Symbols

3G wireless networks 107
802.1D 52
802.1p priority 53
802.1Q 52

A

access control lists (ACLs) 88
active content verification 93
active set 241
address message 67
address translation 182
address withdraw message 68
admissions control 182
aggregated route-based IP switching 65
all-optical switches 33
applets 244
asynchronous transfer mode (ATM) 50, 63, 108
authentication 222
automatic enforcement 232

B

balancers 87
bandwidth control 182
bandwidth management 88
basic neighbor discovery 68
Berkeley Systems Development (BSD) 250
best-effort service 106
border gateway protocol (BGP) 62
bridges 18
bridging 18
byte hit rate (BHR) 238

C

cache redirection 86
cache switching 86
caching 17, 88
caching appliance 235
cachlets 244
CBTv2 62
certification authorities 227
CIPE 257
ciphers 226
circuit-switched networks 175
client multiplexing 243
client-side caching 234
clustering 15
combined input and output queuing 115
connection monitoring 92
consistency 23
constraint routed label distribution protocol (CRLDP) 70
content delivery 242
content optimized algorithms 92
content provider 235
content-aware network 86
cookies 24, 87
cooperating caches 236
cryptography 218
customer edge router 80
customer premise equipment (CPE) 57

D

data warehousing 193
delayed binding 28
delta encoding 244
denial of service (DOS) attack 88
DiffServ 79, 109
DiffServ Code Point (DSCP) 79
differentiated services 109
disk I/O overhead 241
distance vector multicast routing protocol (DVMRP) 62
DNS redirection 243
DNS server 93
downstream on demand (DOD) mode 70
downstream unsolicited (DU) mode 70

dynamic aging 239
dynamic application verification 93
dynamic content 91
dynamic host configuration protocol (DHCP) 57
dynamic pages 244

E

e-commerce 87
E-LSPs 80
element management system (EMS) 36
encryption 222
end-station tagged VLANs 53
explicit route object (ERO) 72
explicit routed hops (ER Hops) 71
exterior gateway protocol (EGP) 62

F

fail-over 23
fiber switch-capable (FSC) interface 76
fibre channel (FC) 198
fibre channel arbitrated loop (FC-AL) 201
firewall 17, 222
flow 19
flow forwarding 99
flow management 99
flow setup 99
forward error correction 132
forwarding equivalence class (FEC) 65
fragments 23
FTN 66
File Transfer Protocol (FTP) 22

G

gatekeeper 134
generalized MPLS (GMPLS) 76
generic switch management protocol (GSMP) 65
global server load balancers 87
GPL (GNU Public License) 249
GreedyDual-Size 240

H

H.323 architecture 134
H.323 gatekeepers 183
hash table 25
“hello” message 67
hit rate (HR) 238
hop count 68
http 236
HTTP redirect 95
HTTP redirection 243
Hybrid 239
Hyper-Text Transfer Protocol (HTTP) 236, 240

I

ICMP 23
incoming label map (ILM) 66
initialization message 67
integrated services 109
interactive video 175
Internet control messages protocol (ICMP) 23
Internet group management protocol (IGMP) 62
Internet transparency 29
intrusion detection 223
IntServ 108
IP address 61
IP authentication header 63
IP encapsulating security payload 63
IP multicast 182
IP over ATM 64
IP switching 61
IPSec 63, 257
ipsilon flow management protocol 65

K

“keep alive” message 67

L

L-LSPs 80
label 65
label abort request message 68
label distribution protocol (LDP) 67
label-mapping message 68
label object 72
label release message 68
label request message 68

label request object 72
label retention 70
label-switched path (LSP) 66
label withdraw message 68
lambda switch capable (LSC) interface 76
LAN emulation 65
LAN emulation 1.0 specification (LANE) 50
LAN emulation clients (LECs) 51
LAN emulation server (LES) 50
Layer 2 switches 48
Layer 3 switches 48
Layer 5-capable architectures 102
layering 2
lazy reads 242
least connection 90
least frequently used (LFU) 238, 239
least recently used (LRU) 238
LFU-DA 239
linux 249
load balancing 86
local area network (LAN) 106, 176
local server load balancers 87
loop detection 70
loose ER hops 71
lowest relative value 239
lowest-latency-first (LLF) 239
LRU-THreshold 238

M

MAC-based VLANs 53
managing risk 217
max connections 92
media gateway 138
media gateway control protocol (MGCP) 138
Megaco 133
memory-mapped files 242
MEMS (micro-electro-mechanical systems) 33
mesh topologies 35
message digests 226
message integrity 222
metropolitan area networks (MANs) 48
metropolitan networks 35
middleboxes 29
misconfiguration 218
mouth-to-ear (M2E) delay 125
MPLS-BGP 74
multilayer switching 1
multi-tenant unit (MTU) 57
multicast address 61
multicast extensions to OSPF (MOSPF) 62
multimedia over IP 175
multiprotocol label switching (MPLS) 65, 110
multiprotocol over ATM 65

N

NAT (network address translation) 15, 21, 250
network bandwidth 235
network management system (NMS) 36
next hop label forwarding element (NHLFE) 67
NML-EML communication 37
non-server load balancing 88
notification message 68

O

one-armed router (OAR) 52
open hardware certification program 252
opening shortest path first (OSPF) 62
OpenSource 252
optical network management 36
optical networking 31
optical switches 33
optical technologies 31
opto-electronic switches 33
OSI reference model 1
output buffering 115

P

packet filter 228
packet filtering 86
packet loss 125
packet network impairments 146
packet sniffers 250
packet switch-capable (PSC) interface 76
path vector 70
per hop behavior (PHB) 79
performance optimized algorithms 91

persistence optimized algorithms 92
persistent connections 241
port-based VLANs 53
privacy 220
protocol independent multicast-sparse mode (PIM-SM) 62
protocol-based VLANs 53
provider router 81
provider edge router 80
proxy 17
proxy caches 235
proxy server 228
public key cryptography 226

Q

QoS mapping 111
QoS policies 119
QoS support 114
quality of service (QoS) 63, 106, 176, 250

R

rate shaping or limiting 88
real IP address 89
real-time control protocol 136
real-time transport protocol (RTP) 136
record route object (RRO) 72
replacement algorithm 237
resource reservation protocol (RSVP) 109, 257
reverse proxies 236
round robin 90
round-robin load-balancing 26
routers 61, 109
routing 16
routing information protocol (RIP) 62
RSVP-TE 72
RSVP-TE path message 72
RSVP-TE resv message 72

S

scalability 15
secondary storage 236
security 185, 217
security administration 223
security policies 228
server accelerators 236
server load balancing 86
server-side caching 236
session attribute object 72
session initiation protocol (SIP) 136
session-id 24
shopping cart sessions 91
signaling gateway 139
slow-start 241
smart firewalls 231
SONET (synchronous optical network) 34
SSL 24
Stallman, Richard 249
statistical multiplexing 106
storage network 199
storage or system area network (SAN) 192
strict ER hops 71
switch routers 18
switched virtual circuit (SVC) 51
switches 15, 110
synchronous digital hierarchy (SDH) 34

T

targeted advertisement 245
targeted peer discovery 69
TCP/IP packets 235
TCP/IP protocol suite 87
termed dense wavelength division multiplexing (DWDM) 32
threats 218
time division multiplex (TDM) capable interface 76
Torvalds, Linus 249
TOS 257
traffic engineering 45, 72
traffic management 86
translation 19
transparent caches 88
transparent proxies 20, 235
triangulation 96
troubleshooting TCP/IP 30

U

unicast address 61
URLs 235

V

video over IP 175
video-enabled endpoints 182
virtual IP address 20
virtual LANs 48
virtual output queuing (VOQ) 115
virtual private network (VPN) 48, 63
virtual servers 20
voice over IP (VoIP) 123, 144
VPNs 229, 257

W

Web caching 234
Web servers 234
Web switching 86
weighted least connections algorithm 90
weighted round robin (WWR) 90
wide area networks (WANs) 176
World Wide Web 234
