

## Acknowledgment

We acknowledge our authors, who dedicated their best efforts to produce this splendid book, which covered a large set of relevant topics in Air Transportation, some of them in more depth, some of them in less depth, depending on the approach adopted, but all being appropriate and brilliantly presented. They have met rigorous requirements from the reviewers, who also deserve an undeniable part of the merit of this book, by putting all their technical skills in helping authors and editors to improve the contents. Their participation was supported and strengthened by our Editorial Advisory Board, composed by Carlos Müller, Dave Young, Elton Fernandes, Félix Mora-Camino, João Batista Camargo Jr. and Maria Cristina Barbot Campos e Matos, to whom we feel very much obliged. Finally, we gratefully thank IGI Global for all the support, specially the Editorial Assistants Joel Gamon and Rebecca Beistline, by their patience and solicitude to make the book move forward.
