Janice M. Burn is foundation professor and head of the School of Management Information Systems at Edith Cowan University in Perth, Western Australia and director of the We-B research centre–Working for e-Business. In 2000 she assumed the role of world president of the Information Resources Management Association (IRMA). She has previously held senior academic posts in Hong Kong and the UK. Her research interests relate to information systems strategy and benefits evaluation in virtual organizations with a particular emphasis on social, political and cultural challenges in an e-business environment. She is recognized as an international researcher, with over 150 refereed publications in journals and international conferences. She is on the editorial board of six prestigious IS journals and participates in a number of joint research projects with international collaboration and funding.
Terry Anthony Byrd is associate professor of MIS in the Department of Management at the College of Business, Auburn University. He holds a BS in electrical engineering from the University of Massachusetts at Amherst and a PhD in management information systems from the University of South Carolina. His research has appeared in *MIS Quarterly, Journal of Management Information Systems, Decision Sciences, OMEGA, Interfaces* and other leading journals. His current research interests include the strategic management of information technology, information technology architecture and infrastructure, electronic commerce, and information technology implementation.

Phil Carter is director of the Auckland University of Technology’s Computer Systems Usability Laboratory. He is also program leader for the bachelor of business and master’s of business in information technology. He holds a doctorate in Information Systems from Massey University. Prior to study in IT, Phil lived for several years in Taiwan, witnessing its transition from martial law to greater freedom and transparency of government. He is currently awakening to the living tradition of his Maori ancestors and seeking to embody the philosophy of valuing the community, caretaking the land, and formulating and expressing knowledge in creative and artistic forms, such as the non-scripted theater of action methods and psychodrama.

Scott Chapman attended Brigham Young University, where he received a bachelor of arts (BA) degree in Korean literature and language and a Juris Doctor (J.D.) degree. He is currently a candidate for a master’s of business administration (MBA) at the University of Nevada, Las Vegas. Mr. Chapman has clerked for the Honorable Judge Ray M. Harding, Jr. in the Fourth Judicial District of Utah, has clerked for the Law Offices of Kim, Shin and Yu in Seoul, South Korea, was a certified mediator for court-sanctioned alternative dispute resolution measures in Utah and was a member of the Willem C. Vis International Moot Arbitration Team in Vienna, Austria. Currently, Mr. Chapman is admitted and practices law in Las Vegas, Nevada, in the US District Court, District of Nevada, and in the United States Court of Appeals for the Ninth Circuit. Mr. Chapman is a member of the American Bar Association, the State Bar of Nevada, the Clark County Bar Association and the J. Reuben Clark Law Society.

N. Ben Fairweather, PhD has been a research fellow in the Centre for Computing and Social Responsibility at De Montfort University, Leicester, UK, since 1996. Prior to this he completed a PhD in environmental philosophy
at the University of Wales, Cardiff. He is associate editor of the *Elsevier Journal–Telematics and Informatics: An Interdisciplinary Journal on the Social Impacts of New Technology*.

**Joseph T. Gilbert** is an associate professor of management at the University of Nevada, Las Vegas. He teaches in the areas of business strategy, organizational theory and business ethics. He holds bachelor’s and master’s degrees in philosophy and a doctorate in business administration. He has published several articles and book chapters in the area of business ethics. Dr. Gilbert currently team-teaches (with an attorney) an MBA-level course in law, regulation, and ethics.

**Sandra C. Henderson** is a doctoral candidate of MIS in the Department of Management at Auburn University. She holds a master’s of accountancy with a concentration in accounting information systems from Florida State University and a BS in Accounting from Albany State University. Her research has appeared in *Information & Management* and several proceedings. Her research interests include information privacy, electronic commerce, and systems development.

**William Hutchinson** is the associate head of management information systems at Edith Cowan University in Western Australia. He has had over 20 years experience in information systems in the government sector and the oil and finance industries. Dr. Hutchinson has published numerous papers on system design and information warfare.

**Karen D. Loch** is the director of the Institute of International Business and an associate professor at Georgia State University. Her current research interests span international IT transfer and social and ethical concerns of information systems. She has published in journals such as *MIS Quarterly, Information Systems Journal, Communications of the ACM, Journal of Global Information Management, Academy of Management Executive, Journal of Business Ethics, and DATA BASE*, and a book on IT education. She serves as global editor for the *Journal of Global Information Management*, as associate editor for the *Journal of Global Information Technology Management*, and as a review board member for *Information Resources Management Journal*. She reviews regularly for other leading IS journals.

**Mark G. Lycett**, PhD is a lecturer at Brunel University, UK. His research interest lies in systems development. In particular, he is interested in the interaction between new development approaches/technologies and strategies,
structures, relationships and culture within business. His research has been published in journals such as *Information and Software Technology Journal, Electronic Markets: The International Journal of Electronic Commerce and Business Media* and *European Journal of Information Systems*.

**Trevor T. Moores** has been an assistant professor of information systems at the University of Nevada, Las Vegas, since 2000. Previously he was at Emporia State University and the City University of Hong Kong. Dr. Moores has published extensively in the areas of software measurement, software cost estimation, IT management issues, software piracy and cultural issues in software development.

**Anastasia Papazafeiropoulou** is a PhD candidate in the Information Systems and Computing Department at Brunel University. She has worked as a technical trainee in the European Union (EU) in Brussels and as a research associate with expertise in electronic commerce at the Athens University of Economics and Business. She holds a first degree in informatics (1994, Athens University of Economics and Business) and a MSc in information systems (1997, Athens University of Economics and Business). Her research interests fall within social aspects and policy issues of electronic commerce, more specifically focusing on awareness creation and knowledge diffusion mechanisms available for electronic commerce adoption from small- and medium-size enterprises. Currently, she works as a full-time researcher for a 3-year EPSRC-funded project with the title: “Human Factors in Electronic Commerce: A Stakeholder Perspective.” She is also member of the e-business centre (eLTRUN) of the Athens University of Economics and Business.
working as a part-time researcher in projects related to policy making in the European region.

**Mario Pascalev** received his MBA from Bowling Green State University. Currently he is working for the Bank of America as a systems engineer-architecture and analysis. He has a long-standing interest in the philosophy and the area of ethics.

**Dan S. Petty** is president of the North Texas Commission, a nonprofit consortium of businesses, cities, counties, chambers of commerce, economic development entities, and higher education institutions in the North Texas region. He was formerly president of Wilcox Realty Group, Hunt Realty Services, Woodbine Development Corporation, Henry S. Miller/Grubb and Ellis of Texas, and the Dallas Chamber of Commerce. He has served as assistant city manager for the City of Dallas, director of public affairs for the University of Texas System, executive assistant/director of planning coordination for the Governor of the State of Texas, Director of urban affairs for the North Central Texas Council of Governments, and assistant city manager of Lubbock, Texas. His education includes a master's of governmental administration from the Fels Institute of Local and State Government, the Wharton Graduate School, University of Pennsylvania; and an MA in public administration and a BS in civil engineering from the University of Texas at Austin. He is currently pursuing a master's in management in e-commerce at the University of Dallas. He and his wife, Mary Jane, have four children and live in Dallas.

**Athanasia (Nancy) Pouloudi** is a lecturer in the Department of Information Systems and Computing at Brunel University, UK. Dr. Pouloudi has a PhD in stakeholder analysis for interorganizational systems in healthcare from the London School of Economics and Political Science, an MSc in analysis, design and management of information systems from the same university and a first degree in informatics from the Athens University of Economics and Business. Her current research interests encompass organizational and social issues in information systems implementation, stakeholder analysis, electronic commerce and knowledge management. She has more than 25 papers in academic journals and international conferences in these areas. She is a member of the ACM, the Association for Information Systems (AIS), the UK AIS, and the UK OR Society.

**Mahesh S. Raisinghani** is the founder and CEO of Raisinghani and Associates International, Inc., a diversified global firm with interests in software and strategy consulting and technology options trading. As a faculty member at
the Graduate School of Management, University of Dallas, he teaches MBA courses in information technology and e-commerce and serves as the director of research for the Center for Applied Information Technology. Dr. Raisinghani was the recipient of the 2001 Faculty Achievement Award for excellence in teaching, research and service. As a global thought leader on e-business and global information systems, he has been invited to serve as the local chair of the World Conference on Global Information Technology Management and the track chair for e-commerce technologies at the Information Resources Management Association. He has published in numerous leading scholarly and practitioner journals, presented at leading world-level scholarly conferences and has recently published his book *E-Commerce: Opportunities and Challenges* and has a second book, *Cases on Global E-Commerce: Theory in Action*, scheduled for publication in December 2001.

**Randall C. Reid** received his PhD from the University of South Carolina. Currently he is an assistant professor at the University of Alabama in Huntsville. His primary teaching and research interests are in networking and security.

**Darryl A. Seale** is assistant professor of management at the University of Nevada, Las Vegas. He earned his PhD and master’s degrees at the University of Arizona, and his MBA from Penn State University. His teaching interests include strategic management, bargaining and negotiation and quantitative decision-making. His research interests include strategic decision-making, bargaining and negotiation, and behavioral game theory. His work has been published in *Management Science, Organizational Behavior and Human Decision Processes, Journal of Economic Behavior and Organization, Behavior and Information Technology* and other quality journals.

**Mikko T. Siponen** is a research scientist in the Department of Information Processing Science at the University of Oulu, Finland. His research interests include information systems security and ethical aspects of computing. He has published several workshop, conference and journal articles in these fields. He is former Finnish champion in tae kwon do.

**Charles A. Snyder** is the Woodruff Endowed Professor of MIS in the Department of Management at the College of Business, Auburn University. He received a PhD in management from the University of Nebraska. He holds an MS in Economics from South Dakota State University, an MBA from Ohio State University, and a BFA from the University of Georgia. His research has
appeared in the *Journal of Management Information Systems*, *Information & Management*, *The Academy of Management Review*, and many other leading journals. His research interests include knowledge management, information resource management, expert systems, computer-integrated manufacturing, systems analysis and design, and telecommunications management.

**Matthew Warren** is a information systems senior lecturer in the Department of Computing and Mathematics at Deakin University (1998+) and before that was a lecturer at the Plymouth Business School, UK (1996-1998). He obtained his PhD in computer security risk analysis at Plymouth University, UK (1996). He has published 50 refereed journal and conference papers. Dr. Warren is a member of Australian Standards Committee IT/12/4 Security Techniques and is the Australian representative on IFIP 11 WG 11–Security Management. He has also worked on several European Union research projects including projects under the ADAPT, HTCA, INFOSEC and AIM schemes.
