2.5D localization 276

A

accuracy limits 100
 accuracy metrics 352
 acoustic ranging 364
 acoustic source localization 369
 active localization 408
 ad-hoc on-demand distance vector (AODV) 435
 ad-hoc positioning system (APS) 355
 AMR sensors 424, 425
 anchor-free virtual coordinate-based solutions 456
 anchor node 452, 453, 454, 455
 anchors 198, 199, 200, 206, 208, 210, 211, 212,
 213, 214, 216, 217, 219, 220, 223, 225, 226
 anchor to node ratio 355
 angle of arrival 260
 angle-of-arrival (AOA) measurements 4
 anisotropic magneto-resistive (AMR) sensors 424
 ANSI 371.1 RTLS 115
 AOA 2, 4, 5, 6, 7, 14, 15, 26, 94, 57, 58, 59, 60, 61,
 63, 64, 71, 72, 89, 90
 AODV 435, 443
 APS 355, 361, 378
 ARD 354
 area-based localization 283
 asset tracking 98
 asynchronous algorithm rID-ASYNC 333
 attitude observations 43
 average relative deviation (ARD) 354

B

BAR metric 354
 battery effects 122

Bayesian Cramér-Rao lower bound 382, 403

Bayesian filtering 413

Bayesian solution 413

bilateration orderings 193, 195

binary composite hypothesis testing 236

binary hypothesis testing 234

binary phase shift keying (BPSK) 101

binary SVM classification 306

Bluetooth (BT) 437

BPSK 101

C

calibration 409, 417, 425

candidate regions 176, 177, 178, 180, 181, 182,
 183, 185, 186, 187, 188

candidate regions sets, generating 177

canonical correlation analysis (CCA) 312

CCA 312, 313

centralized vs. distributed localization 17

CEP 84, 94

channel experiments with power control 132

Chernoff's bound 235

chip spread spectrum (CSS) 117

circular error probability (CEP) 84

circular error probable (CEP) 381

classical MDS 202

client- vs. infrastructure-based systems 264

clock drift 104

clusterhead placement 242

CMS 106, 107

code modulus synchronization (CMS) 106

communication models 367

connectivity measurements 13

convergence and energy efficiency 461

cooperative localization 72

correctly oriented position estimates 188

- cost metrics 355
 Cramér-Rao bound on terminal localization error 385
 Cramér-Rao bounds 270
 Cramér-Rao lower bound 380, 381, 382, 385, 386, 387, 403, 404
 Cramér-Rao lower bound (CRB) 100
 Cramer-Rao lower bound (CRLB) 46
 CRB 100, 101, 102, 105, 106, 108, 117
 cricket system 408, 411, 417, 418, 419, 421, 423
 CRLB 46, 47, 48, 49
 cumulative distribution function (CDF) 138, 344

 - GPS 2, 28, 57, 61, 65, 75, 89, 91, 93, 95, 97, 101, 102, 105, 113, 115, 119, 120
 - GPSR 451, 453, 461, 463, 464
 - GRAIL 282, 283, 295, 296, 297, 300

GRAIL components 296
graph families 156
graph theoretic techniques 146–173
graph theory 14
greedy-face-greedy (GFG) 451
greedy geographic routing protocols 449
greedy perimeter stateless routing (GPSR) 451
GTD 433

H

harsh environment 323
highly connected graphs 156
hybrid metrics 357
hybrid time/power metric 68

I

ICP 354
identifying codes 321, 322, 323, 324, 325, 326, 328, 329, 330, 339, 340, 341, 344, 345, 346
identifying codes in arbitrary graphs 325
indoor environments, signal strength-based localization 257–281
indoor human tracking 422
indoor systems for localization 416
industrial scientific medical (ISM) 434
inertial navigation 422, 423, 429
inertial sensors 422
infinite impulse response (IIR) 412
intelligent transportation systems (ITS) 430
inverse Fourier transform (IFT) 62
ISO/IEC WD 24730-5 117
iterative closest points (ICP) algorithm 354
iterative convergence process 457

K

Kalman filter 414, 415
KCCA 312, 313
KCCA for localization 313
kernel canonical correlation analysis (KCCA) 312
kernel function 308

L

large deviations 235
large-scale deployment of the platform 440
lighthouse approach 12
likelihood ratio 236
linear programming 242, 246, 252
localizability 183
localization accuracy 265

localization algorithm development cycle 374
localization algorithms evaluation 25, 348–379
localization approaches 283
localization based on classification 306
localization based on regression 311
localization, centralized vs. distributed 17
localization decisions 247
localization error 293, 294, 295
localization in wireless networks 259
localization system, overview 58
localization techniques 408
localization techniques, linear programming based 19
localization techniques, stochastic optimization based 20
localization using MDS 203
local map 198, 199, 207, 210
location-aware anchors 452
location awareness 57
location-based communication protocols 449
location estimation engine (LEE) 272
location-unaware anchors 453
Long Range Navigation (LORAN) system 260
LORAN 260
LoS 381, 383, 385, 386, 387, 389, 398, 399, 401, 403
low-communications randomized algorithm rID-SYNC 336
lower bound computations, examples 398
LSVM 308–320, 310–320, 311–320, 314–320, 315–320, 317–320

M

machine learning based localization 302–320
mapping techniques 63
matroids 149, 150
maximum likelihood estimate (MLE) 97
MDS 17, 18, 19, 198, 199, 200, 201, 202, 203, 204, 205, 206, 207, 208, 209, 210, 211, 212, 213, 214, 215, 216, 217, 218, 219, 220, 221, 222, 223, 224, 225, 226
MDS-based localization 198–229
MDS-hybrid 214
MDS-MAP(C) 205
MDS-MAP(C,R) 205
MDS-MAP(P) 209
MDS-MAP(P,R) 209
MDS models, basics 200
mean absolute error 352
measurement error modeling 44
medium access control (MAC) layer 457

MILP 242, 243, 244, 246, 252
minimum mean square error (MMSE) 398
mixed graph 163, 164, 165, 166
mixed integer linear programming problem (MILP)
242
MLE 97, 98
MMSE 398, 399, 401
modified Sweeps 184
modified Sweeps, high level description 176
moving average filter 412
MSE profiling 76
multidimensional scaling algorithms 18
multidimensional scaling (MDS) 18, 200
multipath channel effects 108

N

Nanotron technologies 117
narrowband vs. wideband 119
network convergence 458
network convergence, proving 459
NLLS 371, 373
NLoS 381, 386, 387, 389, 398, 401, 403
NLOS 9, 25, 26
NLS 45
nodes with deterministic locations 383
noise 100
noise, signal bandwidth, non-line-of-sight (NLOS)
9
noisy disk model 362
non-linear least squares minimisation multilateration
algorithm (NLLS) 371
nonlinear least squares (NLS) 45
non-line-of-sight (NLoS) 381
nonparametric belief propagation (NBP) algorithm
22
non-parametric localization algorithms 135
NP-hard 230, 242

O

one-way propagation time measurements 8

P

parameter estimation 139, 141
particle filter 416
particle filters 415
passive infrared (PIR) sensors 424
passive localization 408, 409
path loss model 122, 131, 137, 139, 140, 142
path stretch 456, 460, 461, 462
PCM 215, 219, 221, 222, 357

performance bounds 45
performance cost metric (PCM) 215, 357
PIR sensors 424, 425, 426, 427
point-based localization 287, 288, 289, 293
position observations 43
power consumption model 368
power metrics 68
power observation 38, 41
practical location detection algorithm 328
probabilistic 258, 262, 263, 264, 265, 266, 268, 270
probabilistic techniques 262
probability density function (PDF) 97
proof-of-concept experiment 464
propagation effects 124
propagation model 263, 264, 266, 268, 271, 272,
273, 274
pseudorandom number (PN) 101

R

radio frequency (RF) ranging methods 96–121
radio interferometric positioning system (RIPS) 116
radio irregularity model (RIM) 366
radio propagation 363
random geometric graphs 339
random graphs 158
range-aware 198, 199, 200, 208, 209, 211, 212, 213,
214, 221, 222, 223, 225, 226
range-based localization 136
range binning 105, 106, 107
range-free localization 134
range irregularities 365
RANGEQ-MDS 221
ranging 407, 408, 409, 410, 413, 417, 418, 419, 427
ranging techniques 408
real time difference (RTD) 433
real time location system (RTLS) 115
received signal strength indicator (RSSI) 125, 222
received signal strength (RSS) 34, 112
received signal strength (RSS) measurements 11
redundantly rigid 148, 149, 152, 153, 156, 158,
165, 166
regression, localization based on 311
relative coordinates 452, 453, 454, 455, 456, 460
RF fingerprinting algorithms 135
rigidity matroid 150, 151, 153, 164, 165, 166, 168,
170
RIM 366, 367
RIPS 116, 119
RMSE 46, 48, 49
robust identifying codes 328
robust localization using identifying codes 321–347

root mean square (RMS) 98
roundtrip propagation time measurements 8
RP density 76
RSS 33, 2, 4, 61, 8, 11, 12, 13, 14, 47, 22, 23, 24, 27, 95, 34, 36, 41, 42, 46, 47, 26, 57, 58, 59, 62, 64, 68, 90, 283, 286, 287, 288
RSS-based localization techniques 22
RSSI 122, 198, 123, 125, 129, 130, 131, 132, 133, 134, 135, 136, 138, 140, 141, 142, 143, 199, 222, 223, 226, 227, 228, 303, 434, 437, 438, 439, 441, 442
RSSI circuit device variations 129
RSSI quantization 222
RSS profiling measurements 13
RSS range estimation 112
RTD 433
RTLS 115

S

sample localization system 295
self-organizing wireless sensor networks 446
semidefinite programming (SDP) techniques 19
sensor network localization algorithms 17
sensor network localization theory 14
sensor node location information 38
sequential localization 174–197, 175, 176
set cover problem 326, 328, 329, 332, 345, 346
set multicover problem 329
shadowing 137
shortest-path distance 199, 207, 209, 214, 216, 217, 222, 223
signal-noise ratio (SNR) 365
signal strength, calibration and measurement 122–145
simple localization scenario 398
SNR 365
squares of graphs 159
statistical emulation 375
statistical location detection 230–256
statistical location estimation techniques 21
stochastic characterization 231
super-resolution 60, 63
support vector machines (SVM) 306
SVM 306, 307, 308, 309, 310, 311, 312, 313, 314
Sweeps 176, 177, 178, 180, 181, 184, 185, 190, 192, 193, 194, 195

T

target tracking 316
TDOA 2, 8, 63, 10, 11, 14, 26, 95, 57, 58, 59, 63, 64, 88, 94

time difference of arrival 260
time-difference-of-arrival (TDOA) 8, 10, 113
time of arrival (TOA) 34
time of flight 260
time synchronization 37, 102
timing observations 39
TOA 54, 56, 57, 58, 61, 62, 63, 64, 65, 66, 67, 68, 69, 70, 71, 72, 76, 77, 78, 79, 81, 84, 85, 86, 88, 89, 90, 91, 92, 95
TOA-based ranging 65
TOA based systems 65
topologies 361
tracking vehicles 423
traffic monitoring platform 435
trilateration orderings 192
true physical coordinates 446, 449, 451, 452, 454, 455, 456, 459, 461, 462, 465
two-ray-ground reflection model 364
two way ranging 116
two way time transfer (TWTT) 103
TWTT 103, 111, 116, 117, 119

U

UDP identification 67
UKF 64, 65, 95
ULA 60, 95
ultra wide band ranging 364
ultra-wide band (UWB) signals 9
uncertainty region, properties 268
uniform linear arrays (ULA) 60
uniquely localizable 146, 147, 159, 161, 162, 163, 169
uniquely localizable nodes 159
unit disk graphs 158
unscented Kalman filtering (UKF) 64
UWB 9, 30

V

variance of sending power (VSP) 366
vehicle positioning, wireless mesh network platform 430–445
vehicle tracking 432, 433, 440
vertex transitive graphs 157
virtual coordinates 446, 449, 456, 457, 458, 459, 460, 461, 462, 464, 465
void area 450, 451
VSP 366, 367

W

WAAS 57, 95
waveform observation 37, 39

waveform observations 39
WCN 33, 49
weighted nonlinear least squares (WNLS) 45
Weinstein-Weiss lower bound 382, 390, 392, 398, 399, 401, 402, 403
wide area augmentation system (WAAS) 57
wireless cellular networks (WCN) 33, 49
wireless mesh network platform for vehicle positioning 430–445
wireless mesh networks (WMN) 434
wireless sensor network architectures and classifications 36

wireless sensor networks (WSNs) 1, 231
wireless vehicle tracking 432
WMN 431, 432, 434, 435, 436, 437, 439, 440, 441, 442
WNLS 45
WSN 33, 2, 3, 4, 14, 15, 18, 24, 25, 26, 27, 34, 35, 49, 50, 231, 232, 233, 247, 249, 252
WSN localization algorithms, challenges 75
WSN localization, studies and applications 26

Z

zero-profiling techniques 273
