About the Contributors

Angappa Gunasekaran is a professor of operations management and the chairperson of the Department of Decision and Information Sciences in the Charlton College of Business at the University of Massachusetts (North Dartmouth, USA). Previously, he has held academic positions in Canada, India, Finland, Australia and Great Britain. He has BE and ME from the University of Madras and a PhD from the Indian Institute of Technology. He teaches and conducts research in operations management and information systems. He serves on the editorial board of 20 journals and edits a journal. He has published about 200 articles in journals, 60 articles in conference proceedings and 3 edited books. In addition, he has organized several conferences in the emerging areas of operations management and information systems. He has extensive editorial experience that includes the guest editor and editor of many journals. He has received outstanding paper and excellence in teaching awards. His current areas of research include supply chain management, enterprise resource planning, e-commerce, and benchmarking. He is also the director of Business Innovation research Center (BIRC) at the University of Massachusetts—Dartmouth.

***

Tamara Babaian (http://cis.bentley.edu/tbabaian) received her MS in applied mathematics from Yerevan State University of Armenia, and a PhD in computer science from Tufts University, Medford, MA. She is currently an assistant professor in the Department of Computer Information Systems
at Bentley College, Waltham, MA. Her research interests include artificial intelligence, human-computer collaboration and usability. She studies collaborative interfaces, knowledge representation, reasoning and planning. Her publications have appeared in the *Proceedings of the Intelligent User Interfaces, Artificial Intelligent Planning Systems, International Conference on Enterprise Information Systems*, and *Logical Methods in Computer Science*.

**Leszek Borzemski** of the Institute of Information Science and Engineering, Wroclaw University of Technology, Wroclaw, Poland, received his MSc, PhD and DSc (post-PhD habilitation) degrees in computer science from Wroclaw University of Technology, in 1976, 1980 and 1992, respectively. He is a professor in computer science at the Institute of Information Science and Engineering (IISE), Wroclaw University of Technology, Wroclaw, Poland. He holds the Chair of Distributed Computer Systems and IISE Laboratory. He is the vice-chairman of the Council of the Wroclaw Academic Computer Network. In 1993-2007 he was elected to the Committee on Informatics of the Polish Academy of Sciences. He is the author of 170 publications. His research interests include Web performance measurements and evaluation, data mining and Web quality. He is the member of the editorial board of the *Theoretical and Applied Informatics*. He has served as a PC member of several international conferences. He is the program chair of IEA/AIE2008 and ISAT2007. He is the member of KES International.

**Ahern G. Brown** is currently the assistant controller for Centex Homes in Charlotte, NC. He received his MBA and MS-ITM from Creighton University and holds an undergraduate degree from the University of Nebraska. His interests include information technology, marketing, strategy and accounting. Ahern has over 13 years of experience in applying technology and executing strategies that provide businesses with positive bottom-line driven results.

**Catharine Curran**, PhD (New Mexico State University), recently joined the Charlton College of Business as an associate professor of marketing. Her areas of specialization include marketing to children, privacy, public policy and the application of market orientation to traditionally non-market based professions. Her current research focuses on how becoming market driven has affected the traditional professions of law, medicine and education. Dr. Curran has published in journals such as *The Journal of Advertising, The Journal of Consumer Marketing, The Journal of Business Ethics*, and *Marketing Education Review*.
S.R. Devadasan is a professor in Production Engineering Department of PSG College of Technology, Coimbatore, India. He holds a bachelor’s degree in mechanical engineering and a master’s degree in industrial engineering. He received his PhD degree for his work on strategic quality management in the year 1996. He obtained all his degrees from Bharathiar University, Coimbatore, India. He has 17 years of teaching and research experience. He has published over 200 papers in the proceedings of the leading national and international conferences. He has published over 35 papers in international journals such as Production Planning & Control, International Journal of Quality and Reliability Management, and International Journal of Operations & Production Management. He is an editorial board member in the European Journal of Innovation Management, UK. His areas of research interest include strategic quality management, agile manufacturing and total quality management.

Tony Elliman is a senior lecturer in the School of Information Systems, Computing and Mathematics at Brunel University. He is active in research concerned primarily with the development of information systems for knowledge workers. He is a member of the IS Evaluation and Integration Group and has experience of using simulation techniques in modelling and evaluation projects. As a practicing software engineer he is a consultant on LRF funded medical research and has consulted for the Office of the Deputy Prime Minister (ODPM) on e-government projects. Originally trained as an electrical engineer with International Computers Limited, Dr Elliman has a broad background, having taught many aspects of computing including: information systems development, software engineering, distributed systems and hybrid simulation. As a chartered engineer, he has provided software consultancy services to government, academic and private sector organisations, including DERA and the EU.

Michael Griffin, MBA (Bryan College), CMA, CFM, ChFC, assistant dean of the Charlton College of Business, is a graduate of Providence College (BS 1980) and Bryant University (formerly Bryant College) (MBA 1982). Mr. Griffin has worked for a number of employers including Fleet National Bank, E.F. Hutton and Company, and the Federal Home Loan Bank of Boston. Mr. Griffin is the author of many business books and has developed several software packages both for commercial and academic use. He has been a consultant to a number of textbook publishers, including McGraw-Hill, Irwin, Addison Wesley, and Prentice Hall.
Ratan K. Guha is a professor in the School of Electrical Engineering and Computer Science at the University of Central Florida, Orlando. He received his BSc degree with honors in mathematics and MSc degree in applied mathematics from University of Calcutta and received the PhD degree in computer science from the University of Texas at Austin in 1970. His research interests include distributed systems, computer networks, security protocols, modelling and simulation, and computer graphics. He has authored over 150 papers published in various computer journals, book chapters and conference proceedings. His research has been supported by grants from ARO, NSF, STRICOM, PM-TRADE, NASA, and the State of Florida. He has served as a member of the program committee of several conferences, as the general chair of CSMA’98 and CSMA’2000 and as the guest co-editor of a special issue of the *Journal of Simulation Practice and Theory*. He is a member of ACM, IEEE, and SCS and served as a member of the Board of Directors of SCS from 2004 to 2006. He is currently serving in the editorial board of two journals: *International Journal of Internet Technology and Secured Transactions* (IJITST) published by Inderscience Enterprises (www.inderscience.com), and *Modelling and Simulation in Engineering* published by Hindawi Publishing Corporation (www.hindawi.com).

Tally Hatzakis is a lecturer for Brunel Business School. Her teaching areas include organisational theory and analysis, managing the digital enterprise and change management in digital enterprises. Her research interests include IT-driven organisational change, trust, and trust building, and has been chairing workshops and conference tracks in these areas under the auspices of the British Computer Society, European Congress of Organisational Studies, and the European Institute for Advanced Studies in Management. She holds a PhD in information systems, an MBA and a BSc in marketing management. Prior to returning to education, Tally spent a number of years in industry, where she has worked in project management, advertising, and marketing research.

Danie Jutras, MSc, is an information systems consultant, specializing in accounting and ERP systems for small business. Her research has been published in the *International Journal of Enterprise Information Systems*.

Ivan K.W. Lai, PhD, is an assistant professor in the Faculty of Management and Administration at the Macau University of Science and Technology. He has over 20 years industrial experience in the logistics and supply chain
management. He has published many papers on the topics of ERP, IOS, and SCM. His current research focuses on Internet-based IOS, extended enterprise, ERP implementation, supply chain risk management, and action research in enterprise information systems.

**Gilbert Y.P. Lin** is a PhD student in the Department of Industrial Engineering and Engineering Management at National Tsing Hua University, Hsinchu, Taiwan. He also works in the R&D Division at Avectec, Inc. His research interests are global logistics management, e-business methodology and intelligent expert system. He has participated in several industrial projects with high-tech companies and non-profit R&D centers in Taiwan.

**Wendy Lucas** (http://cis.bentley.edu/wlucas) is an associate professor in the Department of Computer Information Systems at Bentley College in Waltham, MA. She received her MS from the MIT Sloan School of Management and her PhD from the Electrical Engineering and Computer Science Department at Tufts University. Her research interests include interface usability, information visualization, and Web search. She has published in *JASIST, European Journal of Information Systems, Information Processing & Management, and Theory and Practice of Object Systems*. Her primary teaching interests are programming languages, algorithms, and object-oriented technologies.

**S. Ragu Raman** is working as a consultant in Genpact, Hyderabad, India. He pursued his bachelor of engineering (mechanical engineering) course at R.V.S. College of Engineering & Technology, Dindugul, TamilNadu, India.
He has published one paper in an international journal. His areas of research interest are quality information systems and total quality management.

**Sudipta Rakshit** received his bachelor’s of technology (B.Tech) in aerospace engineering from Indian Institute of Technology, Kharagpur in 1998 and his PhD in computer science from University of Central Florida in 2005. He is presently employed with J.P. Morgan Chase Bank in New York. His research interests include computer networks, game theory, Brownian motion, and stochastic calculus.

**Louis Raymond**, PhD, is professor of information systems and holder of the Canada Research Chair on Enterprise Performance at the Université du Québec à Trois-Rivières. His research interests include IT use and management in the context of SMEs and network enterprises, ERP evaluation, strategic alignment, and performance measurement systems. His work has been published in various journals such as the *MIS Quarterly, Journal of Management Information Systems, Entrepreneurship Theory and Practice, Journal of Information Technology* and *International Journal of Operations & Production Management*.

**Carl Reidsema** is a senior lecturer in mechanical engineering design at the University of New South Wales, Australia. Following on from 12 years as a professional design engineer in industry, he obtained his PhD in mechanical engineering from the University of Newcastle, Australia. His research interests include knowledge-based engineering, AI approaches to CAD/CAE automation and decision support, and feature recognition technologies.

**Suzanne Rivard**, PhD, is professor of information technology and holder of the Chair in Strategic Management of Information Technology at HEC Montréal. Her research interests are in the areas of ERP implementation, outsourcing of information systems services, software project risk management, and strategic alignment. Her work has been published in various journals such as the *Communications of the ACM, MIS Quarterly, Journal of Management Information Systems, Journal of Strategic Information Systems* and *Organization Science*.

**M. Sakthivel** is a teaching research associate in Mechanical Engineering Department of Government College of Technology, Coimbatore, India. He obtained his bachelor’s degree in mechanical engineering branch from Ma-
Cesar Sanin has been working in the field of multi-disciplinary decision-making and intelligent technologies for the past 5 years. He obtained his administrative engineering degree (2000) from the National University of Colombia and a diploma in IT (2003) at the University of Newcastle, Australia. Afterwards, he pursued a PhD degree at the School of Mechanical Engineering of the University of Newcastle, and received his degree in the field of knowledge management and intelligent technologies (2007). Currently, he continues his work at the University of Newcastle as a researcher and lecturer. His research focuses on the areas of information/knowledge management, decision support systems and intelligent systems for engineering and business.

Alan Serrano is a lecturer in the School of Information Systems, Computing and Mathematics at Brunel University. His research concentrates on the area of information systems and business process design and simulation including topics such as business process integration and information systems modelling and techniques. Previous to his appointment as a lecturer, he has gained research experience in the areas of IS design and simulation through participation as a research assistant on a number of EU and UK funded projects. Dr Serrano is an active member of the Centre for Applied Simulation Modelling (CASM) and the Centre for Living Information Systems Thinking (LIST), both in Brunel. Dr Serrano has a wealth of expertise gained from his industrial experiences in Mexico, ranging from distributed systems analysis and design to computer network design and implementation.

Timothy Shea, DBA (Boston University), is an associate professor of management information systems. Dr. Shea first worked in industry and management consulting developing large systems applications and early CASE tools. He received his DBA in management information systems from Boston University. Dr. Shea’s research has focused on the delivery and management
of Web-based learning and teaching technologies, corporate universities, end-user training, implementation issues around ERPs, e-commerce, and communities of practice. He has over a dozen journal articles published, four book chapters, four training manuals, and dozens of conference presentations. He teaches advanced projects, database, networking, and quality information systems.

Alan D. Smith is presently university professor of operations management at Robert Morris University, located in Pittsburgh, PA. Previously he was chair of the Department of Quantitative and Natural Sciences and Coordinator of Engineering Programs at the same institution, as well as associate professor of business administration at Eastern Kentucky University. He holds concurrent PhDs in engineering systems/education from The University of Akron and in business administration from Kent State University. He is the author of numerous articles and book chapters.

S. Sriram is working as a software engineer in Infosys Technologies Limited, Chengelpet, India. He pursued his bachelor of engineering (mechanical engineering) course at Arulmigu Kalasilingam College of Engineering, Krishnankovil, TamilNadu, India. He has published one paper in an international journal. His areas of research interest are quality information systems, total quality management, thermal engineering and engineering mechanics.

Helena Szczerbicka received the MSc in applied mathematics and the PhD in computer science from the Technical University of Warsaw, Poland, in 1974 and 1982, respectively. In July 1985 she joined the Faculty of Computer Science at the University of Karlsruhe, Germany. In May 1994 she became a professor in computer science at the University of Bremen, Germany. Since May 2000 she has been a professor at the University of Hanover, Germany.

Edward Szczerbicki has had very extensive experience in the theory of information, autonomous systems analysis, knowledge management and decision support systems development over an uninterrupted 28 year period, 13 years of which he spent in the top systems research centers in the USA, UK, Germany and Australia. He has published over 240 refereed papers, 120 of which appeared in international journals covering the areas of systems science, decision support, autonomous systems modeling and simulation, and decisional DNA. His title of professor (2006) and DSc degree (1993)
were gained in the area of information and knowledge management. His PhD (1983) was gained in uncertainty modeling for design and MSc (1976) in engineering management. He is now with The University of Newcastle, Newcastle, Australia.

**Elisabeth Syrjakow** was born in 1970 in the Federal Republic of Germany. She received the Dipl-Inform degree from the University of Karlsruhe, Germany in 1999. After that she was with the professional group Modeling and Simulation at the Institute for Computer Design and Fault Tolerance at the University of Karlsruhe. In June 2005 she received the PhD in computer science from the University of Karlsruhe. Since December 2006 she has been with the SWR Baden-Baden, Germany.

**Michael Syrjakow** was born in 1964 in the Federal Republic of Germany. He received the Dipl-Inform degree from the University of Karlsruhe, Germany in 1991. After that he was with the professional group Modeling and Simulation at the Institute for Computer Design and Fault Tolerance at the University of Karlsruhe. In February 1997 he received the PhD in computer science from the University of Karlsruhe. In July 2003 he finished his habilitation at the University of Karlsruhe about the topic “Web- and component technologies in modeling and simulation.” In September 2005 he became a professor in computer science at the Wildau University of Applied Sciences, Germany. Since September 2007 he has been a professor at the Brandenburg University of Applied Sciences, Germany.

**Heikki Topi** ([http://cis.bentley.edu/htopi](http://cis.bentley.edu/htopi)) is associate dean of business for graduate & executive programs at Bentley College in Waltham, MA. His teaching interests cover a range of topics including advanced systems analysis and design, systems modeling, and data management. His current research focuses on human factors and usability issues in enterprise systems, information search and data management and the effects of time availability on human-computer interaction. His research has been published in journals such as European Journal of Information Systems, JASIST, Information Processing & Management, International Journal of Human-Computer Studies, Journal of Database Management, Small Group Research, and others. He has been actively involved in national computing curriculum development and evaluation efforts (including IS2002, CC2005 Overview Report, and as the chair of the current IS curriculum revision project). He is a member of the ACM Education Board.
Amy Trappey received her PhD degree in industrial engineering from Purdue University, Indiana, USA. She is a professor of industrial engineering and engineering management and the director of the Electronic Business Center (EBC) at the National Tsing Hua University, Hsinchu, Taiwan. Her research interests are in the areas of e-business methodology, knowledge engineering, product lifecycle management and e-automation. She is the editor-in-chief of *International Journal of Electronic Business Management*. Dr. Trappey is an ASME fellow.

S. Vinodh is currently a PhD scholar of Anna University working in the Department of Mechanical Engineering, PSG College of Technology, Coimbatore, India. He pursued his master’s degree in production engineering at PSG College of Technology and obtained this degree recently from Anna University, Chennai, India. He studied at Government College of Technology, Coimbatore and obtained his bachelor’s degree in mechanical engineering from Bharathiar University, India in 2004. He was a gold medalist in his undergraduate study. He has been awarded Best Outgoing Student by PSG College of Technology. He has now been awarded National Doctoral Fellowship by All Indian Council for Technical Education to support his doctoral work. He has published six papers in International Journals. He has published 18 papers in the proceedings of the leading national and international conferences. His research interests include total quality management, agile manufacturing, quality information systems and computer aided design.

D. Steven White, DBA (Cleveland State University), is a full professor of marketing. His research interests include seafood marketing, international services marketing, service exporting, global entrepreneurship, international marketing, global e-commerce and international business education. He has co-authored 29 articles published in refereed journals and over 20 refereed proceedings. Professor White teaches marketing principles and international marketing at the undergraduate level and international marketing and international business at the MBA level. Prior to entering academia, Professor White managed outdoor sporting goods stores/ski shops, served as an alpine ski instructor, and was the vice president of an advertising agency.

Quangang Yang is currently a research engineer at ResMed Ltd. and a PhD candidate at The University of New South Wales, Australia. He received his MEng from National University of Singapore in 2001 and BEng at Shanghai Jiaotong University in 1991. His research interests include FEM modelling,
experimental modal analysis, multi-body dynamics, development of micro-
systems, vibration and acoustic analysis and knowledge-based system for
engineering design.

**Yin-Ho Yao** is an associate professor of industrial engineering and manage-
ment department at the Ta Hwa Institute of Technology. He received his PhD
degree in industrial engineering and engineering management from National
Tsing Hua University, Hsinchu, *Taiwan*. His research interests are in the
areas of electronic commerce applications, workflow management, service
management and CRM.
