Symbols

1/f fluctuation 1163, 1167
2D breathing template 418
3D medical image registration 1
4D medical image registration 1–9

A

ABC approach 10
abstinence 11
accessory pathway (AcP) localization method 919
acoustic features 17
acoustic quantification (AQ) 1376
acoustic speech analysis (ASA) 16
act utilitarianism (Act U) 536
Active appearance models (AAM) 1374
active appearance models (AAM) 473
active tags 895
activity of daily living (ADL) 620
actor-network theory (ANT) 24
acupuncture 232
acute myocardial infarction 838–843
adaptive mesh refinement algorithm (AMRA) 1253
adaptive structuration theory (AST) 574
admission, discharge or transfer (ADT) events 562
agent based model (ABM) 1189, 1317
agent based simulation 649
agent scheduling system design 47
agent specifications 47
agent systems, definitions 46
agent-based patient scheduling 46–53
agents, communication patterns and utilities 48
agents, optimization and scheduling 50
aging in place, emergin technologies 513–518
Alzheimer's disease 1146, 1151, 1152
Alzheimer's disease (AD) 603–609
ambient intelligence 1407, 1410
ambulance emergency services 203
ambulant mental healthcare centers 1071
ambulatory care module (ACM) 1087
anti retroviral treatment 977–981
anti-inflammatory foods 233
antioxidants 234
aphasia 1153
applying social network analysis 93
appreciation level classification 109
apraxia 1153
arcing 984

arrhythmia detection 115–121
Arruda algorithm 920
Arruda's accessory pathway localization method 918
ART program 978
artifact detection methods 86
artifact rejection method 85
artificial neural networks (ANNs) 1261, 1262, 1306, 1309
artificial variability 1131, 1135
asymmetric information 1057
ATM networks 130–133
ATM uses 131
ATM advantages 132
ATM, categories of services 131
ATM complexity 132
atrial fibrillation (AF) 134
auto mutual information (AMI) 1146, 1147
automatic border detection (ABD) 1376
availability motive 905–912
aviator monitoring wearable platform (AMWP) 779

B

Balanced Scorecard (BSC) 942
balancing the capacity in health care 141–148
batching 1081
bio-instrumental system (BIS) 251
biomedical data warehouses 149–156
biomedical engineering research 534–540
biomedical signal compression 157–166
bionanotechnology 331
bionanotechnology and society 333
bionanotechnology in healthcare and society 331–338
bionanotechnology in healthcare, role 331
bionanotechnology, applications 368, 972–976
bionanotechnology, current state 368–374
bionic eye 998–1003
biosensor, basic structure 168
biosensors 167–172
biosensors, classification 168
biosensors, current and future developments 168
blood pressure estimation 173–180
blood-glucose control 1210
body area networks (BANs) 266
body mass index (BMI) 452
body sensor networks (BSNs), progamming 1101–1110
body surface potential mapping (BSPM) 1261
body suspension device 553
body suspension device (BSD) models 440
bone mineral density (BMD) 181
bone strength assessment 181–187, 184
bone tissue engineering advances 38–45
boosting 983
boundary element method (BEM) 1248, 1252
brain intensive therapy 740–744
brain intensive therapy (IT) 740
brain IT, information processing 741
brain-computer interface 1153, 1159
breathing behavior, analysis 417
bullwhip effect in hospitals 1077–1084
bullwhip effect, causes and strategies 1081
bullwhip effect, defined 1077
business analytics (BA) 56
business model (BM) 1185, 1188, 1189, 1323
business process re-engineering (BPR) 849

C

CAD diagnosis, application 393
caged neurotransmitter, photolysis 999
Canadian health record interoperability infrastructure 188–193
Canadian health record system 188
cardiac autonomic neuropathy (CAN) 275
cardiac output 1331, 1332, 1337
cardiac preload 1331, 1337
cardiac rhythm management (CRM) 1324, 1330
cardiovascular datamart 152
cardiovascular diseases (CVDs) 391
cataract surgery 1121
cataract surgical selection, a study 1111–1124
causal loop diagrams (CLD) 143
CDSS development 355
CDSS evaluation 355
CDSS framework 353
CDSS integration and adoption 355
cell model 1253, 1254
central patient repository (CPR) 764
central venous pressure (CVP) 1331, 1332, 1333, 1337
cerebral aneurysm 1153
cerebral blood flow (CBF) 519
cerebral blood volume (CBV) 519
cerebral palsy 1153
CheckSite 1195
classification of interdependencies 855
clinical data 771
clinical decision making by ER physicians 217–223
clinical decision support systems (CDSS) 56, 217, 352–358, 768

clinical decision support using clinicogenomic profiles 770
clinical document architecture (CDA) 1035
cognitive dissonance theory 1294
cohesive business model (CBM) 961
coiled antenna 895
command decision making (CDM) 1189, 1318, 1320
communication standards 814
community healthcare integrated networks (CHINs) 1345, 1347
complex datamart 152
compulsory continuing medical education (CME) 1024
computational intelligence (CI) 261
computed tomography (CT) 1, 34
computer-aided design (CAD) 1175, 1176, 1178, 1179, 1180, 1182
computerised provider order entry (CPOE) systems 505
computerized physician order entry systems (CPOE) 56
condoms 12
consensus-seeking rules (CR) 1189, 1190, 1323
constant bit rate (CBR) 131
constraint-induced movement therapy (CIMT) 785
consumer health literacy improvement with IT 711–719
contemporary home-care 1032–1040
context-based adaptive lossless image coding (CALIC) 472
context-based adaptive lossless image compression (CALIC) 239
continuing professional education (CPE) 1025
continuity of care record (CCR) 1034
continuous glucose monitoring systems (CGMS) 754
continuous subcutaneous insulin infusion (CSII) 754
control system professional suite (CSPS) 1210, 1218
coordination theory 851
coronary artery disease (CAD) 391
coronary doppler flow velocity 281
coronary flow reserve (CFR) 281
coronary flow velocity profile 283
cost motive 906
cost-sensitive fuzzy classification 298
CPOE on pathology processes 506
Crohn's disease (CD) 884
cross approximate entropy 76
cross approximate entropy analysis 75
cross product marketing 70
cross-modal interaction 595
cross-mutual information (CMI) 1147
cultural relativism (CR) 535
current conveyor + load-in-the-loop 365
current conveyors 362
current-based structures 362

D

data bootstrapping 985
data disparity in the system-of-systems approach 565
data grids 63
data management, functional requirements 806
data mining in clinical care 70
data mining in health care administration 71
data mining in health insurance plans 69
data mining in healthcare industry, applications 68–73
data model 1412, 1416
data processing 772
data recharging 64
data silos 565
database implementation 1051
database management system (DBMS) 1412
decision based support system 383–390
decision support in cancer 768–776
decision support system (DSS) 1412
decision support systems for cardiovascular diseases 391–399
defibrillation 1330
deformable image registration 4
delivering m-health excellence 339–351
delta coding 158
dementia care training project 225
demographic inconsistencies in healthcare environments 561–572
density distribution in the head 483
dental supply e-commerce infrastructure, planning 304
dental supply e-commerce solution 304
dental supply industry 303
dental supply online store, creating 303–317
dental supply online store, marketing 303–317
dependency index 1384, 1385, 1387
device integration 1230, 1232, 1233, 1234
diabetes control and complications trial (DCCT) 754
diabetes detection, computational methods 274–280
diabetes mellitus (DM) 754

diabetic retinopathy, analysis 275
diagnostic assistance through dynamic taxonomies 632
DICOM 563
DICOM to XML conversion 567
diet monitoring software 452–464
diffusion tensor estimation 624
digital disparities 680
digital divide 1349, 1350, 1355, 1356
digital imaging and communications in medicine (DICOM 814
dimensional reduction by heuristic multivariate analysis 589
dimensional reduction by unfolding multivariate analysis 590
discrete event simulation 648
disease management 71
dissimilar resource contribution 733
distance determination 254
distributed algorithmic and rule-based blackboard system (DARBS) 467
distributed medical image and volume registration 465–471
divine command theory (DCT) 535
documentation system 1229
dynamic multileaf collimator (DMLC) technique 1017
dynamic taxonomies 631
dynamic taxonomies vs. decision trees 633
dynamical system simulation 649

E

ECG analysis 1267
ECG assessment 276
echocardiogram 1377
echocardiographic image sequence compression 472–479
EEG recording 604
EEG, forward problem 1248, 1252
EEG, inverse problem 1247, 1249, 1250, 1251
e-health 1235, 1338, 1339
e-health business model 326
e-health research 542
e-health services usage, findings 541–550
e-health solutions, potential 678–685
e-health sustainability 327
e-health sustainability, key elements 327
e-health, sustainability and feasibility 325–330
elbow electrogoniometer 554
elder functions 619
elderly care services, production management 1093–1100
electrical bioimpedance (EBI) 480
electrical bioimpedance cerebral monitoring 480–486, 483
electrical bioimpedance spectroscopy 359–367
electrical impedance spectroscopy (EIS) 487–496
electrical impedance spectroscopy analysis 481
electrical impedance tomography 481
electrical impedance tomography (EIT) 480
electrocardiogram (ECG) 115
electrocutaneous display design 499
electrocutaneous stimulation of skin mechanoreceptors 497–504
electrode-electrolyte interface in microbiology 490
electroencephalogram (EEG) 84, 740, 1152, 1286, 1293
electroencephalography (EEG) 931
electrogram (EGM) 1324, 1329, 1330
electromyographic unit 1390
electromyography (EMG) 595
electromyography (EMG) signal 965
electronic article surveillance (EAS) 1208
electronic data interchange for administration, commerce and transport (EDIFACT) 814
electronic health record (EHR) 188
electronic healthcare record (EHR) 561
electronic healthcare record security, influences 574
electronic medical record systems adoption, challenges 194–200
electronic medical records (EMR) systems 55, 194
electronic medical records system (EMR) 1085–1092
electronic product code (EPC) 1208
electronic test management systems 505–512
elements of an activity 852
EMG prosthetic hand with biofeedback 594–602
emotional intelligence competence 1168
emotional state detection 255
EMR components 1086
EMR overview 1086
enhanced rheoencephalograhy 519–526
enhanced rheoencephalography, mathematical formulation 520
environmental training 1315
EONS, modeling diffusion 530
EONS, online synaptic modeling platform 527–533
epidemiology 70
e-prescription module (EPM) 1087

Euro-Mediterranean Internet-Satellite Platform for Health, Medical Education and Research (EMISPHER) 1349, 1350, 1351, 1352, 1356
event-related potentials (ERP) 1247, 1248, 1249, 1250, 1251, 1252
evidence-based medicine (EBM) 1351
expectancy-value behavior 1302
expectancy-value theory 1294
expression-building software 1153
extended model 914
external cardiac massage performance 551–560
EZW algorithm 1004
EZW in signal 1005

F

false positive rate (FPR) 1395
FCM with spatial and gray level constraints 580
feasible bone tissue engineering process 40
feature selection in pathology detection 587–593
features selection 1064
feminization of HIV/AIDS 10–15
fibrillation 1327, 1328, 1329
finite element method (FEM) 528
flow of an emergency department, evaluate 913–917
fluctuation of working memory resource capacity (FLOWM) 1164–1167
fMRI acquisition 501
f-MRI study 594–602
focused shock waves (FSW) 1125
fractal dimension 604
fractal dimension of the EEG in Alzheimer's disease 603–609
fraud detection 69
free radicals 234
functional magnetic resonance imaging (fMRI) 1286, 1288, 1289, 1290, 1291, 1292, 1293
fused deposition modeling (FDM) 31
fuzzy clustering using spatial constraints 579
fuzzy c-means (FCM) algorithm 578
fuzzy c-means algorithms 578–586
fuzzy reasoning 298
fuzzy rule generation 298
fuzzy rule-based classification 297

G

Gait Analysis 1390, 1391, 1397
gait characteristics and tripping 425
gait modifications associated with aging 427
gait modifications associated with sloped surfaces 427
gait pattern detection 425–433
gastrointestinal (GI) tract 860
gastrointestinal capsules for digestion 884
gastrointestinal endoscopic procedures 860–865
gene selection 125
genomic data 771
geographical information systems (GIS) technology 383–390
glucose modeling 755
Gram Schmidt orthogonalization 625
graphics processing unit (GPU) 1256, 1258, 1260
Greek municipalities' citizens, healthcare training 662–669
grounded theory approach 1398, 1400, 1404
guided interactive diagnostic assistance 631–635

H

hand sign recognition system 256
haptic hardware 638
haptic perception 637
haptic rendering 636–645
haptic software 639
hardware-based system components 64
health care facilities, financing 436
health care marketplace, stakeholders 672
health care sensor research initiatives 267
health care supply chain, characteristics 696
health disparities, overcoming 681
health disparities, overview 678–685
health disparities, scientific evidence 679
health informatics, and the Semantic Web 658
health information access layer (HIAL) 190
health information management system 63
health information system (HIS) 561, 977
Health Insurance Portability and Accountability Act of 1996 (HIPAA) 574
health insurance, costs 292
health level 7/clinical document architecture, (HL7/CDA) 814
health level seven (HL7) 562
health systems simulation 646–655
healthcare costs 292
healthcare delivery, costs and new technologies 290
healthcare information systems (HIS), monitoring 941–949
healthcare integrated delivery system (IDS) 1269
healthcare professionals (HCPs) 1398, 1406
healthcare system stakeholders, concerns 1
heart model 1253, 1256
heart rate variability (HRV) 277
heart simulation 1258, 1264

hemophilia 1398–1406
heterogeneous quality information in healthcare 670–677
hidden Markov models (HMMs) 472
High Altitude Electromagnetic Pulse (HEMP) 1384
high frequency range (long range) 896
HIPAA security rule 869
HL7 to XML conversion 567
Home Area Network (HAN) 1407, 1411
home health care companies in Greece 667
hospital information system (HIS) 807
hospital pathology laboratory services 505–512
hospital strategy 1315
hospital strategy via improved workflow 1041–1047
hospital-acquired infections (HAI) 487
Howland source 360
Huffman coding 158
human-shaped phantom 953
hybrid multidimensional analysis 587
hypermedia 1303, 1306, 1309
hypernasality detection in children 16–22
hypogravity simulation 440–445, 551
hypopnea 610

I

ICT adoption in general practice 23–29
ICT project success in health care 346
iDARBS framework 467
idealized medical search engine 874
IDEF0 852
IDEF0 limitation 856
IIFNNT architecture 726
ILIA1 721
ILIA2 721
image preprocessing 283
image registration 1241, 1243, 1244, 1245, 1246
image segmentation 2
impedance microbiology 488
implantable cardioverter defibrillator (ICDs) 950
improving outpatient adherence 821
IMRT+e methodology 1017
in vivo measurement 1365, 1366, 1367, 1368, 1370, 1371, 1372, 1373
incremental interference-free neural network training (IIFNNT) 720
independent component analysis (ICA) 84, 85, 116
independent life of the elders, maintaining 618–622
inflammation and foods 233
information model 1412, 1413
information quality 1311
information systems 1315, 1316
information systems resource contribution 732–739
information technology for planning and control 1070
initial feature space 19
input-output inoperability model (IIM) 1384
insulin metabolism models 754–762
intelligent sensor network systems 268
intelligent software agents, integration 893
intelligent wearable platform 778
intensity modulated radiation therapy (IMRT) 181
intensity-modulated radiation therapy (IMRT) 1016
intensive care units (ICUs) 435
interaction model 190
interdependency 1383, 1388
interference table 723
interference-free partitioning algorithm 724
international joint venture (IJV) 734
interoperability standards 190
interorganizational network 1269, 1270, 1271, 1274, 1276
interpretative layer 713
intravenous cannulation 1333
inverse electrocardiography 1253, 1267
IT controlling 941
IT standards in healthcare 813
IT-based virtual medical centres 803–812

J

JADE 1230, 1231, 1232, 1233, 1234, 1235

K

Kantianism 535
k-nearest neighbor classifier 117
knowledge base module (KBM) 1087
knowledge management 839
Kuopio University Hospital (KUH) 831

L

Länder 3, 4, 5
laparoscopic surgery simulation 636–645
laparoscopic tools for surgery 885
layers of encryption 901
lean thinking in hospitals 210
learning algorithm 299
Leontief matrix 1384, 1385, 1386
liability profiling 70
lossless compression 157
lossless image compression algorithms 238–243
lossy compression 159

low frequency range (short range) 896
low level laser therapy (LLLT) 232

M

magnetic resonance imaging (MRI) 950, 1286, 1290
magnetic resonance spectroscopy (MRS) 1286
magnetoencephalogram (MEG) 84, 1146, 1152
magnetoencephalogram recording 85
magnetoencephalographic data, spatial filtering 931–940
magnetoencephalography (MEG) 931
majority rules (MR) 1323
MANOVA progressive approach 589
marketing strategy for the e-commerce site 312
master controller system 862
master-slave robotic system 860
Mathematica 1210, 1219, 1210, 1211, 1213, 1216, 1217, 1218, 1219
Matlab 1210, 1211, 1213, 1219
mean arterial pressure (MAP) 173
mechanical ventilation 1277, 1278, 1279, 1282
mechanoreceptors 498
medical billing and receivables module (MBRM) 1087
medical databases 870
medical disaster management 1303, 1304, 1308, 1309
medical IT systems 434–439
medical model of pain management, traditional 232
medical practitioner's subsystem 765
medical privacy 866–872
medical privacy legislation 867
medical search engines 873–881
medical tourism 905–912
medical tourism, United States 907
medication monitoring systems, integrating 763–767
MEDLINE search, parallel architectures 1048–1055
mega-voltage CT (MVCT) 1
mental health knowledge management 376
methodological individualism (MI) 1190
microarray data classification 982–989
microarray time series, content assessment 122–129
microarrays, statistical selection of genes 123
microbial biofilm formation 491
microbial solution, bulk properties 489
minimal invasive surgery (MIS), in Hirschsprung's patients 882–889
minimal invasive therapy (MIT), in Hirschsprung's patients 882
MIS/MIT techniques and tools 883
mobihealth 266
mobile emergency triage (MET) 218
mobile healthcare solutions, value of 821–829
mobile solutions to improve outpatient adherence 824
mobile telemedicine 201–209
mobility choice 825
model, defined 942
modified Arruda algorithm 921
molecular diffusion 529
monitoring 941
motion analysis lab (MAL) 1390
motives of Americans to become a medical tourist 907
movement-based subject state identification system 253
MR safety 500
MRI induced heating on pacemaker leads 950–957
multi-dimensional modeling in the health industry 958–964
multi-expert system (MES) 1179, 1180, 1182
multilayer perceptron 117
multimodal registration 1241, 1245, 1246
multiple instruction multiple data (MIMD) 465
multiresolution decomposition (MRA) 1248
multivariate analysis 17
multivariate data 1358, 1363, 1364
mutator genes 772
mutual information (MI) 1147, 1152
myoelectric control of prosthetic devices 965–971
myoelectric signal (MES) 965

N

nanodiagnosis 369
nanorobotics 972–976
nanorobotics, current developments 973
nanorobotics, future applications 974
nanorobots, architecture 972
nanotherapeutics 369
nasal emission 17
nasalization model 17
national health information network (NHIN) 869
national health information network initiative 866–872
natural photoreceptive protein expression 1000
natural variability 1135
near infrared 1365, 1366
negative impedance converters 364
networks of action 977
networks of action, establishing 979

neural network module 757
neural network training for medical diagnosis 720–731
neural network, interference-free 721
neural networks 1064
new healthcare systems, costs 293
new healthcare technologies 1056–1060
non-contact bio-instrumental system 251–260
nonlinear analysis of HRV 278
novel lithotripter 748
nursing minimum data set (NMDS) 1220, 1223, 1229

O

object oriented (OO) technology 1338, 1339, 1341, 1343, 1345, 1348
obscure gastrointestinal bleeding (OGIB) 884
obstructive sleep apnea (OSA) syndrome 74, 610
oncological network 808
online courses, advantages 1026
online dementia care training 224
online marketing campaigns 313
online nurse education 1024–1031
operating room cost 830
operating room time forecast (F) 831
operating theatre waiting list (OTWL) 844–859
optic disc boundary detection 276
optic disk (OD) 276
optimal cluster size 1052
organizational performance 108–114
organizational performances comparison 110
osteoporosis 446–451
osteoporosis, diagnostic technologies 448
osteoporosis, health informatics 449
osteoporosis, therapeutic technologies 448
OTWL activities 844
OTWL process mapping 847
overall robotic system 860
oximetry studies 75
oxygen desaturation indexes (ODIs) 74

P

pacemaker (PM) 950
pain management, diet and nutrition 232
parallel distributed processing (PDP) simulator 1064
paramedic knowledge for treatment of acute myocardial infarction 838
parameters extraction 284
particle swarm optimization (PSO) technique 173
passive tags 896, 1207, 1208
pathology 447
patient medication and health monitoring system (PMHMS) 763
patient profiling 70
patient registration module (PRM) 1086
patient resident time (PRT) 1130, 1131, 1135
patient safety 516
patient to doctor profiling 892
patient tracking applications 206
patient-centered e-health, creating 318–324
patients' interaction needs, analyzing 320
PDA-based telemedicine applications 205
perceived behavioral control 1295, 1296, 1301
performance reliability 1169, 1171, 1172, 1173
performance-oriented diagnosis-related case groups (PODRG) 5
pharmacokinetics 1365, 1368, 1370, 1373
photonic retinal prosthesis 999
photo-plethysmography (PPG) 173
picture archive and communication system (PACS) 561
picture archiving and communication systems (PACS) 1041–1047, 1311–1316
piezoelectric extracorporeal lithotripter 745–753
planned behavior model 401, 1294, 1295, 1297
planning tool and care programs 1070
plethysmograph 1333
PMHMS subsystems 764
policy holder retention 69
polysomnography (PSG) 610
polysomnography (PSG), drawbacks 611
polysomnography studies 75
populomics 1074–1076
populomics, defined 1075
positive predictive value (PPV) 1395
positron emission tomography (PET) 1
prescription and pharmaceutical applications 207
primacy of knowledge 375–382
principal component analysis (PCA) 84, 624
probe positioning 952
process definition language (PDL) 1412
process level benefits of electronic medical records system 1085–1092
process level benefits, analysis 1088
process-based systems 375
production management in health care 1094
production management, case Helsinki 1095
profile matching 893, 1271, 1276
prosthesis description 1001
prosthetic devices for rehabilitation 965–971

protein drug 1365, 1366, 1368, 1370, 1372
protooncogenes 772
prototype implementation 51
pulse wave velocity (PWV) 173
p-wave morphological features 134–140
p-wave, morphological analysis of 135

Q

quadratic loss function (QLF) in healthcare 102–107
quadratic mirror filters (QMF) 1004
quality information, defined by health plans 673
quality of life scales 1116
quality of life, predicting 1120
quantitative gait analysis 1391, 1397

R

radial basis function 117
radio frequency identification (RFID) 1191–1199
radio frequency identification device (RFID) 866
radiofrequency (RF) pulse 40
radio-frequency catheter ablation 922
radiotherapy technique 1016–1023
randomised control trials (RCT) 647
rapid prototyping technologies 31
Rawl's theory of justice (John Rawl) 537
real time pilot's health telemonitoring 777–784
reasoned action model 400, 1294, 1295, 1297
recommended dietary allowance (RDA) 454
record information system (RIS) 561
reference (fixed) image 1241, 1246
REG modeling 991
rehabilitation engineering 1159, 1160
reject option 1177, 1179, 1182
remote health establishments, categories 61
respiratory pattern variability 1277, 1278, 1281
retained scenario integrating RFID technology 700
retinal image dataset 239
RFID applications 696
RFID description 894
RFID initiatives in the healthcare space 707
RFID specifications 707
RFID technical fundamentals 706
RFID technology impact on health care organizations 695–704
RFID technology, implementing in hospitals 705–710
RFID transponder programmers 898
RFID transponders, types 895
rheoencephalography (REG) 990
rheoencephalography, new perspectives 990–997
rights theory (John Locke) 537
rigid image registration 2
role-enabled device 1230, 1235
rule utilitarianism (Rule U) 536
run-length coding 157

S

Saint Mary's Hospital's service value chain 1078
SAV reduction 1057
search engine implementation 1049
security postcondition 1237, 1239
security precondition 1237, 1238, 1239
security reasoning engine 1240
security risks in healthcare systems 573–577
security-aware service 1236, 1239
self organising map (SOM) algorithm 781
self-perception theory 1294
Semantic Web 656
semi-active tags 895
semi-passive tag 1208
sensed (moving) image 1241, 1246
sensor measurements 269
sensor networks (SN) 261
sensor networks for biomedical systems 261–273
shock wave lithotripsy (SWL) 745
shock wave therapy (SWT), development 1125–1129
shock wave therapy, new opportunities 1126
similarity metric 1241, 1242, 1243
simple datamarts 151
simulated DT-MRI dataset, generating 623–630
simulation challenges 650
simulation validity 651
single instruction multiple data (SIMD) 465
single nucleotide polymorphisms (SNPs) 771
single op-amp basis 364
single photon emission computed tomography (SPECT) 1286, 1287, 1288, 1293
single-modal registration 1241, 1242, 1246
slave manipulator 861
sleep apnea diagnosis, info. processing 610–617
sleep apnea, definition 610
small and medium-sized enterprises (SMEs) 732
small area variations (SAVs) 1056
SNA at a medical center 95
snore sounds 612
social contract theory (SC) 536
social network analysis (SNA) 93
social network analysis (SNA) use in healthcare 94
sociotechnical systems (STS) theory 850

sociotechnical systems framework (STS) 1137, 1138
software control 864
spatial frequency 1248, 1252
spatial parallelism 1049
spatial resolution in EIT 484
spatial transformation 1241, 1246
speckle noise 1374
sphygmomanometer 1332
spontaneous breathing 1277, 1278, 1281
spring-network model 183
SSS domain, modified beamspace in 933
step length estimators comparison 245–250
stock/flow diagrams (SFD) 143
strategic fit 1269, 1270, 1271, 1273, 1274, 1275, 1276
strategic information system planning (SISP) 958
stroke volume (SV) 173
structuration theory (ST) 574
structured query language (SQL) 1036
subjective relativism (SR) 534
subtopography 1252
superior pain management strategies 231–237
support vector machine (SVM) 1262, 1277, 1280, 1283, 1284, 1285, 1286, 1287, 1288, 1289, 1290, 1292, 1293
support vector machine (SVM) classifiers 263
suppressor genes-anticogenes 772
synthetic DT-MR dataset, creating 625
synthetic photoswitch 1001
system quality 1316
systemic interoperability 1142
systemized nomenclature of medicine (SNOMED) 816

T

tachycardia 1324, 1327, 1330
technology acceptance model 402, 1294, 1296, 1297, 1298, 1299, 1301, 1302
technology readiness concept 400–415
technology readiness model 406
technophobia 195
telehealth 1304
telemedicine 1303–1310, 1338, 1339, 1347, 1349–1356
telemedicine 435
telemedicine in space 204
telesurgery 435
temporal parallelism 1049
text simplification 713
text visualization 714
three-dimensional conformal radiotherapy (3DCRT) 1016
throughput flow 1139, 1140
timeliness motive 906
tissue engineering (TE) 30
tissue engineering of heart valves 30–37
torso model 1253, 1254
total quality management (TQM) 141
tourism motive 907
transceivers 897
transconductance amplifiers 362
transcranial doppler (TCD) 1286, 1293
transcutaneous electrical nerve stimulation (TENS) 232
transfer of patient records 566
transthoracic doppler echocardiography 282
transthoracic doppler echocardiography limitations 283
triage 1139, 1140, 1141, 1145
Type 1 diabetes 754
Type 1 diabetes mellitus (T1DM) 754
types of data 771
tyrolean concept of an oncological network 808

U

ultrasound imaging 1331
unified medical language system (UMLS) 874
unified modeling language (UML) 1401, 1405, 1406
unified neural network (UNN) 1263
unplanned surgery 686
unplanned surgical cases, improvement 686–694

V

validation protocol 285
ventricular fibrillation (VF) 918
video game-based exercise tool 786
video game-based tool 787
video game-based tool for dynamic rehabilitation movements 785–791
Virtual Euro-Mediterranean Hospital (VEMH) 1350–1356
virtual hospital 1350
virtual medical centre model 804
visual methods 1357, 1358, 1362
visualization pipeline 1357, 1361
voltage-based structures 360
volumetric analysis 1374–1382
VSQ scale 1117

W

walking pattern evaluation system 440–445
waste classification 211
waste in hospitals, classification 210–216
waste minimization strategies 213
watermark extraction process 1009
watermark insertion process 1007
watermarking algorithm 1005
wavelet analysis 117
weaning trials classified with neural networks 1061–1067
wearable health care systems 1391
wireless communication 202
wireless data grids for health informatics 61
wireless protocols and standards 264
wireless sensor networks (WSNs) 1101, 1407, 1408
wireless sensor networks for health care 264
wireless telemedicine 201–209
Wolff-Parkinson-White (WPW) syndrome 918, 1263, 1264, 1266, 1267, 1268
workflow management module (wmm) 1087
workflow management system (WFMS) 1343, 1348
workflow management system (WfMS) 1412–1416
WPW syndrome analysis 919

X

X-PDL 1412, 1415, 1416
