

Acknowledgment

Editing a book is a quite hard but compensating and enriching task, as it involves an set of different activities like contacts with authors and reviewers, discussion and exchange of ideas and experiences, process management, organization and integration of contents, and many other, with the permanent objective of creating a book that meets the public expectations. And this task cannot be accomplished without a great help and support from many sources. As editor I would like to acknowledge the help, support and believe of all who made possible this creation.

First of all, the edition of this book would not have been possible without the ongoing professional support of the team of professionals of IGI Global. I am grateful to Dr. Mehdi Khosrow-Pour, Senior Acquisitions Editor, and to Jan Travers, Managing Director, for the opportunity. A very very special mention of gratitude is due to Julia Mosemann, Assistant Development Editor, for her professional support and friendly words of advisory, encouragement and prompt guidance.

Special thanks go also to all the staff at IGI Global, whose contributions throughout the process of production and making this book available all over the world was invaluable.

We are grateful to all the authors, for their insights and excellent contributions to this book. Also we are grateful to most of the authors who simultaneously served as referees for chapters written by other authors, for their insights, valuable contributions, prompt collaboration and constructive comments. Thank you all, authors and reviewers, you made this book! The communication and exchange of views within this truly global group of recognized individualities from the scientific domain and from industry was an enriching and exciting experience!

I am also grateful to all who accede to contribute to this book, some of them with high quality chapter proposals, but unfortunately, due to several constraints could not have seen their work published.

A special thanks to my institution, the Polytechnic Institute of Cávado and Ave, for providing the material resources and all the necessary logistics.

Thank you.

Maria Manuela Cruz-Cunha
