Index

Symbols

.NET 112

A

access control 4,220
access control metamodel 224, 226
accountability 134, 195
Acme 57, 61
ACTIVE 197
actor 75
agent 81
agile security method 146
agile software development method 143
ambient intelligence (AmI) 244, 247
analysis stage 111
architecture trade-off analysis method 194
argumentation 18
artifact 19
aspect-oriented modelling 192
aspect model 194, 200
attacker 85
attack tree 6, 49, 59
authentication 4, 114
authenticity 195
automation 35
availability 134, 195

B

Bayesian belief nets 191
behavior 21
belief 76
budget constraint 192

C

Carnegie Mellon 43
commercial off-the-shelf 45
components off-the-shelf (COTS) 245
confidentiality 4, 36, 134, 195, 256
contribution link 79
Coplien form 130
core artifact 19
cost benefit analysis method 194
countermeasure analysis 88
customer 72, 145

D

decomposition link 79
dependency 77
dependency vulnerability analysis 86
deployment stage 112
design stage 95, 112, 118
digital stored value card 91

discretionary access control (DAC) 6
domain requirement 82
dynamism 248, 265

E

e-commerce 192, 197, 209

F

feature driven development 143, 149
firewall 120
Foundation for Intelligent Physical Agents (FIPA) 7

G

gang-of-four (GoF) 130
goal dependency 77

H

heterogeneity 249

I

i* agent 71
i* modelling framework 162
identification and authentication (I&A) 114
implementation stage 112
information system 144
information systems modelling 96
information systems Security 245
inner argument 34
integrated security verification 190
integration scheme 244, 255
integrity 4, 36, 135, 195, 261
Internet 26, 149

J

Java 112
joint application design 52

M

maintainability 134
maintenance stage 112
mandatory access control (MAC) 6
misuse frequency 192
misuse impact 192, 202
model-driven development 193
modelling language 3, 161, 221, 239
model for automated profile specification 96
model view controller 118

N

network connectivity 109
non-functional requirement 132
non-repudiation 195

O

object constraint language 112, 233
object management group 193

P

patient treatment record pattern 117
patterns 107, 129
patterns of software architecture (POSA) 131
pattern representation 132
permission modelling 166
personnel information 27
position 81
prepaid phone card system 92
privacy 272

Q

qualitative goal-reasoning mechanism 89

R

reliability 195
requirements analysis 150
requirements change 145
requirements engineering 44
requirements stage 111, 113
resource 76
resource dependency 77
return on security investment 192
risk analysis 148
risk assessment 52
role 81
role-based access control 117, 223
role base access control (RBCA) 6

run-time monitoring 244, 253, 258, 266

S

S&D pattern 254
satisfaction argument 18
SecureUML 122
secure access point 134
secure entities 164
secure software 109
secure software engineering 2
secure system 46, 96, 107
secure Tropos 160
security 129, 143, 160, 245, 272
security and dependability (S&D) 247
security constraint 164
security constraint modelling 166
security engineering 1, 6, 70, 127, 244, 270
security goals 24, 53
security knowledge 274
security manager 252
security model 92
security pattern 107, 127, 131
security policy 4
security requirement 15, 18, 146
security risk 144, 193, 202, 208
security solution cost 192
security solution effect 192
security verification 196
semantic analysis pattern 115
SERENITY 244, 247
single access point 135
smart-card system 82
softgoal 76, 80, 84, 163
softgoal dependency 77
software cost reduction 48
software developer 143
software development 144
software engineering 1, 70, 270
software lifecycle 76, 107, 111
software process 110
software requirements specification 48
software system 1
solution design trade-off analysis 190
SQUARE method 43, 54
stakeholder 9, 44
standardization 256
stereotype 196
strategic dependency model 77
strategic rationale model 79, 83
supervision 249
support artifact 19
system configuration 90
system design specification 48
system requirements specification 48

T

task 76
task dependency 77
Tropos 160
trust 22, 90, 160, 272

U

UMLsec 196
unified modelling language (UML) 3, 9, 95, 109, 169, 200, 220

V

view-based access control 223
virus 27, 46
visual specification language 234

W

Web application server 108
Web server 198
Web services protocol 74
worm 27, 113
