# Index

## A

- abstraction risk 207
- access to information 93
- accessibility 148
- action research 47, 62, 69, 193, 273
- actor network theory 34, 39
- advocacy 32
- ambiguity 195
- analyst-client interaction 110
- analytic 22
- analyze 194
- authenticity 126
- automation of work 81
- axial coding 116

## B

- behavior-centric researchers 245
- behavioral-technological interactions 244
- business environment 87

## C

- case study 179
- categories 105
- change 46
- chaos and complexity studies 36
- chaos theory 23
- classification 220
- client/server computing 173
- coding 104, 277
- coding paradigm 128
- cohesion of the states 35
- collaborative research 200
- communication role 68
- communicative action 144
- communicative practices 151
- competitive intelligent analysts 93
- Completion Risk 206
- computer supported cooperative work 228
- computer-based systems 55
- computer-supported cooperative 5
- computing infrastructure 165
- confessional writing 85
- constant comparison 107
- conversation analysis 228
- covert strategic action 154
- critical ethnography 79, 152
- critical IS research 143
- critical research 143, 273
- critical social theory 142
- cultural critique 85

## D

- data collection 165
- data reduction 180
- database designers 198
- decentralised structures 49
- design and development 81
- design group 67
detachment risk 207
dialectic character 159
domination risk 206

e-mail 145
e-mail messages 146
electronic communication 5
electronic media 227
emancipatory role of IS 148
empiricism 21
enterprise resource package 165
epistemology 7, 273
ethical competence 74
ethical dilemmas 50
ethnographic insights 93
ethnographic methods 7
ethnographic research 79, 279
ethnography 2, 25, 79, 227
explanatory matrices 174

face-to-face interviewing 52
face-to-face discussions 146
face-to-face interviewing 73
face-to-face meetings 151
facilitator role 48
field notes 80, 169
field study 226
fieldwork 78, 96
first-degree outcomes failure 202
formal gatherings 151
functionalist paradigm 258

gatekeepers 87
geographical information systems 5
grounded theory 64, 104, 129, 171, 226, 274
group facilitator 56
group identities 156
group involvement 67
groups 46

Habermas 144
hermeneutic circle 155
human action 224
human factors engineer 37
human organizations 196
human reason 28
human welfare 35
human-centered situations 27

immersion 84
implementation 173
independent learners 3
inductive 282
information systems 48, 110, 241
information systems research 28, 81, 128, 215, 229
information systems researchers 128
informing practices 79
informing processes 81
Innovation 50
Innovative competence 74
intellectual search 32
intensive research 227
interim theories 179
interpretive 2, 273
interpretive approaches 126
interpretive ethnography 151
interpretive experiments 230
interpretive framework 39
interpretive research 221
interpretive researcher 165
interpretivist perspective 227
IS research 94, 194
IS research community 244
IS researcher 142
IS specializations 26

knowledge 35, 64
knowledge competence 74
knowledge management 86
knowledge work 83
knowledge workers 49, 95

L
language analysis 226
lifeworld 149
linguistic acts 152
Lotus Notes environment 88

M
maintaining access 93
management 81
messages 145
method independence 169
methodological strategy 144
Mid-Sized University 167
modernity 30
motivation 57
multi-method 172
multi-method analysis 164
multi-method fieldwork 165
multi-method research 164, 273
multi-skilling 71

O
ontology 105
open coding 111, 277
organizational change 81
organizational competence 74
organizational decisions 200
organizational interpretation 200
organizational learning 81
organizational politics 47
outcomes failure 202, 205

P
participant observation 47, 52, 73, 276
participative design 61
philosophical issues 125
philosophy of science 244
political structures 30
positivism 21

positivist 2, 126, 273
positivist agenda 29
post-change exercise 72
postmodernism 30
pragmatism 197
privatization 1
problem solving approach 67
properties 107
psychological competence 74
public trust 50

Q
qualitative analysis 281
qualitative data analysis 112
qualitative methods 1, 272
qualitative research 9, 20, 241
qualitative research methods 1
quantitative research 9, 263
quantitative-qualitative 273

R
rational bureaucracy 25
reality 126
reductionism 22
reflective practices 149
reflexivity 84, 147
relativist approach 126
relativist statement 126
research failures 203
research problem 4
research risks 201
research training 9
researcher’s skills 8
resource competence 74
restructuring 146
reward systems 30
risk strategies 209

S
scientific rigor 21
second-degree outcomes failure 202
single loop learning 261
social actions 152
social improvements 56
social integration 153, 156
social interaction 153, 156
social IS practice 159
social science research 29
social systems 224
socio-cultural impacts 4
socio-cultural influences 4, 8
socio-political structures 22
socio-technical 48, 274
socio-technical design 61, 75
socio-technical solution 53
structuration theory 171
substantive theory 127, 131
symbolic interactionism 126, 228
synthetic 22
system implementation 81
system integration 153, 156
systems approach 242, 248
systems design 57
systems development 194

T

technological-subsystem determined theory 255
technology-determined theory 255
theoretical lens 6
theoretical memos 121
theoretical sensitivity 115, 130
theorizing 171
theory elaboration 171
trends 23
triangulation 166

U

uncertainty 7, 8
understanding of human action 224
user participation 60

V

variance models 175
virtual network 209

W

work practices 82
