A
ActiveX controls 188
analyze-design-develop-implement-evaluate (ADDIE) model 67
application software, remote access 199–200
assessment methods 325–328. See herein Kirkpatrick’s four-level evaluation model
ASSIST-ME Model 243
automated system recovery (ASR) 293–294

B
blogs 209
border gateway protocol (BGP) 168
business process automation server 147–148

C
central processing units (CPUs) 124, 187
Citrix 117, 184
client collaboration tools 206–209
client computer systems 186–194
client computer systems, hardware 186–187
client multimedia devices 200–206
client multimedia software 200–206
cluster management software 136
course management systems, Blackboard 34
course management systems, WebCT 34
customer relationship management (CRM) server 149
database management systems (DBMSs) 144–146, 193, 199, 340
database remote client 184
denial-of-service (DoS) attacks 221, 222
disk images 288–289
domain name server (DNS) 140
dynamic host configuration protocol (DHCP) 156
e-learning strengths, availability 6–7
e-learning strengths, cost efficiency 8
e-learning strengths, flexibility 7–8
e-learning strengths, learning enhancement 9
e-learning strengths, maintainability 8–9
e-learning system. See Web-based teaching (WBT) systems
e-learning system, interactivity 5
e-learning system, suggestions 12–13
e-learning weaknesses, lack of direct communication 9–10
e-learning weaknesses, student effort 11–12
e-learning weaknesses, technology dependency 10–11
e-learning weaknesses, workload 11
e-mail server 148–149

F
file transfer protocol (FTP) 218–219
firewalls 169

G
graphical user interface (GUI) 33

H
hands-on practice, requirement identification 72–74
hardware selection 104–112
hardware selection, blade system 105
hardware selection, computer systems 104–107
hardware selection, network equipment 108–113
hardware selection, processor performance 105
hardware selection, rack system 105
hardware selection, stand-alone server 104–105
hardware selection, uninterruptible power supply (UPS) 107–108
hypertext transfer protocol (HTTP) 218

I
information systems curriculum 15–16
information technology infrastructure library (ITIL) 275
instruction design, systematic approach to 67
intelligent tutoring systems 208
Internet information services (IIS) 187–188
Internet inter-ORB protocol (IIOP) 218
Internet relay chat (IRC) 221
Internet service providers (ISPs) 84, 167, 188
IT infrastructure library (ITIL) 277–278, 300

J
Java 188
Java based application software 190–191

K
Kirkpatrick's four-level evaluation model 327–328
Knoppix 294

L
lab-based teaching material design 262–264
lab-based teaching material development 264–269
large computer lab network 167–172
learning management systems (LMSs) 3, 5, 34, 40–41, 53, 199, 206, 244. See also online technology-based courses, teaching trends-LMS
local area networks (LANs) 41

M
media players 205
medium computer lab network 159–167
microphones 201–202
Microsoft application software 191–192
Microsoft MSDN Academic Alliance program 177
Microsoft operations framework (MOF) 275, 278–280
Microsoft SQL server 200
movie development 257–258
multimedia authoring software packages 205–206
multimedia client software 204–207
multimedia course content development 255–260
multimedia course content development, presentations 256–262. See herein movie development; See herein virtual whiteboards
multimedia course content development, screen capture programs 255–256

N
network address translation (NAT) 157
network management tools 284–287
network performance 169–171
network reliability 171–172
network security 169
network traffic reduction 171

O
online analytical processing (OLAP) 174, 178, 194
online computer lab, development strategies 94–119
online computer labs, application software 220–221
