About the Contributors

**Imran Ghani** is a Senior Lecturer at Faculty of Computing, Universiti Teknologi Malaysia (UTM), Johor Campus. He received his Master of Information Technology Degree from UAAR (Pakistan), M.Sc Computer Science from UTM (Malaysia), and Ph.D. from Kookmin University (South Korea). His research focus includes studying agile software development practices, semantics techniques, content-based, collaborative filtering techniques, Semantic Web services, semantics-based software testing, business IT, enterprise architecture, and software architecture.

**Wan Mohd Nasir Wan Kadir** is an Associate Professor of Software Engineering in the Faculty of Computing, Universiti Teknologi Malaysia (UTM). He received his BSc. from UTM, MSc. from UMIST, and Ph.D. in the field of Software Engineering (SE) from University of Manchester. He has been with UTM since 1997. He was the Head of SE Department from 2005 to 2009, and currently, he is the Deputy Dean of the Faculty of Computing. He is the Co-Editor-In-Chief of *Int. Journal of Innovative Computing* (IJIC) and *Int. Journal of SE and Technology* (IJSET). He is also the Chairman of MySEC’06, and a member of pro-tem committee of Malaysian SE Interest Group (MySEIG). He serves as a Program Committee member of ICSEA (2008-2010), APSEC (2008-2013), ICSOFT (2009-2010), ENASE (2009-2011), and MySEC (2006-2013). His research interests include adaptable software architecture, software evolution, service-oriented computing, model-driven development, software testing, and software measurement.

**Mohammad Nazir Ahmad** is currently working in the Faculty of Computing at the Universiti Teknologi Malaysia. He is a founder of the Applied Ontology and Conceptual Modeling Special Interest Group (AOCO-SIG). Nazir holds a PhD from the University of Queensland. He is a member of the Association for Information Systems (AIS) and the International Association for Ontology and its Applications (IAOA).

* * *

**Golnoush Abaei** received her B.E. in Software Engineering from Islamic Azad University, Central Branch, Tehran, Iran and the master’s degree, MCA (Master of Computer Application) from University of Mysore, Mysore, Karnataka state, India. Now she is a Ph.D candidate in University Technology Malaysia. She had worked in several software companies as a programmer, software tester, project manager and system analyst for almost four years before she started her masters. She worked in faculty of software engineering in Shahab e Danesh institute of higher education in Iran. Her research interests are software testing, software defect prediction, and soft computing.
Rodina Ahmad is an Associate Professor in University Malaya, Malaysia. She holds a PhD in software engineering from UKM, Malaysia and her Masters from Rensselaer Polytechnic Institute, USA and Bachelors from University of Hartford, USA. Her research interest lies in empirical studies of requirements engineering, and organizational Analysis (Requirements elicitation, analysis, modelling, prioritization, and evolution).

Sabrina Ahmad received Bachelor of Information Technology (Hons) from Universiti Utara Malaysia and MSc. in Real-time Software Engineering from Universiti Teknologi Malaysia. She obtained Ph.D in Computer Science from The University of Western Australia. Her specialization is in requirements engineering and focusing on improving software quality. She is currently a Senior Lecturer at the Faculty of Information and Communication Technology, Universiti Teknikal Malaysia Melaka. Her research interests include software engineering, software requirements, quality metrics, defect management and process model. She is a member of Innovative Software System and Services Research Group and Computational Intelligence and Technologies Lab in Universiti Teknikal Malaysia Melaka. She is Certified Professional Requirements Engineering (IREB CPRE -FL) and Certified Information Technology Architect (IASA CITA-F).

A. De la Rosa Algarín is a Ph.D. student of Computer Science and Engineering at the University of Connecticut, with research interests including: information and knowledge-level security and privacy enforcement, document-level information security, identity-inferred access control, knowledge modeling, and ontology engineering. He holds two majors, one in Computer Science and another in Mathematics, from the University of Puerto Rico.

AbdulRahman A. Alsewari obtained his BEng in Computer Engineering from the Military Engineering College, Baghdad in 2002, his MEng in Electronic System Design Engineering from the Universiti Sains Malaysia in 2009, and his PhD in Software Engineering from Universiti Sains Malaysia in 2012. He was a lecturer and a head of IT department in the Faculty of Engineering and Information Technology, Dar-Alsalam International University for Science and Technology Sana’a, Yemen. Currently, he is a senior lecturer in the Faculty of Computer Systems and Software Engineering. His research interests include Optimization Algorithm, Software Engineering, and Software Testing.

Pedro Álvarez received his Ph.D. in computer science engineering from the University of Zaragoza (Spain) in 2004. He has worked as a Lecture Professor at this University since 2000 and belongs to the Group of Complex and Heterogeneous Systems Integration (GIDHE). His research interests include service-based applications, business processes, and scientific workflows. More specifically, his research work focuses on integration problems of this type of distributed systems and the use of formal models (Petri nets, Linda-based coordination, etc.) for solving them. He has co-authored several publications in national and international conferences and journals and has participated in several research projects.

Adila Firdaus Bt Arbain earned her Bachelor’s Degree in Software Engineering. Currently, she is doing Ph. D in Computer Science. Her research interests include agile methodologies and secure software development.
Hishammuddin Asmuni is a Senior Lecturer at the Faculty of Computing in Universiti Teknologi Malaysia. He received his first degree in Computer Science at the Universiti Malaya in 1996 and later obtained his MSc degree in Computer Science from Universiti Teknologi Malaysia in 1999 specializing in the area of Software Engineering. After teaching for four years, he pursued his PhD at the University of Nottingham, United Kingdom in Computer Science specializing in the area of Artificial Intelligence in 2008. His current research interest includes optimization techniques particularly in parallel bio-inspired algorithm and software testing. He has also published in many reputable journals and learned conferences.

Zulkarnain Azham earned his Bachelor’s Degree in Software Engineering, Master’s Degree in Computer Science (Information Security). Currently, he is doing Ph. D in Computer Science. His research focus is on information security.

Maslita Abd Aziz is a senior lecturer at Faculty of Information and Communication Technology, UTeM. She finished her first degree at Universiti Utara Malaysia (UUM) with BSc in Information Technology (with Hons.) and later her MSc from Rochester Institute of Technology, New York, USA with MSc in Information Technology (with Hons) specializing in Software Development and Management. Her research interests are in semantic network and information retrieval, specifically on code retrieval of how to assist programmers during system development or learning the language. She is also interested in improving teaching and learning approach of programming language especially for novice learner. She is a member of Innovative Software System and Services Research Group and Computational Intelligence and Technologies Lab in Universiti Teknikal Malaysia Melaka. She is an active member as an InfoSys instructor in Malaysia.

S. Berhe is an Assistant Research Professor in Computer Science and Engineering at the University of Connecticut with research focuses mainly on fine-grained extending role-based access control to support collaborative access control as applied to the care and treatment of patients in clinical and emergent settings. Previously, he was a post-doc in the Biomedical Informatics Department at the Columbia University Medical School. Dr. Berhe has one book chapter and ten refereed conference/workshop/journal articles.

Verónica A. Bollati is a Visiting Professor at the Department of Computing Languages and Systems at the Rey Juan Carlos University sited in Madrid, Spain. She received her M.Sc. degree in Information Systems from the National Technological University, Argentina in 2002 and she got her PhD in Computer Science by the Rey Juan Carlos University in 2011. She is a member of the Kybele Research Group where leads the Model-Driven Engineering research line. Her research interests include Model-Driven Engineering, Model Transformations and Languages, Software Engineering, Tool Development, Services Engineering, etc. She has co-authored several publications in national and international conferences and journals and has participated in several research projects.

Michel Boyer is an associate professor in computer science at The University of Montreal. His research interests include theoretical computer science, and quantum information science.
Valeria de Castro is an Associate Professor at the Department of Computing Languages and Systems at the Rey Juan Carlos University sited in Madrid, Spain. She received her M.Sc. degree in Information Systems from the National Technological University, Argentina in 2002 and she got her PhD in Computer Science at the Rey Juan Carlos University in 2007. She is a member of the Kybele Research Group where she leads the Service Engineering research line. Her research interests include Services Engineering, Service-Oriented Development, Web Engineering, and Model Driven Engineering. She has co-authored several publications in national and international conferences and journals and has participated in several research projects.

João Pedro Dantas Bittencourt de Queiroz is a System Analyst at Brazilian Federal Institution. He is a MSc Student in Computer Science at Federal University of Bahia and also graduated in Computer Science at Federal University of Bahia. His current research interests include model-driven software development, service-oriented architecture and business processes modeling. He has also worked with computer graphics and augmented reality applied to medicine.

José C. Delgado is an Associate Professor at the Computer Science and Engineering Department of the Instituto Superior Técnico (Lisbon University), in Lisbon, Portugal, where he earned the Ph.D. degree in 1988. He lectures courses in the areas of Computer Architecture, Information Technology and Service Engineering. He has performed several management roles in his faculty, namely Director of the Taguspark campus, near Lisbon, and Coordinator of the B.Sc. and M.Sc. in Computer Science and Engineering at that campus. He has been the coordinator of and researcher in several research projects, both national and European. As an author, his publications include a book, several book chapters and more than 50 papers in international refereed conferences and journals.

S. A. Demurjian is a Full Professor and Director of Graduate Studies in Computer Science and Engineering at the University of Connecticut, and co-Director of Research Informatics for the Biomedical Informatics Division, with research interests of: secure-software engineering, security for biomedical applications, and security-Web architectures. Dr. Demurjian has over 150 archival publications, in the following categories: a book, 2 edited collections, 54 journal articles and book chapters, and 98 refereed conference/workshop articles.

Javier Fabra holds an Associate Professor position in the Department of Computer Science and Systems Engineering at the University of Zaragoza. He received his Ph.D. in computer science from the University of Zaragoza, Spain, in 2010. Javier Fabra belongs to the Group of Complex and Heterogeneous Systems Integration (GIDHE), where his main research areas focus on service-oriented computing and architectures, business processes and interoperability issues in distributed and flexible systems by means of the application of high-level Petri nets. He has co-authored several publications in national and international conferences and journals and has participated in several research projects.

Ramon Araújo Gomes is a System Analyst at a Brazilian National Organization. He is a MSc Student in Computer Science at Federal University of Bahia and also graduated in Computer Science at Federal University of Bahia. His current research interests include model driven software development, software testing, and business processes modeling.
**About the Contributors**

**James H. Hill** is an Assistant Professor of Computer Science at Indiana University-Purdue University Indianapolis (IUPUI). At IUPUI, he is the co-director of the Software Engineering and Distributed Systems Group. His areas of research include domain-specific modeling, system emulation, real-time software instrumentation, and performance analytics via system execution traces. He has published over 50 peer-review publications in these areas. Lastly, he is the lead architecture of the CUTS system execution modeling tool set (cuts.cs.iupui.edu), and OASIS middleware (oasis.cs.iupui.edu).

**Johannes Himmelbauer** is an industrial researcher of the Data Analysis Systems group at the Software Competence Center Hagenberg, Austria. His research interests include general machine learning and data mining techniques, in particular in the area of knowledge discovery. Amongst others, he has led projects for machine learning in steel production and in the area of regional health insurance funds. He studied Technical Mathematics at the Johannes Kepler University of Linz and holds an M.Sc. (2002) from the Johannes Kepler University of Linz, Austria.

**Weichih Huang** received his B.S. (2004) degree in National Taiwan Normal University and MS (2006) degree in National Tsing Hua University. He was a software engineer in Billion, based in Taiwan, from 2007 to 2011. Currently, he is a PhD student supervised by Dr. William Knottenbelt at Imperial College London. His research interests include self-adaptive software systems and embedded systems.

**Mohd Adham Isa** received the M.Sc in Computer Science from University Teknologi Malaysia in 2009. He is obtained his PhD degree in the same institution. His current research interests are software quality analysis, software modeling, and software measurement.

**Dayang Norhayati Abang Jawawi** is an associate professor in the Department of Software Engineering, Faculty of Computer Science and Information Systems, Universiti Teknologi Malaysia (UTM). She received her B.Sc. in Software Engineering from Sheffield Hallam University, UK, and conducted her M.Sc. and Ph.D. research in Software Engineering from Universiti Teknologi Malaysia. Her research interests are in software reuse, software quality and software testing. Currently, she is Head of the Software Engineering Department, Faculty of Computer Science and Information Systems, UTM, and a member of the Software Engineering Research Group (SERG), K-Economy, UTM. Most of her research projects focus on rehabilitation and mobile robotics, real-time embedded systems, and precision farming applications.

**Seung Ryul Jeong** received the Ph.D. degree from the University of South Carolina. He is a full professor of management information systems and the Graduate School of Business Information Technology at the Kookmin University, Seoul, South Korea. His research interests include BPM, Project Management, ERP, IS audit, and Software Processes.

**Zhi Jin** is a professor of Computer Science at the Peking University, Beijing, China. She received the MS degree in computer science in 1987 and the PhD degree in 1992, both from Changsha Institute of Technology, China. Her research interests include software requirements engineering and knowledge engineering. She has published 2 books and more than 100 referred journal/conference papers in these areas. She has won various nation-class awards/honors in China, including the Natural Science Foundation for Distinguished Young Scholars of China (2006), and the Zhongchuang Software Talent Award (1997).
Emaliana Kasmuri received Bachelor of Science Computer (Hons) and MSc. in Real-time Software Engineering from Universiti Teknologi Malaysia. She is currently a lecturer at the Faculty of Information and Communication Technology, Universiti Teknikal Malaysia Melaka. Her research interests include software engineering and mobile application development. She is a member Computational Intelligence and Technologies Lab in Universiti Teknikal Malaysia Melaka. Certified Sun Java Programmer (SCJP) and Certified Information Technology Architect (IASA CITA-F).

William Knottenbelt is a Reader in Applied Performance Modelling in the Department of Computing at Imperial College London, where he became a Lecturer in 2000. His research interests are related to the performance modelling of systems using high-level formalisms such as stochastic Petri Nets, stochastic process algebras and queueing networks. His research has been supported by three EPSRC research grants as Principal Investigator.

Marcos López-Sanz received his PhD in Computer Science from the Rey Juan Carlos University with a work on service-oriented model-driven specification of software architectures. He also received an MSc in Computer Science from the same University. His research interests include Software Architecture, Model-Driven Engineering, Service-Orientation, Software Engineering of Distributed Systems and Grid Computing, Database Design, etc. He currently belongs to the Kybele Research Group and works as a visiting teacher for the Rey Juan Carlos University. He received his BSc in IT Systems from the Polytechnic University of Madrid. He is co-author of numerous journal articles and conference papers, and has participated in many joint research projects.

Ruqian Lu is a professor of computer science of the Institute of Mathematics, Academy of Mathematics and Systems Science. He is a fellow of Chinese Academy of Sciences. His research interests include artificial intelligence, knowledge engineering and knowledge based software engineering. He has published more than 100 papers and 10 books. He has won two first class awards from the Academia Sinica and a National second-class prize from the Ministry of Science and Technology. He has also won the sixth Hua Loo-keng Mathematics Prize.

Rita Suzana Pitangueira Maciel is adjunct professor from Computer Science Department at Federal University of Bahia Brazil, holds a Master and a Doctoral degree in Computer Science, and her current research interests include model driven software development, service-oriented architecture and business processes modeling. Additionally, she has practiced application software engineering for ten years in industry.

Abdelhamid Abdelhadi Mansor is currently working as an Assistant Professor in Computer Science Department – Faculty of Mathematical Sciences University of Khartoum, Sudan. In 2000, he graduated from Faculty of Mathematical Sciences – University of Khartoum with a BSc (Honors) in Computer Science & Statistics. In 2002, he received his MSc. Degree in Networks and Computer Architecture from Faculty of Electrical Engineering – University of Khartoum, Sudan. He has a PhD. in the field of Software Engineering from the Universiti Technologi Malaysia. His research interests include Software Engineering, distributed systems, Adaptive software system and Service-Oriented Architecture.
**Esperanza Marcos** is a Full Professor at the Department of Computing Languages and Systems at the Rey Juan Carlos University, Madrid, Spain. She is the leader of the Kybele Research Group. Kybele’s main research interests include Service Engineering, Software Engineering, Model-Driven Engineering, Information Systems Development, and Philosophical Foundations on Information Systems Engineering. Prof. Marcos received a PhD in Computer Sciences from Polytechnic University of Madrid (Spain) in 1997. She is co-author of several books and she has published several book’s chapters and articles in journals and conferences. Prof. Marcos has participated and managed several research projects.

**Ana Patrícia F. Magalhães Mascarenhas** is graduated in informatics and holds master degree in Mechatronic Systems in Federal University of Bahia where she is now a PhD. student in Computer Science. She is assistant professor from Computer Science Department at University of Bahia State. Her current researches include model driven software development, specially related to model transformations, and software development processes. She has also worked for ten years in industry.

**Rafia Naz Memon** received her Bachelor’s in Software Engineering in 2006 and Masters of Information Technology in 2008 from MUET, Pakistan. She holds a Ph.D. in software engineering from UM, Malaysia and serving as an Assistant Professor at QUEST, Pakistan. Her research interest lies in requirements engineering and software engineering education.

**Manoel Mendonça** is a Professor of Computer Science at the Federal University of Bahia (UFBA). Prof. Mendonça holds a Ph.D. in computer science from the University of Maryland at College Park (UMCP), a M.Sc. in computer engineering from UNICAMP (Brazil), and a bachelor in electrical engineering from UFBA. From 1994 to 1997, he was a visiting scientist and was awarded a doctoral fellowship from IBM Toronto Laboratory’s Centre for Advanced Studies. From 1997 to 2000, he worked as a Faculty Research Associate at UMCP and as a scientist at the Fraunhofer Center Maryland. He joined Salvador University (Brazil) as a Professor in 2000. There he headed the university’s Computing Research Center and helped to create the first computer science master and doctoral programs at his home state of Bahia. From 2008 to 2009, he was the president of the Special Commission for Software Engineering of the Brazilian Computer Society (SBC). He joined UFBA in 2009. There, he has headed the computer science graduate program and software engineering lab. Since 2012, he is the Director of the Fraunhofer Center for Software and Systems Engineering at UFBA. Dr. Mendonça has published over 100 technical papers. His main research interests are on software engineering and information visualization. He is a member of SBC and ACM, and a senior member of IEEE.

**John-Jules Ch. Meyer** is a full professor of Computer Science at Utrecht University where he heads the Intelligent Systems Group. His current research interests include artificial intelligence, and intelligent agents in particular, from theory to applications. He is a Fellow of the European Coordinating Committee for Artificial Intelligence.

**Radziah Mohamad** is a senior lecturer in the Faculty of Computing, Universiti Teknologi Malaysia. She received her Bachelor of Software Engineering from Sheffield Hallam University, UK, MS, and PhD from Universiti Teknologi Malaysia. She is the referee for many scientific journals like *IET Software* and *Malaysian Journal of Computer Science*. 
Roy Morien has worked in the IT industry since January 1975, and has been a University academic since February 1985. He has qualifications in Corporate Administration and Law, Accounting, Business Management and Information Systems. During his nearly 30-year career as a University academic, he has published and presented at numerous conferences primarily on the subject of System Development methodologies, with a special interest in ‘lightweight’ methodologies. However, his interests lie in both Education and Information Systems, and the nexus between business studies and computer studies. His knowledge and understanding of Agile Methods can be traced back to his earliest days of teaching and applying systems development methods, usually on the topics of Software Prototyping, Rapid Application Development (RAD), and evolutionary and incremental approaches to system development. His academic career includes teaching in the area of Information Systems and Database development in Australia, Indonesia, Singapore, Hong Kong, and Thailand. He is currently an academic editor at Naresuan University in Thailand.

Al-Fahim Mubarak-Ali received his Bachelor of Computer Science (Software Engineering) degree from Universiti Malaysia Pahang, Malaysia in 2009 and Master of Science (Computer Science) degree from Universiti Sains Malaysia, Malaysia in 2012. Currently, he is pursuing his PhD in the area of Software Engineering in Universiti Teknologi Malaysia, Malaysia.

Noor Azilah Muda received MSc. in Software Engineering from Universiti Teknologi Malaysia. Her specialization is in soft computing area particularly in pattern recognition problems. She is currently a Senior Lecturer at the Faculty of Information and Communication Technology, Universiti Teknikal Malaysia Melaka. Her research interests include artificial immune system, data management, and software engineering. She is a member of Computational Intelligence and Technologies Lab (CIT) research group in Universiti Teknikal Malaysia Melaka. She recently has certified in IREB Certified Professional for Requirements Engineering (CPRE-FL), and since 2005, she is one of the IBM Certified Database Associates DB2 Universal Database V8.1 Family.

Thomas Natschläger is a key researcher and head of the Data Analysis Systems group at the Software Competence Center Hagenberg, Austria. His research interests include general machine learning and data mining techniques (in particular interpretable data analysis methods), recurrent neural networks and prediction systems. Amongst others, he has lead projects for machine learning in discrete manufacturing, machine learning in steel production and optimization of local weather forecasts. He studied Telematik at the Technical University of Graz and holds a M.Sc. (1996, Technical University of Graz) and a PhD (1999, Technical University of Graz) and was an associate professor at the Technical University of Graz (1999-2003).

Renato Novais is an effective professor at Federal Institute of Bahia (IFBA). He holds a D.Sc. degree in Computer Science from Federal University of Bahia. During his Doctorate, he spent a period as a visiting scientist in Fraunhofer Center for Experimental Software Engineering, MD, USA. His main research areas are software visualization, software evolution, experimental software engineering, software maintenance and reengineering, and software comprehension.
About the Contributors

Oluwagbemi Oluwatolani is a Nigerian who holds B.Sc. and M.Sc. degrees in Computer Science. She is currently pursuing her PhD degree in Computer Science at Universiti Teknologi Malaysia. As a Lecturer cum Researcher with over 5 years research and teaching experience, she has published about 20 articles in reputable journals and learned conferences, which are indexed in major computer science repositories. Her research interest is Software Processes and Testing.

J. Pavlich-Mariscal is an Associate Professor of the Pontificia Universidad Javeriana (Colombia). His research interests are access control, model driven development, code generation, and CASE tools. He has several publications about access control in conferences and journals, and has developed software for the Universidad Católica del Norte (Chile), and the Connecticut Departments of Insurance and Transportation, among others.

Manjua Peiris is a PhD student in Department of Computer Science at Indiana University-Purdue University Indianapolis (IUPUI). He is a research assistant in Software Engineering and Distributed Systems research Group. His areas of research include using system execution traces for performance analysis and developing techniques to detect software performance anti-patterns using system execution traces. He has received the BSc degree in Computer Science and Engineering (with first class honors) in 2006 from university of Moratuwa Sri Lanka and MS degree in Computer Science from Purdue University, Indianapolis in 2013.

Srini Ramaswamy earned his Ph.D. degree in Computer Science from the Center for Advanced Computer Studies (CACS) at the University of Louisiana at Lafayette in 1994. He is a member of the Society for Computer Simulation International, Computing Professionals for Social Responsibility, a Senior member of the IEEE and a Senior member of the Association of Computing Machinery (ACM). He is an active member of IEEE SMCS Technical Committee on Distributed Intelligent Systems and also serves as an Associate Editor for the IEEE Transactions on Systems, Man and Cybernetics, Part C: Applications and Reviews. In the local community, Dr. Srini Ramaswamy is currently leading Industrial Software Systems research at ABB, the Swiss Multinational Fortune 500 company at its India Corporate Research Center (INCRC) in Bangalore, India.

Rudolf Ramler is a key researcher at the Software Competence Center Hagenberg, Austria. His research interests include software testing, quality management, and software analysis. He has managed research projects on testing Web-based systems, test management, as well as the development of tools for test automation and quality monitoring. Rudolf works as a consultant in industry projects and is a lecturer at the Upper Austrian University of Applied Sciences at Hagenberg, the Johannes Kepler University of Linz, and the Vienna University of Technology. He holds an M.Sc. (2001) from the Johannes Kepler University of Linz, Austria.

Eran Rubin is currently a lecturer at the Faculty of Technology Management at the Holon Institute of Technology (HIT). His research interests include Information Systems’ value and impact, decision support systems, and systems analysis and design. Dr. Rubin has published in various journals including Information and Management, Journal of Business Finance and Accounting, Electronic Commerce Research and Applications, and Requirements Engineering. He received his PhD in Management Information Systems from the University of British Columbia.
Hillel Rubin is a Professor at the Faculty of Civil and Environment Engineering at Technion – Israel Institute of Technology, Haifa, Israel. His research interests concern Water Resources and Environmental Engineering and Systems. He received all his academic degrees at Technion, and served for several years as a visiting professor in various American Universities like University of Florida, University of Michigan, University of NY at Buffalo. Dr. Rubin has published more than 100 scientific articles in refereed journals.

Arsène Sabas is a research scientist at CanmetENERGY-Natural Resources Canada. He received his PhD in computer science from The University of Montreal. His research interests include software engineering, agent-oriented software engineering, formal methods, aspect-oriented systems, and real time multi-agents systems.

Siti Salwa Salim is a Professor in University Malaya, Malaysia. She holds a PhD in software engineering from Manchester University, UK, Masters from UM, Malaysia and Bachelors from Wichita State University, US. Her research interest lies in requirements engineering, human computer interaction, computer-supported cooperative work, component-based software development, and affective computing.

Ali Selamat has received a B.Sc. (Hons.) in IT from Teesside University, U.K. and M.Sc. in Distributed Multimedia Interactive Systems from Lancaster University, U.K. in 1997 and 1998, respectively. He has received a Dr. Eng. degree from Osaka Prefecture University, Japan in 2003. Currently, he is the Dean of Research Alliance in Knowledge Economy (K-Economy RA) UTM. He is also a professor at the Software Engineering Department, Faculty of Computing UTM. He is currently a treasurer of IEEE Malaysia Computer Society Chapter and also the auditor of IEEE Malaysia Section. He is the editors of International Journal of Digital Content Technology and its Applications (JDCTA), International Journal of Advancements in Computing Technology (IJACT), and International Journal of Intelligent, Information and Database Systems (IIJIDS). His research interests include software engineering, software agents, Web engineering, information retrievals, pattern recognitions, genetic algorithms, neural networks, and soft-computing.

Subash Shankar is an associate professor of Computer Science at Hunter College and the Graduate Center of the City University of New York. His research interests include formal methods, applied logic, software engineering, and programming languages.

Shahida Sulaiman is an associate professor of the Faculty of Computing, Universiti Teknologi Malaysia (UTM). She holds a PhD in Computer Science and Masters in Computer Science (Software Engineering in Real Time Systems). Her expertise includes software design, software maintenance, software visualisation and documentation, and knowledge management.

Sharifah Mashita Syed-Mohamad is a senior lecturer of the School of Computer Sciences, Universiti Sains Malaysia (USM). She received her PhD in software engineering from the University of Technology, Sydney, Australia in 2012. Her research interests include software reliability, software testing, software maintenance, agile development, and empirical research.
About the Contributors

William G. Tuohey, PhD, MSc, worked for many years in the European Space industry, and on civil aviation software. He had key technical roles in development of simulation software and, particularly, of on-board attitude and orbit spacecraft control software in a number of scientific satellite missions. Since 2000, he has lectured on software engineering, operations research, and applied statistics in the School of Computing in Dublin City University. His research interests are in software engineering and applied mathematics. As well as having continued concern for the effective application of software standards for critical systems, he is particularly interested in application of mathematics to improve aspects of software engineering practice.

Linda Westfall is the president of Westfall Team, Inc., which provides software engineering, software quality engineering, and software project management training and consulting services. Linda has more than 35 years of experience in real time software and has worked as a software engineer, tester, systems analyst, process engineer, quality engineer, and manager. Linda is a past chair of the ASQ Software Division and has served as the Division’s Program Chair and Certification Chair and on the ASQ National Certification Board. Linda was a significant contributor to the 3rd and 4th edition of the PMI’s PMBOK® Guide and participated in exam development for the Professional Engineer (PE) in software engineering. Linda is a PE in software engineering, an ASQ Fellow, and is an ASQ CSQE, CMQ/OE, CQA, a PMI PMP, and a Certified Scrum Master and Product Owner. Linda is the author of The Certified Software Quality Engineer Handbook.

Virginie Wiels is a research engineer at ONERA - the French Aerospace Lab. She is deputy director of the Information Modeling and Processing Department. Her research interests include formal methods, software certification, and critical embedded systems.

Zhenchang Xing is an assistant professor in the School of Computer Engineering, Nanyang Technological University. He received his PhD in Computer Science from University of Alberta, Canada in 2008. His research currently focuses on innovative human-oriented software development infrastructure and tools, sustainable software maintenance and reengineering, and reliable and secure system operation.

Nor Izzaty Yasin earned her Bachelor’s Degree in Software Engineering. Her research focus is on agile methodologies and secure software development.

Mohammed I. Younis obtained his BSc in computer engineering from the University of Baghdad in 1997, his MSc degree from the same university in 2001, and his PhD in Software Engineering from Universiti Sains Malaysia in 2010. He is a senior lecturer with the Computer Engineering Department, College of Engineering, University of Baghdad. He has been also a member of the Iraqi Union of Engineers since 1997. His research interests include software engineering, parallel and distributed computing, algorithm design, networking and security, cryptography, embedded systems, and RFID development.
Liguo Yu is an associate professor at Computer Science Department, Indiana University South Bend. He received his Ph.D. degree in computer science from Vanderbilt University in 2004. He received his MS degree from Institute of Metal Research, Chinese Academy of Science and his BS degree in Physics from Jilin University. Before joining Indiana University South Bend, he was a visiting assistant professor at Tennessee Tech University. His research areas include software coupling, software maintenance and software evolution, empirical software engineering, and open-source development. He is also interested in social network analysis, knowledge management, and complex system.

Kamal Z. Zamli obtained his BSc in electrical engineering from Worcester Polytechnic Institute, USA, in 1992, his MSc degree in real-time software engineering from Universiti Teknologi Malaysia in 2000, and his PhD in software engineering from University of Newcastle upon Tyne, UK, in 2003. Professor Dr. Kamal is currently dean of the Research in the Department of Research and Innovation. He is a senior lecturer in the Faculty of Computer Systems and Software Engineering, Universiti Malaysia Pahang. His research interests include software engineering, t-way testing, and algorithm design.

Furkh Zeshan is an Assistant Professor in the Department of Computer Science, COMSATS Institute of Information Technology (CIIT), Lahore, Pakistan. He received his PhD from Universiti Teknologi Malaysia. His specialization includes service-oriented computing, Embedded and Real-Time computing and agent-oriented software engineering.
