

## Acknowledgments

We would like to express our gratitude to the contributors without whose submissions this book would not have been born. We owe a great deal to the reviewers who reviewed entire chapters and gave the authors and editors much needed guidance. Also, we would like to thank those dedicated reviewers, who did not contribute through authoring chapters to the current book or to our second book *Heuristics and Optimization for Knowledge Discovery*—Paul Darwen, Ross Hayward, and Joarder Kamruzzaman.

A further special note of thanks must go also to all the staff at Idea Group Publishing, whose contributions throughout the whole process from the conception of the idea to final publication have been invaluable. In closing, we wish to thank all the authors for their insights and excellent contributions to this book. In addition, this book would not have been possible without the ongoing professional support from Senior Editor Dr. Mehdi Khosrowpour, Managing Editor Ms. Jan Travers and Development Editor Ms. Michele Rossi at Idea Group Publishing. Finally, we want to thank our families for their love, support, and patience throughout this project.

Hussein A. Abbass, Ruhul Sarker, and Charles Newton
