About the Authors

Magid Igbaria most recently was a Professor of Information Science at the Claremont Graduate University and at the Faculty of Management, Graduate School of Business, Tel Aviv University. Formerly, he was a Visiting Professor of Decision Sciences at the University of Hawaii in Manoa, and a Professor of MIS, College of Business & Administration, at Drexel University. He had published articles on electronic commerce, virtual workplace, information economics, computer technology acceptance, IS personnel, management of IS, compumetical approaches in IS, and international IS in Communications of the ACM, Computers & Operations Research, Decision Sciences, Decision Support Systems, Information & Management, Information Systems Research, Journal of Management Information Systems, Omega, Journal of Strategic Information Systems, MIS Quarterly, and others. His research interests focused on electronic commerce, virtual workplace, computer technology acceptance, information and computer economics management of IS, IS personnel, and international IS. At the time of his death, Dr. Igbaria was a member of the editorial board of Information Resources Management Journal (IRMJ), Journal of the Association for Information Systems (JAIS), Journal of Management Information Systems (JMIS),
Conrad Shayo is a Professor of Information Science at California State University San Bernardino, USA. Over the last 20 years he has worked in various capacities as a university professor, consultant, and manager. He holds a Doctor of Philosophy Degree and a Master of Science Degree in Information Science from Claremont Graduate University, formerly Claremont Graduate School. He also holds an MBA in Management Science from the University of Nairobi, Kenya, and a Bachelor of Commerce Degree in Finance from the University of Dar-Es-Salaam, Tanzania. His research interests are in the areas of IT assimilation, distributed learning, end-user computing, organizational memory, organizational learning assessment, reusable learning objects, IT strategy, and “virtual societies.” His most recent publications can be found in the *Information Systems Journal, Journal of End User Computing*, and the *Encyclopedia of Library Sciences and Information Technology.*

*     *     *

Catherine M. Beise is currently an Associate Professor in Information and Decision Sciences in the Perdue School of Business at Salisbury University in Salisbury, Maryland. In addition to her 10-plus years in academia, she has worked in industry and government as a systems analyst, programmer, and GSS facilitator. Current research interests include implementation and facilitation of electronic support for teamwork and online learning. Her previous work has appeared in publications such as *MIS Quarterly* and *Communications of AIS.*

Stanley J. Birkin is Professor of Information Systems and Chair of the Department of Information Systems and Decision Sciences at the University of South Florida, USA. He also serves as the Director of the Bear Stearns Information Technology Research Center at the University of South Florida.
His research interests include the international aspects of information systems, electronic commerce, and employee motivational issues associated with error-free work performance.

**Mari W. Buche** is an Assistant Professor of Management Information Systems at Michigan Technological University, USA. She earned her PhD in Information Systems from the University of Kansas. Her primary research interests include management of Information Systems, IS strategy, technology change agents, software engineering, and knowledge management. She is currently investigating issues of transition in IT organizations, specifically the phenomenon of changing IT professional work identity. She focuses on cross-disciplinary research designs that combine qualitative and quantitative methodologies. Her work has been published in the *Journal of Information Technology and Management* and numerous conference proceedings (International Conference on Information Systems, Americas Conference on Information Systems, INFORMS, and HICSS).

**Lisa A. Burke** is an Associate Professor of Management at Louisiana State University in Shreveport, USA. She holds a PhD in Organizational Behavior and Human Resources from Indiana University. Dr. Burke’s research interests deal with management development, training, and education. She has published in the *Journal of Applied Psychology, Academy of Management Learning and Education, Academy of Management Executive, Communications of the ACM, Journal of End User Computing, Human Resource Management Review*, and other journals.

**Rosann Webb Collins** is Associate Professor of Information Systems and Decision Sciences at the University of South Florida, USA. Her current research focuses on global information systems and cognitive issues in systems development and testing. Her publications include a book, *Crossing Boundaries: The Deployment of Global IT Solutions*, and research articles in *MIS Quarterly, Information Systems Research, The Information Society, the Journal of the American Society for Information Science*, and other MIS and information science journals. Dr. Collins has consulted with numerous businesses, community organizations, libraries, and educational organizations on information technology use and issues.

**Henry J.P. Croes** is a PhD candidate in the MIS Division of the Michael F. Price College of Business at the University of Oklahoma, USA. His research
focuses on the internal processes of the IT function, and on relationships between internal IT and supported organizational processes. Prior to his graduate studies, he served in the United States Army (CWO4, Retired) designing communications and computer networks.

Karin M. Darais is a PhD student at the David Eccles School of Business at the University of Utah, USA. Her major course of study is Management of Information Systems. Her current research interests include software reuse, software engineering, knowledge management, and the use of IS in operations management. Before starting the Ph.D. program, she was an Assistant Professor at Utah Valley State College in Orem, Utah. Ms. Darais earned BS and MS degrees in Managerial Accounting from Brigham Young University. Her work has appeared in multiple conference proceedings (International Conference on Information Systems, Americas Conference on Information Systems, INFORMS, Academy of Management, and HICSS).

Tor Guimaraes holds the Jesse E. Owen Chair of Excellence at Tennessee Technological University, USA. He has a PhD in MIS from the University of Minnesota and an MBA from California State University, Los Angeles. He was a Professor and Department Chairman at St. Cloud State University. Before that, he was Assistant Professor and Director of the MIS Certificate Program at Case-Western Reserve University. Dr. Guimaraes has been the keynote speaker at numerous national and international meetings sponsored by organizations such as the Information Processing Society of Japan, Institute of Industrial Engineers, American Society for Quality Control, IEEE, ASM, and Sales and Marketing Executives. He has consulted with many leading organizations including TRW, American Greetings, AT&T, IBM, and the Department of Defense. He was also the Editor-in-Chief of *Computer Personnel*, an Association for Computing Machinery journal. Working with partners throughout the world, he has published more than 100 articles about the effective use and management of Information Systems and other technologies.

Stephen Hawk is Associate Professor of MIS at the University of Wisconsin-Parkside, USA. He received his PhD in Business with a specialization in Management Information Systems from the University of Wisconsin-Madison in 1987. His current research focuses on offshore software development outsourcing, human resource issues in MIS, and international e-commerce. Dr. Hawk’s publications include articles on e-commerce in developing countries,
Jon (Sean) Jasperson is an Assistant Professor of MIS in the Michael F. Price College of Business at the University of Oklahoma, USA. His research interests include the adoption, use, management, and implementation of information technology in organizational settings. He received his PhD from Florida State University.

Kate M. Kaiser has been involved in information technology (IT) since 1967 as a practitioner, researcher, faculty member, and consultant. Her primary areas have been project management, user involvement, end-user computing, groupware, Year 2000, IT recruitment and retention, and offshore software development. She has published in *MIS Quarterly, Communications of the ACM, Academy of Management Journal*, the *Journal of High Technology Research, Information and Management*, and *Datamation*, among others. She wrote a variety of Year 2000 studies for Giga Information Group and delivered them to major firms in a variety of industries. Dr. Kaiser has served on the faculty of McGill University, University of Wisconsin-Milwaukee, and Marquette University. She serves as IT internship advisor over 170 IT undergraduate majors, in addition to developing MBA electives. She has held board positions in the Society for Information Management (SIM). Her BA in Mathematics and MBA are from Kent State University; her PhD in Management Information Systems is from the University of Pittsburgh.

Lynette Kvasny is an Assistant Professor of Information Sciences and Technology at The Pennsylvania State University, USA. Prior to her arrival at Penn State, she held various IS development and consulting positions at AT&T, Bell Laboratories, Lucent Technologies, and Avaya Communications. She was selected to participate in the International Conference on Information Systems 2000 Doctoral Consortium, and she was recognized as a KPMG Doctoral Scholar in 2001-2002. Her research interests focus on information technology adoption and use in historically underserved communities. She has published several conference papers and book chapters. Ms. Kvasny is a member of the
Association for Computing Machinery, the International Federation for Information Processing, and the Computer Professionals for Social Responsibility. She can be reached by e-mail at lkvasny@ist.psu.edu.

**Denis M.S. Lee** is a Professor of Computer Information Systems in the Sawyer School of Management at Suffolk University. He received his PhD from the Sloan School of Management at MIT. Dr. Lee’s research interests are related to the management of computer-based technologies and the management of technical professionals. He has published extensively in these areas and received a number of special honors and recognition for his research work. Currently, he is the Principal Investigator of a multi-year, Information Technology Research Program research project on the effective development of information technology workers funded by the National Science Foundation.

**Patrick Chang Boon Lee** is an Assistant Professor in Computer Business Information Systems in the Faculty of Business Administration, University of Macau. He was a personnel practitioner before joining academia. His main research interest is in the management of information technology professionals. His research has been published or is forthcoming in a number of international journals such as *Information and Management; Career Development International; Accounting, Management and Information Technologies; Journal of Management Development;* and others.

**James D. McKeen** is currently a Professor of MIS at the School of Business, Queen’s University at Kingston, Canada, and is the Founding Director of the Queen’s Centre for Knowledge-Based Enterprises, a research think-tank for the knowledge economy. He received his PhD in Business Administration from the University of Minnesota. His research interests include IT strategy, user participation, the management of IT, and knowledge management in organizations. His research has been published in *MIS Quarterly, Journal of Information Technology Management, Communications of the Association of Information Systems, Journal of Systems and Software, International Journal of Management Reviews, Information and Management, Communications of the ACM, Computers and Education, OMEGA, Canadian Journal of Administrative Sciences, Journal of MIS, KM Review,* and *Database.* He currently serves on the editorial board of the *Journal of End User Computing,* regularly reviews articles for many MIS journals, and was the MIS Area Editor for the *Canadian Journal of Administrative Sciences* for seven years.
**Jo Ellen Moore** is an Associate Professor in Computer Management and Information Systems at Southern Illinois University Edwardsville, USA. She holds a PhD in Organizational Behavior from Indiana University and a master’s degree in Psychology from Illinois State University. In the corporate sector, she has worked as a programmer/analyst, systems programmer, project leader, and IS manager. Her research interests center on the management of IS professionals and technology. She has published in *MIS Quarterly, Academy of Management Review, Communications of the ACM, Academy of Management Learning and Education, Human Resource Management Review, HR Magazine*, and other journals.

**Jennifer Moro** is a PhD student at Cattaneo University, CETIC (Center of Economy and Technology of Information and Communication), Italy. Since 2000 she has been researching in the field of Information Systems, with a specific focus on the activities and the competencies needed to manage the use of ITC within companies. At the moment her research interests cover the topics of Knowledge Management System and eLearning management. Since 2000 she has worked as Chairman of the Board of Directors at an Information Systems consulting company in Milan, Italy.

**Martha Myers** is Professor of Computer Science and Information Systems (CSIS) at Kennesaw State University (KSU), where she has taught since 1990. Dr. Myers holds three degrees from UT Austin: a BA in Mathematics, an MA Mathematics and Computer Science Education, and a PhD in Information Systems. She served as CSIS Department Chair from 1993-2000. From 1985-1988, she was Vice President of Systems for Continental Insurance Company. She has also taught high school mathematics and computer science. Her teaching interests include database systems, systems analysis and design, and project and team management, and her research interests include diversity in the IT workplace, real-time writing, and database pedagogy. Dr. Myers is Faculty Principal for KSU’s Women In Technology student organization and Chair of OWLS (Outfitting Women Leaders in the Sciences), a faculty organization at KSU.

**Kay M. Nelson** is an Associate Professor of Management Information Systems, Research Scientist, and Director of the Center for Information Technologies (CITM) in Management at the Fisher College of Business, Ohio State University, USA. Dr. Nelson has industry and academic experience both in the U.S. and overseas. She holds a PhD from the University of Texas at
Austin in Management Science and Information Systems, with minors in Technology Management and Organizational Behavior. She works extensively in the areas of organizational and information technology flexibility, strategy, business value, e-business, and IT measurement. Dr. Nelson has published numerous articles about IT strategy issues, software engineering, and IT/business partnership in publications such as *MIS Quarterly*, *European Journal of Information Systems*, *Decision Support Systems*, and *Quality Digest*. Her research awards include the International Conference on Information Systems (ICIS) Best Paper Award and the Workshop on Information Technologies and Systems (WITS) Best Paper Award, as well as two nominations for Best Paper from the Hawaii International Conference on Systems Science (HICSS). Dr. Nelson is a National Science Foundation Career Award recipient. This four-year award supports her research titled, “IT Personnel Transition and Organization Transition Strategy.” She was also a George S. Eccles Emerging Scholar at the University of Utah and held the Dean Whierry Fellowship at the University of Kansas.

**R. Ryan Nelson** is a Professor, Director of the Center for the Management of Information Technology, and Director of the MS in the Management of IT program at the McIntire School of Commerce at the University of Virginia, USA. His research interests are in the areas of technology adoption and innovation, IT human capital, and project management. His research has been published in such journals as *MIS Quarterly*, *Journal of MIS*, and *Communications of the ACM*.

**Aurelio Ravarini** is Assistant Professor at Cattaneo University, CETIC (Center of Economy and Technology of Information and Communication), Italy, since 2000. Since 1996 he has been researching in the field of Information Systems, with a specific focus on the adoption and use of ITC within SMEs. At the moment his research interests cover the topics of eBusiness models, IS organizational impacts, and eLearning management. From 1998 to 2001 he worked as a Consultant at ISMO, an organizational and training consulting company in Milan, Italy.

**Sarah C. Rice** is a PhD student in the Fisher College of Business at the Ohio State University. Her major course of study is Management of Information Systems, with minors in Microeconomics and Quantitative Psychology. Her current research interests include the analysis of behavioral effects and economic impacts imposed on individuals and organizations as a result of technol-
ogy implementation. She also holds an MBA from the University of Utah, with an emphasis in Product and Process Innovation.

**Carol Stoak Saunders** is Professor of MIS at the University of Central Florida in Orlando, USA. She served as General Conference Chair of ICIS’99 and Telecommuting’96. She was the Chair of the Executive Committee of ICIS in 2000. Currently she is a Senior Editor of *MIS Quarterly* and *e-Services Journal*, and an Associate Editor of *Decision Sciences Journal, Information Systems Research*, and *Communications of the AIS*. Her current research interests include electronic commerce, the impact of Information Systems on power and communication, virtual teams, and interorganizational linkages. Her research is published in *MIS Quarterly, Information Systems Research, Information Resources Management Journal, Journal of MIS, Communications of the ACM, Academy of Management Journal, Academy of Management Review, and Organization Science*.

**Albert B. Schwarzkopf** is Associate Professor of MIS at the Michael F. Price College of Business at the University of Oklahoma, USA. Professor Schwarzkopf’s research interests include decision support, data warehousing, and systems. He has obtained several grants for research in various facets of MIS and business studies. His articles have been published in *Research Policy, International Journal of Production Research, Journal of Business Logistics, Journal of Retailing*, and *Transportation Research*, among others.

**D. Sandy Staples** is an Associate Professor in the School of Business at Queen’s University, Kingston, Canada. His research interests include the enabling role of Information Systems for virtual work and knowledge management, and assessing the effectiveness of Information Systems and IS practices. Dr. Staples has published articles in various journals and magazines, including *Organization Science, Information & Management, Journal of Strategic Information Systems, Journal of Management Information Systems, Communications of the Association of Information Systems, International Journal of Management Reviews, Business Quarterly, Journal of End-User Computing, OMEGA, and KM Review*. He is currently an Associate Editor of *MIS Quarterly* and serves on the editorial boards of other journals.

**Marco Tagliavini** earned his degree in Computer Science from the University of Milan in 1992. In the same year he obtained a master’s degree in Information Technology at the CEFRIEL Research Center in Milan, Italy. He is Assistant
Professor in Information Systems and has been teaching Computer Science and Information Systems for two universities: the Cattaneo University in Castellanza (since 1993) and the Catholic University in Milan (since 1998). His research work concerns the management of business information systems and Internet-based technologies, especially focusing on the peculiarities of small and medium enterprises.

**Andrea H. Tapia** is an Assistant Professor of Science, Technology, and Society at The Pennsylvania State University, USA. Prior to her arrival at Penn State, she completed a National Science Foundation-funded post-doctoral fellowship at the University of Arizona titled, “Universities in the Information Age.” She has taught at both the University of Arizona and the University of New Mexico. Her PhD is in the area of Sociology and focuses on the study of technology, culture, and organizations. Her most recent work examines the culture of computer-centered, high-tech industry. Dr. Tapia is currently shared between several departments at Penn State. She teaches for the Science, Technology, and Society Program, and for the Labor and Industrial Relations Department. She conducts research with several members of the School of Information Sciences and Technology. Dr. Tapia can be reached by e-mail at andreatapia@psu.edu.

**Peter A. Todd** is the Chesapeake and Potomac Professor and Associate Dean for Graduate Programs at the McIntire School of Commerce at the University of Virginia, USA. His research interests are in the areas of technology adoption and innovation, and the role of IT in decision making and human-computer interaction. He has published in a variety of journals, including *MIS Quarterly* and *Information Systems Research*. He currently serves as a Senior Editor for *MIS Quarterly*.

**Eileen M. Trauth** is Professor of Information Sciences and Technology at The Pennsylvania State University, USA. She conducts research on the influence of socio-cultural factors on IS, the IS profession, and underrepresented groups. Dr. Trauth has published several books, including *The Culture of an Information Economy: Influences and Impacts in the Republic of Ireland* and *Qualitative Research in IS: Issues and Trends*. She has been a Visiting Scholar at the University of Limerick and Dublin City University (Ireland), Vrije Universiteit Amsterdam (The Netherlands), and the University of Melbourne and Griffith University (Australia). She is currently engaged in a multi-country study of socio-cultural influences on gender in the IS profession. She has
written articles for the leading IS journals and serves on the editorial boards of several of them. Dr. Trauth received her PhD from the University of Pittsburgh. She can be reached by e-mail at etrauth@ist.psu.edu.

Amy Wosczynski is an Assistant Professor of Information Systems at Kennesaw State University. She earned her PhD at Clemson University, her MBA at Kennesaw State University, and a Bachelor’s in Industrial Engineering from Georgia Tech. Dr. Wosczynski’s current research interests include diversity in the IT workforce, pedagogy and curriculum to improve the success rates of students in programming courses, and research methods in Information Systems. She has published on these and other topics in journals such as *Computers in Human Behavior, Industrial Management & Data Systems*, and *Journal of Computer Information Systems*. She is also Co-Editor of the forthcoming *Handbook for Information Systems Research.*
