Appendix F

Figure F-1. 2-D animated example 1 illustrating curvilinear motion

What is Curvilinear Motion?
- Curvilinear simply means curved. Curvilinear motion is motion that does not follow a straight line.
Figure F-2. 2-D animated example 2 illustrating curvilinear motion

What is Curvilinear Motion?
- Curvilinear simply means curved. Curvilinear motion is motion that does not follow a straight line.
- In other word, a curvilinear motion is a motion along a curved path.
- We experience Curvilinear motion everyday. For Example:
  (a) Body Motion
  (b) Car negotiation a Curve
  (c) Rollercoaster Path
