

Acknowledgment

This book would not have been possible without the expertise and commitment of our contributing authors. The editors are grateful to all the authors for their contributions to the quality of this book.

The editors also greatly appreciate the reviewers of all the chapters for their constructive and comprehensive reviews. The list of reviewers is provided separately in the book. We are immensely indebted to them.

We want to thank the publishing team at IGI Global, whose contributions throughout the whole process from inception of the initial idea to final publication have been invaluable, in particular to Rebecca Beistline, Julia Mosemann and Christine Bufton, who continuously provided valuable support via e-mail.

Our special thanks go to Brian D.O. Anderson, whose collaborative studies with us in the last four years have helped provide the foundation and motivation for us to edit this book. He is a person of great character, and he has been a selfless mentor, a brilliant research partner and a precious friend during these stimulating collaborative studies. We have enjoyed collaboration with him enormously.
