

Acknowledgment

The authors would like to thank deeply Dr. Takeo Kanade who has encouraged and supported us during the write-up of the manuscript. In particular, the first author greatly appreciates the very insightful discussions and feedback that he gave during his one year's stay at the CMU. The second author would like to express many thanks to all past and current students who carried out the experiments and wrote many valuable manuscripts. Also, the second author is also very much indebted to his family for the strong support they have provided while putting together the material of the manuscript.

The material presented in this book is the result of research performing during last 10 years involving many researchers besides the authors. We would like to acknowledge the financial support from: the Intelligent Robotics Development Program funded by one of the 21st Century Frontier R&D Programs, funded by the Ministry of Science and Technology of Korea; the Lab of Excellency Project funded by the Ministry of Education and Human Resources Development (MOE); the Ministry of Commerce, Industry and Energy (MOCIE) and the Ministry of Labor (MOLAB); the Biometrics Engineering Research Center (BERC) Program at Yonsei University funded by the Korea Science and Engineering Foundation (KOSEF); and the Regional Technology Innovation Program funded by the Ministry of Commerce, Industry and Energy (MOCIE), and many other programs.
