics at the University of Wisconsin-Whitewater (Whitewater, WI 53190, USA).

Wanda J. Orlikowski (wanda@mit.edu)is the Eaton-Peabody Chair of Communication Sciences at the Massachusetts Institute of Technology and an Associate Professor of Information Technologies and Organization Studies at the MIT Sloan School of Management. Her primary research interests focus on the dynamic interaction between organizations and information technology, with particular emphasis on organizing structures, cultures, and work practices. She is currently exploring the organizational and technological aspects of working virtually, and with JoAnne Yates examining the role and use of electronic communities. She serves on a number of editorial review boards and is currently a Senior Editor for *Organization Science.*

Stefano Perlusz (perlusz@iprod.auc.dk) is a Ph.D. student at the Department of Production, Aalborg University. He graduated in Economics at the Università di Pavia, Italy, and received his Master in Technical Analysis at the Scuola di Finanza in Milano. Before starting his doctoral studies he has been working at the Joint Research Centre for the European Commission. His research interests include: the impact of security and safety on the uptake of electronic commerce from customers' perspective, and the recognition of system dependability scheme as relevant explanatory framework for understanding Internet users' behaviors.

Jennifer Petersen (jennifer.petersen@activeink.net) has an MA in journalism from the University of Texas at Austin, where her studies focused on the ways in which the media are used as venues for both social replication and dissemination of ideology and for social critique and transformation. Her thesis research focused on attempts to use personal web sites as alternative media. She is currently working for an educational software company, developing web content for teenagers.

Bruce Rollier (rolliers@home.com) is an associate professor of MIS at the University of Baltimore. He holds a B.S. from Oklahoma State University, an MBA from Northwestern University, and a Ph.D. from New York University. His research interests include strategic information systems, human information processing, systems design, and the applications of technology to education.

Conrad Shayo (cshayo@cactus.csusb.edu) is an Associate Professor of Information Science at California State University San Bernardino. He holds a Doctor of Philosophy Degree and a Master of Science Degree in Information Science from the Claremont Graduate University, formerly Claremont Graduate School. He also holds an MBA in Management Science from the University of Nairobi, Kenya; and a Bachelor of Commerce Degree in Finance from the University of Dar-Es-Salaam, Tanzania. His research interests are in the areas of IT assimilation, end-user computing, organizational memory, information strategy, and "virtual societies". His most recent publications can be found in the *Information Systems Journal, Journal of End User Computing,* and the *Encyclopedia of Library Sciences and Information Technology*.

Christian Mørck Sørensen (Christian@WebUrb.dk) received his Master in Engineering Management (2000) from Aalborg University. His interests include decision making in electronic environments, and an understanding of how human risk and trust processes develop on the Internet. He is also working with security and safety issues related to the Internet.

Ramesh Venkataraman (venkat@indiana.edu) is an Assistant Professor of Information Systems in the Department of Accounting and Information Systems, Kelley School of Business at Indiana University. His areas of expertise are in database modeling and design, systems design and development, heterogeneous databases and groupware systems. His papers have been published in *ACM Transactions on Information Systems, IEEE Expert*,

Information Systems, Journal of Systems and Software and other journals. He received his Ph.D. in Business Administration (MIS) from the University of Arizona.

JoAnne Yates (jyates@mit.edu) the Sloan Distinguished Professor of Management at MIT's Sloan School of Management, examines communication and information as they shape and are shaped by technologies and organizational policies and practices over time. Her book *Control through Communication* looks at the evolution of communication systems in firms historically. She and Wanda Orlikowski have collaborated on several studies of electronic communication in contemporary organizations, with papers published in *AMR, ASQ, Organization Science*, and various conference proceedings. She is 2000/2001 Division Chair of the Organizational Communication and Information Systems Division of the Academy of Management.

Ilze Zigurs (zigurs@colorado.edu) is an Associate Professor of Information Systems at the University of Colorado, Boulder, where she teaches courses in systems analysis and design, as well as doctoral seminars in e-business and conceptual foundations of information systems. Her Ph.D. is from the University of Minnesota. Her research focuses on the intersection of information technology with collaborative work in an increasingly virtual world. She has published in such journals as the *MIS Quarterly*, *Journal of Management Information Systems*, *Journal of Organizational Computing and Electronic Commerce*, and *Data Base for Advances in Information Systems*. She currently serves as senior editor for *MIS Quarterly*, senior editor for *e-Service Journal*, and department editor for *IEEE Transactions on Engineering Management*. Ilze has also been active for many years in the executive committee of the Organizational Communication and Information Systems Division of the Academy of Management.
