

# Index

## A

- adaptive activation function 8, 316, 320
- adaptive critic designs 86
- adaptive resonance theory (ART) 87, 89, 90, 91
- agent-based computational economics (ACE) 81, 82, 87
- approximate dynamic programming (ADP) 79, 80, 83, 85, 87, 88, 91
- artificial higher order neural units (AHONUs) 368
- artificial neural network (ANN) 1, 2, 8, 94, 95, 103, 104, 105, 106, 107, 108, 128, 135, 166, 181, 191, 192, 270, 298, 299, 302, 310, 314, 315, 316, 317, 318, 320, 321, 322, 323, 332, 333, 486, 495
- artificial second order neural networks (ASONNs) 372, 377
- artificial second order neural units (ASONUs) 372, 373, 374, 381, 382, 384
- autoregressive 51, 53, 54, 55, 56, 57, 95, 114, 156, 165, 184, 188, 251, 270, 298

## B

- backpropagation 40, 53, 54, 55, 65, 74, 93, 156, 168, 171, 172, 173, 174, 187, 200, 276, 282, 290, 299, 304, 310, 313, 317, 326, 355, 374, 377, 383, 502

## Bellman equation 85

bottom-up part 60, 61, 62, 63, 72

## C

chaotic behavior 269, 295, 300, 301

computational intelligence 79, 80, 81, 82, 88, 92

correlator model 213, 214

covariance matrix 218, 219, 220, 227, 234, 246, 304, 451

## D

dendrites 167, 369

discrete time delay 470, 479

discriminability based transfer (DBT) 490

distributed time delay 470, 476, 479

dynamic decision model 123, 124, 125

## E

efficient market hypothesis 115, 165

epochs 52, 64, 142, 144, 148, 151, 203, 282, 283, 285, 286, 288, 321, 323

equilibrium models 80, 81

equilibrium real exchange rates (ERER) 133,

136, 145, 146, 147, 153, 154

evolutionary computation (EC) 92, 99, 109, 110, 111, 114, 129, 130, 131

exchange rate forecasting 95, 108, 111, 250, 251, 259, 261, 268, 269, 270, 272, 289

expert systems 73, 74, 490

extended Kalman filter 299

## F

- feature mapping 432
- feature space 385, 432, 433, 434, 436, 437, 439, 492
- feedforward network 7, 193, 199, 272, 274, 379
- flexible neural tree (FNT) 96, 97, 128, 251, 269
- function approximation 1, 37, 119, 158, 170, 187, 197, 209, 210, 249, 276, 279, 289, 291, 311, 326, 372, 377, 381, 382, 383, 385, 430, 434, 440, 465, 467, 489

## G

- gene expression programming (GEP) 94, 98, 101, 102, 103, 104, 106, 107, 108, 114
- genetic algorithm 83, 88, 95, 96, 101, 131, 267, 270
- global exponential stability 389, 391, 393, 427, 466, 468, 470, 478, 480
- grammar guided genetic programming (GGGP) 94, 96, 98, 99, 100, 103, 104, 105, 106, 108
- group method of data handling (GMDH) 267, 268, 269, 277, 278

## H

- higher order neural network (HONN) 1, 11, 12, 14, 15, 16, 153, 120, 132, 133, 139, 96, 217, 218, 113, 133, 212, 250, 254, 221, 271, 272, 294, 295, 302, 315, 318, 333, 348, 355, 360, 367, 368, 430, 443, 460, 466
- higher order terms 49, 56, 58, 118, 119, 174, 199, 208, 272, 273, 274, 275, 276, 278, 282, 284, 288, 302, 361, 425

## I

- information credit 61, 63, 65, 66, 67, 71
- inner product 213–230, 277, 371, 380, 432, 451–458, 493
- intersymbol interference (ISI) 443

## K

- Kalman filter 90, 295, 303, 305, 307, 313
- kernel function 432, 436, 437, 439, 492

## L

- least-squares 247, 440, 494
- linear matrix inequalities (LMIs) 389, 468, 471, 476, 477, 478
- linear programming 430, 434, 437, 438, 440
- linear regression 115, 212, 220, 233, 289, 301, 352, 488
- London Inter Bank Offered Rate (LIBOR rate) 234
- Lyapunov functional 394, 396, 408

## M

- Markov decision process (MDP) 84, 85, 86
- Markovian switching 466, 468, 469, 470, 471, 477, 478, 479, 480
- Matlab toolbox 476
- mean squared error 276
- model-free inference 485
- multi-layer perceptrons (MLPs) 48, 49, 56, 74, 190, 254, 272, 273, 282, 283, 285, 286, 287, 288, 355, 356, 485, 486
- multiple polynomial functions HONN (MPHONN) 4
- multiplexing 447, 455, 456, 457, 462, 463

## N

- neta-neural networks 491
- neuron activation function 43, 160, 316
- nonlinear model 3, 4, 15, 16, 18, 27, 33, 61, 133, 302, 330, 332, 336, 338, 340
- normalization method 281
- number of free parameters 274, 277, 284, 288, 302

## O

- outer product 214–220, 227, 229, 230, 246, 247, 443, 451, 452, 453, 455, 460
- over-fitting 199, 277

**P**

- particle swarm optimization (PSO) 89, 96, 98, 99, 100, 103, 109, 121, 122, 124, 127, 251, 349, 352, 353, 364  
 periodic solutions 89, 389, 391, 425  
 Pi-sigma neural network 190, 191, 197, 198, 203, 208  
 plateau data 18, 19  
 polynomial and trigonometric higher order neural network (PTHONN) 3, 4  
 polynomial higher order neural network (PHONN) 2, 4, 5, 11, 12, 20, 23, 27, 28, 29, 30, 31, 32, 34, 37, 38, 112, 133, 135, 143, 144, 153, 159, 332, 333, 334, 336, 338, 340  
 polynomial kernel 430, 431, 432, 433, 434, 436, 437, 439, 440  
 polynomial neural network (PNN) 37, 159, 174, 209, 249, 250, 254, 256, 269, 303, 380, 495, 496, 497  
 predictor variables 60, 61, 62, 63, 64, 66, 67, 68, 69, 70, 71, 72  
 printed circuit board 443, 444, 445, 446, 448

**Q**

- Q-learning 86  
 quadratic programming 430, 434, 435, 436, 437  
 questions and answers (Q&A) method 485

**R**

- radial basis function (RBF) 207, 254, 384, 431, 432  
 recurrent link 198, 199, 288  
 reinforcement learning 86, 91  
 ridge polynomial neural network (RPNN) 277, 278, 282, 283, 284, 285, 288, 380, 381

**S**

- SAS Nonlinear (NLIN) 1, 4, 5, 6, 8, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 32, 33, 34, 35, 135, 139  
 share index 221, 231

- sigmoid activation function 52, 254, 276, 282, 316  
 sigmoid polynomial higher order neural networks (SPHONN) 5, 16, 18, 27, 28, 29, 30, 31, 32  
 SINC and sine polynomial higher order neural networks (SXSPHONN) 15, 27, 28, 29, 30, 31, 32, 34  
 SINC higher order neural networks (SINCHONN) 3, 16, 27, 28, 29, 30, 31, 32, 34, 35, 157  
 single layer recurrent 180, 183, 185, 192, 196, 205, 208  
 soma 369  
 soybean crush spread 349  
 statistical analysis system (SAS) 1, 4, 5, 6, 8, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 32, 33, 34, 35, 135, 139, 330, 334, 338  
 stochastic neural networks 467, 481  
 stock return prediction 60, 61, 62, 63, 64, 66, 67, 69, 70, 72  
 swap rate 235, 238

**T**

- Tabu search 121, 124, 125, 128  
 tapped delay line neural networks (TDLNNs) 382, 383  
 time series prediction 3, 4, 35, 49, 51, 82, 130, 131, 157, 165, 166, 187, 188, 191, 192, 208, 209, 210, 212, 247, 250, 251, 253, 254, 256, 268, 269, 272, 275, 279, 282, 288, 290, 292, 300, 301, 467  
 time series prediction problem (TSPP) 254  
 top-down part 60, 61, 62, 63, 64, 68, 69, 70, 72  
 trading filters 361  
 trainable weights 174, 199, 272, 273, 274  
 training cycles 283  
 tree-structure 96, 98, 109, 251  
 trigonometric higher order neural network (THONN) 2, 3, 4, 5, 12, 22, 23, 27, 28, 29, 30, 31, 32, 34, 37, 133, 135, 143, 144, 153, 154, 156, 495, 496, 497, 498, 499, 500

**U**

- ultra high frequency cosine and cosine trigonometric higher order neural network (UCHONN) 13, 136, 138, 139, 141, 152
- ultra high frequency cosine and sine trigonometric higher order neural network (UCSHONN) 5, 12, 13, 14, 15, 18, 20, 21, 22, 23, 24, 25, 27, 28, 29, 30, 31, 32, 34, 136, 137, 138, 139, 141, 142, 143, 144, 145, 146, 147, 148, 152, 153
- ultra high frequency sine and sine trigonometric higher order neural network (USSHONN) 13, 136, 138, 141, 142, 152
- ultra high frequency trigonometric Higher order neural networks (UTHONN) 133, 135, 136, 139, 142, 143, 144, 147, 153, 154

**W**

- waveguides 442, 443, 445, 446, 447, 448, 459, 460, 461, 462

**X**

- XOR 2, 168, 171, 172, 174, 273, 374, 375, 378, 494

**Y**

- yield curve 234, 235, 237, 238, 243

**Z**

- Z-learning 86
