About the Authors

**John W. Bagby** is professor of information sciences and technology at Pennsylvania State University. He researches the public policy of information sciences and technology, privacy, security, intellectual property, entrepreneurship and financial services regulation. His undergraduate and graduate instruction in these subjects has occurred at four doctoral/research-intensive universities. He has developed and delivered various executive and continuing legal education classes. His funded and interdisciplinary research is published in numerous journals in law, economics, business and engineering. He is co-author of several college texts and serves on various professional and institutional committees, including three terms on the Penn State Faculty Senate.

**Sanda Berar** R&D manager at Nokia Multimedia in Finland. Her key responsibilities include Mobile Enhancements Finland SW strategy, competence development and technology studies. She is also responsible for operational development in the Mobile Enhancements, Software area. Prior to that, she has been working in diverse project management and SW engineering positions in Nokia, Finland. She has over 10 years’ experience in SW development, and also holds a PhD in business information systems.

**Raluca Bunduchi** is a lecturer in management at the University of Aberdeen Business School. Her current research focuses on technology management and the development and adoption of e-business in organisations. Prior to that, she has been a research fellow at the University of Edinburgh, looking at the development and adoption of e-business standards. She studied for her PhD in the Department of Management Science at Strathclyde Business School, examining the use of Internet technologies and their implications for the nature of business relationships within and across organizational boundaries.

**Anindya Chaudhuri** is lead researcher at the National Center for Education Accountability, Austin, Texas. He graduated with a PhD in public policy from the Lyndon B. Johnson School of Public Affairs at The University of Texas at Austin in 2005, after obtaining an MA in economics in 1999 from Jadavpur University, India, specializing in International Trade. In 1997, he was an Honors graduate in economics from the same institution, with a minor in mathematics. His research interests include telecommunications, education, international trade and research methodologies.
**About the Authors**

**Ioannis P. Chochliouros** is a telecommunications electrical engineer, graduated from the Polytechnic School of the Aristotle University of Thessaloniki, Greece, holding also an MSc and a PhD from the University Pierre et Marie Curie, Paris VI, France. He possesses broad research and practical experience in a great variety of matters relating to modern electronic communications. He currently works as the head of the research programs of the Hellenic Telecommunications Organization S.A. (OTE) in Greece, where he has been involved in different national, European and international R&D projects and market-oriented activities. He has published numerous scientific and business papers and reports in the international literature, especially for technical, business and regulatory options arising from innovative e-infrastructures and e-services, in a global converged environment. He also works as a lecturer, on the Faculty of Science and Technology, Departments of Telecommunication Science, Computer Science and Technology of the University of Peloponnese, Greece.

**Stergios P. Chochliouros** is an independent consultant, specialist for environmental-related studies, and holds a PhD from the Department of Biology of the University of Patras, Greece, and a university degree as an agriculturist. He has gained enormous experiences as an academic researcher and has been involved in various research activities, especially including options for extended use and/or applicability of modern technologies. In particular, he has participated, as an expert, in many European research projects relevant to a variety of environmental studies. Moreover, he has gained significant experience both as educator and advisor; he is author of several papers, studies and reports.

**Tilemachos D. Doukoglou** holds a diploma of electrical engineering from the Aristotle University of Thessaloniki-Greece (1986), an MEng degree from McGill University of Montreal – Canada (1989) and a PhD in electrical and biomedical engineering from the same University (1994). He was also a visiting research engineer and post-doc in the Massachusetts Institute of Technology-Cambridge, MA-USA (1994-1995). Dr. Doukoglou is currently the head of OTE’s (Hellenic Telecommunications Organization) Labs and New Technologies Division. His interests are in the area of IP over DWDM technologies, Broadband Services over xDSL technologies (VoD, VideoStreaming, GoD, etc.) and development of platforms for services like TeleMedicine and TeleEducation. He has also been the ADSL Rollout project manager for 2004 and 2005. Since 1995, he has been involved in various EU RTD programs as technical responsible and project manager. Finally, he has more than 40 publications in international magazines, conferences and workshops.

**Kenneth Flamm** is director of the Technology and Public Policy Program and dean rusk chair in international affairs, The Lyndon B. Johnson School of Public Affairs, The University of Texas at Austin. He is an expert on telecommunications, international trade and the high technology industry. Dr. Flamm is a 1973 honors graduate of Stanford University and he received a PhD in economics from MIT in 1979. From 1993 to 1995, he served as principal deputy assistant secretary of Defense for Economic Security and special assistant to the deputy secretary of defense for Dual Use Technology Policy. Prior to his service at the Defense Department, he spent 11 years as a senior fellow in the Foreign Policy Studies Program at Brookings. Among his publications are Mismanaged Trade? Strategic Policy and the Semiconductor Industry (1996), Changing the Rules: Technological Change, International Competition, and Regulation in Communications (ed., with Robert Crandell, 1989), Creating the Computer (1988) and Targeting the Computer (1987).
Shane Greenstein is the Elinor and Wendell Hobbs professor in the Management and Strategy Department of the Kellogg School of Management at Northwestern University. He teaches courses on strategy in technology-intensive industries and markets. He is also a research associate with the industrial organization and productivity groups at the National Bureau of Economic Research in Cambridge Massachusetts. His research interests cover a wide variety of topics in the economics of high technology. His most recent book is *Diamonds are Forever, Computers are Not; Essays in the Economics and Strategy of Computing Markets*. It is published by Imperial College Press. He received his BA from University of California at Berkeley in 1983, and his PhD from Stanford University in 1989.

Jarice Hanson is the Verizon chair in telecommunications at Temple University, Philadelphia. She is also professor of communication in the Department of Communication at the University of Massachusetts, Amherst. She has authored, co-authored or edited 15 books and numerous articles on media and society, and on telecommunications policy. A former department chair and associate dean, she also was the founding dean of the School of Communications at Quinnipiac University. Her next book will be published by Praeger Publishers in 2007, titled, *24/7: How the Internet and Cell Phones Change the Way We Live, Work, and Play*.

Jarmo Harno received his MSc in mathematical analysis from the University of Helsinki in 1983. After working in SW industry, he joined Nokia in 1987, and has worked as a systems analyst and manager in R&D, quality assurance and product management. He started as a senior research scientist on techno-economics with Nokia Research Center in 2001. In doing research on the future telecom technologies and service concepts, he has also taken part in the EU IST framework co-operation project TONIC (2001–2002). Starting from the year 2004, he has led a work package for “Mobile and wireless network economics beyond 3G” in the EUREKA’s CELTIC co-operation project ECOSYS. Mr. Harno has authored several international journal articles and conference presentations, and holds some patents relating to telecom technology and services.

Meheroo Jussawalla is an emerita research fellow/economist at the East West Center, Honolulu, Hawaii. Her research interests in the economics of telecommunications has led her to research and publish 15 books and 200 refereed journal articles in the ICT sector. A festschrift was presented to her in 1998 titled *Communications and Trade: Essays in Honor of Meheroo Jussawalla*, edited by D.M. Lamberton ( Hampton Press, NY). She has served on the board of directors of the Pacific Telecommunications Council and the International Institute of Communications. She is on the editorial board of *Telecommunications Policy*.

Dimitris Katsianis received the informatics degree, an MSc in signal processing and computational systems from the University of Athens, Department of Informatics and Telecommunications. He is a research fellow with the Optical Communications Group, participating in several European R&D projects. He has worked as an expert scientific advisor with several firms in the field of techno-economic and network design studies. His research interests include broadband communications and methodology of network design with techno-economic aspects. He has more than 40 publications in journals and conferences in the field of techno-economics and telecommunication network design and he serves as a reviewer in journals and conferences.
About the Authors

Ken Krechmer is lecturer in the Interdisciplinary Telecommunications Program of the University of Colorado, Boulder, USA. He was the founding technical editor of Communications Standards Review and Communications Standards Summary (1990-2002), technical journals reporting on standards work-in-progress in various national and international standards committees. Krechmer consulted on standardization strategies and actively participated in standards committee meetings 1980-2002 for various clients, including France Telecom, British Telecom, NEC and Intel. He received the first place awards in the World Standards Day paper contests in 1995 and 2000. Krechmer is a senior member of the IEEE and a member of the Society of Engineering Standards.

Youngsun Kwon is an associate professor of IT Business School at Information and Communications University in Korea. He is a senior researcher, leading research on the unlicensed use of spectrum at the Spectrum Engineering and Policy Research Center in Korea. In addition, he has been a member of the Gerson Lehrman Group Telecommunications Council Member since 2005. He is listed in the 23rd edition of Marquis Who’s Who in The World (2006). His major research concerns are spectrum resource management, competition policy in telecommunication industry and the convergence between network industry and traditional industries including mass media industry.

Changi Nam is a professor at Information and Communications University in Korea. He received a BS in management from Seoul National University, Seoul, Korea in 1978, and a PhD in business administration (finance) from Georgia State University, Atlanta in 1988. During his stay in Korea Information Society and Development Institute (KISDI) from 1988 to 2000, he had been engaged in the research related to strategic management of post and telecommunications. Since 2001, he has been a faculty member at Information and Communications University, servicing as dean of the School of Business and director of the IT Business Research Institute. His current research interests include financial analysis and performance evaluation in the information and communications industry.

Hajime Oniki was born in 1933, Tokyo, Japan. He earned his BA and MA from the University of Tokyo, Japan, and PhD (economics, 1968) from Stanford University, USA. He is currently a professor at Osaka-Gakuin University, and a professor emeritus at Osaka University. His academic appointments in the past include professor at Chukyo University and Institute of Social and Economic Research, Osaka University; assistant and associate professor at Queen’s University, Canada; assistant professor at Harvard University, USA; and assistant professor at Tohoku University, Japan. He served as editor of International Economic Review and as associate editor of Information Economics and Policy, Economics of Innovation and New Technology, info and Telecommunications Policy. Professor Oniki writes mainly in economics of information and communication.

Theodoros Rokkas received his BSc in physics in 2000 and an MSc in electronics and radio-communications in 2002, both from the National and Kapodistrian University of Athens, Greece. Currently he is a research associate and working toward a PhD at the Department of Informatics and Telecommunications at the same university. His research interests include mobile communication systems, broadband and wireless systems and techno-economic evaluation of networks.
About the Authors

Thomas Spicopoulos received his physics degree from Athens University in 1976, the DEA degree and Doctorate in Electronics, both from the University of Paris VI, in 1977 and 1980, respectively and the Doctorat Es Science from the Ecole Polytechnique Federale de Lausanne in 1986. From 1976 to 1980 he worked in Thomson CSF and in 1980 he joined the Electromagnetism Laboratory of the Ecole Polytechnique Federal de Lausanne. Since 1987 he has been with the University of Athens, where he is a professor in the Department of Informatics and Telecommunications. He has participated and managed about 30 National and European R&D projects and he has more than 100 publications in scientific journals and conference proceedings.

Anastasia S. Spiliopoulou is a lawyer, LLM, member of the Athens Bar Association. During recent years, she has directly participated in matters related to telecommunications and broadcasting policy in Greece and abroad, within the wider framework of the information society. She has been involved in current legal, research and business activities as a specialist for e-commerce and e-businesses, electronic signatures, e-contracts and e-procurement, e-security and other modern information society applications. She has published many scientific papers, with specific emphasis on regulatory, business, commercial and social aspects. She has mainly focused her activities on recent aspects of the European regulatory policies and on their implications in the competitive development of the converged telecommunications market. She currently works as an OTE (Hellenic Telecommunications Organization S.A.) lawyer for the Department of Regulatory Issues of the General Directorate for Regulatory Affairs.

YiJun Tian is a final year PhD candidate at the University of Technology Sydney Law School, and a postgraduate research associate at the Baker & McKenzie Cyberspace Law and Policy Centre, Australia. He was visiting scholar at the University of Washington Law School (Seattle), and summer associate at the Berkman Center for Internet & Society at the Harvard Law School in 2005. He has published a number of journal articles on international comparative law, intellectual property and Internet law in Australia, China, the United Kingdom and the United States.

Dimitris Varoutas holds a physics degree and MSc and PhD diplomas in communications and technoeconomics from the University of Athens. He is a lecturer in telecommunications technoeconomics in the Department of Informatics and Telecommunications at the University of Athens. He actively participates in several technoeconomic activities for telecommunications, networks and services within numerous European and national R&D projects. His research interests include optical, microwave communications and technoeconomic evaluation of network architectures and services. He has published more than 40 publications in refereed journals and conferences in the areas of telecommunications, optoelectronics and technoeconomics.

Ilari Welling received his MSc degree in telecommunication engineering from the Helsinki University of Technology in 1996. He joined the Nokia Research Center in 1995, where he has been studying techno-economic aspects of telecommunication networks and is currently leading the research group focusing on this topic. Recently, he has been working on the EU project TONIC and is currently leading the CELTIC project ECOSYS, which concentrates on techno-economic modelling. Mr. Welling has authored/co-authored several international journal articles and has presented papers at conferences in the field of telecom techno-economics. He was also co-author of the book Broadband Access Networks: Introduction Strategies and Techno-Economic Evaluation (Chapman&Hall, 1998).
About the Authors

Qingchuan Zhong holds a master’s degree in public affairs from the Lyndon B. Johnson School of Public Affairs, The University of Texas at Austin and an undergraduate law degree from Shanghai International Studies University, China. Zhong is recipient of various academic honors, including the Emmett S. Redford Award from the LBJ School and the Jones Day International Legal Fellowship. Zhong has worked for Public Strategies, Inc., Austin, Texas, and was a summer associate at the U.S. law firm Paul, Hastings, Janofski and Walker. He is currently earning his JD at the University of Michigan Law School, where his research interests include law and public policy in competition, development and technological advancement.
