Acknowledgment

A number of people have extended their help in the development of the ideas presented in this book. I take this opportunity to convey my regards and thanks to those who have helped and supported me at various stages in completion of this project.

This book would not have been possible without the cooperation and assistance of the authors, reviewers, editorial advisory board, our colleagues and the staff at IGI Global Publishing. The editor would like to thank the people at IGI Global, namely: Kristin M. Klinger for handling the book proposal, Jan Travers for managing the contract, and Dave DeRicco for managing this project especially for answering queries and keeping the project on schedule.

A special word of thanks goes to the members of the Editorial Advisory Board for their continuous support in the editorial processes. A special word of thanks also goes to reviewers for their useful and constructive comments that have been incorporated in the final versions of the chapters. I am greatly obliged to Dr. Vikas Jain, Dr. Marijn Janssen, Dr. Anastasia Papazafeiropoulou, and Dr. Roya Gholami for providing the forewords. Last but not least my sincere gratitude to the chapter authors for their valuable contributions to the book.
