About the Authors

Harbhajan Kehal has recently retired from the position of senior lecturer in economics from the University of Western Sydney, Blacktown Campus, New South Wales, Australia. He has a PhD from the University of Western Australia, Perth. The author of chapters in various books that have been published in Australia and other countries, Dr. Kehal has received international recognition for his achievements in various facets of life. A well-travelled person, he has been a visiting fellow and visiting professor in many overseas universities and research institutions. His research interests centre around digital economy, outsourcing and offshoring, foreign investment in developing countries, economic relationships of Australia with Japan and other countries. An academician, researcher and philanthropist, his name has appeared in Australasian Who’s Who since 1987, Who’s Who in the World since 1995, Directory of International Biography since 1996, and many other publications. He is an Eminent Fellow of the American Biographical Institute. He is a member of a vast number of economic societies and is well known in the contemporary economic world for his leadership and active participation in international conferences. His recent travels have taken him to Toronto (Canada), Hawaii and San Francisco (USA) and Cancun (Mexico), not to mention his trips to Asia and other continents.

Varinder Pal Singh was born in 1974 in India and achieved his master’s degree in commerce, specializing in information systems from the faculty of management, University of Western Sydney, Australia (2002). Earlier, he received his bachelor’s and master’s degrees in biochemistry from Panjab University, Chandigarh, India. He was co-editor of Digital Economy-Impacts, Influences and Challenges. He intends to pursue research in the less-explored field of health economics, emphasizing the financing and delivery of medical services, with extensive emphasis on federal and state legislation of current
policy issues. His forthcoming projects include editing of the *Encyclopedia of Information Technology Global Sourcing* (Idea Group Reference, 2006).

**Michael Amberg** (born in 1961) is the head of the Department for Business Information Systems III at the Friedrich-Alexander-University of Erlangen-Nuremberg, Germany. Before he came to Nuremberg, he worked at the RWTH in Aachen and at the Otto-Friedrich-University of Bamberg. His major research interests are in the fields of IT outsourcing/offshoring, economics of IT investments, and competence management.

**Anthony S. Atkins** is a principal lecturer in information and applied business systems in the faculty of computing, engineering and technology at Staffordshire University, UK. He has a first degree in engineering and two Master of Science degrees in computing and engineering. He is a chartered engineer in both computing and engineering and has taught and supervised to the PhD level in both disciplines in the UK, Australia and the U.S. He also has a Churchill Fellowship in biotechnology and environmental engineering and has several patents in biotechnology with embedded real-time systems covering the UK, EU, Australia and the U.S. His main interests are in strategic management, outsourcing, knowledge management, visualisation, mobile computing and engineering application in computing/IT. He has more than 70 international journals, conference papers and book chapters.

**Parthasarathi Banerjee** is with the NISTADS, New Delhi, India, and is a visiting professor to a few management institutions. His research spans business strategy, technological changes, innovation management and information system strategy. Apart from undertaking consultancy/sponsored research projects and advising industry in these areas, he has contributed to teaching, training and has published large number of research papers, research reports and nine books. His last book has been *The Indian Software Industry: Business Strategy and Dynamic Coordination* (2004, Palgrave-Macmillan, London) and his forthcoming book from the same publisher is on *Biomedical Innovation in India*.

**Subhajit Basu** graduated from University College of Law, Calcutta University (India) in 1997. He was called to the West Bengal Bar and worked as an advocate specializing in corporate law. He did his PhD at the Liverpool John Moores University, on *Taxation of E-Commerce from a Global Perspective*. He worked as the research and administrative assistant for *Ethnic Minority Law Network (UKCLE Project)*. His research interest includes e-commerce, taxation of e-commerce, e-commerce and developing countries and WTO, e-government, cybercrime, intellectual property and developing countries, digital divide and corporate social responsibility, and legal issues of outsourcing. He is the book review editor for *International Review of Law Computers and Technology* and a reviewer of articles for *JILT (Journal of Information Law and Technology)* and Inter-
national Review of Law, Computers and Technology. He is an executive committee member of British & Irish Law, Education and Technology Association (BILETA). He is a member of the Tax Research Network (UK), member of the Legal Network of E-Commerce Law Professionals and a member of LEFIS (Legal Framework for the Information Society: Network, supported by the European Union as Erasmus Thematic Network). In addition, Dr. Basu is the author of a number of articles and chapters in scholarly journals and books covering a variety of topics, including e-commerce, cybercrime, intellectual property, outsourcing and e-government. Currently, he is a lecturer in information and technology law at the School of Law, Queen’s University, Belfast, Northern Ireland.

Nicholas B. Beaumont (BSc, MBA, PhD) is a senior lecturer in the Department of Management at Monash University, Australia. He is a member of the Australian Society for Operations Research and the Australian Computer Society. He worked in the computer industry for 12 years and now teaches information systems management and electronic business. His research interests include the effect of information and communication technologies on individuals, organisations and society; a particular interest is electronic business and its ramifications. His major current project entails research on outsourcing in Australia. Other current projects are an investigation of service level management in Australia and the improvement of a particular kind of statistical analysis. He has published widely in operations research and management journals and presented at international academic conferences. He often presents at industry seminars on outsourcing and service level management. He welcomes opportunities to meet and work with people “at the coalface”. He was heavily involved in negotiating Monash University’s internal service level agreements.

Sangeeta S. Bharadwaj has an MSc (Hons.) in mathematics, an MMS (Master of Management Studies), an ME in systems and information and a PhD from Birla Institute of Technology and Science, Pilani, India. She has 10 years of experience in teaching and research and four years of entrepreneurial experience of managing a florist business in the U.S. Prior to joining Management Development Institute, India, she taught at BITS, Pilani. Her teaching interests are managing IT projects, software project management, knowledge management and MIS. She has published in Opsearch, Indian Management and JITCA. She is presently researching in the area of business process outsourcing, including strategic partnering of service providers with the clients and knowledge management in global software teams.

Subrata Chakrabarty is pursuing his PhD in information and operations management at Mays Business School, Texas A&M University, USA, since the fall of 2004. His research and consulting interests include global sourcing of information systems (IS), quality assurance & control, global project management, and business processes in the IS industry. Before pursuing his PhD, he had more than two years of work experience in the software services industry with Infosys Technologies (India), where he worked with large clients based in the U.S. and UK. In addition, he had worked for about half a year with Toyota (India) at their product design and development division. He also has one year of undergraduate research internship experience with National Aerospace Labs,
India. He is a certified software quality analyst (CSQA), indicating a professional level of competence in the principles and practices of quality assurance in the IT profession. He is willing to take up research and consulting assignments in areas related to his interests. His hobbies include swimming, painting and cartooning.

Narendra S. Chaudhari is with the Division of Information Systems, School of Computer Engineering (SCE), Nanyang Technological University (NTU), Singapore, as an associate professor since December 2001. He has obtained a PhD, an MTech in computer science, and a BTech in electrical engineering (with distinction) from I.I.T. Bombay (1988, 1983 and 1981, respectively). He has been a fellow at the Institute of Electronics and Telecom Engineers (IETE), India, since 2000, and is a member of many professional societies. He has varied experience in industry and R&D organizations, and he has been with Devi Ahilya University since 1988, and a professor of computer science since June 1990. He has been on various committees of the university, and he was a dean in the faculty of engineering sciences, Devi Ahilya University, from 1995-97. During this period, the university started the Institute of Engineering and Technology (IET), which currently offers BE programs in electronics and community engineering, computer engineering and mechanical engineering. He has more than 120 publications and four books to his credit. He has successfully guided nine PhDs in computer science and engineering. He was the chairman of the Computer Society of India (CSI), Indore Chapter, from 1997-99. He has been invited by various universities abroad to deliver colloquium lectures/research talks, as well as teaching assignments. The list of countries he has visited includes America, Australia, Germany, Hungary and Japan.

Brian J. Corbitt is currently a professor of management science at Shinawatra University in Thailand and also supervises research students as a professor of information systems at Deakin University in Melbourne, Australia. He has previously been a pro vice chancellor (Online Services) at Deakin University, JADE professor of eCommerce at Victoria University of Wellington in New Zealand. Prior to that, he lectured at the University of Melbourne, where he was also head of International House, and, before that, Monash University. Professor Corbitt specializes in IT policy development, analysis and implementation, in business modeling and electronic commerce trade relationships, and knowledge management. He has published six books on e-business, e-commerce and e-government, and another four books. He has also published more than 100 refereed scholarly papers and also numerous government reports to the governments of Thailand and New Zealand, and some 20 invited papers as a keynote speaker in Malaysia, Singapore, Thailand, New Zealand, Japan, Hong Kong and Australia. He has supervised 18 students to completed PhDs, and is an experienced PhD examiner.

Glauco De Vita is a reader in international business economics at Oxford Brookes University Business School (UK). Prior to joining academia, he worked as a senior analyst for an American multinational corporation. He has taught several subjects at both undergraduate and postgraduate levels, including international economics, econometrics, industrial economics, international business, international management and strat-
egy. His research interests include international trade, FDI, international business, capital mobility and exchange rates. His research has been published in *Economics Letters*, *the Scottish Journal of Political Economy*, *Manchester School*, *Applied Economics*, *Energy Policy*, *Economic Issues* and other peer-reviewed academic journals.

**Abhinav Dhawan** is the president of team4U, an outsourced staffing services firm based in New Delhi, India. His company is one of the biggest players in this industry in India, with a more than 5,000-strong team located in more than 100 cities across India, handling a wide range of outsourced services including in-bound complaint management, loyalty programs, out-bound telesales, off-line direct sales and back-office business processes. Besides managing these widespread operations, Abhinav is also a member of several international organizations and attends all major international conferences in the BPO area.

**Alev M. Efendioglu** is a professor of management at the School of Business and Management (SOBAM), University of San Francisco (USF), USA. Having joined USF in 1977, he has served at various times as chair of SOBAM’s many faculty committees (including peer review and academic standards committees), coordinator of the management teaching area, and the coordinator of USF-EMBA Program for Guangdong Enterprises in China (Hong Kong, Shenzhen and Guangzhou). He has extensive consulting experience, and is the author of two books, chapters in four other books (*Encyclopedia of E-Commerce, E-Government and Mobile Commerce, Encyclopedia of Online Learning, Digital Economy: Impacts, Influences and Challenges* and *Chinese Economic Transition and Its Impact on Marketing Strategy*), and articles in numerous professional publications, including *Business Horizons, Journal of American Academy of Business, Journal of Asia-Pacific Business, Journal of Small Business Strategy, Interacting with Computers* and *China International Review*. His research, “Acceptance and Use of Information Technology among Small Retail and Service Businesses,” was awarded the best paper in the Small Business/Entrepreneurship Track award at the Western Decision Sciences Institute’s Twenty-Sixth Annual Meeting in 1997. He holds leadership positions in a number of domestic and international professional organizations, including Academy of Management. He also serves as a member of the board of directors of Ameristock Mutual Fund companies. You can find more detailed information on Dr. Efendioglu at [http://www.usfca.edu/alev/alev.htm](http://www.usfca.edu/alev/alev.htm).

**Ashima Goyal** is a professor at the Indira Gandhi Institute of Development Research, Mumbai, India. She has taught development theory and policy, advanced macroeconomics and open economy macroeconomics. She has been a faculty member in the Delhi School of Economics, Gokhale Institute of Politics and Economics, a visiting fellow at the Economic Growth Centre, Yale University, and a Fulbright Senior Research Fellow at Claremont Graduate University, USA. Her research interests are in institutional macroeconomics, the open economy, international finance, development and gender. She is the author of numerous international and national publications, and a book on developing economy macroeconomics. Her research has received national and international awards.
She is also active in the Indian policy debate. More details are available at http://www.igidr.ac.in/~ashima.

**Smita Gupta** works as an information technology (IT) consultant in St. Louis, MO, USA. She has extensive experience in IT software projects implementation for major corporates in the U.S. doing businesses in areas of telecommunications, financial, legal, education and health care. Software applications and project areas of her interest are: customer relationship management, pharmacy benefit management, point of sales, order management, business process improvement, software quality assurance, software configuration management, release management and visual modeling. Initial years of her career have been in academics in university education. Her first job was as a lecturer in the Department of Computer Science, Vikram University, Ujjain, India. Later, she joined as lecturer in the School of Computer Science, Devi Ahilya University, Indore, India, where she taught postgraduate students. She possesses a bachelor of engineering degree in electronics, a master of engineering degree in computer engineering, and a PhD degree in computer engineering from Devi Ahilya University, Indore, (MP), and India.

**Luke Ho** is a management consultant in the Centre for Organisational Decision Intelligence Studies (CODIS). He has previously worked with the Altria Group Inc. (formerly known as Philip Morris) and the Ministry of Defence (Singapore). He holds a masters degree in research, a BSc (Hons.) in computing science and was awarded two postgraduate scholarships from Staffordshire University, UK. His masters dissertation on “Strategic Frameworks for Outsourcing Decision-Making” was awarded the highest classification of “Distinction”. Luke is currently undertaking a PhD which looks to develop a holistic framework to effectively address the complex multi-faceted nature of outsourcing decision-making. His research interests are in strategic management, outsourcing, infocomm security, computer forensics and electronic crime scene investigation (E-CSI).

**A. Hoecht** is a senior lecturer at the Business School, University of Portsmouth, UK. He is an economist and political scientist with a particular research interest in the role of trust in business relations. He holds a doctorate in economics (Budapest) and an M.A. in political science (Hamburg).

**Paula Luna Huertas** is a full professor at the University of Sevilla, Spain. She teaches information technologies and information systems in the faculty of managerial sciences. She holds graduate and doctoral degrees in economics and managerial sciences. She has been engaged as a principal researcher in several research projects in the area of MIS, supported by the Spanish government and the EU. She is currently the leading researcher of an alpha project of the European Union. She has also participated in several scientific summits in diverse Spanish, European and American institutions, and written more than 100 scientific documents — 12 books, 30 chapters, more than 30 articles and 50 research reports.
Francisco Jose Martínez López is a full professor at the University of Huelva, Spain. He teaches information technologies and information systems in the faculty of managerial sciences. He holds graduate and doctoral degrees in economics and managerial sciences (with extraordinary prize). He has imparted conferences in diverse institutions, courses and masters, as well as more than 30 doctorate courses in diverse universities in Spain, Europe and America. He has been the director and main investigator in numerous scientific projects, national and international, author and joint author of more than 100 scientific works; he has written 12 books, 29 chapters in books, more than 30 articles in scientific journals and more than 50 reports in national and international congresses.

Rajiv Mathur is a director with Percom Limited, an advertising and marketing services firm based at New Delhi, India. In his role as the head of media planning, consumer research and marketing services functions at Percom, he has a significant experience with local as well as overseas clients who outsource these services on a regular basis. Besides his professional responsibilities, Rajiv is an active participant in major marketing conferences in the Asia-Pacific region. He also shares his valuable experience with budding managers at many business schools in India as a seasoned guest faculty member.

Arjun K. Pai graduated with an honours degree in electronics & communications engineering from University of Mangalore with a distinction in 2001. After his short stint at Wipro-GE Medical Systems, Bangalore, as a graduate engineering intern, he moved to pursue his M.Sc. in system level integration at the University of Edinburgh, which he completed with a distinction in 2003. Arjun is currently a postgraduate research student in the School of Computer Science, at Queen’s University Belfast, United Kingdom. He is a working member of a research cluster investigating programmable system-on-chip architectures for image and video processing applications, at the ECIT Institute in Northern Ireland Science Park. Arjun’s commitment to professional development, academic excellence and involvement in community leadership activities has won him recognition and many laurels. His achievements have been honoured through an entry in the Marquis Who’s Who in the World® in their 23rd edition to be published in 2006.

Anne C. Rouse is an associate professor in business strategy at the Deakin Business School, Melbourne, Australia. She previously taught IT strategy with the Monash Graduate School of Business, the University of Queensland/Mt Eliza Business School and the Helsinki School of Economics and Business Administration. Her Ph.D. into IT outsourcing risks and benefits won the Australasian “Best Ph.D.” medal in 2003, awarded by the Association of Information Systems Professors and Heads of Schools. Her doctoral research was funded by a consortium of 10 large Australian organisations interested in discovering outsourcing success factors, through the management consulting group, Simsion, Bowles & Associates. Her outsourcing research underpinned the Australian federal government’s Guide to ICT Sourcing (which she co-authored in conjunction with the Boston Consulting Group and Consulting Insights). Dr. Rouse has more than 20 years industry experience in project management, business strategy consulting, and organizational psychology, and is licensed to practice as a psychologist.
in Australia. She has published widely in the areas of outsourcing and vendor-client relationships, and is currently supervising PhD students in the areas of enterprise software, quality management and customer relationship management.

Fjodor Ruzić is a doctor of information sciences at the University of Zagreb where he is lecturer in new media and interactive multimedia systems. He currently holds a position in the Croatian government office for e-Croatia as head of the information unit and a consultant in information-communications systems, interactive multimedia and information services (electronic documents). His recent research activities are covering the integration of information content and integration impacts on development of information theory and practice. He is in information sciences from 1975, and he is member of many national and international bodies relating to telecommunications systems integrity, information resources management and multimedia system environment. He was working on both research and implementation sides of networked databases, educational material, and digital media. He published more than 125 scientific and research papers in various international journals and he is author of several books dealing with graphical user interfaces, multimedia and Internet. After finishing work on Electronic Signature Law and related Ordinances in 2002, he wrote the Law on Electronic Document enacted in 2005.

Jurgis Samulevičius teaches at the Vilnius Gediminas Technical University of Lithuania. He graduated from the Vilnius University and did postgraduate work at The Kiev Institute of Trade, Ukraine. As a senior researcher, he worked at the Institute of Economics, Lithuanian Academy of Sciences. He published extensively in Lithuania and abroad; more than 80 publications at the latest count. His most recent publications in English include: Introduction to Macroeconomics (Vilnius, 2001), Introduction to Modern Economics: Macroeconomics (Vilnius, 2003) and China’s Development: Foreign Direct Investment, Accession to the WTO and Future Perspectives, a chapter in the book Foreign Investment in Rapidly Growing Countries: The Chinese and Indian Experiences (Palgrave Macmillan, 2005), edited by Professor Kehal. His research interests include foreign investment in developing countries, environmental economics and management, economics of European integration, ITC, health care economy and the digital economy.

Educated in Poland, USA, the UK and elsewhere, Val Samonis (PhD, CPC) gained more than two decades of cross-functional research, teaching/training, and advisory experience combining theoretical and hands-on empirical approaches to business/finance, technology, and policy frontiers globally. Dr. Samonis worked with top reformers and business leaders in a number of countries (e.g., Polish Deputy PM L. Balcerowicz, Czech Deputy PM P. Mertlik), Nobel Laureates in economics (as part of the Stanford Economic Transition Group); lectured internationally on trade, investment/finance, knowledge economy, corporate governance, and other business reform issues in the global economy; and has been extensively published. He managed and/or worked in international research and advisory (“blue ribbon”) teams sponsored by The Hudson Institute, World Bank, CASE Warsaw, EU (ACE, TEMPUS), USAID, Soros Foundations, The Center for
European Integration Studies (ZEI Bonn), Joint Committee on Corporate Governance (Canada), and a number of governments (e.g., in the Baltic States, Ukraine, Poland and Canada). He served as an advisor to the Czech government, Lithuanian Parliament, international organizations (e.g., UNCTAD, ITC/WTO), and multinational corporations (e.g., Andersen Consulting, Medley Global Advisors). Professor Samonis taught executives globally online, onsite, and the dual mode; he is one of the two founding editors of The Journal of East-West Business (The Haworth Press, Inc).

Carlos Piñeiro Sánchez is a permanent lecturer of financial economics at the faculty of economics of the University of A Coruña, Spain, where he teaches financial management and MIS. He is also a permanent lecturer at several master and post-graduate programs. He got his postgraduate degree in 1994 in finance and a PhD degree in information systems in 1999 for a work on the use of group decision support systems by SMEs in Spain. He is involved in several research programs in Spain and the European Union, and has published more than 20 books and journal articles on finance and management information systems. He has also contributed about 30 works to academic summits, and collaborated as a reviewer for several Spanish academic journals.

Piyush Sharma is a research associate at Nanyang Business School, Singapore. He has more than 15 years of professional experience in heavy engineering, FMCG, health care and financial services with top Indian and multinational companies (e.g., BHEL, ITC (now Conagra India), Dabur and Becton Dickinson). For the last few years, he’s been based in Singapore and actively engaged in teaching, academic research and executive education activities. He has presented his research in many top international conferences (e.g., ACR, AMS and AMA) and has a few papers under review at major marketing journals (e.g., JCR, JCP and JSM). Besides his academic efforts, he is also involved in consulting projects and executive education programs for major MNCs based in Singapore. His research interests are in consumer behavior (impulse buying, variety seeking and complaint behavior), international marketing (country-of-origin effects, consumer ethnocentrism, offshore outsourcing) and services marketing (healthcare services, service quality, inter-cultural service encounters and services outsourcing) areas.

Varadharajan Sridhar is a professor in information management at the Management Development Institute, Gurgaon, India. He received his PhD in management information systems from the University of Iowa. His current research interests include telecommunications management and policy, global electronic commerce, and global virtual teams. He has published articles in a number of journals including Annals of Cases on Information Technology, European Journal of Operational Research, Journal of Heuristics, Telecommunication Systems, and The Journal of Regional Analysis and Policy. He is an associate editor of International Journal of Business Data Communications and Networking.

Kirk St.Amant is an assistant professor in the Department of English at Texas Tech University, USA. He has a background in anthropology, international government and
technical communication, and his research interests include intercultural communication via online media. He has taught online and conventional courses in technical and professional communication and in intercultural communication for Texas Tech University, Mercer University and James Madison University. He has taught courses in e-commerce, distance education and business communication in Ukraine as a part of the USAID-sponsored Consortium for the Enhancement of Ukrainian Management Education (CEUME).

Siri Terjesen received her Ph.D. from the Cranfield School of Management in the United Kingdom, and has published over a dozen refereed journal articles and book chapters in the areas of strategy and entrepreneurship. She is a research fellow at the Brisbane Graduate School of Business at Queensland University of Technology and a visiting research fellow at the Max Planck Institute of Economics in Jena, Germany. She also lectures at the London School of Economics Summer School in London and Beijing. Siri holds a BS in business administration from the University of Richmond, Virginia, and a master’s degree in international business from the Norwegian School of Economics and Business Administration (NHH) in Bergen, Norway, where she was a Fulbright Scholar. Prior to her academic career, Siri worked in strategy consulting in the U.S. and Europe, in financial services, telecommunications and pharmaceuticals. She is an associate of Stratevolve Consulting and a member of Open World Initiative. In addition to her research and consulting, she is a keen runner and has represented the U.S. at the IAAF-sanctioned IAU World 100K Championships, holds three UK national championship titles, and was a member of England’s Anglo-Celtic team.

Felix R. Doldán Tié is a professor of finance in the faculty of economics of the University of A Coruña, Spain, where he teaches financial management. He has two postgraduate degrees in business and computing from the Universities Complutense (Madrid) and Politécnica (Madrid); he got a PhD in business and finance from the University Complutense, for a work on “Quantitative Methods for Financial Management” As a researcher, he is an expert on financial management and management information systems, and is currently engaged in several research projects supported by the Spanish government and the European Union. He has also published 50 books and research papers, and taken part in several academic conferences. His main research concerns are information systems, decision theory, multicriteria analysis, uncertainty management and financial derivatives.

P. Trott is a principal lecturer at the Business School, University of Portsmouth, UK. He holds a PhD from Cranfield University. His research focuses on aspects of innovation management. His book, Managing Innovation and New Product Development, published by Pearson Education, is now in its third edition.

Catherine L. Wang is a senior lecturer in international strategic management at Oxford Brookes University Business School, UK. She holds a BA in economics, an M.Sc. in marketing management and a PhD in management. Prior to joining academia, she worked
in industry for eight years, both in the UK and China, in the area of international trade and investment, small business support and consultancy. Currently, she teaches strategic management and research methods at both undergraduate and postgraduate level. Her research interests are in the fields of strategic management, knowledge management, innovation, the resource-based view, dynamic capabilities and organisational performance.

**Martin Wiener**, born in 1979, studied business information systems at the Friedrich-Alexander-University of Erlangen-Nuremberg, Germany. After residing in the United States for research purposes, he started working at the Department for Business Information Systems III, as a research associate and doctoral candidate in 2004. Martin’s research activities concentrate on the field of IT offshoring. The topic of his dissertation is “Management of Critical Success Factors in Offshore Software Development Projects.”
