Index

A
aggregation logic 111
algorithm RulExSVM 278
apriori algorithm 135
artificial intelligence (AI) 297
artificial neural network (ANN) 199
association rules mining (ARM) 90
atomic change 113

B
base single tuple (BST) 33
bidirectional associative memory (BAM) 298
big-bang 196
bipartite weighted matching 65
BOAT 101
bottom-up cubing (BUC) 32

brain-derived neurotrophic factor (BDNF) 259
breadth first search (BFS) 18
business process execution language for Web service (BPEL4WS) 320

C
candidate rules 21
cellular automata (CA) 297
centroid 102
CFI 90
change detector mechanism 98
classification algorithm 198
classification error (CE) 106
CLIQUE algorithm 92
clustering 32, 61, 102, 107, 123, 213
clustering genetic algorithm (CGA) 278
COBWEB algorithm 92
CommBuilder 219
common log format (CLF) 15
complete linkage 102
Complexpander 224
compression algorithm 145
condensed model 55
conditional market-basket probability (CMBP) 97
Connect-4 167
corridor-based heuristic 113
cost planning 311
coupling type 111
cover type 167
cube aggregation threshold 31
cube cardinality threshold 31
cube dimensionality threshold 31

D
DAG structure 185
DARPA agent markup language (DAML) 312
DARPA agent markup language semantic markup extension for Web services (DAML-S) 321
database for interacting protein (DIP) 216
database management system (DBMS) 2, 14
data cleaning 252
data mining (DM) 87, 176, 309
datasets selection 252
data warehouse (DW) 1, 15
decision tree (DT) 90, 99, 183, 201, 261, 317
déclat algorithm 164
DEMOn 112
density-based methods 92
depth-independent distance-based misclassification cost 189
depth first search (DFS) 18
Dif-Bits 157
direct acyclic graph (DAG) 176, 185
distance function 92
dominant eigenvalue 56
DOS group 266

E
éclat algorithm 151
enumerative 61
evaluation function 92
execution time 69
ExpandCore 219
expression component 89
extended common log format (ECLF) 15

F
false trail 11
fast update (FUP) algorithm 98
FindCore 219
FIs 90
FLP classification 258
FLP method 250
FOCUS measure 96
FP-tree 151
frequent itemset mining (FIM) 89
frequent pattern set (FREQ-PATTERN) 129

G
G-Protein-Coupled-Receptor (GPCR) 201
GDS124 80
GDS38 80
GDS39 80
gene ontology (GO) 81, 186, 199
general repository for interaction datasets (GRID) 216
generator 21
generic framework 186
generic rule model (GRM) 98
genetic algorithm (GA) 199, 277
GenMax algorithm 138
GN algorithm 214
Golomb encoding scheme 150
graphical user interface (GUI) 15
greatest common refinement (GCR) 94, 110
grid-based methods 92
grid cell 56
H
hierarchical method  92
HIV-1 associated dementia (HAD)  243, 271
horizontal compression  151
HPG model  12
hybrid  12
hybrid technique  3
hypertext probabilistic grammar (HPG)  8

I
IBL paradigm  183
in-community degree  217
instance-based learning (IBL)  182
inter-quartile range (IQR)  315
internal node  91
interval-based heuristic  113

J
Jaccard index  60

K
K-means algorithm  93
K-medoids algorithm  93
knowledge discovery in databases (KDD)  86, 87

L
leaf node  91
learnability-based prediction  200
LINDO Systems Inc  252
low-dimensional  34

M
machine learning (ML)  176
mandatory leaf-node prediction  187
Markov random field (MRF)  297
maximal matching  67
MCP  244
mean field (MF)  297
measure component  89, 90
medoid  102
MFI  90
Microarray datasets  81
minSup  38
MMS  315
model-based method  92
model formulation and classification  252
molecular complex detection (MCODE)  215
MonteCarlo sampling  69
multidimensional hierarchical clustering scheme (MHC)  32
multiple criteria linear programming (MCLP)  246, 259
multiple criteria programming (MCP)  242, 243
multiple criteria quadratic programming (MCQP)  246

N
National Basketball Association (NBA)  53
nearest neighbor paradigm  182
neural network (NN)  298
Newton’s method  285
NMDA  260
nominal attribute  91
non-empty cubes  35
numerical attribute  91

O
occurrence-based grouping heuristic  113
OLGA  71
optimization/ant colony optimization (PSO/ACO) algorithm  201
optimization based  61
optional leaf-node prediction  187, 193
ordinal attribute  91

P
pan-organism classification  186
PANDA  96, 109, 111
Parthasarathy-Ogihara  96
partitioning method  92
pattern comparison  86, 95
pattern monitor (PAM)  98, 112
permanent rules 113
post-checking 21
post check enhanced hybrid (PEHA) 20
ProductGraph 64
protein-protein interaction (PPI) 209
Protein Data Bank (PDB) 178
protein function 175, 179, 184
PSO/ACO algorithm 201

R
r-dimensional cuboids 34
Rand index 59
RBF kernel functions 286
referrer 13
restricted sparse statistics tree (RSST) 29
ResultSet 17
RLE (run length encoding) 169
RNA polymerase II 228
ROCK algorithm 101

S
scanner 143
selected values set (SVS) 44
self-organizing map (SOM) 121, 123
sequences 2
sequential pattern 3
service discovery 312
service innovation 315
session_dimension 19
similarity-based protein function prediction 181
simple object access protocol (SOAP) 310
simple quadratic programming (SQP) 269
single linkage 102
singular value decomposition (SVD) 318
SMS (short message service) 315
social network analysis (SNA) 298
SOM 126
specialized HPG 11
standard template library (STL) 46
star pointer 34
star value 34
STING 92
string tbp 19
structural component 89
subgraph 55
subsequence 6
subsession 6
subspace 57
support vector machine (SVM) 244, 268, 276, 278

T
tidset/diffset database 156
top-down 196
transaction ID (tid) 146, 168
transcription factor IID (TFIID) 225
tree-based data structure 151
true rule 20
true traversal 21

U
uniform misclassification cost 192
universal description, discovery, and integration (UDDI) 310
unsupervised 91
update with early pruning (UWEP) algorithm 99
user session 2

V
validating 21
variation of information (VI) 104
vertical compression 150
VIPER 150

W
Web content mining 2
Web log 2
Web mining 2
Web ontology language for services (OWL-S) 321
Web services description language (WSDL) 310
Web structure mining 2
Web usage mining 2
X

XML (eXtensible Markup Language) 310

Z

Zscore 69
