## Symbols

4G wireless mobiles 354–367

## A

Addenbrooke's Hospital 105  
 android mobile 189  
 antenna systems 21  
 Anti-Phishing Working Group (APWG) 390  
 Austria, and Coca Cola 276  
 authentication 389  
 authentication, and CLEW 393  
 authentication, multi-factor 392  
 authentication, out-of-band 392  
 authentication, single-factor 391  
 authentication, through mobility 393  
 authentication, two-factor 392  
 authentication solutions 391  
 autonomy 478  
 average revenues per user (ARPU) 46

## B

bandwidth 542  
 binding messages 427  
 broadband wireless communication systems 354  
 business intelligence 434  
 business process modelling notation 74  
 business understanding 432  
 business value, and mobile technologies 1–11

## C

caching 521  
 cardholder not present (CNP) fraud 389  
 CASDPF 194–199  
 cell broadcasting (CB) 375  
 cellular networks 376  
 CLEW 393  
 Coca Cola 276  
 collaboration 624

collaborative business model 151  
 collaborative business process engineering (CBPE) 622–632  
 collaborative organizations, and the use of SOA 505  
 collaborative Web-based system 73, 83  
 composite process, limitations of 196  
 composite process-personalization (CPP) 226–244  
 composite web services 88  
 consumer trust 306  
 context, definition of 33  
 context-aware mobility solutions 38  
 context-aware systems, generalized architecture of 34  
 context aware mobility management 33–44  
 cooperative game theory 13  
 cultural impacts on mobile commerce 245–259  
 culture 245  
 culture, quantifying 246  
 customer identification 391  
 customer interaction 95  
 customer relationship management (CRM) 104, 399  
 cyber fraud 389

## D

data broadcast 378  
 data management 98  
 data theft 390  
 datum concept 115  
 denial of service (DOS) attack 426  
 direct marketing 269, 338  
 disruptive technologies 3  
 distance shopping 284  
 DSCDMA 456

## E

e-book mobile payment process model 127–138  
 e-health 572

e-readiness 254  
 eInfoC 127  
 elasticity of demand 3  
 electronic business transitions 64  
 electronic manufacturing services (EMS) 53  
 electronic matrix 119  
 employee rosters, creation of 85  
 enterprise application integration (EAI) 499–517  
 enterprise architecture, applying mobility to 491  
 enterprise architecture, extending with mobility 487  
 Environmentally Responsible Business Strategy (ERBS) 432–439  
 eP WAP site 129  
 essential value 3  
 ethernet 465  
 European online travel 296  
 exchange value 3

## F

Facebook 320  
 fairness 480  
 fault tolerance 523  
 Federal Communications Commission 46  
 FedEx model 102, 223  
 fixed wireless broadband 140  
 French consumers 260–268

## G

game theory 12–24  
 game theory, and Internet commerce 21  
 game theory, cooperative 13  
 game theory, in business 13  
 game theory, in mobile technologies 17  
 game theory, non co-operative 13  
 game theory, social perspective of 21  
 globalization 207–213  
 globalization, with mobile business 206–213  
 global virtual teams 596  
 Google 54, 189  
 green mobiles 435  
 Grid computing 598

## H

handheld device 186  
 handset-based technology 47  
 handset technology 48  
 healthcare, and blogs 324  
 healthcare, and instant messaging 324  
 healthcare, and mobility 606

healthcare, impacts of mobile virtual communities 316–327  
 HSDPA 142  
 hybrid technologies 47

## I

I-phone 218  
 ICA algorithm 457  
 India, and mobile adolescents 329–333  
 industry food chain 51  
 information service provider (ISP) 16  
 information system (IS) 473  
 information technologies (ITs) 472  
 infrared data communication 466  
 intellectual capital 600  
 intellectual property assets 601  
 interaction 318  
 Internet, and business xvii, 94  
 Internet connectivity 64  
 iPhone 49, 54  
 IP networks, and mobility 422–431

## J

JADE algorithm 457

## K

key-value model 34  
 knowledge management, in mobile business 215

## L

lateral marketing 570  
 Linux 189  
 liquid crystal displays 49  
 List of Values (LOV) scale 248  
 local positioning technologies 47  
 location-based services 298  
 location-based services (LBS) 45–62  
 location technology 47

## M

m-marketing 336  
 m-payment 579  
 m-payments 105  
 m-shopping 288  
 m-transformation 25  
 m-transformation, economic dimension 66  
 m-transformation, methodological dimension 67  
 m-transformation, social dimension 68  
 m-transformation, technical dimension 66

## O

online fraud 389  
 online tourism 294  
 optical network traffic grooming 18  
 out-of-band authentication 392

## P

Palm OS 188  
 patient-patient relationship 323  
 patient-physician relationship 324  
 people prerequisites 27  
 perceived ease of use (PEOU) 474  
 perceived usefulness (PU) 474  
 permission-based mobile marketing 304–315  
 permission marketing 281  
 personal digital assistants (PDAs) 335  
 phishing 390  
 point-and-click pen 201  
 PowerPoint 178  
 privacy 57, 106  
 process-oriented composite services 229  
 process prerequisites 28  
 public Internet connectivity 349  
 Pugh method xviii, 113  
 pull marketing 281  
 push and pull, MDM 273  
 push marketing 281

## R

radio frequency identification (RFID) 444, 466  
 Ramamoorthy's interaction model (RIM) 227  
 real time decision making, and mobile technologies 173–181  
 real time decision making, elements of 174–181  
 receipt system 129  
 RFID 491, 571, 584  
 Rokeach Value Survey (RVS) 247

## S

Schwartz Value Survey (SVS) 248  
 secure electronic transactions (SET) 579  
 secure payment, and mobile business 578–583

sensor network 445–455  
 sensory ERP 444  
 service-oriented architecture 73  
 service mobility 35  
 session mobility 35  
 short messaging services 105  
 single-factor authentication 392  
 single intrusion detection (SID) 548  
 SISO device 358  
 Sri Lanka 139–149  
 Sterling, Bruce 48  
 Strategy Clock 144  
 supply chain management (SCM) 488  
 supply chain visibility 368–374  
 Sydney International Airport xxiii–xxx, 343–353  
 Symbian 188

## T

technology acceptance model (TAM) 473  
 technology prerequisites 28  
 terminal (device) mobility 35  
 theory of reasoned action (TRA) 474  
 third-generation (3G) networks 334  
 time sheets 85  
 Token Ring network 465  
 tourism, and new technologies 300  
 tourism, computer reservation system 294  
 trade exchange value 4  
 traffic grooming 18  
 traffic management system (TMS) 615–621  
 trojans 390  
 Trompenaars databank 248  
 tunneling 425  
 two-factor authentication 392

## U

UDDI 504  
 user (personal) mobility 35  
 utility value 3

## V

value, essential 3  
 value, exchange 3  
 value, trade exchange 4  
 value, utility 3  
 value creation 3  
 VENCORP 75  
 viral marketing 274  
 virtual community 299, 317  
 virtual mobility 407

## ***Index***

virtual reality 597  
virtual teams 100  
virtual travel 299
