

## Acknowledgment

The completion of this book involved the cooperation of many colleagues on both the local and global level. It was not always easy to coordinate everyone's efforts towards one common goal. The editors would like to express their profound gratitude to each and every individual involved in this project. First of all we would like to thank the contributors for the interesting results presented and for their patience throughout the process of preparing this book. We are also grateful to our technical coworkers Pavlína Čížková, MSc. Filip Gyenes, MSc. and, Nela Dosedělová, MSc. as well as to proofreader Fernando Villanueva, MSc. and translator Jan Krch, MSc. Without financial support the preparation of this book would not have been possible, and for that we owe our thanks to the Ministry of the Environment of the Czech Republic. The authors of the respective chapters have each mentioned the grant support for their contributions.
