About the Contributors

Ricardo Colomo-Palacios is an Associate Professor at the Computer Science Department of the Universidad Carlos III de Madrid. His research interests include applied research in Information Systems, software project management, and people in software projects. He received his PhD in Computer Science from the Universidad Politécnica of Madrid (2005). He also holds a MBA from the Instituto de Empresa (2002). He has been working as Software Engineer, Project Manager, and Software Engineering Consultant in several companies including Spanish IT leader INDRA. He is also an Editorial Board Member and Associate Editor for several international journals and conferences and Editor-in-Chief of International Journal of Human Capital and Information Technology Professionals.

Jose A. Calvo-Manzano Villalon holds a PhD in Computer Science. He is an assistant professor in the Facultad de Informática at the Universidad Politécnica de Madrid, where he teaches Software Engineering, specifically Software Process Management and Improvement. He has participated in more than 20 research projects (European, Spanish Public Administration, as well as with private enterprises). He is the author of more than 50 international papers. He is the author of several books on software process improvement and software engineering topics as well. He is the Director of the Research Chair for Software Process Improvement for Spain and the Latin American Region, where he was a member of the team that translated CMMI-DEV v1.2 and v1.3 into Spanish. He also holds the ITIL® v2 and v3 Foundation and CMDB Certifications.

Antonio de Amescua Seco is a full professor in the Computer Science Department at Carlos III University of Madrid. He has been working as a software engineer in a public company (Iberia Airlines) and a private company (Novotec Consultores) as a software engineering consultant. He also founded Progresión, a spin-off company, in order to offer advanced Software Process Improvement services. His research interests include software process improvement, software reuse, and software project management.

Tomás San Feliu Gilabert holds a PhD in Computer Science. He is an assistant professor in the Facultad de Informática at the Universidad Politécnica de Madrid. He teaches Software Engineering, specifically software process management and improvement. He has participated in more than 20 research projects (European, Spanish public administration, as well as with private enterprises). He is author of more than 50 international papers. He is also the author of books related to software process improvement and software engineering. He is a member of the Research Chairs for Software Process Improvement for Spain and the Latin American Region and has been a member of the team that translated CMMI-DEV v1.2 and v1.3 to Spanish.

* * *
María Clara Gómez Álvarez is a professor in the Facultad de Ingeniería at the Universidad de Medellín, Colombia. She teaches Software Engineering, specifically requirements engineering. She is the head of the Research Group ARKADIUS.

Magdalena Arcilla holds a PhD in Computer Science. She is assistant professor in the Languages and Computer Science Department of UNED (Spanish Open University). She teaches Software Engineering. She has also worked in the Computer Science Department of the Carlos III University of Madrid and has 8 years’ experience as a software developer at CustomWare Company. She is the author of several international papers on software engineering and of a book on the software engineering. She holds the ITIL® v2 and v3 Foundation certificates.

Jaime Alberto Echeverri Arias is an associate professor in the Facultad de Ingeniería at the Universidad de Medellín, Colombia. He teaches Software Engineering. He is the author of international papers related to software. He is member of the Research Group ARKADIUS.

Félix A. Barrio holds a PhD in Science and Technology Management from the University of Salamanca. He is the Head Manager of the Innovation and Quality Department at the National Institute for Information and Communication of Technologies, an agency of the Spanish Government. He was the head of the National Laboratory for Quality of Software between 2007 and 2012, where he has promoted actively the translation of CMMI-DEV v1.2 and v1.3 to Spanish. He has been teaching in the Master’s of Information Security programme of the Open University of Catalonia (UOC) and in the Master’s of IT Security programme at the Universidad of Leon since 2007, both in the area of Information Security Management and IT governance. He has participated in more than 20 research projects (European, Spanish public administration, as well as private enterprises). He also holds the CISM Certification.

Jorge Becerra is a professor and researcher of computer engineering and head of the Software Factory Group at Escola Politécnica da Universidade de São Paulo (Brazil). His research interests are software architecture, process architecture, software factory, business process management, and enterprise architecture. He has a PhD in Computer Engineering from Escola Politécnica da Universidade de São Paulo.

Adrián Casado-Rivas obtained his B.Sc. in Computer Science Engineering in October 2012 from Universidad Carlos III de Madrid. Currently, he is pursuing an Information Science and Technology Master’s Degree at the same university. Adrián has been working for a year and a half with the Software Engineering Lab research group at UC3M (SEL-UC3M) as a junior researcher. His areas of interest are people, projects and process management, and the improvement of daily life supported by mobile applications.

Víctor Navarro Belmonte obtained a Master’s degree in Software Engineering at the Research Center in Mathematics (CIMAT) in Zacatecas, México.
Leonardo Bermon-Angarita is a professor at the National University of Colombia in Manizales, Colombia. He holds a PhD in Computer Science from the Carlos III University of Madrid (Spain, 2010). During his research at the Carlos III University of Madrid, he worked on collaborative environments to improve process asset libraries by providing them with new features and capabilities for the reuse of knowledge. His current interests are software process improvement, knowledge management, agile software development, and software product and process quality.

Elisabet Capón-García is a Chemical and Industrial Engineer from Universitat Politècnica de Catalunya (UPC). She obtained her PhD at UPC in the area of Process Systems Engineering. She is currently working at ETH Zürich in the Safety and Environmental Technology Group. Her research interests include decision-making and optimization in the process industry.

Humberto Cervantes is a professor of Software Engineering at the Autonomous Metropolitan University in Mexico City. His primary research interests include software architecture design methods and their adoption in industrial settings. Dr. Cervantes is also a consultant for software development companies in topics related to software architecture. He has helped Quarksoft, a leading Mexican development company, to integrate architecture methods with the Team Software Process (TSP) and Capability Maturity Model Integration (CMMI). Dr. Cervantes holds a PhD from Université Joseph Fourier in France, and he has received the Software Architecture Professional and ATAM Evaluator certificates from the Software Engineering Institute.

Manuel Pérez Cota is Professor and Researcher at the University of Vigo (UVIGO) in Vigo, Spain. He has a degree in Electrical Engineering (Universidad La Salle) and Electronics and Communications Engineering (Universidad Nacional Autónoma de México – UNAM, 1980), a PhD in Industrial Engineering (Universidad de Santiago de Compostela, 1990). He is the director of the international research group SI1-GEAC (http://cuautla.uvigo.es/si1-geac/). He was the first director and developer of the Computer Department (Computer Science School of the University of Vigo). He collaborates in different Master and PhD programs in Spain, Portugal, Germany, Argentina and Bolivia, and has been supervisor of several PhDs. He has been involved in different European and International projects. He has published quite extensively and has many publications (including books, book chapters, Scientific Citation Index journal articles, and international journal articles, as well as publications in refereed conference proceedings). He is a member of different international committees and associations (ACM, IEEE, AISTI, AIPO, ANALCT).

Gonzalo Cuevas was awarded his MSc degree in Computer Science in 1972 at the Computer Science Faculty of the Universidad Politécnica de Madrid and his PhD degree in Telecommunications from the School of Telecommunications in 1974 from the same university. He was a professor in Software Engineering at the Computer Science Faculty of the Universidad Politécnica de Madrid from 1970 to 2010. He joined the faculty as professor in 1970 and became full professor in 1996. He was a systems analyst at the Spanish national railway company (RENFE) from 1965 to 1969. He was the director of
software development, data processing, data transmission software development, and Software Process Improvement (SPI) at Iberia Airlines (now AIG). He has been project leader and evaluator in European projects on software best practices. He was also the founder and director of the Master’s program in Software Engineering in association with Carnegie Mellon University at the Computer Science Faculty of Universidad Politécnica de Madrid. His current research interests are models and methods for process assessment and process improvement, and process deployment. He has worked as an SPI Consultant in different organizations since 1990. He was a member of the IPRC coordinated by SEI. Also, he was a member of CMMI V1.3 Translation Team, where he coordinated the translation of CMMI-DEV V1.2 and V1.3 into Spanish.

Ismael Edrein Espinosa-Curiel received his BSc in Computational Systems in 2005 and his MSc and PhD in Computer Science at CICESE in 2008 and 2013, respectively. His research interests focus on software process improvement in small companies, software engineering, knowledge management, and the impact of social and personal factors in software engineering.

Roberto Esteban-Santiago holds a BSc in Computer Science and Engineering and is pursuing an MSc in Information Technology and Science at Carlos III University of Madrid. He develops iOS apps in the Software Engineering Lab research group at the university, one of which has already been published on the App Store. His current research interests focus on mobile app development and agile software development.

Luis Fernández-Sanz is an associate professor at the Dept. of Computer Science of Universidad de Alcalá (UAH). He earned a degree in Computing in 1989 at Universidad Politecnica de Madrid (UPM) and his Ph.D. in Computing with a special award at University of the Basque Country in 1997. With more than 20 years of research and teaching experience (at UPM, Universidad Europea de Madrid, and UAH), he is also engaged in the management of the main Spanish Computing Professionals association (ATI: www.ati.es) as vice president and is chairman of ATI Software Quality group. He is now vice president of CEPIS (Council of European Professional Informatics Societies: www.cepis.org). He has made a large number of contributions to refereed impact international journals, conferences, and books. His main research interests include technical fields like software quality and engineering and testing and non-technical fields like computing education, especially in multinational settings, IT profession and professionalism, and requirements and skills for IT jobs.

José Alberto Fernández-Zepeda received his BSc in Electronic Engineering in 1991, MS degree in Electronic Engineering in 1994, and PhD in Computer Engineering in 1999. He is currently an associate professor in the Computer Science Department at CICESE. Some of his research interests include software process improvement in small companies, the impact of social and personal factors in software engineering, and design and analysis of algorithms.

Ivan Garcia has a PhD in Software Engineering at the Universidad Politécnica de Madrid and is a full-time professor at the Postgraduate Division of the Universidad Tecnológica de la Mixteca, Mexico. He is the author of international papers on Software Engineering and, more specifically, Software Process Improvement. Garcia is a member of the Technical Committee of the International Association of
Science and Technology for Development (IARIOED) and is also a reviewer of international journals and conferences in Mexico. He has participated in more than 15 software project management and software process improvement projects in the Mexican software industry. In Latin America, Garcia has participated in several institutional research projects in industry (IBM Global Services) and in academia. At present, he is a member of the IMPROWEB project to improve software processes in 32 Spanish enterprises. He was a member of the team that translated CMMI-DEV v1.2 and CMMI-DEV v1.3 into Spanish.

**Javier Garcia-Guzman** is an associate professor in the Computer Science Department at Carlos III University of Madrid. He holds a BSc in Electrical Engineering and a PhD in Computer Science. Javier has participated in numerous knowledge management research projects in software engineering organizations. He has published several books and numerous international scientific papers on software engineering and collaborative working environments.

**Alejandra García-Hernández** holds a Ph.D. in Engineering and Innovation Projects from the Polytechnic University of Valencia (2010). She is currently a researcher and professor in the Master’s program of Software Engineering at CIMAT. She is an Industrial and Systems Engineer from the Instituto Tecnológico y de Estudios Superiores de Monterrey and she is certified in Supply Chain Management (2004). She was a researcher in the Institute of Innovation and Knowledge Management – INGENIO (2007-2010), a joint institute of the Spanish Council for Scientific Research and the Polytechnic University of Valencia. She has participated in R&D projects funded by the Ministerio de Economía y Competitividad de España, CONACyT and private enterprises. She has submitted several papers to International congresses and published papers in international journals. Her research activities mainly concern social network analysis, innovation and knowledge management, teams and organizational performance, networks and software engineering.

**Gloria Piedad Gasca-Hurtado** holds a Ph.D. in Computer Science. She is an assistant professor in the Facultad de Ingeniería at the Universidad de Medellín, Colombia. She teaches Software Engineering, specifically software process management and improvement. She has participated in research projects. She is author of international papers related to software process improvement and other software engineering topics as well. She is member of the “Research Group ARKADIUS” and was a member of the team that translated CMMI-DEV v1.2 and v1.3 to Spanish.

**Ramiro Gonçalves** is an Associate Professor at the state-owned University of Trás-os-Montes e Alto Douro (UTAD) in Vila Real, Portugal, and a researcher with INESC TEC. He has a degree in computer management (Universidade Portucalense Infante D. Henrique, 1991), a master of science in computer science (Universidade do Minho, 1998), and a PhD in information systems (Universidade de Trás-os-Montes e Alto Douro, UTAD, 2005). At UTAD, he is currently a member of the Coordination Committee of the Doctoral Program in Computer Science (since 2010). He is widely sought after as a supervisor in the area of computer science and as such has been responsible for the supervision of several PhDs and MScs. He has published quite extensively and has around 120 publications (including book chapters, Scientific Citation Index journal articles, and international journal articles, as well as publications in refereed conference proceedings).
Ulises Gutiérrez-Osorio received a BSc in Computer Science in 2009 and MSc in Computer Science in 2011. His research interests focus on software process improvement in small companies, software engineering, and knowledge management.

Alberto Heredia is an assistant professor in the Computer Science Department at Carlos III University of Madrid. He holds a BSc in Telecommunication Engineering and a PhD in Computer Science and Technology. His current research interests focus on software engineering and knowledge management, especially mobile app development and agile software development.

Antonia Mas is a university lecturer of Software Engineering and Project Management at the University of the Balearic Islands. Her research interests include software process improvement, project management, and service management. She has promoted and coordinated the QuaSAR Project, a software process improvement initiative in small software companies in the Balearic Islands. She received her degree in Computer Science from UAB (Catalonia, Spain) and her PhD in Computer Science from the University of the Balearic Islands. She has been a member of the Software Quality Group of ATI Spain since 1998 and is a member of the editorial board of the REICIS journal. She has also served as program committee chair and program committee member of scientific conferences and workshops related to software quality. She is an ISO/IEC 15504 assessor and focuses on assessing small companies.

Manuel Muñoz Archidona got his B.S. in Computer Science Engineering in June 2012 from Universidad Carlos III de Madrid. He is currently studying the Information Science and Technology Master’s Degree at Universidad Carlos III de Madrid, where he has been working for two years with the Computer Architecture, Communications and Systems Group (ARCOS) as a research assistant. At present, Manuel is working on a project related to the simulation of the Spanish railway network electricity consumption in collaboration with the railway infrastructure company ADIF.

Edrisi Muñoz Mata has an MSc. in Industrial Engineering from Instituto Tecnológico de Orizaba in Mexico and a PhD in Chemical Process Engineering from Universitat Politècnica de Catalunya (UPC) in Spain. His research focuses on knowledge management through the development of ontologies and management frameworks for decision-making support in different areas. He is currently a member of Centro de Investigación en Matemáticas A.C (CIMAT) in Mexico and collaborates with the UPC as part of the research team, participating in different Mexican and European research projects.

Fuensanta Medina-Dominguez holds a BSc and a PhD in Computer Science from the Carlos III University of Madrid, Spain. She has been working in the field of software engineering since 2000 and has been a faculty member of the Computer Science Department in the Carlos III University of Madrid since 2004. Her research interests include software engineering, knowledge management, knowledge reuse, and software process improvement focusing on technology transfer in organizations through the use of new trends in computer-supported collaborative work technology.

Jezreel Mejia holds a PhD in Computer Science. He is currently a researcher in software engineering at the Research Center in Mathematics, Zacatecas, México. He is a member of Research Chair in Software Process Improvement for Spain and the Latin American Region. His research field is software
engineering, including both technology (methods, techniques, tools, and formalisms) and management. His current research interests are: software process improvement, multi-model environment, project management, acquisition and outsourcing process, agile methodologies, software process improvement models and standards, knowledge management, software quality, team software process, and IT security. He has published several technical papers on project management, software teams, software process improvement, acquisition and outsourcing processes. He was a member of the team that translated CMMI-DEV v1.2 and v1.3 into Spanish.

Antoni Lluís Mesquida is an assistant lecturer of Software Engineering and Project Management at the University of the Balearic Islands. His research interests include software process improvement, project management, and service management. He has participated in the QuaSAR project, a software process improvement programme in small software companies in the Balearic Islands. He received his PhD in Computer Science from the University of the Balearic Islands.

Sanjay Misra is a professor of Computer Engineering at Covenant University, OTA, Nigeria. He served as head of department of Computer Engineering from February 2010 to October 2011 and head of the Cyber Security department from October 2011 to September 2012 at Federal University of Technology, Minna, Nigeria. He is a software engineer and has previously held academic positions at Federal University of Technology Minna, Nigeria, Atılım University, Turkey, Subharati University, and UP Technical University, India. He is also Adjunct/Visiting Professor at the University of Alcalá, Spain; UNICEN, Tandil, Argentina, and Atılım University, Turkey. He is the author of more than 100 research papers and has received several awards for outstanding publications. He is chief editor of the International Journal of Physical Sciences and founder chair of several annual international workshops (Software Engineering Process and Applications [Springer], Tools and Techniques in Software Development Process [2009, 2010, 2011, 2012, IEEE], Software Quality [2009, 2011, 2012, IEEE]).

Hugo A. Mitre is a software engineering researcher at CIMAT Zacatecas, Mexico, member of the Mexican national researchers system (SNI), and member of the SEL-UC3M (Software Engineering Lab, sel.inf.uc3m.es) group at Carlos III University of Madrid. He holds a PhD in Computer Science and Technology from the Carlos III University of Madrid (Spain, 2010) and has participated in numerous research projects related to software engineering, IT governance, strategic management, incubation of software companies and legal systems financed by public (Mexican and Spanish) and private funds. His current interests are software process improvement, strategic management in Software Engineering Organizations (SEO), IT governance, agile software development, knowledge measurement, knowledge management, product and process measurement, and ICT clusters management.

Arturo Mora-Soto holds a PhD in Computer Science and Technology from Carlos III University of Madrid. He is an assistant professor at the Computer Science Department of Carlos III University of Madrid. His research involves collaborative learning, Web technologies (especially Web 2.0), knowledge management (use, reuse, assessment, and capitalization), data analysis, and process improvement, especially applying Six Sigma in software engineering. He has been working as a software engineer as well as university lecturer in Mexico since 2002.

Fernando Moreira has a degree in Computer Science (1992), M.Sc. in Electronic Engineering (1997), and Ph.D. in Electronic Engineering (2003), both obtained from the Faculty of Engineering of
the University of Porto. He has been a member of the Department of Innovation, Science and Technology at University Portucalense since 1992, currently as Associate Professor. He teaches undergraduate and post-graduate studies and supervises several Ph.D. and M.Sc. students. He is a (co-)author of several peer-reviewed scientific publications with national and international conferences. He has served as a member of the Editorial Advisory Board for several books. He regularly serves as a member of Programme and Organizing Committees of national and international conferences, namely ICEIS, CISTI, InSITE, PATTERNS, INTELLI, Elpub, and CENTRIS. He is the coordinator of the M.Sc. of Computation. He is associated with NSTICC, ACM, and IEEE.

Mirna Muñoz holds a PhD in Computer Science. She is currently a researcher in computer science at the Research Center in Mathematics (CIMAT), Zacatecas, México. She is a member of Research Chair in Software Process Improvement for Spain and the Latin American Region. Her research field is software engineering, including both technology (methods, techniques, tools, and formalisms) and management. Her current research interests are: how to implement software process improvements focused on minimizing change resistance and the use of multi-model environments and software tools in software process improvements, software process improvement models and standards, project management, change management, knowledge management, software quality, and team software process ad IT security. She has published several technical papers on project management, multi-model environment and process improvement. She was a member of the team that translated CMMI-DEV v1.2 and v1.3 into Spanish.

Cuauhtémoc Lemus Olalde received his PhD in Computer Science from the Graduate School at Tulane University (New Orleans, LA, 1996). He was a visiting researcher from 1996 to 1998 as Postdoctoral Fellow in the Aerospace Program at Houston University – Clear Lake in partnership with the National Aeronautics and Space Administration (NASA) and the Johnson Space Center (JSC). Currently, he is the Branch Director of the Research Centre in Mathematics at Zacatecas, México. His research interests include systemic thinking, TRIZ tools applied to software, six sigma tools applied to software.

Martha Fofò Omorodion has obtained her Bachelor of Engineering in electrical and computer engineering from Federal University of Technology, Minna, Nigeria. Her area of interest includes software engineering, software process improvements, software process models, agile software development, and software metrics. She is a talented researcher and has authored several papers on these topics.

Carmen Pagés obtained her University degree in Computer Science at the Technical University of Madrid and PhD from the University of Alcalá. She worked in private telecommunication companies as analyst, project manager, and consultant between 1987 and 2003. She has extensive teaching experience and, at present, holds the position of assistant Ph.D. lecturer at the Department of Computer Science (University of Alcalá, Spain). She has practical experience from software process technology and modeling methodologies to software projects planning and managing, software maintenance and international ERP projects. Her research interests include learning technology and quality issues in education as well as software engineering and management.
Mery Pesantes obtained her Master’s Degree in Software Engineering at the Research Centre in Mathematics (CIMAT, Mexico) in 2006. She is an SEI-authorized Personal Software Process Developer. She was involved in several TSP™ and PSP™ projects in academia. In addition, she participated in process assessments and implementation of quality models, such as CMMI and MOPROSOFT. She is currently a PhD student in Computer Science at CIMAT. Her research interests include multimodel environment, process architecture, software process improvement, and software quality.

Raquel Poy holds a PhD in Psychology and Education from the University of Leon. She is an assistant professor in the Faculty of Education at the same university. She is teaching in the Department of Theory of Education, specifically in the area of Technology in Education. She has participated in more than 10 research projects (European and Spanish Public Administration). She is the director of the research area at the Latin-American Federation for Learning Diseases. She also holds a certificate in Expert in ICT Management from the University of Alcalá. She is the author of more than 20 academic papers related to digital skills development.

Josefina Rodríguez-Jacobo received her BSc in Physics in 1986, MSc in Computer Science in 1993 and PhD in Psychology in 2003. She is currently working in the Computer Science Department at CICESE. Her main research interests include software process improvement in small companies, software engineering, knowledge management, and the social and personal factors related to software engineering.

Jorge Manjarrez Sanchez obtained a PhD in Computer Science in Parallel Databases at the University of Nantes, France. At the writing of this article, he was an Associate Professor in the Master’s in Software Engineering at the Research Center in Mathematics (CIMAT) in Mexico. He is now an entrepreneur and independent software consultant in large scale data analytics and parallel software engineering.

Perla Velasco-Elizondo is a professor of Software Engineering at the Autonomous University of Zacatecas. Her main research interests include software composition, architecture-centered software development and software engineering education. From 2008-2012, she was an associate researcher at the Center for Mathematical Research and faculty member of the Master of Software Engineering Program of this institution. From 2010-2011, she was a visiting researcher at The Institute for Software Research of The Carnegie Mellon University. She has received several training courses at The Software Engineering Institute and holds the SOA Architect Professional certificate from this institute. Dr. Velasco-Elizondo received her PhD from the University of Manchester, UK.
